Eugene Khashper has worked predominantly with FDOT Districts, and has extensive experience in permitting through governmental agencies. Eugene started his career as a project engineer, reviewing site plans, coordinating with utility providers, and overseeing utility installations and service connections. He later served as an in-house consultant for FDOT's D6 Construction Office, providing construction plans review at all project phases, utility coordination during design and construction of roadway projects, conflict resolution, and review of all utility certifications. Most recently, Eugene worked for FDOT D4's Utilities office where he was responsible for managing the utility office, which administered District Value Engineering and Cost Savings Initiatives. He also has experience in construction methods and design principles, as well as having vast knowledge of FDOT standards, procedures, and manuals (UAM, UPM, CPAM, etc.), is familiar with Florida Statutes governing utility agencies, and FDOT's process for determining utility agency compensable rights, and continues to foster great relationships with various designers and utility agency representatives.

RELEVANT PROJECT EXPERIENCE

36 Acre Park-Platting, Parkland, FL: Project Manager. KEITH, under its continuing services agreement with the City of Parkland, is assisting the Client in producing a plat for Beasley Park approximately 35.4 acres. KEITH is providing services to the Client including survey, utilities, and planning.

SR A1A Improvements, Pompano Beach, FL: UC. Under our continuing services contract for GO Bond Improvements, KEITH assisted the Client in the development of a KEITH Access project including streetscape improvements such as landscaped medians, widened sidewalks, and street lighting. KEITH provided full services to the Client including survey/SUE, civil and transportation engineering, landscape architecture, and construction program management. During project coordination it was determined that FDOT had a project overlapping the City's project. KEITH coordinated with FDOT to have the funds transferred to the City.

Cypress Road Improvements, Plantation, FL: Task Manager. KEITH, under a continuing services contract with the City, assisted the Client with the development of a KEITH Access project involving signalization upgrades, milling and resurfacing, design of a roundabout, drainage improvements, additional sidewalk, and corridor-wide addition of sharrow pavement markings and respective signage. KEITH provided services to the Client including survey, SUE, civil engineering, landscape architecture, and transportation engineering. KEITH managed a team of professional contractors providing lighting analysis and design and geotechnical services.

Fire Station No. 52, Pompano Beach, FL: Task Manager. KEITH, under its continuing services agreement with the City, assisted the Client in developing a KEITH Campus project including a new stand-alone one-story annex building consisting of approximately 4,200-GSF. KEITH provided services to the Client including owner's representation and construction management.

Drainage Improvements At US-1 and NE 14th St, Pompano Beach, FL: UC. KEITH, under its continuing contract with the City, is providing civil engineering, surveying, and subsurface utility engineering for this improvement project. This comprehensive drainage improvement project aims to significantly enhance the stormwater management system. The project involves the installation of new storm drainage infrastructure and the cutting of swales to optimize drainage functionality and mitigate flooding risks. This project area primarily consists of residential properties. Key components of the project include installation and reconstruction, storm drain piping, and enhance drainage functionality.

Michael Vonder Meulen has 39 years of local, national, and international experience in urban planning, zoning, and project management systems. Since 1986, Mr. Vonder Meulen's experience has included many phases of public sector and private sector land planning, site planning, and permitting services. He has directed project services from planning, design, and construction management throughout the United States, Caribbean, and South America.

RELEVANT PROJECT EXPERIENCE

Monthly Planning Services Pembroke Park, Pembroke Park, FL: Planner. KEITH has proudly served the Town of Pembroke Park under a continuing services contract, delivering comprehensive planning, engineering, and landscape architecture solutions. Our partnership reflects a shared commitment to enhancing infrastructure, promoting sustainable growth, and improving the quality of life for residents. Some notable projects under this contract include: **Various Zoning Text Amendments:** New Mixed-Use/Entertainment District; Quasi-Judicial Proceedings; Signage; Live Local Act; **Site Plan Review of Major Developments:** Seneca Town Center (Wawa, Hospital & Extra Storage); Magnolia Townhomes; Prologis; Pembroke Oakes; Public Storage; Pembroke Villas; 95 Warehouse; Ekos Pembroke; **Comprehensive Plan Amendments:** SW 30th Avenue Mixed-Use/Entertainment District; Property Right Element; Trinity Broadcasting.

Fire Station No. 7 and Emergency Management Facility, Hallandale Beach, FL: Planner. KEITH assisted the Client, as subconsultant, in developing a KEITH Facility project that includes a 25,000-SF two-story fire rescue headquarters and emergency management facility including four apparatus bays and living quarters for up to 16 firefighters. In addition, the building houses space for the City's Fire Prevention Bureau offices, fire inspectors, plan review, and public education. KEITH provided full services to the Client including civil engineering, SUE, landscape architecture, public outreach, and construction management. The world-class facility is LEED Gold Certified.

Fire Station No. 113, Coconut Creek, FL: Planner. Under our continuing services contract for the City of Coconut Creek, KEITH was retained to provide due diligence and professional services for three potential and temporary fire station sites. KEITH's services included traffic engineering, planning, and civil engineering, providing due diligence findings reports, exhibit plans, and concept opinion of probable construction costs.

North Pompano Park Improvements, Pompano Beach, FL: Planner. KEITH assisted the Client in developing a KEITH Play project that includes several multi-purpose sports fields, concession stands, restrooms, sports and site lighting, walking paths, parking, dog park, and artificial turf and natural sod enhancements at the 20-acre site. KEITH, utilizing a multi-disciplinary team, provided full services to the Client including civil engineering, survey/SUE, landscape architecture, planning, arborist services, tree disposition, and construction management.

Fire Station No. 52, Pompano Beach, FL: Planner. KEITH, under our continuing services agreement with the City for GO Bond Improvement Projects, assisted the Client, as subconsultant, in developing a KEITH Facility project that includes the design/build of Fire Station No. 52 a two-story multi-bay facility. KEITH provided full services to the Client including civil engineering, planning, survey/SUE, landscape architecture, and construction program management.

PROFILE

Mr. Michael Amodio is a planning professional who has coordinated with various Municipal and County departments in obtaining development approvals for many types of projects, including residential, commercial, industrial and institutional uses. His specialty is site planning and municipal code research. He possesses the team coordination skills necessary to meet strict deadlines for various size projects. He also has experience in the Public Sector as a planning assistant for the City of Boynton Beach, where he performed research tasks of various land development regulations within South Florida's many municipalities. Mr. Amodio has extensive experience with many computer aided drafting programs to produce 2D and 3D products, as well as GIS applications. Specifically, his 3D design capabilities allow KEITH to help clients visually conceptualize how their project will take shape along every step of the planning process. He is affiliated with planning groups such as the American Planning Association, Florida Atlantic Planning Society and the U.S. Green Building Council.

RELEVANT PROJECT EXPERIENCE

Monthly Planning Services Pembroke Park, Pembroke Park, FL: Planner. KEITH has proudly served the Town of Pembroke Park under a continuing services contract, delivering comprehensive planning, engineering, and landscape architecture solutions. Our partnership reflects a shared commitment to enhancing infrastructure, promoting sustainable growth, and improving the quality of life for residents. Some notable projects include various zoning text amendments, site plan review of major developments, and comprehensive plan amendments.

Parkland City Hall-Bldg Dept Wing Exp, Parkland, FL: Planner KEITH managed a 3,000 SF expansion of the City Hall building, which included 1,500 SF of records retention space and 1,500 SF of Building Department offices. The project involved modifying driveway access and installing a roll-up door for vehicular access to the records retention area, which also included space for scanning desks. Additional office space was provided for the Chief Building Official and partitioned areas for plan reviewers and inspectors. KEITH designed a new partition behind the staff receiving counter for privacy and addressed the loss of nine parking spaces by restoring the parking lot. The expansion required relocating a water main and installing 160 LF of gravity sewer and 230 LF of water main. KEITH developed the site plan in coordination with the architect and performed a topographic survey to locate all above-ground improvements and native tree species.

Youth Sports Complex, Pompano Beach, FL: Planner KEITH assisted the Client in the development of this KEITH Play project that includes several multi-purpose pitches, clubhouse with concessions, restrooms, storage, offices, landscaped walking paths, preservation of several mature canopy trees to provide a park experience that affords ample shade, and a 180-space parking lot in the 10-acre complex. KEITH, as prime consultant, provided full services to the Client throughout all design phases including public outreach, planning, design development and site plan approval, and ultimately permitting and construction observation.

Broward County Convention Center Master Plan, Fort Lauderdale, FL: KEITH supported the Broward County Convention Center Expansion and Omn Planner i Fort Lauderdale Hotel project by providing local expertise in surveying, planning, conceptual civil engineering, and landscape architecture. Planning services included site history review, entitlement and DRI analysis, land use and zoning studies, parking analysis, visioning support, development scheduling, and regulatory coordination. The expansion delivered over 1.2 million SF of space, including a 350,000 SF exhibition hall, a 65,000 SF waterfront ballroom, 83,000 SF of retail and entertainment, 100,000 SF of parking, and a signature waterfront plaza with enhanced water taxi access.

PROFILE

An experienced landscape architect and dedicated project manager, Kelli Schueler provides planning, design and project management services for a wide variety of project types through all phases of the development process. Her knowledge of the local environment, innovative technologies and sustainable best practices is combined with a creative approach that is detail oriented, ensuring designs are implemented both efficiently and accurately. Kelli has a wide range of project experience, but is most motivated by the opportunity to create special moments within the urban environment where hardscape and architectural elements are thoughtfully combined with green space to create impactful places of respite and community within the urban core.

RELEVANT PROJECT EXPERIENCE

Annie Gillis Park, Pompano Beach, FL: Landscape Architect. KEITH, under its continuing services contract with the city, assisted the Client in developing a KEITH Play project that included the development of a small park serving the local community integrating historically important elements and providing flexibility to create larger gathering spaces. KEITH provided full services to the Client including civil engineering, survey, planning, and landscape architecture.

Covered Bridge Park, Parkland, FL: Landscape Architect. KEITH assisted the Client, under its continuing services contract, in developing a KEITH Play project that includes meandering natural trails with a connection to the iconic Covered Bridge, flexible open space, nature playground, meditation garden, and yoga lawn on a 3-acre site. KEITH provided full services to the Client including survey/SUE, civil engineering, landscape architecture, planning, traffic engineering, and construction observation and management.

Fire Station No. 52, Pompano Beach, FL: Landscape Architect. KEITH, under our continuing services agreement with the City for GO Bond ImproLandscape Architect. vement Projects, assisted the Client, as subconsultant, in developing a KEITH Facility project that includes the design/build of Fire Station No. 52 a two-story multi-bay facility. KEITH provided full services to the Client including civil engineering, planning, survey/SUE, landscape architecture, and construction program management.

Pine Trail Park, Parkland, FL: Landscape Architect. KEITH, under our continuing services agreement with the City, assisted the Client in developing a KEITH Play project that included the revitalization of Pine Trails Park Playground and Field. KEITH provided full services to the Client including geospatial and civil engineering, landscape architecture, and construction management.

Police Headquarters, Fort Lauderdale, FL: Landscape Architect. KEITH, as subconsultant, assisted the Client in the development of a KEITH Facility project including the demolition and the design and construction of a new Police Headquarters. KEITH provided full services to the Client including civil and traffic engineering, survey/SUE, utility coordination, planning, landscape architecture, and construction program management. The project leaves the City of Fort Lauderdale with a state-of-the-art public safety headquarters to better serve the community.

Arts and Cultural Center, Hollywood, FL: Landscape Architect. KEITH assisted the Client with the redevelopment of a KEITH Campus project that includes a 5,400-SF education space for dance, music, visual arts, and new media, galleries, administrative offices, and an outdoor courtyard. KEITH provided full services to the Client including survey and mapping, civil engineering landscape and irrigation design, and construction observation.

KEITH provided full services to the Client including survey/SUE, civil engineering, landscape architecture, planning, traffic engineering, and construction observation and management.

DC Alexander Park, Fort Lauderdale, FL: Landscape Architect. KEITH assisted the Client in developing a KEITH Play project that includes the visioning and redevelopment of an oceanfront park nestled in a unique 1+ acre spot on Fort Lauderdale's beachfront. KEITH provided services to the Client including survey/SUE, planning, civil and traffic engineering, landscape architecture, and construction observation. This award-winning project through its context – historic and present, its users, and the needs of the community – balances 'design for people' and 'design with nature' and is a testament to the value of comprehensive research, exploration, and analysis phases.

Police Headquarters, Fort Lauderdale, FL: Landscape Architect. KEITH, as subconsultant, assisted the Client in the development of a KEITH Facility project including the demolition of existing buildings and the design and construction of a new Police Headquarters. KEITH provided full services to the Client including civil and traffic engineering, survey/SUE, utility coordination, planning, landscape architecture, and construction program management.

Intracoastal Courtsport Complex, Sunny Isles Beach, FL: Landscape Architect. Part of KEITH's continuing services agreement with the City of Sunny Isles Beach, this project includes the development of a KEITH Play project consisting of a new downtown park. KEITH provided services to the Client including survey, civil engineering, planning, and landscape architecture. Through a subconsultant, geotechnical and site lighting were coordinated. KEITH coordinated a multi-disciplinary team to manage the project development from the initial design phase through construction documentation.

PROFILE

Jon Weymouth has more than three decades of experience in the planning, design, permitting, and construction of heavy transportation, utility, and civil and environmental engineering projects. His work involves the supervision of engineering and technical personnel engaged in the design and construction of public and private sector improvements. Past projects include major transportation infrastructure projects such as airports, bridges, highways, and roadways. This is in addition to civil land development, recreational facilities, and environmental mitigation projects. Additionally, he has extensive knowledge and effective experience coordinating with FEC, as well as with permitting and federal agencies such as FDOT and FAA. He is very familiar with and fully qualified to implement and control the guidelines and requirements established by these agencies.

RELEVANT PROJECT EXPERIENCE

Annex Building Addition, Plantation, FL: Construction Administration. KEITH, under its continuing services agreement with the City, assisted the Client in developing a KEITH Campus project including a new stand-alone one-story annex building consisting of approximately 4,200-GSF. KEITH provided services to the Client including owner's representation and construction management. The finished facility provides a valuable asset for the safety and stability of the community.

Pier Parking Garage, Pompano Beach, FL: Construction Administration. The Pompano Beach Pier Parking Garage is located on a 3.5-acre site. The parking garage includes five stories, 662 parking spaces, speed ramp to facilitate access to higher levels of the garage and some retail space. As part of the design-build team, KEITH was responsible for planning, survey, utility coordination/investigation, civil engineering, landscape design, permitting, and construction inspection of the project.

Everglades Holiday Park Site Improvement, Fort Lauderdale, FL: Construction Administration. KEITH assisted the Client in redeveloping a KEITH Play project involving a $12M expansion and improvements of this 43-acre county park. The project included LEED "Green" design principles. KEITH provided the Client civil engineering, planning, landscape architecture, SUE, and construction management services. In 2022, the park was named the Trip Advisors Traveler's Choice award, the Florida ACEC Engineering Excellence award and the ASCE Broward Project of the Year.

MLK Blvd Improvements, Pompano Beach, FL: Construction Administration. This area was part of the CRA's "Downtown Pompano Connectivity Plan". Improvements included multi-modal friendly streetscape with landscape/hardscape beautification. KEITH, under a continuing services agreement, assembled a multi-disciplinary team to complete all design aspects. As the Lead/Prime consultant, KEITH was responsible for overall team management, engineering, permitting, planning, surveying, public consensus, and construction management.

Fire Station No. 52, Pompano Beach, FL: Construction Administration. KEITH, under our continuing services agreement with the City for GO Bond Improvement Projects, assisted the Client, as subconsultant, in developing a KEITH Facility project that includes the design/build of Fire Station No. 52 a two-story multi-bay facility. PROFILE

Steve High joined the firm in 2008 and has 53 years of experience in land development, project management, roadway and utility construction inspection. He has managed daily construction activities relating to earthwork operations, asphalt paving, utility relocations, concrete placement and drainage pipe installation. His experience includes preparing daily inspection reports on all activities, job progression, personnel and equipment, as well as interfacing with contractors on behalf of clients and accountability for job site coordination. His current capacity of Senior Construction Inspector requires monitoring and inspection of all phases of construction work, as well as coordination with clients, contractors, public agencies, utilities and affected property owners. His experience includes project management and field engineering inspection experience for both public and private projects.

RELEVANT PROJECT EXPERIENCE

Dania Beach Public Safety Facility No. 93: Inspector. The project site is located within a predominately residential area. The project involved platting, extensive community outreach, and major infrastructure improvements. KEITH provided engineering and construction engineering inspection (CEI) services including water, sewer, paving, grading & drainage design, permitting. KEITH was instrumental in working with the County and City officials to obtain all the necessary approvals. KEITH also worked closely with the contractor to assist in obtaining building permits through the City of Dania Beach and Broward County and was asked to act as liaison.

Bermuda Riviera Watermains, Fort Lauderdale, FL: Inspector. KEITH, under its continuing services contract with the City, assisted the Client in developing a KEITH Water project that included improvements and replacement of undersized and deteriorated water mains in the residential neighborhood of Bermuda Riviera, upgrading the existing 6" diameter water mains one nominal size to 8" diameter, replacing existing 8" water mains with new, and installing fire hydrants along the nine dead-end finger streets, and installation of two subaqueous crossings. The KEITH Team assisted the Client in civil design from beginning to completion, survey, SUE, and permitting with jurisdictional agencies including City of Fort Lauderdale, Florida Department of Environmental Protection, Broward County Environmental Engineering and Permitting Division, Broward County Traffic Engineering Division, Army Corps of Engineers, U.S. Coast Guard, and FDOT.

CEI Services for SR 7 Median Enhancement, Coconut Creek, FL: Inspector. Under our continuing services contract for the City and under an FDOT LAP awarded grant, the KEITH Team was provided CEI service for a median restoration approximately one mile in length. KEITH is a prequalified CEI provider by FDOT.

Colonial Drive Traffic Calming, Margate, FL: Inspector. KEITH, under its continuing services contract with the CRA, provided Phase 1 of traffic calming, pedestrian routing and streetscape improvements containing approximately 500-LF of local roadway.

Main Beach Parking Lot Seating Project, Deerfield Beach, FL: Inspector. As a task work order under KEITH's long-term continuing services contract, KEITH provided professional engineering services including the modification of an existing retaining wall along the east side of the main beach parking lot, constructing a 3-seat high concrete seating step area. The project included modifications to the curb on S. Ocean Way to facilitate stage delivery inclusive of anti-sleeping and anti-skateboarding design. KEITH's services included specific purpose survey, paving and grading, demolition and erosion control, pavement markings and signage, construction observation and construction certification for the .25-acre space. The project was permitted through the Florida Department of Environmental Protection.

PROFILE

Morris Smith joined the firm in 2003 and has 24 years of experience in roadway and utility construction inspection. He has overseen daily construction activities relating to earthwork construction, asphalt paving, land surveying, utility relocations, concrete pours, and fuel line and drainage pipe installation. Morris' experience includes preparing daily inspection reports on all activities, job progression, personnel and equipment as well as interfacing with contractors on behalf of clients and accountability for job site coordination. His current capacity of Senior Construction Inspector requires monitoring and inspection of all phases of construction work, as well as coordination with public agencies, clients, contractors, utilities and affected property owners.

RELEVANT PROJECT EXPERIENCE

Youth Sports Complex, Pompano Beach, FL: Inspector. KEITH assisted the Client in the development of this KEITH Play project that includes several multi-purpose pitches, clubhouse with concessions, restrooms, storage, offices, landscaped walking paths, preservation of several mature canopy trees to provide a park experience that affords ample shade, and a 180-space parking lot in the 10-acre complex. KEITH, as prime consultant, provided full services to the Client throughout all design phases including public outreach, planning, design development and site plan approval, and ultimately permitting and construction observation.

Pompano Reclaimed Water III CEI: Inspector. The City of Pompano Beach Department of Public Works selected KEITH to provide additional construction administration services for this reclaimed water distribution main project. The scope consisted of furnishing and installing a new system along five separate corridors and KEITH provided a RPR and other field staff to assist in observation and administration through issuance of a certificate of substantial completion.

Quiet Waters Park, Deerfield Beach, FL: Inspector. KEITH, as subconsultant to Walters Zackria Architects, assisted the Client in developing a KEITH Play project that includes complete demolition and reconstruction of the gatehouse/ticket booth facility, realignment of the main park entrance, construction of a new maintenance facility and service yard used for all Broward County Parks, new restroom building, rehabilitation of parking lots and sidewalks to meet ADA criteria, and drainage/water distribution/wastewater collection improvements at the 427-acre site. KEITH provided survey, civil engineering design, permitting, and construction observation services to the Client. The KEITH Team assisted the Client in the design and permitting of several lift stations, force mains, and/or septic systems throughout the park to provided sanitary sewer service to these isolated improvements.

North Pompano Park Improvements, Pompano Beach, FL: Inspector. KEITH assisted the Client in developing a KEITH Play project that includes several multi-purpose sports fields, concession stands, restrooms, sports and site lighting, walking paths, parking, dog park, and artificial turf and natural sod enhancements at the 20-acre site that is home to the Pompano Eagles youth football team. KEITH provided full services including civil engineering, survey/SUE, landscape architecture, planning, arborist services, tree disposition, and construction management from the early planning stages.

Tamarac Fire Station #36, Tamarac, FL: Inspector. KEITH provided professional services under West Architecture + Design, LLC for landscape architecture and civil engineering. KEITH focused efforts towards arbor, paving, grading, drainage, water distribution and sanitary sewer, storm water, and permitting. The project site remained active through the project duration.

OSHA Excavation

PROFILE

With more than 34 years of experience in governmental project inspection services, Brian Eddington is a seasoned professional in his field. He possesses extensive knowledge in a variety of areas, including: Roadway project inspections, Street resurfacing, Concrete sidewalk repairs and replacement, Water mains, Bridges utility repairs, Seawalls, Curbs and gutters, and numerous other capital improvement projects (CIP). As a former crew leader for the City of Fort Lauderdale, Brian has a deep understanding of the daily operations within South Florida's governmental agencies, making him a valuable asset in managing and executing public works projects.

RELEVANT PROJECT EXPERIENCE

CEI Consultant Services for Huizenga Park, Fort Lauderdale, FL: Inspector. KEITH is assisting the Client with a KEITH Play project including owner's representation and construction engineering inspection services to deliver the design of the Huizenga Park project. The park is envisioned to include a series of uniquely designed spaces intended to transform downtown Fort Lauderdale into an outdoor living room, dining room, and backyard all in one. The KEITH Team is assisting the Client in a drawings and project audit involving the full transdisciplinary team including value design/engineering, constructability, programing, operations/maintenance and potential errors/omissions/risks. Disciplines and services studied during Master Plan phase include: site planning and permitting analysis, civil engineering analysis, landscape architecture including arborist analysis, and traffic/transportation analysis.

DC Alexander Park, Fort Lauderdale, FL: Inspector. KEITH assisted the Client in developing a KEITH Play project that includes the visioning and redevelopment of an oceanfront park nestled in a unique 1+ acre spot on Fort Lauderdale's beachfront near the Fort Lauderdale Aquatic Center and International Swimming Hall of Fame. KEITH provided services to the Client including survey/SUE, planning, civil and traffic engineering, landscape architecture, and construction observation. The KEITH Team assisted the Client with public engagement, turtle-compliant lighting, carefully planned stormwater infrastructure, shoreline habitat analysis, and practical and creative applications of stormwater mitigation practices resulting in a design that reflects and embraces the social and economic needs of the community.

Sunny Isles Beach Intracoastal Courtsport Complex, Sunny Isles Beach, FL: Inspector. Part of KEITH's continuing services agreement with the City of Sunny Isles Beach, this project includes the development of a KEITH Play project consisting of a new downtown park. KEITH provided services to the Client including survey, civil engineering, planning, and landscape architecture. Through a subconsultant, geotechnical and site lighting were coordinated. KEITH coordinated a multi-disciplinary team to manage the project development from the initial design phase through construction documentation.

Arts & Cultural Center, Hollywood, FL: Inspector. KEITH assisted the Client with the redevelopment of a KEITH Campus project that includes a 5,400-SF education space for dance, music, visual arts, and new media, galleries, administrative offices, and an outdoor courtyard. KEITH provided full services to the Client including survey and mapping, civil engineering including paving, grading and drainage, water distribution and sanitary sewer plans, stormwater prevention, hardscape and paving, landscape and irrigation design, and construction observation. The KEITH Team assisted with the site plan and site development of all onsite improvements. This was the first project in the City's plan to modernize and increase capacity for arts programming at the 1.2-acre site. Future expansion will include construction of a new performing arts studio and renovation of gallery spaces.

Relevant Project Experience

Our firm has extensive experience providing both engineering and operational services across multiple municipal contracts.

For example, on several CSC contracts, including the City of Parkland, Lighthouse Point, City of Boca Raton, and City of West Palm Beach, we deliver comprehensive engineering services for the design and construction of individual projects. These services include project planning, design development, and construction oversight. In addition to engineering, we augment municipal staff and provide operational support such as:

- Permit plan reviews
- Extension of planning staff
- Construction inspections
- Engineering plan reviews

This dual approach ensures municipalities maintain continuity of operations while advancing critical infrastructure projects.

Integration Experience:

Our team has successfully overseen the integration of engineering and operational services on multiple contracts. For instance:

City of Boca Raton: We combined design engineering for roadway improvements with on-site inspection and permit review services, ensuring seamless coordination between project delivery and regulatory compliance.

City of West Palm Beach: We managed both engineering design for stormwater improvements and operational support through staff augmentation, enabling the city to meet aggressive timelines without sacrificing quality.

In each case, we utilized a collaborative approach—leveraging in-house expertise and, when appropriate, sub-consultants—to align engineering deliverables with operational needs. This integration has consistently resulted in improved efficiency, reduced project delays, and enhanced client satisfaction.

Personnel Commitment

KEITH commits that the key personnel listed in this proposal will remain assigned to the project throughout the contract term. Any changes will be submitted in writing with qualifications of proposed replacements for prior approval.

KEITH, under a continuing services contract, is assisting the Client with a KEITH Access project including the replacement and upsizing of an existing 12" and 16" ductile iron water main with a new 16" water main along Hallandale Beach Boulevard, extending from west of SE 14th Avenue to west of SE 26th Avenue, approximately 3,500-LF. All existing domestic water services will be replaced up to the existing meters or within five feet of the back of the sidewalk, existing fire services will be replaced up to existing DDCVs or within five feet of the back of the sidewalk, and all fire hydrants will be replaced, and if necessary, adding additional fire hydrants to provide the required minimum spacing. KEITH provides services to the Client including civil engineering, survey/SUE, permitting, and construction observation. KEITH assists the Client with topographic survey, horizontal designation and location services, SUE conditions and understandings, utility mapping, preliminary civil design through final design documents, engineering permitting, bidding assistance, construction observation, administration, and final certification.

KEITH was contracted by the City of Deerfield Beach, under its continuing services contract, to identify the water mains consisting of asbestos cement pipe (ACP) within the City's Community Development Block Grant (CDBG) limits and prepare a technical memorandum for the removal and replacement of the portions of the City owned water distribution system that consists of ACP. KEITH provided Civil Engineering services for the City.

The limits of the ACP within the City's water distribution system were identified by utilizing the City's Utility Atlas that was provided to KEITH as a baseline. KEITH reviewed the City's Utility Atlas and as-built plans to eliminate the number of water mains designated with an unknown pipe material. The water mains designated with an unknown pipe material during the desktop review were investigated in the field by the KEITH team to confirm the pipe material and update the City's GIS.

The technical memorandum prepared identified future Capital Improvement Projects (CIP) based on the limits of the ACP water main within the City's water distribution system, monetary budget limits for each future CIP, and the duration of the overall ACP replacement program. The memorandum also will guide the City, consulting engineers, and contractors through the process of a typical future CIP for this program. It identifies the various methods that are currently acceptable by US EPA and the local jurisdictions for the removal and replacement of the ACP, typical design details, typical specifications, and typical permitting requirements.

RFQ DISCIPLINE

Civil Engineering

Under this continuing engineering services contract, KEITH supported BCWWS with the planning, design, and construction support for various utility infrastructure improvements. These efforts include water distribution, wastewater collection, and stormwater management systems. A key focus of the contract is the implementation of the Septic Tank Elimination Program, which involves the extension of short sanitary sewer lines to serve small clusters of previously unserved properties. As the Prime Consultant, KEITH is responsible for delivering comprehensive engineering services throughout the project lifecycle. Projects under this program include:

- District 3A STEP Area 3A-N Design and Construction: Fee: $85,127.42. This project entails approximately 36 septic tank eliminations and incorporation of a new gravity sewer system lift station in the City of Hollywood (District 3A-N) on SW 33rd Ave, SW 32nd Terr, SW 33rd Terr, and the north half of Stirling Road (SR 848). This project was divided in two phases; preliminary analysis to select a lift station and the design/procurement/construction services to implement the preliminary analysis.

  Phase 1: Preliminary analysis of options and their construction cost, as required for the site selection for the construction of a sanitary sewer lift station to service 36 customers in the project area. The work includes a community outreach program to interact with homeowners for the site selection and securing of 30' x 30' easement for a sanitary sewer lift station.

  Phase 2: The project entails the construction of approximately three thousand feet (3,000') of 8" gravity sanitary sewer main, 15 maintenance access structures, 1 pump station, one thousand four hundred feet (1,400') of 6" force main to the existing Stirling Road force main and associated service lines and cleanouts. The project has the potential to eliminate 36 septic tanks. New utilities for the project will be constructed within SW 33rd Avenue SW 32nd Terrace and Stirling Road.

- District 1 STEP Area 3A-H: Fee: $ 67,528.83. This project entails the construction of approximately 400 LF of 8" PVC watermain, 2 maintenance access structures and associated service lines and cleanouts. The proposed project has the potential to eliminate approximately 50 septic tanks from the adjacent mobile home park. The proposed gravity sewer is to be located on Griffin Rd. and SW 24th Ave.

- District 3A STEP Area 3A-E1 & E2: Fee: $96,483.34. This project consisted of extending sanitary sewer laterals to properties located along SW 40th Ave from an existing gravity sewer main on SW 40th Ave (Area 3A-E2). The original project entailed the construction of approximately 700 linear feet of 8" PVC, 2 sanitary

sewer maintenance access structures and associated service lines and cleanouts. However, the design team was able to come up with a solution to minimize the work necessary. This project included a new sanitary sewer service lateral to connect the existing land use at 5020 S SR 7 to the existing WWS gravity sanitary sewer system located on the abutting SW 45th Ave./SW 50th St. roadways (Area 3A-E1). The project has the potential to eliminate 5 septic tanks.

- District 3A STEP Area 3A-D: Fee: $236,695.94. The project entails the construction of approximately 3,250 linear feet of 8" PVC gravity sewer, 10 maintenance access structures and associated service lines. The proposed project has the potential to eliminate several septic systems that currently serve businesses in an industrial park generally located southwest of the intersection of SR 84 and I-95.
- District 3A STEP Area 3A-L1: Fee: $62,132.07. This project consisted of extending public gravity sanitary sewer to properties located at the Northwest corner of Stirling Road and SW 25th Ave from an existing gravity manhole located in SW 25th Ave. The project entailed the construction of approximately 50 linear feet of 8" PVC, 1 sanitary sewer maintenance access structures and associated service laterals. The proposed project has the potential to eliminate 2 or 3 septic tanks and extend public sanitary sewer to 2 vacant lots.
- District 3A STEP Area 3A-B: Fee: $29,915.32. This project entailed the evaluation and selection of a sewer system and utility corridor to serve business properties in a boat marina entered exclusively through Marina Rd. from West SR84. This project has the potential to eliminate 5 septic tanks from the existing marina business west of Secret Woods Nature Center, Fort Lauderdale. This project included the evaluation of 2 public sewer system design options and also extending water main to serve the existing properties.
- District 3A STEP Area 3A-F1: Fee: $143,611.70. The project consisted of extending public sanitary sewer to properties located along SW 22nd Ave., SW 22nd Terr, SW 21st Ave./Anglers Rd., and SW 42nd St. from an existing gravity manhole located at the NW corner of SW 22nd Terr and SW 42nd St. The project entailed the construction of approximately 1100 linear feet of 8" PVC, 6 sanitary sewer maintenance access structures and associated service laterals. In addition, the project entailed upgrading the existing water main from a 4" to a 6". The water main extension was approximately 875 LF. The project has the potential to eliminate 4 septic tanks.
- District 1 STEP Area 1-B: Fee: $99,002.98. The project extended public sanitary sewer to properties located along Commercial Boulevard and NW 37th Avenue from an existing gravity manhole located at the Northeast corner of property addresses 3833 Commercial Boulevard. The project entailed the construction of approximately 950 linear feet of 8" PVC, 3 sanitary sewer maintenance access structures and associated service laterals. The project has the potential to eliminate 7 septic tanks.
- Lead and Copper Inventory: Fee: $499,983.56. This project entails assistance to the County to address the latest EPA executive order regarding lead in drinking water, which was last updated in August of 2022. KEITH reviewed existing records on both the public and private side and prepared an inventory of the sources where lead may be present in the existing drinking water system. The inventory is to be used to populate a GIS database that can be continually updated. KEITH also helped with the preparation of a Standard Operating Procedure (SOP) outlining the service line replacement plan as part of this first phase. The County performed the necessary testing and public outreach in areas where lead had been identified. In areas where information was insufficient, test holes were performed as part of the second phase of this project along with executing the SOP.
- Water Service Material Validation: $486,164.66. KEITH was tasked with the Water Service Material Validation project. This project supported compliance with the EPA's Lead and Copper Rule Improvements (LCRI) by identifying and validating the materials of existing water service lines within the County's drinking water system. The scope included predictive modeling, field investigations, and integration of findings into BCWWS's GIS system. KEITH performed visual inspections and vacuum excavations to verify service line materials, documented findings, and supported data-driven decision-making. The project also involved the use of Trinnex's LeadCAST software to enhance predictive modeling capabilities.

KEITH, under its continuing services contract with the city, assisted the Client in developing a KEITH Play project that included the development of a small park serving the local community integrating historically important elements and providing flexibility to create larger gathering spaces for events ensuring that, when not being used for events, the day-to-day visitor feels comfortable in the space. KEITH provided full services to the Client including civil engineering, survey, planning, and landscape architecture. The KEITH Team assisted the Client with integrated drainage plans allowing a resilient approach to infrastructure creating a functioning park with plaza, fitness areas, signage, and special events lawn. The project has become a focal point of the neighborhood at MLK Boulevard and NW 6th Avenue welcoming visitors and hosting events throughout the year.

Drainage and Stormwater

KEITH is partnering with the Client to develop the KEITH Life project, a transformative $2 billion redevelopment of a 285-acre site in South Florida. This ambitious project includes an entertainment venue, casino, offices, retail spaces, industrial facilities, and 4,100 residential units. KEITH is providing comprehensive services, including geospatial, planning, civil, traffic, and transportation engineering, as well as landscape architecture.

KEITH has successfully designed and implemented a comprehensive master stormwater design for the 285-acre development, scheduled for a 10-year buildout. The stormwater infrastructure was meticulously constructed in phases to ensure seamless integration and functionality throughout the construction period.

To support the early phases of the project, temporary stormwater improvements were strategically installed, ensuring effective stormwater management until the full infrastructure was completed. The final stormwater system features a 13-acre lake, over 15,000 linear feet of exfiltration trench, and associated retention areas, providing robust and sustainable stormwater solutions for the entire development.

Additionally, the KEITH Team is assisting the Client in the entitlement and development process to create a distinct zoning district, enabling the creation of a Live! branded entertainment district centered around the existing casino. KEITH's services also include public engagement, platting/plat note amendments, water and sewer modeling and planning, FEMA assessments, FDOT coordination, visioning, utility coordination, roadway design, casino expansion, parking garage development, retail/grocery outlets, a Live! entertainment venue and hotel, and multi-family residential development.

KEITH is actively involved in all stages of development, assisting the Client in navigating City, County, and State agencies to unlock the site's full development potential. Once completed, this project will establish a premier destination, enhancing the appeal of Pompano Beach and South Florida for residents and visitors alike.

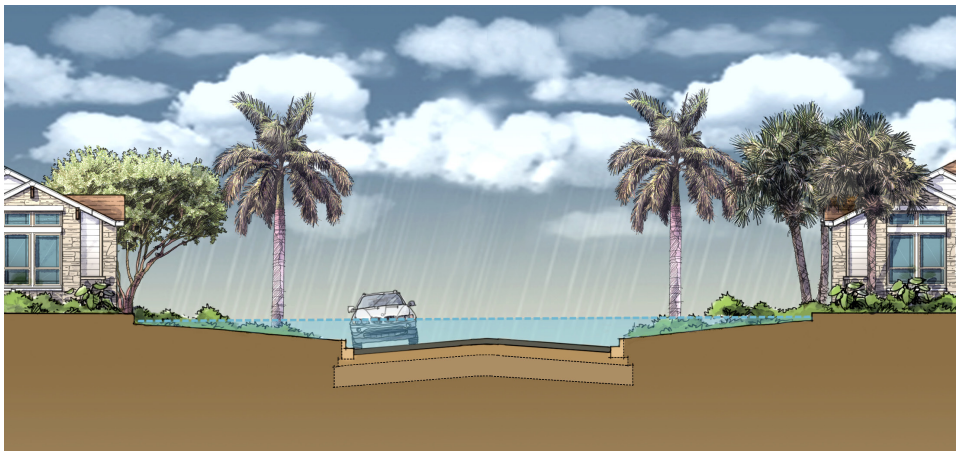
RFQ DISCIPLINE
Drainage and Stormwater

Abbott Avenue Drainage Improvements – Evaluation and Report Phase: KEITH was retained by the Town of Surfside to provide comprehensive civil engineering services of the existing stormwater drainage condition of Abbott Avenue, spanning from 90th Street to 96th Street. The scope of services encompasses the evaluation and assessment of the current stormwater drainage conditions, as well as the preparation of a detailed report offering viable options to mitigate issues associated with ponding and standing water. Additionally, KEITH estimated the required construction improvements to address these concerns. KEITH diligently reviewed and evaluated all pertinent information and materials, including plans, narratives, calculations, and the ICPR model. Furthermore, KEITH furnished a findings and conclusion report, appraising the effectiveness and cost-efficiency of previously proposed solutions. To proactively minimize risks and changes arising from the permitting process, the KEITH Team was strategically engaged with regulatory authorities through pre-application meetings. Moreover, KEITH assessed the Town's existing land use development code, stormwater ordinance, and MS-4 reporting, providing expert recommendations and ordinance revisions to ensure compliance and exceedance of federal, state, and local requirements. The provision of future projections and infrastructure assessment established the essential framework for developing accurate stormwater models.



Abbott Avenue Drainage Improvements - Design Phase: KEITH was engaged by the Town of Surfside to develop construction documents for the implementation of Phase I recommendations. The primary focus of the project was to mitigate stormwater issues along Abbott Avenue. KEITH proposed a series of drainage improvements, which included the design of two underground stormwater pump stations located at the intersections of Abbott Avenue with 91st Street and 92nd Street. Each pump station was designed to discharge into three stormwater injection wells, with an additional overflow connection leading to the intercoastal waterway. To regulate the flow, a control structure with a flap gate was incorporated to ensure that the stormwater would not reach the intercoastal until the desired design pressures were achieved. KEITH also played a crucial role in preparing specifications and assisting the Town of Surfside throughout the bidding process.

ABBOTT AVENUE DRAINAGE

Surfside, FL

Abbott Avenue Drainage Improvements - Final Design Phase: KEITH developed the final phase of design for the Abbott Avenue Stormwater Drainage project. KEITH provided survey, SUE, civil engineering, FDOT coordination, bidding assistance, and construction program management services. KEITH oversaw structural engineering, mechanical and electrical engineering, and geotechnical engineering services provided by subconsultants. The KEITH Team assisted the Client in milling, resurfacing, restriping, preparation of construction documents, construction observation, final inspections, and final certification.

KEITH assisted in securing a 2022 FDEP Flooding and Sea Level Resiliency Grant to cover most of the estimated construction costs. Since, the Town of Surfside has been awarded $3,000,000 in additional funding from the Fiscal Year 2024-2025 Resilient Florida Program Statewide Flooding and Sea Level Rise Resilience Plan for Abbott Avenue Stormwater Improvements.

RFQ DISCIPLINE
Drainage and Stormwater

The KEITH Team, under its continuing services contract with the city, was successfully retained to provide a full range of engineering services for the City of Plantation Drainage Zone 2 to provide an evaluation of the existing stormwater system and develop a Capital Improvement Program (CIP) specifically for this Drainage Zone. The final product will be compiled in a Stormwater Master Plan. KEITH will leverage its expertise in hydrology and hydraulics modeling to evaluate the overall existing stormwater system, identify potential areas at risk of flooding and evaluate future required stormwater system upgrades in order to improve the flood resiliency for the City and its residents. The proposed improvements prepared by KEITH will adhere to the respective federal, state and local regulations to meet water quality and quantity requirements. The final report will build upon past studies and models, data, permit conditions, and recently completed and ongoing projects and initiatives. The culmination of the study's effort will be presented in the new and comprehensive stormwater master plan that establishes a policy framework, integrates resiliency, conducts vulnerability analysis, and provides a prioritized improvement program that ensures the integrity of the City's future is protected for the generations to come.

KEITH assisted the Client in developing a KEITH Play project that includes the visioning and redevelopment of an oceanfront park nestled in a unique 1+ acre spot on Fort Lauderdale's beachfront near the Fort Lauderdale Aquatic Center and International Swimming Hall of Fame. KEITH provided services to the Client including survey/SUE, planning, civil and traffic engineering, landscape architecture, and construction observation. The KEITH Team assisted the Client with public engagement, turtle-compliant lighting, carefully planned stormwater infrastructure, shoreline habitat analysis, and practical and creative applications of stormwater mitigation practices resulting in a design that reflects and embraces the social and economic needs of the community. This award-winning project through its context – historic and present, its users, and the needs of the community – balances 'design for people' and 'design with nature' and is a testament to the value of comprehensive research, exploration, and analysis phases.

Everglades Holiday Park is a 43-acre county park that serves millions of visitors each year. The site is located at the junction of two (2) SFWMD canals and is part of SFWMD water conservation areas 3A and 3B. The project included stormwater restoration master planning, civil engineering, landscape architecture, survey/SUE and construction management services, and construction phase services associated with a two-phase, $12M expansion and site improvements.

KEITH successfully provided a goal of long-term protection through the implementation of solutions for stormwater management, erosion control, and pollution. The project aimed to address complex problems with severe flooding that would close down the majority of the parking areas and access to the park rendering it functionally obsolete. As sea level rise and clear sky flooding became the norm for this already water inundated site, the team developed schemes to mitigate these flooding events and enhance the access to the park. Mitigation efforts introduced large bioswales to allow water from the parking areas to gather in vegetated areas vs back-up in the parking areas. These bioswales are interconnected and tie into the overall storm system to ensure that the system functions even in major storm events. This was successfully done by utilizing the Santa Barbara urban hydrograph methodology to design the water quality and stormwater system, providing complete water quality for the entire project. These drainage improvements have been successful allowing the park to remain open after several major storm events which can be daily in this ecosystem. In addition to the boat ramps, a series of new docks were created to provide enhanced accessibility to the waters' edge as well as for visitors on the landside to get out close to the natural ecosystem. The bulkhead allows for a long-term solution to bank stabilization on the park side while minimizing the parks extent into the natural ecosystem. This is one of the many collections of infrastructure solutions embedded into the park.

EVERGLADES HOLIDAY PARK SITE IMPROVEMENTS

Fort Lauderdale, FL

Permitting was also a challenge, as the park is located within the Florida Everglades and spans flood protection levees under the jurisdiction of the Army Corp of Engineers and the South Florida Water Management District. Through constant coordination with Broward County and the concessionaire, the design and construction team were able to satisfy the needs of all stakeholders. The park was kept open throughout the construction process by constructing the project in two phases, with the first phase being utilized for the park users when the contractor moved into Phase 2 of construction. The project had two main goals: to renovate and rehabilitate the park program elements and to allow the community safe and continuous access to the park while phased construction occurred; these goals were met with distinct and celebrated success. In 2022, Everglades Holiday Park was named as the Trip Advisors Traveler's Choice award, as well as the Florida ACEC Engineering Excellence award and the ASCE Broward Project of the Year.

KEITH is the prime consultant for the City of Boca Raton and the Beach – Parks Recreation Department. KEITH is responsible for the planning and programing of 4 parks throughout the City that aim to relocate a series of recreational facilities being displaced by a PPP development in the downtown. KEITH came up with an innovative process to host a comprehensive workshop that included all City Stakeholders from the various City Departments including Planning and Zoning, Facilities and Maintenance, Park Rangers, Police, Recreation Programs and others. This day long workshop allowed all stakeholders to provide input on the parks from all aspects to ensure every department can be heard. KEITH then facilitated the design of 15 different concepts during the day to allow for a dramatically abbreviated process. What normal could take months of back and forth was accomplished in a single day. This approach has allowed the design and review process to be expedited. Construction: N/A

The KEITH Team was awarded the Pompano Beach General Obligation Bond Park Redevelopment Design/Build projects, which included North Pompano Park, the Youth Sports Complex, and Centennial Park. The design phase for these projects encompassed surveying, subsurface utility engineering, civil engineering, traffic and transportation engineering, landscape architecture, and planning. Each project also involved extensive public outreach.

The Centennial Park project featured the addition of an outdoor, open-air event pavilion that incorporated contextually sensitive architecture honoring the historic Sample-McDougald House, located on the property. The improvements also included the redevelopment of walkways and garden areas adjacent to the pavilion. KEITH worked closely with stakeholders to ensure the new garden spaces and pavilion met the event needs of both users and staff. Fee: $164,500.00

The North Pompano Park project involved redeveloping the site to preserve existing features that had functioned well, while enhancing and introducing new multi-purpose fields, exercise equipment, landscaped walking trails, connectivity to the on-site pond, and other programmed spaces. KEITH's design achieved a well-balanced integration of both passive and active uses for this residential-area park. Fee: $494,609.65

The Youth Sports Complex project was a 10-acre, multi-sport facility. KEITH designed the park to include several new multi-purpose fields, a community center with event rooms, and landscaped paths. Located adjacent to Centennial Park and the historic Sample-McDougald House, the architecture was thoughtfully designed to reflect the historic home's vernacular while also meeting the community's desire for a state-of-the-art sports facility. Fee: $431,250.00

Surveying and mapping

KEITH is providing professional engineering and surveying services for the design, permitting, and construction contract administration associated with development of new cargo handling container yards. These container yards are integral to the expansion of Port Everglades' Southport Turning Notch, which currently is under development. The project consists of two components:

Component I is the design, permitting, and construction administration of new container yards to be constructed east and west of McIntosh Road.

Component II will include environmental assessments and demolition of the Foreign Trade Zone warehouse buildings and conversion of the site into a cargo handling container yard facility.

Design services include existing facility and site documentation and assessments; project budgeting; environmental evaluations, assessment and remediation plans; project cost estimating; project schedule development and analysis; complete engineering and design of proposed project scope project permitting, as required with local, state, and federal agencies; construction contract document development; construction specification development; contract and bidding document development; code analysis; bid/award support and concurrence; negotiation support; construction contract administration services; construction phase field support services; inspections, construction observation, and project progress documentation; project-related claims analysis and support; surveying and mapping; computer-aided and manually generated graphics support; preparation of narratives and other textual project support; photographic/videographic project support; geographic information systems (GIS) project support; and other data and information system project support.

Building Inspections, Plans Review, and Permitting

KEITH provided civil engineering, surveying, subsurface utility engineering, and landscape architecture services on a continuing services contract for the City of West Palm Beach. Projects under this contract include:

In-House Civil Engineering Support: Members of the KEITH Team have served the City with in-house consulting services for the past 3 years. The KEITH Team operates as an extension of the City, working both individually and collaboratively with City staff to support the City Engineering Department in permits review and research. They closely coordinate with engineering staff, contractors, and City construction coordinators, and assist the City in meetings with developers, engineers, and contractors as needed.

Alhambra Place Improvements and Palm Beach Lakes Blvd. Signalization: KEITH provided SUE and surveying services for utility upgrades along Alhambra Place and one test hole on Palm Beach Lakes Blvd. The work included horizontal utility designation and up to 20 test holes, excluding gravity systems, laterals, irrigation, and overhead utilities unless requested.

Flagler Drive Survey: KEITH conducted 6 Specific Purpose / Topographic Surveys along Flagler Drive at the intersections of Dyer, Almeria, Valencia, Granada, and Barcelona Roads, and just north of Barcelona. These surveys supported the installation of in-line tide control valves and the potential replacement of stormwater infrastructure. Each survey extended 10 feet beyond the curve radius along Flagler Drive and adjacent side streets. The surveys documented surface features, trees and storm and sanitary structures.

Okeechobee Blvd & Parker Ave Valve Replacement: KEITH provided surveying and SUE services for a critical valve replacement project at a high-traffic intersection. The scope included water main investigation and precise utility location. KEITH prepared horizontal utility designations for up to 30 test holes and provided utility mapping, permitting, office coordination, and Maintenance of Traffic (MOT) planning.

Australian Ave & 7th Street: KEITH provided SUE services for a water main investigation at Australian Avenue and 7th Street. The scope included horizontal utility designation and up to 15 test holes, excluding gravity systems, laterals, irrigation, and overhead utilities unless requested. Utilities were marked using electromagnetic and GPR methods, with test holes restored and documented. Surveying captured markings using RTK GPS, with deliverables in AutoCAD and Excel formats. KEITH also mapped right-of-way lines at locations 3 and 3a and collected sanitary manhole data at location 8.

Fire Station No. 1: KEITH prepared a topographic survey for the site of West Palm Beach's Fire Station No. 1. The survey documented surface improvements, tree locations, and storm and sanitary sewer structures.

25th Street Topographic Survey: KEITH prepared a topographic survey of 25th Street from North Australian Avenue to the east side of the railroad tracks between Rosemary Avenue and Pinewood Avenue.

Apoxee Park Parking Lot Improvements: KEITH provided civil engineering services for improvements to the access roadway and parking lot at Apoxee Park, located at 3125 N Jog Road in West Palm Beach, FL. The existing milled asphalt surface had been prone to washouts during heavy rain events, leading to frequent maintenance by the City. The project involved evaluating existing conditions, developing multiple improvement options with cost estimates, and proceeding with civil engineering design for the selected solution.

Ernest St Soft Digs: KEITH provided subsurface utility engineering services for Ernest Street, performing various utility locates during the design phase to minimize construction impacts.

Building Inspections, Plans Review, and Permitting

KEITH was selected through this continuing services agreement for general consulting, engineering, surveying services. KEITH is providing services to the Client including civil engineering, survey, and inspections on an as-needed basis. Some projects under this contract include:

In-House Civil Engineering Support: Members of the KEITH Team have served the City with in-house consulting services for the past 3 years. The KEITH Team operates as an extension of the City, working both individually and collaboratively with City staff to support the City Engineering Department in permits review and research. They closely coordinate with engineering staff, contractors, and City construction coordinators, and assist the City in meetings with developers, engineers, and contractors as needed.

Vulnerability Assessment And Adaptation Plan: KEITH assisted the City of Lighthouse Point with the development of a comprehensive Vulnerability Assessment and Adaptation Plan funded through the Florida Department of Environmental Protection's Resilient Florida Grant Program. This initiative evaluates the City's exposure and sensitivity to high tide flooding, storm surge, sea level rise, and compound flooding in accordance with Section 380.093, Florida Statutes. KEITH led the technical effort to identify at-risk public assets and infrastructure using advanced GIS tools, LiDAR data, and flood scenario modeling based on NOAA and FEMA projections. The assessment prioritizes infrastructure vulnerabilities and outlines strategic adaptation measures tailored to the City's most critical needs.

McDonough Tennis Center: KEITH assisted with renovations to the tennis courts at the Lighhouse Point Tennis Center. KEITH provided survey, SUE, civil engineering, and construction management services. KEITH prepared a specific purpose survey and horizontally marked any known underground utilitites. The KEITH Team also prepared schematic designs, construction documents, and permitting approvals. KEITH provided construction engineering services to ensure the integrity of the design intent and prepared final certification.

TAB 4.7

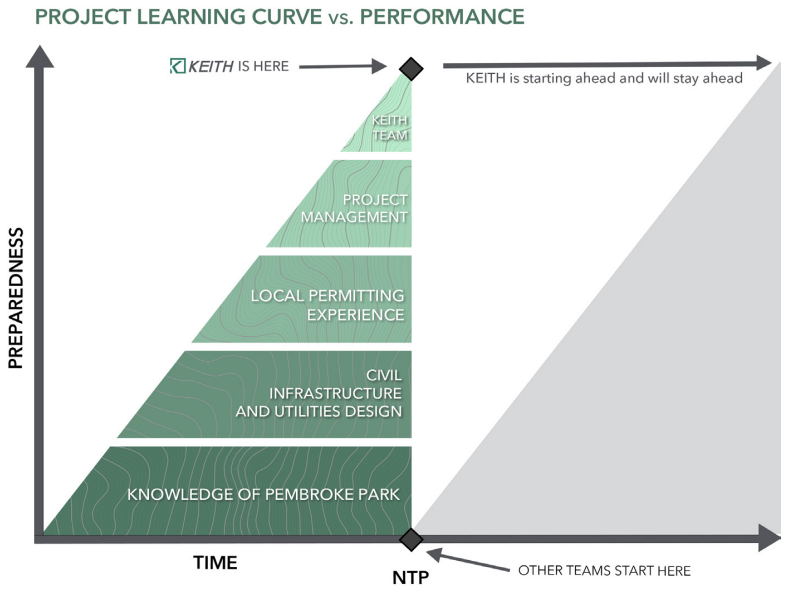
PROJECT IMPLEMENTATION STRATEGY AND APPROACH

Approach and Methodology

KEITH has developed a keen understanding of the many challenges that can be encountered for projects within the Town of Pembroke Park. Accordingly, we have assembled a team with broad capabilities and depth of experience to address any needs that may arise. These many years of collective experience mean that any of Pembroke Park's concerns with project development will be taken under consideration throughout the entire design and construction process.

KEITH is well-versed on the management and implementation of large and small-scale projects. As one of the veteran South Florida based engineering firms, we have provided services for general continuing contracts as a prime consultant for numerous governmental agencies for decades. Our approach to every project begins with a "No Excuses" methodology. We bring a unique combination of top-quality consultants with years of in-depth experience working on similar municipal projects under the leadership of KEITH, a firm you know you can trust with your most important projects. We believe that our overall corporate ideology, coupled with our expertise and commitment to the Town of Pembroke Park will be the keys to the successful execution of this contract.

Delivering the Scope of Services



Our strategy is simply to assist the Town in creating a team with the right skill sets and personalities; ensure the team has the proper tools to manage and communicate; understand existing processes and augment those processes, if needed; and finally, facilitate the alignment of the project team towards the common goal of project delivery.

- **People.** The most important element and foundation of our strategy is to ensure that the right people with the correct skill sets are assigned to support the project team. In today's world of project delivery, it is not enough to have the correct skill set. We must consider how the team's diverse personalities compliment and support each other to achieve team cohesiveness.

- **Tools.** The delivery team must also have the correct tools to manage projects and to communicate progress to stakeholders. These tools typically include scheduling, document controls, and collaborative websites. Scheduling tools like MS Projects or Primavera P6 Scheduler are important tools to coordinate the execution of various projects. Familiarity with these tools also assists the project team in evaluating and managing change on projects. Establishing a web-based document

controls system is a critical element to foster transparency and to ensure important documents are available to the entire team when needed. Document controls tools such as eBuilder, Primavera Contracts Manager, or others not only help make documents accessible, but they also assist in status monitoring of submittals and Requests for Information, as well as reporting of metrics (review response times, change logs, etc.).

- **Processes.** Project delivery has changed over the years, but one thing remains consistent: processes bring consistency and repeatability to project management. With efficient processes that are well-defined and communicated, the delivery team becomes more efficient with every task accomplished. These processes also allow leadership to fine tune the delivery to match the changing needs of the Town. The delivery team performance is directly tied with their understanding and ability to follow established processes. Since processes are such an important part of the team's delivery strategy, a joint review of the existing processes is recommended. During this review, KEITH can assist the Town in evaluating if modifications to any existing processes can be made to improve the efficiency of the project delivery team or if additional processes or forms are needed. This review can be done in parallel with project delivery to maintain forward progress of the existing projects.

- **Alignment.** It is not enough to have the right people with the right tools following efficient processes. They must be aligned towards a common vision/goal. One way to accomplish alignment is to clearly communicate expectations and create a dialogue between the project delivery team and various key Town staff/stakeholders. Alignment can also be encouraged through the establishment of efficient processes and monitoring metrics that promote and encourage project delivery success.

Management and Design Approach

The KEITH Team will implement a rigorous communication protocol among all project participants. The basis of our management approach will focus on managing communication between our team and the Town of Pembroke Park as follows:

- Provide Single Point of Contact: Project Manager, Mr. Michael Pinzon, PE
- Stress early planning and scheduling
- Establish the involved group of stakeholders, and provide clear lines of communication to all, as required
- Understand the objectives of the project and assure that all project stakeholders have the same level of commitment and expectation in understanding the scope of work
- Schedule periodic progress meetings
- Maintain strong, ongoing working relationships with the Town staff

Our approach to this management plan is one that has proven successful with many projects. We will schedule all meetings in coordination with Town staff, conduct the meetings, provide agendas and meeting materials, record and submit minutes for review/approval and then distribute those minutes to the appropriate parties. We will establish clear lines of communication and review procedures among team members to ensure the continuous and timely flow of work in the planning and design phases.

Based on the scope of each individual work authorization, the KEITH Team will develop a project schedule to sequence key activities associated with and required for the successful design of the project. By carefully scheduling and sequencing activities, key elements of the work authorization may be performed in a sequential, but staggered manner to expedite delivery of the work authorization while ensuring all issues and concerns are properly addressed. An example of this would be a certain level of general planning and conceptual design consideration of alternative solutions and interviews with authorities having jurisdiction, may be undertaken while site inspections and surveys of existing conditions at a site or facility are underway.

Project Manager

When approaching any work order assigned, certain factors and initiatives are always considered and implemented. Mr. Michael Pinzon, PE, serving as the Project Manager for this contract, will be responsible for directing our team members to undertake the correct approach for each assignment.

Project Execution and Controls

"Plan. Measure. Manage. Execute." The elements of Project Controls are:

- Quality Assurance/Quality Control
- Cost Control
- Schedule Control

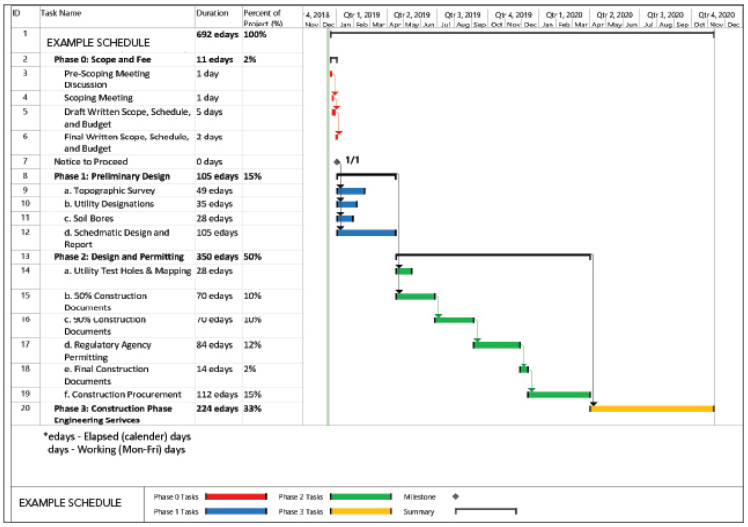
The KEITH Team will provide experienced senior project managers with extensive project controls experience to properly reflect the size and pace of the work.

Quality Assurance/Quality Control

KEITH is keenly aware that time is of the essence for most projects and cost is always an important component of the design. Therefore, we have an established Quality Assurance/Quality Control (QA/QC) Program that is implemented throughout the design process through project closeout. This ensures that the plans are prepared to the highest quality standards from the beginning and eliminates lengthy agency review and revision times. It also allows for value engineering and constructability analysis throughout the quality review process.

Underlying this quality process are three (3) corporate philosophies: Utilizing the right people to do the right things at the right time; putting our detailed and time-tested processes in place to facilitate quality work and delivery and utilizing a comprehensive quality management plan that addresses quality control throughout every aspect of the project.

Our QA/QC Program consists of the following four (4) key principles:



1. Proper Project Approach: Quality is achieved through due diligence, communication, planning, coordination, supervision, and technical direction at the very start of the project. The Project Manager will discuss the goals and objectives for each project with the City to understand the scope of work, level of detail, and the applicable technical standards that need to be met for each assignment.

2. Constant Project Supervision and Communication: Quality is achieved by conveying the scope and special instructions to the office and field staff together with regular reviews of their continued work effort and progress.

3. Active Senior Management: Quality is assured by the Senior Management establishing realistic schedules and providing the proper technical directions to the team assigned. Plan omissions are typically the greatest challenge in any QA/QC program, and they are best identified in a review by experienced senior staff members. Senior staff also provide the independent reviews of the processes, procedures, and project documentation to provide the required deliverable to the City.

4. Formal Quality Reviews: Quality of the deliverables and the procedures is verified by the KEITH QA/QC Officer, Stephen Williams, PE. A final check of the deliverables is performed by the Project Manager and the QA/QC Officer on every project prior to submission to the City.

Schedule Control

While all work authorizations must be executed in a quality fashion, it is critically important that they are also performed responsively, in accordance with Town of Pembroke Park's schedule and budget objectives. The depth of staff on this team of consultants, both in number and experience, will permit us to satisfy these work authorization assignments for the Town on this contract without sacrificing quality and responsiveness.

Our ability to work in close coordination with Town of Pembroke Park staff, contractors and other consultants will result in projects being completed on time and within budget. We have found great success utilizing an approach that has led to effectively identifying problems and quickly defining solutions. This approach, coupled with our experience and knowledge, offers the Town of Pembroke Park the opportunity to minimize cost overruns and project delays.

Developing and managing the schedule to deliver the project will require accurate project scopes and cost estimates.

As your Consultant, the KEITH Team will:

- Prepare a realistic and achievable project schedule, which reflects the project's funding constraints. The schedule will be complete, allow room for contingencies, and focus on what is important to the Town in order to deliver on commitments at key milestones.
- Develop accurate and complete project scopes and cost estimates that will be reviewed, as required, including such incentives as may be appropriate and justifiable. This includes provisions to build in upgrades for rapidly changing technology.
- Monitor progress periodically as required and minimize delays of any kind. This requires preventing foreseeable delays, mitigating delays from unforeseen sources, and reversing or recovering from delays that may arise from unforeseen circumstances.

- Establish a process to review and properly assign responsibility for any increase in project delays.
- Establish a mechanism for prompt resolution and payment (i.e., including alternative dispute resolution procedures).
- Arrange for task-oriented team "workshops" as required to review the work and schedule aimed at enhancing efficiency (i.e., by enhancing productivity, optimizing schedule overlaps, reducing work, value engineering, and the like).

By using these standard procedures, KEITH will deliver each project on time and on budget. We will commit a dedicated Rapid Response team of managers, engineers, and professionals of all disciplines, as well as technicians that will make the Town of Pembroke Park's assignments our top priority!

Cost Control and Cost Estimates

Two factors weigh into a successful overall project cost control initiative: controlling the cost of the construction by providing efficient and practical designs ("value engineering") and controlling the cost of the design effort itself. KEITH takes responsibility for both factors on every project for every client.

At KEITH, we undertake design estimates, constructability reviews and schedule analysis as the project evolves through the various phases of design. At each phase of design benchmark, we evaluate potential errors, omissions, and document coordination problems that may impact cost and time after contract award and bring these to the attention of the project team. We can evaluate alternatives and recommend substitute methods or materials based on their relative economy and life cycle. Our efforts are designed and focused to identify and make recommendations on cost issues and risks as early as possible to address and mitigate these prior to the start of construction.

KEITH has a reputation of working within the budgets set and negotiated to perform design and construction services of this nature. We look to build long lasting partnerships with our clients and have found the best business practices to be reliable and accountable. *KEITH recently completed the re-analysis of the Northern, Western and Ravenswood Drainage System Study for Broward County Aviation Department (BCAD). Our value engineering practices provided Broward County a reduction in anticipated comparable cost which equated to a projected savings differential estimated at $6.5 million from the initial study and recommendation provided by a previous drainage consultant.*

On many previous projects, KEITH has managed our team in an efficient manner resulting in residual contract dollars being reconciled and reassigned for additional projects. Design team addendums are only requested in association with a significant scope change or significant unforeseen conditions.

The general intention of this contract is to be available to the Town of Pembroke Park as a consultant that functions as an extension of its own skilled professionals. KEITH will continue to provide a trans-disciplinary resource pool of qualified professionals as we have for years. This team will be expected to provide quality and time-and-budget-responsive support to the Town for specialized general civil engineering services, as identified in the Town's Request for Qualifications. This support may be in the form of defined technical tasks, which are alternatively performed in the office of the consultant team or as needed in the Town's offices, side-by-side with its professional and technical staff.

FAST TRACK | Efficient Work Order Process

Regardless of the project site, scale, or schedule, KEITH commits the necessary resources and quality personnel to complete the work orders. Our experience has provided a thorough understanding of the myriad of project issues that may arise when executing fast-track work orders on contracts requiring on-call engineering services. The KEITH Team, with its senior level, proactive management, and continuous quality control measures, has proven to be a team that can successfully perform on this consulting services contract for the Town of Pembroke Park.

KEITH proposes to maintain the process that has been followed for each work authorization based on similar types of experiences, to assure continued timely response to Sunny Isles Beach's needs, which involves a close working relationship with the utility representatives, permitting agencies and other key stake holders. This process, and the timeline to which the KEITH Team commits, is as follows:

- Our Project Manager will meet in person or via telephone with Town's Project Manager or

representative within one (1) business day of the initial scoping meeting request, to discuss scope, schedule, and budget issues related to the individual project work authorizations.

- KEITH will provide a draft written scope, schedule, and budget for the work authorizations to the Town within five (5) business days of the scoping meeting and be prepared to negotiate the scope and fee through the Town's negotiation process.

- KEITH will provide a final written scope, schedule, and budget within two (2) business days of receipt of agreed upon comments on the draft scope following successful negotiations. It is important to note that the KEITH Team has successfully negotiated many projects with a minimum number of negotiation sessions to meet the requirements of the Town Commission directives concerning minimizing the negotiations. We have done that by entering the negotiation process with reasonable fees so that one (or two if needed) negotiation sessions are ample to complete the scope and fee process.

KEITH has the ability and staff capacity to begin work with minimum notice and will initiate work immediately upon formal Notice to Proceed or as needed by the Town. KEITH's approach to this contract includes Quality Responsiveness and Skilled Management combined with the technical ability and level of experience that will provide superior service to the Town of Pembroke Park. We are extremely proud of our accomplishments as a local business and truly believe our commitment and dedication to the success and progress of our cities makes us the best choice for this contract.

Workload Management

KEITH manages its long and short-term workload through a policy of proactive management and resource/ personnel sharing. Our diverse staff wear many hats; we have committed to the time and energy required to meet the schedule requirements of similar contracts in the past and continue to be committed to providing unparalleled service to this contract. Delays are contained and minimized through routine weekly department/project meetings aimed at maximizing project scheduling effectiveness. Senior management oversight and weekly interaction guarantees our teams have those discussions to deliver the projects successfully. Given our current and projected workloads, KEITH can and will provide the personnel and resources to exceed the expectations of the Town for this contract.

KEITH has the administrative know how and the staff to manage large and small work authorizations, the management skills and the technical expertise to ensure top quality is always delivered to the Town.

Given our current and projected workloads, KEITH can and will provide the personnel and resources required to service the Town of Pembroke Park for this contract.

We Know Agency Staff, Standards, and Procedures

The KEITH Team has performed a magnitude of work for the state, county and local municipalities within Southeast Florida, including the Town of Pembroke Park. Our experience has resulted in a thorough knowledge of the standards, and how to apply them with a practical and common-sense approach to solving problems. We believe that building relationships is what it takes to truly understand the concerns of the agencies and address them in a professional manner that is personal to the Agency.

We take pride in building those long-lasting relationships and acting as an extension of our clients' staff.

Safety and Risk Management Philosophy

Accidents do not happen without cause. The identification, isolation and control of these causes are underlying principles of all accident prevention techniques. Education and training are an ongoing and daily process within

the KEITH Team structure. Through adequate instruction, personnel gain useful knowledge and develop safe attitudes which result in safe work habits. Our Field Review and Safety Supervisors, hold weekly "tool box" safety meetings in accordance with OSHA specifications.

The KEITH Team is committed to protecting employees, clients, and the general public on all of its projects. The goal is ZERO incidents. Safety includes health and risk management, in addition to security factors. KEITH has a proven Safety, Health, and Risk Program that addresses all phases of the design and construction process, from business development to project closeout. It includes best management practices from the National Safety Council and the Construction Industry Institute. This "play book" allows KEITH to tailor safety plans to any level of contractual risk in a variety of office and construction settings to achieve superior results. All of our field personnel have received Temporary Traffic Control (TTC)/Maintenance of Traffic (MOT) safety training currently required by the FDOT for work within public roadways. Specialty crews have additional certifications for OSHA Confined Space Entry requirements for general industry and construction, and general job site safety certifications.

It is imperative that all project personnel understand that safety is a shared responsibility. The goal is to provide information which will enhance safe working practices, not only for the benefit of our employees, but also for the client and general public.

Stormwater Management

KEITH has the knowledge and proven abilities to understand the complex nature of stormwater management. Especially in the urban environment, where balance must be achieved between the permitting requirements, restricted positive outfalls, budget limitations and existing historical drainage patterns. Our team has the professional acumen to fully investigate the existing conditions and propose creative solutions that will resolve and simplify the feasible alternatives. In addition, we are routinely familiar with the National Pollutant Discharge Elimination System (NPDES) Program, and the requirements to implement it.

Some key projects include:

Tamarac Stormwater Pump Stations
Parkland Citywide Stormwater Master Plan
Kendall Lake Stormwater Improvements
Pompano Beach Stormwater Design and Analysis
FLL Retention Area Stormwater Improvements
Gateway Drive Stormwater Improvements
Abbott Avenue/Town-wide Stormwater Improvements
Pompano Beach Atlantic Boulevard Stormwater
FLL Stormwater Master Plan
Monroe County Stormwater Master Plan
Broward College North Campus Stormwater Plan
Port Everglades Container Yard Stormwater Report
Surfside NPDES MS-5 Monitoring and Reporting
Plantation Citywide Stormwater Master Plan

Water Distribution, Sanitary Sewer Collection System and Force Main

KEITH has vast experience with studies, designs, permitting and construction administration tasks associated with water distribution and sanitary sewer collection systems. Designs following standards of South Florida utility providers have been implemented. Sanitary sewer collection system designs ranged in pipe sizing from a 2-inch force main serving a grinder pump system to a 16-inch diameter force main transmission line. Numerous public and private pump station designs have been constructed throughout South Florida. Water distribution system designs ranged from 4-inch diameter fire sprinkler lines to 24-inch diameter water transmission lines. All manner of service demand evaluation and hydraulic capacity of these systems has been evaluated in the design of these systems. KEITH inspection staff have expertise with all AWWA/Florida HRS testing requirements of water distribution systems and all FDEP testing requirements for gravity/force main sanitary sewer collection systems. At Fort Lauderdale Hollywood International Airport, KEITH was responsible for many miles of sanitary sewer

force main and water main relocations and upgrades associated with the construction of the South Runway.

Some key projects include:

- BCWWS Continuing Engineering Services – County-wide Water Distribution, Wastewater & Stormwater Collection
- Fort Lauderdale Hollywood International Airport - Westside Watermain Expansion Loop
- Fort Lauderdale - Bermuda Riviera Watermain Improvements
- Nova Southeastern University (NSU) - Campus-Wide Master Drainage

Surveying Services

The KEITH Team has the blend of experiences to handle every aspect of a project's needs from start to finish. KEITH currently employs 200 full-time staff members of whom 50 are surveying and mapping related personnel. Our current percentage of active survey work compared to all the other services we provide is 40% and we've consistently performed at this level of activity, giving us the ability to adjust our crews based on the demand. Another benefiting factor that most firms do not have are our hybrid crews. Our hybrid crews are cross trained to have both survey and utility experienced personnel on each crew allowing us to expand crews if necessary. Every crew can perform multiple tasks such as survey, GPS and utilities services. KEITH is also able to provide all the services the Town needs in-house, under one roof. Things are done faster—efficiently and effectively. Our total completed projects for last year included over 200 survey and mapping related assignments. Those projects ranged from sketch and legal description surveys to flood certificates for two major transportation projects such as the I-95 Express Lanes and the Fort Lauderdale-Hollywood International Airport (FLL) South Runway. Our team utilizes technologies both in the field and in the office to verify accuracy of existing features through our 3D Scanning, Survey and SUE capabilities. We are well equipped with technology and personnel to tackle any small, medium or large survey the Town may require.

The KEITH Team has completed and performed similar assignments for consulting service contracts for the past twenty-two years which include numerous construction layout, boundary surveys, preparation of sketches and legal descriptions, mapping, AutoCAD drafting, calculations, and others such as topographic surveys, horizontal and vertical geodetic control surveys, right-of-way mapping and right-of-way mapping and right-of-way surveys, parcel and right-of-way stakeout, Digital Terrain Models (DTM), maintenance mapping, parcel sketches and GIS services.

Some key projects include:

- Town of Southwest Ranches Continuing Contract
- Miscellaneous Surveying Services for City of Pompano Beach and Pompano Beach CRA
- Miscellaneous Surveying and Engineering Services for the City of Parkland
- Miscellaneous Surveying and Mapping for the City of Fort Lauderdale

Planning and Planning Review

Our key staff have worked as City Planners, Planning Directors, and as City Planning Consultants for various municipalities. Through their time in public service, they gained valuable insight into the constraints, challenges, and opportunities public agencies encounter as they carry-out their mandates. This understanding informs their approach when overseeing public agency

contracts. As a result of their academic training, practical experience in both the public and private sectors, and hands-on approach, our team looks forward to working with Town staff to best serve the Town's needs. We are also well-versed in managing the planning process for private development. This provides our team with a unique perspective, in that we appreciate the need to streamline processes in order to gain efficiencies and to provide timely service to clients who invest in development projects, that ultimately serve to increase the Town's tax base.

KEITH has a vast amount of experience in providing professional planning services. This includes long range planning services comprising of comprehensive planning, evaluation and appraisal reports, preparation of land development applications including, rezoning, platting, delegation requests, and site planning. Our planners have the knowledge and expertise to meet the needs of a wide variety of general planning design and development services. We understand the necessity for continual input during the conceptual site planning design stages to assure a satisfactory final community site plan.

KEITH has the knowledge and proven abilities to coordinate and provide all necessary services for commercial and residential community site planning. At KEITH, we understand the development review process from initial conceptual design application submission to final approval. We can also provide numerous planning studies including, but not limited to parking studies, corridor studies, state mandated planning reports, urban design analysis, transfer of development rights, community liaison, and numerous types of feasibility studies.

Comprehensive Planning

With extensive experience developing and implementing comprehensive plans, our team understands that the Comprehensive Plan document is a key regulatory mechanism and guidance document for achieving a local government vision, which also provides a foundation for the LDRs and provides support for planning initiatives. Our project team understands the legal requirements and processes related to a local government's comprehensive plan.

We have performed a variety of comprehensive planning assignments including collecting data and analysis and creating comprehensive plans, conducting Evaluation and Appraisal Reviews (EAR) and preparing EAR-based amendments, revising the policies that address singular issues and reviewing developer proposals for text or map compliance. Our project team has also assisted state agencies in their review of comprehensive plan amendments from the agency perspective in numerous subject matter areas including environmental, land use and transportation.

Land Development Regulations (LDRs), Code Amendments

Our team has substantial experience updating local government LDRs. Staff has worked with several local governments throughout the State of Florida to update Land Development Regulations and code amendments in a variety of ways, from updates to address major changes to elements of the Comprehensive Plan, to adjustments to sections of the LDR to address specific issues in the community.

We are particularly fluent in the requirements for communities within Broward County. We value community and stakeholder collaboration and incorporate opportunities for public input at appropriate places in review processes. During LDR amendments for other communities, staff has utilized public input along with guidance from comprehensive plans and other planning documents to successfully improve upon and streamline existing regulatory frameworks.

Urban Planning and Design

Our team is experienced in reviewing the architectural and urban design components of development applications such as height, setback, window glazing percentage, massing and other code requirements. Our urban designers are familiar with local building vernacular and can work with the Town to enhance design standards. Our team is also familiar with other aspects of urban design including complete street design requirements and the need for a connected, multi-modal transportation network. As part of our design philosophy, our project team members are LEED certified; have created land development regulations and comprehensive plan elements to encourage green building and sustainable development and address sea level rise; and have prepared climate and sustainability plans.

Landscape Architecture and Master Planning

Our landscape architecture department specializes in the creative fusion of architecture, landscape architecture and the environment. The ability to offer in-house landscape architecture design capabilities provides for a more comprehensive, unified team. Our team has provided innovative designs for institutional and commercial projects, residential and mixed-use developments, streetscape and roadway beautification, active and passive parks, plazas and various urban redevelopments.

Whether it is in meeting the code of landscape ordinances with creativity or in creating spectacular lush destinations—we bring experience, knowledge, fresh energy and innovation to each project. Our approach guides and assists clients in making smart, long-term decisions that result in greater value for them, their projects, their clients and our community. From site detailing to landscape and irrigation plans, tree removal, mitigation plans and more, our team has completed projects for public and private clients throughout the tri-county region including projects for hospitals, libraries, parks (public and aquatic), fire stations, marinas, streetscapes and more.

Our team is experienced in all aspects of Master Planning, including the creation of a framework in which development parcels, massing, heights, relationships of buildings, circulation and streets are defined in enough detail to define predictable outcomes but with sufficient flexibility to allow various responses to actual developers and designers of which there may be several within one master plan area. We also have significant expertise with planned unit developments, form-based codes and non-physical aspects of master planning such as funding, scheduling and phasing. Our team has prepared master plans for various jurisdictions and agencies. Significant projects include projects for the City of Fort Lauderdale, City of Marathon and City of Plantation; as well as the Broward County Convention Center and the Fort Lauderdale/Hollywood International Airport.

Public Involvement

KEITH recognizes that among the many contributing factors to a successful project, public involvement and consensus building are critical elements and we strive to incorporate into every major project. Our public involvement program has been extremely successful in establishing lines of communication among the affected parties so that everyone has an opportunity to contribute towards the development of the project. We have facilitated charrettes for numerous municipal projects to gain awareness of community preferences and concerns on upcoming developments. On many sensitive construction projects, KEITH has established a community hotline manned by our project engineers to assist in resolving community construction related concerns in a timely and effective manner.

Construction Engineering Inspections

It is imperative that the CEI team understands the significant differences in the two roles and the dissimilar management approach of the Contractor vs. the CEI. KEITH specializes in Construction Project Management services, acting and focusing in the capacity of the Owner's Representative overseeing General Contractors. We subscribe to only one mission and one allegiance, and that is the successful implementation of all contracts to the benefit of the project and Pembroke Park.

The CEI will provide on-site Quality Assurance Inspectors who are responsible to provide daily inspection reports to document their observations, activities on the project, directions to and agreements with the contractor. KEITH will be responsible for the supervision of Quality Assurance Inspectors and review of the Inspector's Daily Reports and action items required to respond to issues noted in their reports. Our CEI's will also coordinate the daily web based photographic documentation efforts for the project and will ensure remote access is functional, and that photo documentation is incorporated into the Daily and Weekly Reports.

The Inspector's Daily Report is an important tool for the documentation of progress, conditions, manpower, equipment utilization, reporting problems and assessing productivity. Reports, including daily photographic evidence of progress are essential to the evaluation of claims, processing of progress payment requests, and acceptance or rejection. If the inspector determines the work was not installed according to Contract Documents, a Notice of Non-conformance (NCR) shall be issued to the Contractor. The Contractor would be given adequate time to rectify the non-conforming work in accordance with

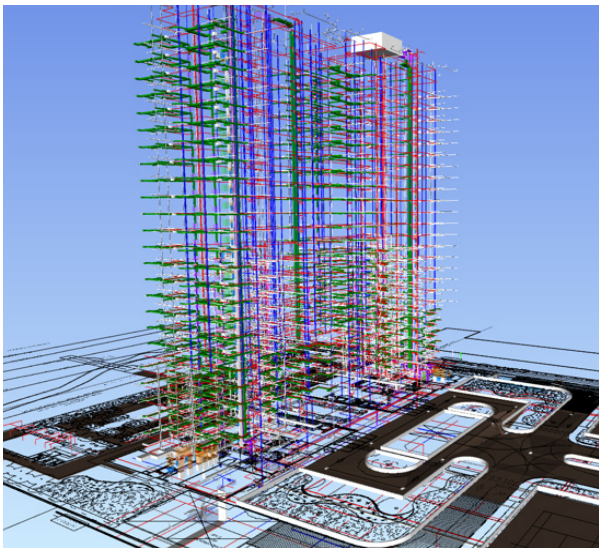
approved protocols. The responsibility of the CEI is to ensure that all NCRs are rectified and closed in a timely manner. The KEITH Team has a proven track record of successfully closing all NCR's issued on projects and are committed to following QA procedures to ensure the Town is provided with a quality product it can be proud of.

Sustainability and LEED Experience

KEITH is devoted to improving the built and natural environments we are fortunate to be a part of and for our team that starts at our home offices. Sustainability requires a more holistic approach than before; one that looks at a triple bottom line from economic, social and ecological aspects.

The KEITH Team is very familiar working on projects incorporating LEED strategies and practices promoting better buildings and project sites that complement our environment and enhance our communities. KEITH provided integrated engineering design components on a number of public facilities to facilitate a designation of a LEED-Certified Building. The KEITH Team has completed over 17 LEED accredited projects throughout the nation. Some relevant projects include:

- Glade View Elementary School – LEED BD+C
- Rosenwald Elementary School – LEED BD+C
- Hallandale Beach Fire Station 7 – LEED BD+C New
- Nova Southeastern University Sports Center – LEED Silver
- Pinnacle at Tarpon River – LEED BD+C Homes
- Tamarac Fire Station 78 – LEED BD+C New
- FLL Terminal 2 – LEED BD+C New
- FLL Terminal 3 – LEED BD+C New



Minimizing Change Orders

KEITH can evaluate alternatives and recommend substitute methods or materials based on their relative economy and life cycle. Our efforts are designed and focused to identify and make recommendations on cost issues and risks as early as possible in order to address and mitigate prior to start of construction.

The inspection staff will be armed with this detailed information during construction to ensure budget is following approved estimates. Clients are notified of any outstanding issues based on each completed deliverable. Constructability Reviews will be in place in order to minimize and/or eliminate any potential change orders by the General Contractor during the construction process based on conflicts between disciplines, drawings and specifications.

Willingness to Meet Time and Budget Requirements

KEITH has historically completed projects ahead of schedule and within budget parameters. Our hands on project approach and dedicated team, as described in previous sections, has proven their ability to control the design process, expedite the permitting process and move quickly into construction. Our budgets are based on historical costs for similar projects and estimated levels of effort anticipated for each individual project. Combining our local knowledge and input from key subconsultant partners on the elements needed to plan and execute the project, we are confident the project can be completed within the time and budget allotted. Yes, the KEITH Team is willing and confident we can meet anticipated project completion dates for the entire duration of this contract and will provide design and CA services to keep total project cost below the project budget ceilings. We will work with the Town staff to assure individual work order schedules and budgets are properly identified and expectations are understood to deliver on-time projects while being good stewards of the Town's funds.

Technology

At KEITH, we invest in technologies that benefit the process and outcome of our client's projects. For years now, our firm has led the industry utilizing AutoCAD, Civil 3D, Revit, and other high-powered BIM/ CIM Software. To supplement our high-quality location services, KEITH is excited for our new Leica Pegasus 2 Mobile LiDAR to complement our existing Leica Scan Station C10 and Faro scanners. The use of Mobile LiDAR can expedite project phasing as traditional surveying can take time depending on the size of the area, and it can also reduce the need to have field crews in or near the roadway.

Every member of our design team has a proven history of successfully completing projects of this size and nature, and this Contract has our full attention and commitment. Each member of our team is wholly committed to the success of work authorizations to be issued under this contract. At KEITH we carefully monitor, measure and push to fruition each and every activity on the work authorization. We measure its progress to ensure we remain on track and on schedule. This is true through planning, design, permitting, bidding, administration of the construction contract and project close-out. Understanding the proposed scope and schedule of the Town on each work authorization is fundamental to the success of each project and the KEITH Team knows what it takes to meet the expected goals and objectives of the Town and all the associated stakeholders.

Commitment to Success

The KEITH Team is a representation of the combined experience, strengths and capabilities of professional personnel who have all been providing services for or working with projects that are subject to the Town's standards and specifications, working in South Florida for decades. This combination provides the Town with a diverse team, led by a firm that is Broward County based and well-known in the community.

Every member of our design team has a proven history of successfully completing projects, and this contract has our full attention and commitment. Each member of our team is wholly committed to the success of work authorizations to be issued under this contract. At KEITH, we carefully monitor, measure and push to fruition each and every activity on the work authorization. We measure its progress to ensure we remain on track and on schedule. This is true through planning, design, permitting, bidding, administration of the construction contract and project close-out.

Understanding the proposed scope and schedule of these utility projects is fundamental to the success of this project and the KEITH Team knows what it takes to meet the expected goals and objectives of the Town.

We are fully committed to continuing to be a true partner with the Town of Pembroke Park, always keeping the Town's interests at heart, while delivering projects on time and within budget.

Special Qualifications	Qualification Effective

Form **W-9**
(Rev. March 2024)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give form to the requester. Do not send to the IRS.

Before you begin. For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See *Specific Instructions* on page 3.

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

Keith and Associates, Inc.

2 Business name/disregarded entity name, if different from above.

dba KEITH

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☑ C corporation ☐ S corporation ☐ Partnership ☐ Trust/estate

☐ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) . . . .

Note: Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see instructions)

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any)

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any)

(Applies to accounts maintained outside the United States.)

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions . . . . . ☐

5 Address (number, street, and apt. or suite no.). See instructions.

301 East Atlantic Boulevard

Requester's name and address (optional)

6 City, state, and ZIP code

Pompano Beach, FL 33060

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–			–				

or

Employer identification number

6	5	–	0	8	0	6	4	2	1

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here Signature of U.S. person [signature] Date 01/31/2025

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

2. Conflicts of Interest*

Respondent covenants that it presently has no interest and shall not acquire any interest which would conflict in any manner of degree with the performance of the Services covered under this Agreement. Furthermore, Respondent warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for Respondent to solicit or secure this Agreement and that it has not paid or agreed to pay any person, company, corporation, individual, or firm, other than a bona fide employee working solely for Respondent any fee, commission, percentage, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Respondent, and its subconsultants at any tier, certify that they have not entered into any contract, subcontract, or arrangement in connection with the Project covered under this Agreement, or of any property included or planned to be included in the Project, in which any member, officer, of employee of Respondent or its subconsultants, during its tenure, or for two years thereafter, has any interest, direct or indirect. Respondent, and its subconsultants at any tier, shall insert the following provision into each of their contracts and subcontracts: "No member, officer, or employee of the subconsultant, during their tenure or for two years thereafter, shall have any interest, direct or indirect, in this contract or the proceeds thereof."

Do you have any Conflicts of Interest to report?

☐ Yes

■ No

**Response required*

When equals "Yes" Please upload a document listing all your Conflict of Interest

3. No Contingency Affidavit*

Affiant certifies the following:

a. Neither Firm nor any principal, employee, agent, representative or family member has promised to pay, and Firm has not and will not pay, a fee the amount of which is contingent upon the Town of Pembroke Park awarding a contract.

b. Firm warrants that neither it, nor any principal, employee, agent, or representative has procured, or attempted to procure, a contract with the Town of Pembroke Park in violation of any of the provisions of the Broward County conflict of interest and code of ethics ordinances.

c. Consultant acknowledges that a violation of this warranty may result in the termination of any contracts and forfeiture of funds paid, or to be paid, to the Consultant if awarded a contract.

■ Please Confirm

**Response required*

4. Copeland Anti-Kickback Affidavit*

Affiant certifies that no portion of any sums will be paid to any employees of the Town of Pembroke Park, its elected officials, or its consultants, as a commission, kickback, reward or gift, directly or indirectly by Proposer or any member of Proposer's firm or by any officer of the corporation in exchange for business with the Town of Pembroke Park.

■ Please Confirm

**Response required*

5. Certifications*

Respondent certifies that they comply (or will comply) with the statements concerning, but not limited to: Compliance with Laws, Conflict of Interest, Convictions, Debarment, Discriminatory Vendor, Drug Free Workplace, Equal Employment Opportunity, E-Verification System, Gopher Tortoise Relocation, Immigration and Nationality Act, Lobbying, Non-Collusion, Prohibited Interests, Public Entity Crime and Scrutinized Companies.

■ Please Confirm

**Response required*

6. Compliance with Laws*

Respondent shall comply with all laws, rules, codes, ordinances, and licensing requirements that are applicable to the conduct of its business, including those of Local, State and Federal agencies having jurisdiction and authority. These laws, shall include, but not be limited to, Chapter 287, Florida Statutes, the Uniform Commercial Code, the Immigration and Nationalization Act, the Americans with Disabilities Act, the United States Occupational Safety and Health Act, the United States Environmental Protection Agency, the State of Florida Department of Environmental Protection, Code of Federal Regulations and all prohibitions against discrimination on the basis of race, religion, sex, creed, national origin, handicap, marital status, sexual orientation, gender identity or expression or veteran's status. Violation of such laws shall be grounds for termination of the Agreement.

■ Please Confirm

**Response required*

7. Convictions*

Respondent has fully informed Owner of all convictions of the firm, its affiliates (as defined in section 287.133(1) (a), Florida Statutes), and all directors, officers, and employees of the firm and its affiliates for violation of state or federal antitrust laws with respect to a public contract for violation of any state or federal law involving fraud, bribery, collusion, conspiracy or material misrepresentation with respect to a public contract. This includes disclosure of the names of current employees who were convicted of contract crimes while in the employ of another company.

■ Please Confirm

**Response required*

8. Debarment*

Respondent certifies to the best of their knowledge and belief, that they and their principals 1) are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Municipal, County, State or Federal department or agency, 2) have not, within a three-year period preceding execution of this Agreement, been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records; making false statements; or receiving stolen property, 3) are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated above, 4) have not within a three-year period preceding execution of this Agreement had one or more public transactions (Federal, State or local) terminated for cause or default, and 5) will advise Town immediately if their status changes and will provide an explanation for the change in status.

■ Please Confirm

**Response required*

9. Drug-Free Workplace Certification*

In accordance with Florida Statute 287.087 (current version), Respondent hereby certifies the following:

1. Publishes a written statement notifying that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the workplace named above, and specifying actions that will be taken against violations of such prohibition.
2. Informs employees about the dangers of drug abuse in the workplace, the firm's policy of maintaining a drug free working environment, and available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug use violations.
3. Gives each employee engaged in providing commodities or contractual services that are under proposal a copy of the statement specified above.
4. Notifies the employees that as a condition of working on the commodities or contractual services that are under proposal, the employee **will** abide by the terms of the statement and will notify the employer of any conviction of, pleas of guilty or nolo contendere to, any violation of Chapter 893, or of any controlled substance law of the State of Florida or the United States, for a violation occurring in the workplace, no later than five (5) days after such conviction, and requires employees to sign copies of such written statement to acknowledge their receipt.
5. Imposes a sanction on, or requires the satisfactory participation in, a drug abuse assistance or rehabilitation program, if such is available in the employee's community, by any employee who is so convicted.
6. Makes a good faith effort to continue to maintain a drug free workplace through the implementation of the Drug Free Workplace Program.

"As a person authorized to sign this statement, I certify that the above named business, firm or corporation complies fully with the requirements set forth herein".

By clicking confirm below, Respondent certifies that the information as provided in this Drug-Free Workplace Certification, is truthful and correct at the time of submission.

■ Please Confirm

**Response required*

13. Discriminatory Vendor*

Respondent certifies that they are not subject to Section 287.134 (2)(a) which specifies that an entity or affiliate who has been placed on the discriminatory vendor list may not submit a Proposal on a contract to provide any goods or services to

a public entity, may not submit a Proposal on a contract with a public entity for the construction or repair of a public building or public work, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with public entity.

■ Please Confirm

**Response required*

14. Equal Employment Opportunity*

Respondent shall not discriminate on the basis of race, color, sex, sexual orientation, gender identity, age, national origin, religion, and disability or handicap in accordance with the Provisions of: Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000 et seq.), Title VII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), Florida Civil Rights Act of 1992 (§ 760.10 et seq.), Title 41 CFR Part 60 for compliance with Executive Orders 11246 and 11375, Title 49 CFR 23 and Title 49 CFR 26 for Disadvantaged Business Enterprises, Age Discrimination Act of 1975 (42 U.S.C. § 6101, et seq.), Title 49 CFR 21 and Title 49 CFR 23, Nondiscrimination on the basis of handicap, Title 49 CFR 27, Americans with Disabilities Act of 1990 (42 U.S.C. 12102, et. Seq.), Federal Fair Labor Standards Act (29 U.S.C. § 201, et seq.), and any other Federal and State discrimination statutes. Respondent shall furnish pertinent information regarding its employment policies and practices as well as those of their proposed subcontractors as the Secretary of Labor, or Town may require. The above shall be required of any subcontractor hired by Respondent. All Equal Employment Opportunity requirements shall be included in all non-exempt subcontracts entered into by Respondent. Subcontracts entered into by Respondent shall also include all other applicable labor provisions. No subcontract shall be awarded to any non-complying subcontractor. Additionally, Respondent shall insert in its subcontracts a clause requiring subcontractors to include these provisions in any lower tier subcontracts that may in turn be made. Respondent shall comply with all state laws and local ordinances, except that any preferential consideration of local in-state subcontractors is NOT allowed.

■ Please Confirm

**Response required*

15. E-Verification System*

Respondent and its subcontractors shall utilize the U.S. Department of Homeland Security's E-Verify system, https://www.uscis.gov/, in accordance with Section 448.095, Florida Statutes, to verify the employment eligibility of: (1) all persons employed by Respondent during the contract term to perform any duties within Florida, and; (2) all persons, including subcontractors, assigned by Coordinating Consultant to perform work pursuant to this Contract. Respondent meeting the terms and conditions of the E-Verify System are deemed to be in compliance with this provision. Respondent and its subcontractors shall provide Town with affidavits stating that they do not employ, contract with, or subcontract with an unauthorized alien. Town is obligated to terminate this Agreement upon a good faith belief that Respondent or its subcontractors has knowingly violated Section 448.095, Florida Statutes. E-Verification Identification

■ Please Confirm

**Response required*

16. E-Verification Identification Number*

Provide your E-Verification Identification Number 1215852

**Response required*

17. Immigration and Nationality Act*

Respondent shall comply with all immigration laws as outlined in 8 USC § 1324a- Unlawful employment of aliens. Town will not intentionally award Town contracts to any Respondent who knowingly employs unauthorized Alien workers . Any violation of the employment provisions outlined in the Immigration and Nationality Act throughout the term of any Agreement with Town may result in immediate termination of the Agreement. Town will consider the employment of unauthorized aliens a violation of Section 274A (e) of the Immigration and Nationality Act. Such violation will be cause for unilateral

cancellation of the Agreement, by Town, if Consultant knowingly employs unauthorized aliens.

■ Please Confirm

**Response required*

18. Lobbying*

Respondent confirms that it will not, in connection with the Agreement, directly or indirectly

A. offer, confer, or agree to confer any pecuniary benefit on anyone as consideration for any Town officer or employee's decision, opinion, recommendation, vote, other exercise of discretion, or violation of a known legal duty, or
B. offer, give, or agree to give to anyone any gratuity for the benefit of, or at the direction or request of, any Town officer or employee. For purposes of clause (2), "gratuity" means any payment of more than nominal monetary value in the form of cash, travel, entertainment, gifts, meals, lodging, loans, subscriptions, advances, deposits of money, Services, employment, or contracts of any kind.

■ Please Confirm

**Response required*

19. Non-Collusion*

Respondent agrees that neither it, nor any of its officers, partners, agents or employees have entered into any agreement, participated in any collusion, or otherwise taken any action which is in restraint of a free competitive solicitation in connection with this Agreement, and that Respondent intends to do the work with its own bona fide employees or subcontractors and has not provided a Proposal for the benefit of another Consultant/Vendor. Furthermore, Respondent certifies that its affiliates, subsidiaries, directors, officers, and employees are not currently under investigation by any governmental authority and have not in the last ten (10) years been convicted or found liable for any act prohibited by law in any jurisdiction, involving conspiracy or collusion with respect to submitting a Proposal on any public contract.

■ Please Confirm

**Response required*

20. Prohibited Interests*

Respondent, and its subcontractors at any tier, certify that they have not entered into any contract, subcontract, or arrangement in connection with the project covered under this Request for Proposal, or of any property included or planned to be included in the project, in which any member, officer, of employee of the Respondent or its subconsultants, during its tenure, or for two years thereafter, has any interest, direct or indirect.

■ Please Confirm

**Response required*

21. Public Entity Crime*

Pursuant to 287.133, Florida Statute, A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a Proposal, or reply on a contract to provide any goods or services to a public entity; may not submit a Proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit Proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in s. 287.017, Florida Statutes for

CATEGORY TWO for a period of 36 months following the date of being placed on the convicted vendor list.

■ Please Confirm

**Response required*

22. Scrutinized Companies*

Respondent certifies that it is not listed on (a) the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Florida Statues, or is engaged in a boycott of Israel; (b) the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Terrorism Sector List, created pursuant to Section 215.473, Florida Statutes; or (c) is engaged in business operations in Cuba or Syria. Respondent further understands and accepts that any contract issued as a result of this Proposal shall be subject to Section 287.135, Florida Statutes, and subject to immediate termination by Town in the event there is any misrepresentation or false certification on the part of Respondent.

■ Please Confirm

**Response required*

PROPOSER AFFIRMATION

I, the undersigned affiant, being first duly sworn as an authorized agent of the below-named firm, does hereby affirm and attest under penalty of perjury as the proposed Consultant for the Town of Pembroke Park that the certifications and statements provided above on behalf of Consultant are true to the best of affiant's knowledge and belief and that Consultant is compliant with all requirements outlined in these Town of Pembroke Park's Affidavits. Consultant acknowledges it is required to comply with and keep current all statements sworn to in the above affidavits and will notify the Town of Pembroke Park immediately if any of the statements attested hereto are no longer valid.

6.1 AFFIDAVIT ATTESTING TO NONCOERCIVE CONDUCT FOR LABOR OR SERVICES

Effective July 1, 2024, Section 787.06, Florida Statutes, a nongovernmental entity executing, renewing, or extending a contract with the Town of Pembroke Park is required to provide an affidavit, signed by an officer or a representative of the nongovernmental entity under penalty of perjury, attesting that the nongovernmental entity does not use coercion for labor or services as defined in Section 787.06(2)(a), Florida Statutes.

By signing below, **I hereby affirm under penalty of perjury that**:

1. I have read Section 787.06, Florida Statutes, and understand that this affidavit is provided in compliance with the requirement that, upon execution, renewal, or extension of a contract between a nongovernmental entity and the Town of Pembroke Park, the nongovernmental entity must attest to the absence of coercion in labor or services.

2. I am an officer or representative of KEITH, a nongovernmental entity.

3. KEITH does not use coercion for labor or services as defined in the relevant section of the law.

6.2 AFFIDAVIT REGARDING PROHIBITION ON CONTRACTING WITH ENTITIES OF FOREIGN COUNTRIES OF CONCERN

Pursuant to Section 287.138, Florida Statutes (which is expressly incorporated herein by reference), the Town of Pembroke Park may not knowingly enter into a contract with an entity which would give access to an individual's personal identifying information if (a) the entity is owned by the government of a foreign country of concern; (b) the government of a foreign country of concern has a controlling interest in the entity; or (c) the entity is organized under the laws of or has its principal place of business in a foreign country of concern.

This affidavit must be completed by an officer or representative of an entity submitting a bid, proposal, or reply to, or entering into, renewing, or extending, a contract with the Town of Pembroke Park which would grant the entity access to an individual's personal identifying information.

1. KEITH ("entity") does not meet any of the criteria in paragraphs (2)(a)-(c) of Section 287.138, F.S.

6.3 CONSULTANT QUESTIONNAIRE

The completed Consultant Questionnaire form should be submitted with the solicitation response. Failure to timely submit with the response may affect may result in Consultant being deemed non-responsive.

If a response requires additional information, the Consultant should upload a written detailed response; each response should be numbered to match the question number. The completed questionnaire and attached responses will become part of the procurement record. It is imperative that the person completing the form be knowledgeable about the proposing Firm's business and operations.

1. Legal Business Name: Keith and Associates, Inc.
2. Doing Business As / Fictitious Name: (if applicable): KEITH
3. Federal Employer I.D. No. (FEIN): 65-0806421
4. Website address: (if applicable): www.keithteam.com
5. Principal place of business address: 301 E Atlantic Ave, Pompano Beach, FL 33060
6. Office location responsible for this project: 301 E Atlantic Ave, Pompano Beach, FL 33060

   Telephone No.: 954.788.3400
7. Type of business *(check appropriate box):*
   - [x] Corporation (specify the State of Incorporation):
   - [ ] Sole Proprietor
   - [ ] Limited Liability Company (LLC)
   - [ ] Limited Partnership
   - [ ] General Partnership (State and County filled in)
   - [ ] Other – Specify: _____
8. AUTHORIZED CONTACT(S) FOR YOUR FIRM:

   Name: Alex Lazowick, PE, PMP, ENV SP

   Title: President/CEO

   E-mail: ALazowick@KEITHteam.com

   Telephone No. 954.788.3400

Name: Tom Green, PE

Title: Director of Municipal Services

E-mail: TGreen@KEITHteam.com

Telephone No. 954.788.3400

9. List name and title of each principal, owner, officer, and major shareholder:

a) Dodie Keith-Lazowick, PSM - Chairman

b) Alex Lazowick, PE, PMP, ENV SP - President/CEO

c) _____

d) _____

10. Affiliated Entities of the Principal(s):

List the names and addresses of "affiliated entities" of the Firms' principal(s) over the last five (5) years (from the solicitation opening deadline) that have acted as a prime Consultant with the Town. Affiliated entities of the principal(s) are those entities related to the Consultant by the sharing of stock or other means of control, including but not limited to a subsidiary, parent or sibling entity.

a) N/A

b) _____

c) _____

d) _____

11. Has your firm, its principals, officers or predecessor organization(s) been debarred or suspended by any government entity within the last three (3) years? *If yes, specify details in an attached written response.*

☐ Yes ☑ No

12. Has your firm, its principals, officers or predecessor organization(s) ever been debarred or suspended by any government entity? *If yes, specify details in an attached written response the reinstatement date, if granted.*

☐ Yes ☑ No

13. Specify the type of specialized service your firm offers: civil engineering, surveying and mapping, landscape architecture, subsurface utility engineering, utility coordination, planning, transportation engineering, and construction management services

14. How many years has your firm been in business while providing the services offered within this solicitation? 26 years.

15. Is your firm's business regularly engaged in and routinely providing services offered within this solicitation?

☑ Yes ☐ No

16. Has your firm ever failed to complete any professional services during the last three (3) years? *If yes, specify details in an attached written response.*

☐ Yes ☑ No

17. Is your firms or any of its principals or officers currently principals or officers of another organization? *If yes, specific details in an attached written response.*

☐ Yes ☑ No

18. Have any voluntary or involuntary bankruptcy petitions been filed by or against your firm, its parent or subsidiaries or predecessor organizations during the last three (3) years? *If yes, specify details in an attached written response.*

☐ Yes ☑ No

19. Has your firm's surety ever intervened to assist in the completion of a contract or have Performance and/or Payment Bond claims been made to your firm or its predecessor's sureties during the last three years? *If yes, specify details in an attached written response, including contact information for owner and surety company*.

☐ Yes ☑ No

20. Non-Collusion Certification: Consultant shall disclose, to their best knowledge, any Town of Pembroke Park officer or employee, or any relative of any such officer or employee as defined in Section 112.3135 (1)(c), the Florida Statues who is an officer or director of, or has a material interest in, the Vendor's business, who is in a position to influence this procurement. Any Town of Pembroke Park officer or employee who has input into the writing of specifications or requirements, solicitation of offers, decision to award, evaluation of offers, or any other activity pertinent to this procurement is presumed, for purposes hereof, to be in a position to influence this procurement. Failure of a Consultant to disclose any relationship described herein shall be reason for debarment *(check one).*

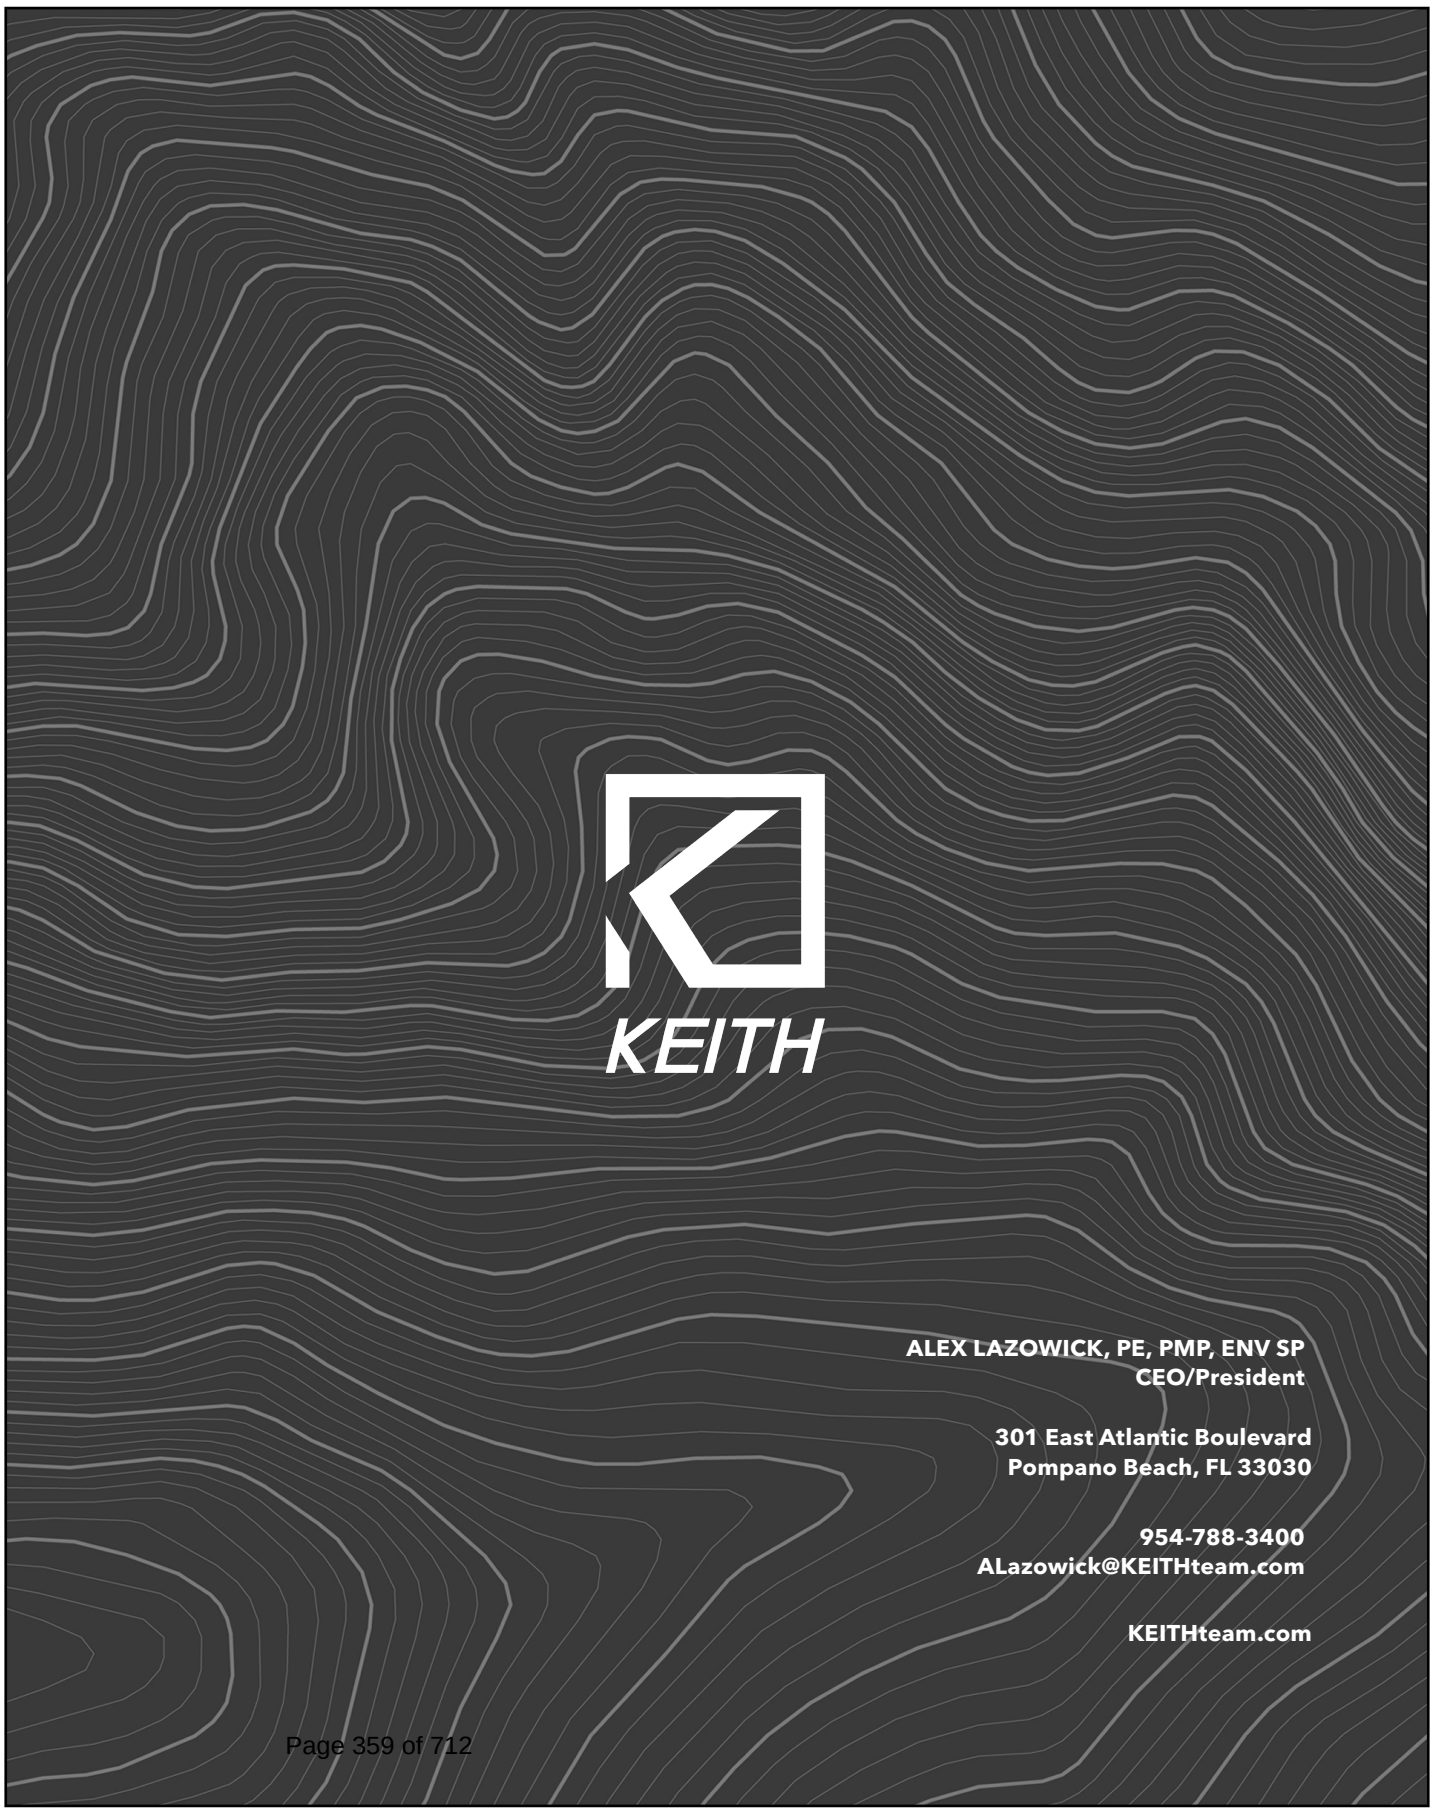
☑ Consultant certifies that this offer is made independently and free from collusion;

or

☐ Consultant is disclosing names of officers or employees who have a material interest in this procurement and is in a position to influence this procurement. *Consultant must include a list of name(s), and relationship(s) with its submittal.*

6.4 DESIGNATION OF QUALIFIED DISCIPLINE FORM

NAME OF COMPANY:



Keith and Associates, Inc., dba KEITH

(Name of Firm submitting RFQ)

Proposers must have experience in the related areas below described in Section 3.0 Scope of Services of the RFQ. Accordingly, Proposers shall specify whether such experience requirement is satisfied by the Proposer and/or any of its proposed sub-consultants by identifying the applicable entity along with the category of experience and number of years of experience as required in Section 4.0 Submittal Requirements. Resumes and experience submitted with the Proposal must specify and substantiate the experience and qualifications provided herein in the same format as below, as needed.

CHECK CATEGORY (DISCIPLINE) YOU ARE APPLYING:

- ☐ **1. ARCHITECTURAL SERVICES**
- ☑ **2. CIVIL. STRUCTURAL AND MECHANICAL, ELECTRICAL, PLUMBING (MEP) ENGINEERING SERVICES**
- ☑ **3. TRANSPORTATION, TRAFFIC AND ROADWAY ENGINEERING**
- ☑ **4. LANDSCAPE ARCHITECTURAL SERVICES**
- ☐ **5. ENVIRONMENTAL ENGINEERING SERVICES**
- ☑ **6. PLANNING AND COMMUNITY DEVELOPMENT**
- ☑ **7. SURVEYING AND MAPPING**
- ☑ **8. DRAINAGE AND STORMWATER**
- ☑ **9. BUILDING INSPECTIONS, PLANS REVIEW AND PERMITTING**
- ☑ **10. CONSTRUCTION ENGINEERING INSPECTION (CEI)**
- ☑ **11. PROJECT MANAGEMENT**

DEMANDSTAR SUBMITTAL

RE: REQUEST FOR QUALIFICATIONS – RFQ 25-01 – CIVIL ENGINEERING CONSULTANT SERVICES
CONSULTANT'S COMPETITIVE NEGOTIATION ACT (CCNA)
CAS PROPOSAL #0832

Dear Selection Committee:

Craig A. Smith & Associates, LLC (CAS) is pleased to submit our qualifications in response to RFQ No. 25-02 for Architectural and Engineering Services through Continuing Contracts (CCNA). Our firm is fully licensed and staffed to perform the professional civil engineering, surveying, transportation, drainage, CEI, and project management services outlined in professional Categories 2, 3, 7, 8, 10, and 11 of the RFQ.

Relevant Experience and Capabilities Aligned to RFQ Categories

Category 2 – Civil, Structural, and MEP Engineering Services

CAS has delivered civil site design, utility infrastructure, drainage, roadway, and facility improvement projects in South Florida for over 45 years. For the Town of Pembroke Park, our work has included site planning, pump station upgrades, force mains, roadway improvements, drainage retrofits, and master plans such as:

- I-95 Stormwater Pump Station
- Lift Station Nos. 1, 3, and 18 (rehabilitations)
- SW 52nd Avenue Roadway & Drainage Improvements
- SW 31st Avenue Stormwater Improvements
- SW 25th Street Roadway & Drainage Improvements
- Sanitary Sewer and Stormwater Master Plans

To fulfill the structural, building systems, and foundation-related aspects of Professional Category 2 as outlined in the RFQ, CAS maintains long-standing partnerships with specialty firms. **MU Engineers** provides structural design, analysis, and foundation engineering for new construction and rehabilitation projects. **Smith Engineering Consultants (SEC)** delivers Mechanical, Electrical, and Plumbing (MEP) services, including load calculations, system design, inspections, and construction documentation.

For subsurface analysis and foundation support on civil, drainage, and transportation-related projects, CAS is supported by **RADISE International**, our geotechnical engineering partner. RADISE provides soils testing, subsurface investigations, and materials evaluations that inform roadway, drainage, and structural designs and ensure constructability.

Together with these partners, CAS delivers comprehensive civil, structural, geotechnical, and MEP services including feasibility studies, permitting support, emergency response, rehabilitation planning, and preparation of specifications and construction documents for new and existing facilities.

CRAIG A. SMITH & ASSOCIATES
A SMART-INFRASTRUCTURE COMPANY

Category 3 – Transportation, Traffic, and Roadway Engineering

CAS provides roadway design, resurfacing, traffic calming, pavement management, pedestrian and multi-use trail design, and complete streets/streetscape projects. Through our long-term teaming arrangement with **VN Engineers**, we supplement our in-house transportation capabilities with full traffic analysis services. This partnership allows us to deliver comprehensive solutions that include multimodal access improvements, pavement markings and signing, traffic calming strategies, and roadway drainage design.

Category 7 – Surveying a Full Service

CAS maintains in-house surveying staff and advanced field equipment for boundary and topographic surveys, platting, legal descriptions, digital terrain modeling, utility mapping, and parcel mapping. Our team provides survey support for design, construction, and as-built documentation. Aerial mapping, SUE, and GIS deliverables are provided through our integrated field and drafting personnel.

Category 8 – Drainage and Stormwater

Stormwater master planning, drainage modeling, flood mitigation, permitting, and design of collection/conveyance systems are core services for CAS. We have developed feasibility analyses, pump stations, canal improvements, erosion control, and regulatory compliance strategies for local governments throughout South Florida, including numerous successfully completed drainage projects in Pembroke Park and planned capital projects.

Category 10 – Construction Engineering Inspection (CEI)

CAS provides CEI services including field inspection, conformance verification, shop drawing review, certification of manufactured components, construction documentation, progress payments, claims review, and change order evaluation. Our inspectors and construction managers have delivered CEI for utility, roadway, and drainage projects funded at the local, state, and federal levels.

Category 11 – Project Management

Our project managers lead design coordination, schedule control, stakeholder communication, utility coordination, public outreach, grant administration, and regulatory interface. CAS has secured and administered funding from FDOT, FEMA/HMGP, SRF, USDA, CDBG, and other state and county programs. We routinely prepare agendas, meeting minutes, and status reports for pre-construction, interagency, and public meetings.

Qualifications, Personnel, and Local Presence

CAS is a mid-sized, Florida-based firm with over 50 professionals, including Professional Engineers, Professional Surveyors, CADD technicians, CEI inspectors, construction managers, and administrative support. Many of our employees have over 25 years with the company, ensuring continuity and immediate mobilization. Our Broward office, located at 1425 E. Newport Center Drive in Deerfield Beach, provides access to all Town and regional projects.

We partner with long-standing subconsultants when specialized support is required:

- **Smith Engineering Consultants** – Mechanical/Electrical/Plumbing (MEP)
- **MU Engineers** – Structural Engineering
- **VN Engineers** – Transportation/Traffic Engineering
- **RADISE** – Geotechnical & Materials Testing

This team is experienced working under a single management structure and can provide complete A/E support.

CRAIG A. SMITH & ASSOCIATES
A SMART-INFRASTRUCTURE COMPANY

Commitment to the Town

CAS' 38-year relationship with the Town of Pembroke Park is evidence of our responsiveness, institutional knowledge, and successful delivery of capital improvements. Our familiarity with your procedures, utility systems, permitting agencies, budgets, and staff enables us to perform efficiently on projects of all sizes and scopes.

Stephen C. Smith, P.E., President, 1425 E. Newport Center Drive, Deerfield Beach FL 33442, 954-782-8222 will serve as Principal-in-Charge and primary contact. He brings 39 years of local experience with projects identical to the RFQ scope and will commit all technical, managerial, and financial resources necessary for successful contract performance.

CAS is committed to:

- Maintaining all required licensure and insurance
- Meeting schedules and budgets
- Providing high-quality plans, specifications, and construction oversight
- Supporting grant and funding compliance
- Coordinating with agencies, utilities, contractors, the public and any other stakeholders
- Delivering cost-effective, timely engineering solutions

We value the Town's trust and look forward to continuing our partnership. CAS appreciates your consideration and is fully prepared to perform the services requested under RFQ 25-02.

Respectfully submitted,
Craig A. Smith & Associates, LLC

Stephen C. Smith, P.E., President

Section 4.4:
Professional Capabilities and Project Experience

Section 4.4: Professional Capabilities and Project Experience

Craig A. Smith and Associates LLC (CAS) is a Florida firm licensed for the practice of professional engineering, surveying, utility locates and construction management services. CAS has offices in Palm Beach County, Miami-Dade County and Broward County.

Palm Beach County Office:
4152 W. Blue Heron Blvd.,
Suite 116
Riviera Beach, FL 33404
(561) 314 4445

Broward County Office:
1425 E. Newport Center Dr.
Deerfield Beach, FL 33442

(954) 782-8222

Miami-Dade Office
7900 Oak Lane
Miami Lakes, FL 33016

(305) 940-4661

Established in **1980**, CAS has grown from a municipal engineering and surveying firm into a **full-service civil engineering practice**. Our expertise includes civil engineering, surveying & mapping, subsurface utility engineering (SUE), grants and loan assistance, construction management, utility locating, and CAD design. CAS is a certified **Small Business Enterprise (SBE)** with Palm Beach County, the City of West Palm Beach, the Solid Waste Authority of Palm Beach County, and the South Florida Water Management District.

FIRM SIZE AND RESOURCES - CAS employs over **55 professional, technical, and administrative staff** including Registered Professional Engineers, Licensed Surveyors, ADDA-certified drafters, GIS specialists, construction inspectors, utility locators, and project managers. Our in-house team provides full support for municipal and utility projects while maintaining expertise across civil, structural, mechanical, electrical, plumbing, and transportation disciplines through teaming with **MU Engineers (structural)**, **Smith Engineering Consultants (MEP)**, **RADISE (geotechnical)**, and **VN Engineers (traffic/transportation)**.

ORGANIZATION - CAS is organized into five technical divisions supervised by Vice Presidents or Directors:

- Civil Engineering
- Surveying
- CADD (Computer-Aided Design & Drafting)
- Subsurface Utility Locates
- Construction Management

FIRM PHILOSOPHY & EXPERIENCE - CAS is committed to providing its clients with cost-effective, timely, comprehensive, high-quality professional services in the practice of civil engineering, surveying, construction management, utility locating and grant/legislative services. This commitment to excellence is achieved through the development of a team spirit of service to clients. CAS has extensive local South Florida experience in engineering design and construction management spanning over more than 45 years.

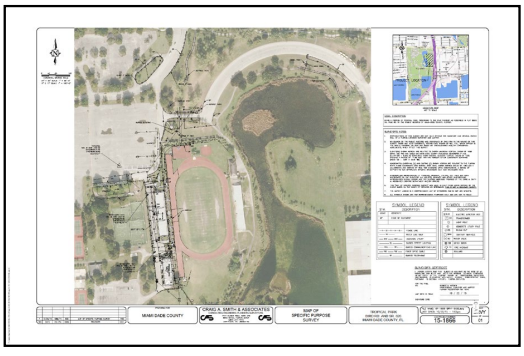
Our success can be exhibited by our tenure with our clients, many of which we have served for over 20 years or more. We put premium value on the opinions and input of the end users of our services, officials, staff and residents and strive to produce an end product that addresses their needs and expectations. CAS is committed to making clients successful by understanding their organization, methods of operation, challenges and achieving their objectives through a multi-discipline approach based on experience, innovation, and teamwork. We pride ourselves on establishing long-term relationships with our clients by providing them with the ultimate in successful consulting engineering services. We believe in providing clear and concise face-to-face communication with clients. And any communication via phone, fax, email, or other method shall be provided clearly and concisely. Response time to a client's request is usually within the hour if not by the close of the business day. CAS also strives to adopt platforms or software programs that clients require or utilize for project management in order to increase efficiency and flow of work.

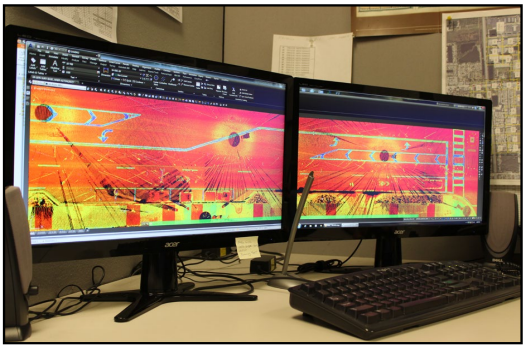
CLIENTS - Our decades of experience gives us the perspective to provide services for large municipal projects (over $200,000) as well as smaller projects (under $200,000). More specifically, design and construction administration/management of water mains, stormwater and wastewater force mains, sanitary sewer gravity lines, inflow and infiltration studies/repairs, wastewater pump station rehabilitation, pump sizing/expansion improvements, water treatment plant design/processes including expansions and improvements, regulatory compliance, drainage outfalls, roadway design, stormwater management, swale, sidewalk and drainage improvements and other related services such as hydraulic modeling, master planning, permitting, bidding assistance, surveying and subsurface utility engineering (SUE), grant assistance, technical studies or reports as required. CAS has successfully completed countless utility and drainage/roadway improvement projects during its 45+ year history and most recently completed projects for the City of Belle Glade, Indian Trail Improvement District, Sunshine Water Control District, City of Sunny Isles Beach, Glades County, City of Miami Beach, Town of Golden Beach, City of Pompano Beach, City of Oakland Park and the Town of Pembroke Park. In addition, recent projects which included water main and wastewater conveyance/ collection system improvements were completed for the following clients: Town of Pembroke Park, Bal Harbour Village, Moore Haven/Glades CCPWA Utility Authority, Town of Golden Beach, Hardee County, Village of El Portal, City of Lauderhill, City of Pompano Beach. CAS has provided professional engineering services as it relates to utility and infrastructure projects for the following municipalities:

Town of Pembroke Park (since 1987)
City of Margate (since 1988)
Bal Harbour Village (1989-2017)
Glades County (since 1993)
CCPWA Utility Authority (since 1994)
City of Moore Haven (since 1995)
Town of Golden Beach (since 2000)
City of Sweetwater (since 2000)
Hardee County (since 2000)
Spring Lake Improvement District (since 2001)
Village of El Portal (since 2003)
City of Oakland Park (since 2004)
City of Lauderhill (since 2013)
City of Sunny Isles Beach (since 2013)
City of Belle Glade (since 2013)
City of Pompano Beach (since 2015)
Sunshine Water Control District (since 2015)
City of Lake Worth Beach (2018)
City of Hallandale Beach (since 2020)
City of Deerfield Beach (since 2020)
Town of Davie (since 2020)
Hamal CDD (since 2021)
Town of Mangonia Park (since 2024)
Town of Highland Beach (since 2024)
City of Riviera Beach (since 2025)

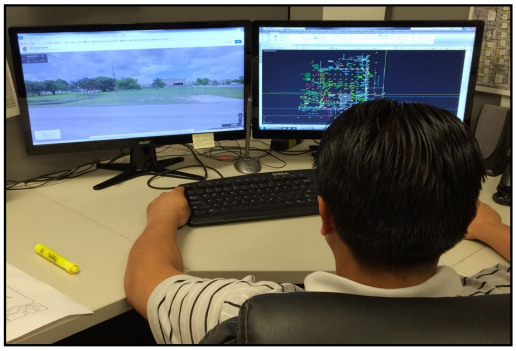
CIVIL ENGINEERING - CAS provides clients with a full range of engineering consulting services. Our engineers and trained specialists have extensive experience in assisting municipalities and utility departments with daily engineering needs such as planning, design, permitting and construction of cost-efficient operational utility systems. CAS engineering consulting services include:

- Storm Water Management
- Storm Water Utilities
- Water Treatment & Distribution Systems
- Wastewater Collection/Transmission & Treatment
- Potable Water Treatment Systems
- Wastewater Pump Station Design
- Stormwater Pump Station Design
- Canal Dredging and Sediment Removal
- Surface Water Management
- Utility Permitting
- Water/Wastewater Treatment Plant Design/Rehabilitation
- Utility Pipeline Design & Relocation (Water, Wastewater & Reclaimed Water)
- Utility Master Planning
- Grant Funding Assistance
- Facility Planning
- Solid Waste Studies
- Solid Waste Disposal and Leachate Treatment
- Development Permitting
- Feasibility Studies
- Inflow & Infiltration Studies
- Construction Cost Estimating
- Construction Management
- Construction Observation and Certification
- Contract Administration
- Effluent Reuse & Disposal
- Sludge Treatment & Disposal
- Roadway & Drainage Design



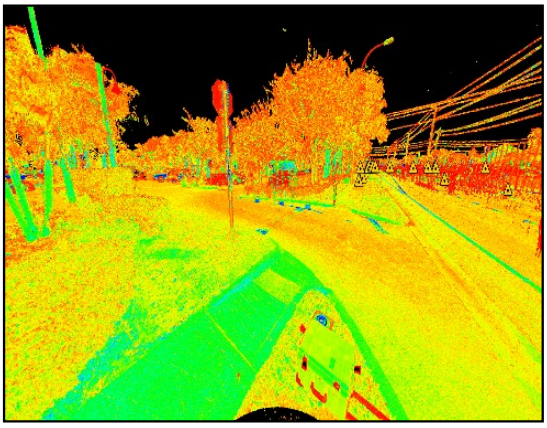


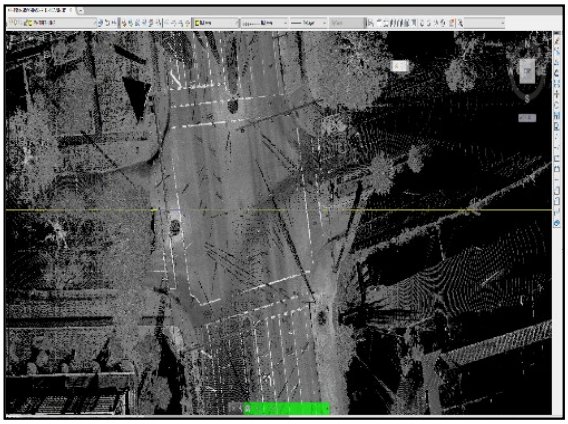
SURVEYING & MAPPING - CAS is one of South Florida most tenured and respected surveying firms providing complete land surveying services. Our surveying staff is comprised of licensed land surveyors who adhere to strict standards and give special attention to accuracy and detail. CAS utilizes the most up to-date electronic survey equipment such as Trimble C-3 and Trimble S7 Robotic Total Stations, Trimble R12i RTK Rovers, Trimble X7 Laser Scanners, Trimble TSC7 and TSC5 Data Collectors along with Trimble DiNi 0.3 Digital, and Topcon AT-B Series Levels, and DJI Mavic 3E drone. In addition, our survey crews have been trained based on engineering principles and implement daily quality control measures to ensure that our clients receive the highest quality service and most accurate basemaps. CAS surveying services include:



- Mapping & Platting
- Boundary & Acreage Surveys
- Land Description Preparation
- Construction Surveys
- Subdivision Designs & Calculation
- GPS Mapping
- Route Surveys
- Canal Cross-Sections
- Parcel Description & Sketches
- Condemnation Surveys
- Highway Construction Surveys
- Quantity Surveys
- Accident Surveys
- As-Built Certifications
- Mean High Water Surveys
- Drone Aerial Imagery and Surveys

CAS' "in-house" surveying capabilities eliminates the need for an additional subconsultant for this service and thus allows for more cost-effective and faster response to revisions or modifications to basemaps or scope of work as required for the duration of a project.





CADD (COMPUTER-AIDED DESIGN & DRAFTING) - CAS employs on-staff Florida Certified American Design & Drafting Association CADD operators and Autodesk Certified professionals. Our CADD technicians prepare detailed drawings, layouts, exhibits, topographical maps, and graphic representations of survey information & engineering designs. Designs relate to engineering projects such as water, sewer, reclaimed water, paving and drainage systems. Craig A. Smith & Associates prides itself on keeping its workforce educated and equipped to handle today's most challenging and rewarding tasks. CAS utilizes the latest AutoCAD software (Civil3D), custom-built AutoCAD systems and functions, as well as some industry-first hardware including 3D laser scanning technologies. In summation, the CADD systems CAS uses are:

- AutoCAD
- Autodesk Civil 3D
- Autodesk Map 3D
- Navisworks

Clients benefit from CAS' experienced CADD staff who work closely with project managers and client staff on assigned utility projects and provide any technical support to client staff related to Autodesk Civil & Map 3D use.

SUE (SUBSURFACE UTILITY ENGINEERING) - CAS provides complete subsurface utility engineering and location services utilizing the latest in electronic verification, ground penetrating radar, vacuum excavation and GPS survey equipment. CAS can provide utility location information in various formats from simplistic 2D (two dimensional) to comprehensive 3D (three dimensional) Radar Tomography coupled with advanced software platforms (AutoCAD Civil 3D). CAS performs subsurface utility engineering providing utility mapping, electromagnetic designating (EMD), 2D radar designating/ground penetrating radar (GPR), 3D radar tomography (RT), vacuum soft digs, and conventional and GPS utility surveys. CAS also provides utility coordination services, interfacing with utility owner/operators on behalf of engineers, planners and project designers. CAS provides comprehensive utility locating services for projects during the design phase and also during construction as needed. **CAS' extensive SUE experience coupled with its EMD, 2D GPR and unique 3D RT capabilities will provide you with accurate and comprehensive utility locates for complete survey basemaps irregardless of quality of existing record drawings and thus superior engineering design for your utility projects. This will translate also to time saving and minimization of change orders during construction by eliminating "unforeseen" field conditions.**

CONSTRUCTION MANAGEMENT & CEI - The CAS construction management team has a combined total experience of nearly 80 years. CAS field representatives are qualified to perform a full-service program, assuring total monitoring on-site to protect the client's interest on their projects. The CAS construction management team will keep the client informed of all facets of construction including, but not limited to, weekly progress notices, advice on any change orders and monthly monitoring of project finances. The construction management team of professionals provides extra attention to detail to ensure that all projects are built to specifications and are fully operational to meet the needs of our client. CAS also has extensive experience in managing the required documents for state or federal grant funded projects. CAS construction management services include:

- Value Engineering
- Design Document Review
- Contract Administration
- Contract Documents
- Construction Management
- Construction Document Management for Grant Funded Projects
- Construction Engineering & Inspection
- Cost & Payment Verification
- Bidding Coordination
- Contract Negotiation
- Residential/Commercial/Municipal Project Observations
- Inspections

We recently provided construction inspection services for: City of Hallandale Beach, City of Margate, Sunshine Water Control District, Town of Golden Beach, City of Belle Glade, City of Lauderhill, Hardee County, City of Deerfield Beach, Town of Pembroke Park, Springlake Improvement District and City of Sunny Isles Beach.

GRANT ASSISTANCE EXPERIENCE - Since the early 1990's CAS has assisted its clients with securing grant funding and financing for multiple infrastructure projects. We have assisted our clients (municipalities, counties, special districts and utility authorities) in obtaining grants and/or loans through multiple funding sources such as: USDA, SRF, FEMA (HMGP), State Legislative Appropriations, SFWMD Cooperative Agreement Program, EPA 319 Program, CDBG, etc.

CAS assists its clients with the preparation of grant applications, supporting documents, such as preliminary engineering reports, environmental assessments, preliminary designs, project scope development, cost estimating, present worth cost analysis, cost benefit analysis, project beneficial use, etc.

CAS continually provides many of these services to its clients annually for state appropriation requests or during grant funding cycles. CAS provides grant evaluation for competitive grants requiring scoring and consultation with respect to the need for phasing of projects to achieve a high success rate from funding institutions.

CAS is continually involved with infrastructure funding assistance and has a **high success rate** in securing funding. We understand the nuances of "grantsmanship." CAS is committed to providing these services to all of its clients, with an estimated 70-80% of our on-going projects being funded through our assistance. CAS is also aware of the deadlines required in achieving these grants/loans and delivers grant assistance services on time.

Some of the capital improvement projects for which CAS has acquired granting funding (indicating dollar amount secured and funding source) are:

- **Spring Lake Improvement District (SLID):** Design & Construction of a 70 Acres Stormwater Treatment Area (STA) – $1,666,000 (25% SRF / 75% FDEP 319 Funded)
- **Spring Lake Improvement District (SLID):** Design and Construction of an 80,000 GPD Wastewater Treatment Plant – $3,300,000 (SRF Funded)
- **City of Moore Haven:** Design and Construction of a 500,000 GPD ultrafiltration (Zenon) system to expand an existing 750,000 GPD Lime Softening Water Treatment Plant – $3,663,800 (USDA Funded)
- **Town of Pembroke Park:** Wastewater Master Plan for the rehabilitation of 22 Wastewater Lift Stations – $100,000 (FDEP Legislative Funded)
- **City of South Bay:** Water Treatment Plant and Water Distribution Improvements – $1,200,000 (USDA Funded)
- **Port Labelle:** Design and Construction of a 900,000 GPD Reverse Osmosis Water Treatment Plant (ROWTP) – $5,500,000 (USDA Funded)
- **City-County Public Works Authority (Glades County):** Gravity Sewer Expansion and Lift Station No. 5 Installation - $620,000 (State Legislative Appropriation)
- **City-County Public Works Authority (Glades County):** Gravity Sewer Expansion N, O, S Avenue and 4th Street - $900,000 (State Legislative Appropriation)
- **City-County Public Works Authority (Glades County):** Gravity Sewer and Lift Station Improvements Avenue L, M, N & 4th Street - $1,340,000 (State Legislative Appropriation)
- **Hardee County:** Wauchula Hills Wastewater Service Area Expansion – Phase II - $1,300,000 (FDEP Legislative Funded)
- **Bal Harbour Village:** Comprehensive Water & Sewer Master Plan (Completed 2015) - $136,675

Legislative Appropriations and Grant Funding Acquisition for water quality projects within the last five years:

Glades County Wastewater Funding Acquisition:

State Legislative Appropriation 2018-2019 - $891,848.00

State Legislative Water Quality Appropriation 2019-2020 - $1,036,924.00

State Legislative Water Quality Appropriation 2020-2021 - $2,700,000.00

State Legislative Water Quality Appropriation 2020-2021 - $2,762,183.00

FDEP Water Quality Grant Application 2023-2024- $1,250,000.00

*State Legislative Appropriation 2024-2025- $2,508,882.00

Glades County Wastewater Funding Acquisition Total: $11,149,837.00

FDEP Resilient Florida Planning Grant

Critical Assets Vulnerability Assessment2022-2023- $200,000.00

Hardee County Water & Wastewater Quality Projects Funding Acquisition:

Phase 7 Regional Potable Water & Wastewater Improvements FDEP – Legislative Grant 2021-2022-

$1,400,000.00
Phase 8 Potable Water & Wastewater Improvements FDEP Legislative Appropriation Grant 2022-2023 - $3,100,000.00
Wauchula Hills Water & Wastewater Improvements 2000–2016 -$ 9,875,000.00

Hardee County Water & Wastewater Funding Acquisition Total: $14,375,000.00

City of Moore Haven Water Quality Projects Funding Acquisition:
DEO Rural Infrastructure Planning Grant 2022 – 2023 - $1,084,102.00
Legislative Appropriation Caloosahatchee River Area Water Quality Stormwater Improvements 2022 – 2023 - $934,960.00
FDEP Florida Resilient Planning Grant Critical Assets Vulnerability Assessment 2022 – 2023 - 200,000.00

City of Moore Haven Water Quality Funding Acquisition Total: $2,219,062.00

City of Belle Glade Water Quality Projects Funding Acquisition:
NW Avenue H Stormwater Improvements FDEP - Legislative Grant 2014-2015 - $250,000.00
NW/SW 3RD SW Avenue B Extension Corridor Stormwater Conveyance Improvements FDEP - Legislative Grant 2015-2016 - $200,000.00
NW/SW 3RD SW Avenue B Extension Corridor Stormwater Conveyance Improvements
FDEP - Legislative Grant 2019-2020 - $100,000.00
NW/SW 3RD SW Avenue B Extension Corridor Stormwater Conveyance Improvements FDEP - Legislative Grant 2021-2022 - $350,000.00
DEO Rural Infrastructure Planning Grant for stormwater planning and design in the downtown area 2022-2023 - $291,732.00.
FDEP Resiliency Citywide Critical Asset Vulnerability Assessment 2022-2023 - $200,000.00

City of Belle Glade Water Quality Funding Acquisition Total: $1,391,732.00

Total Funding Acquisitions: $29,335,631.00

A major portion of CAS projects involve grant funding. Grant funded projects are restricted to finite budgeted amounts for both professional and construction dollars. Grant projects also have strict schedules that must be met. If these parameters are not met, the grant funds would be lost. Our grant funded project experience demonstrates our staff's expertise in meeting budgets and schedules.

STORMWATER STUDIES/MASTER PLANNING EXPERIENCE – CAS has provided comprehensive Master Planning with scope of services which included but were not limited to reviewing existing stormwater systems, stormwater system inventory and data collection, addressing water quality, flood risk, environmental issues, researching existing data (historic flood, permits, policies, regulations), surveying, hydraulic modeling, stormwater system map development, provided recommendations for new/upgraded stormwater infrastructure, develop a stormwater capital improvements plan, technical reporting, grant funding assistance and coordination with regulatory agencies and municipal departments. CAS completed Stormwater Master Plans for the following municipal clients:

Project Description	Project Fees
Okeechobee County: County-Wide Stormwater Master Plan (1995)	$150,000
City of Oakland Park: City-Wide Stormwater Master Plan (1998)	$124,740
City of Sweetwater: Comprehensive Stormwater Master Plan (2000)	$ 75,000
Village of El Portal: Village-Wide Stormwater Master Plan (2002)	$152,800
City of Lighthouse Point: City-Wide Stormwater Master Plan (2002)	$152,000
Town of Golden Beach: Town-Wide Stormwater Master Plan (2003)	$168,800
Spring Lake Improvement District: District-Wide Stormwater Master Plan (2008)	$266,316
Village of Key Biscayne: Village-Wide Stormwater Master Plan (2016)	$134,000
Bal Harbour Village: Comprehensive Utility Master Plan (2017)	$136,675
City of Lake Worth Beach: Stormwater Master Plan Updates (2021)	$ 25,000

WATER & SEWER STUDIES/MASTER PLANNING EXPERIENCE- CAS has extensive experience in providing technical engineering studies for existing utility systems and developing comprehensive utility master plans for municipal clients, providing condition assessment, hydraulic modeling, life-cycle analysis, identifying system components for replacement/rehabilitation, prioritizing projects based on level of criticality/level of service and providing cost estimating for budgeting purposes. Below are some examples of completed projects with associated completion dates and costs:

Project Description	Project Fees
Indian Trail Improvement District: Comprehensive Water & Sewer Master Plan (2004)	$183,480
City of North Miami: Water Distribution Analysis (2004)	$50,000
Town of Pembroke Park: Sanitary Sewer Master Plan (2000)	$155,000
Bal Harbour Village: Comprehensive Water & Sewer Master Plan (2017)	136,675
Village of El Portal: Sanitary Sewer Master Plan (2017)	$75,000
City of Pompano Beach: Non-Sewer Area C Sanitary Sewer Study (2019)	$44,540
Town of Pembroke Park: Sanitary Sewer Master Plan Update (2023)	$372,490

UNMANNED AERIAL VEHICLE OR DRONE - Unmanned Aerial Vehicles (UAV's) are now being employed by CAS as another tool which can be utilized to enhance or even eliminate the need for certain field exercises. Some of the uses the UAV is most suitable for are as follows: Site inventory in which the UAV is deployed over a site that is under construction, to determine monthly construction progress easily and accurately. It can also be used for reconnaissance to determine the complexity of an upcoming project and the "lay of the land". More technical uses are providing LIDAR data which can be utilized for topographic data acquisition, highway striping configurations in a safe manner and can be used for survey control data to be shown on high resolution aerial maps, etc. UAVs are governed by the Federal Aviation Administration (FAA) and must be operated by a licensed drone pilot. Flight Plans must be submitted in advance in restricted areas and approved prior to flight. Normal flight elevations range from 100 to 250 feet (depending on the desired accuracies of the data) and can be no higher than 400 feet per the FAA regulations. Some of the advantages of using UAV's is quick and cost-effective data collection, aerial imagery capture and monitoring of construction project progress. The images obtained by the UAV display clear and accurate detail of current conditions at project sites. Applications are ideal for the following:

- Hard-to-Access Areas (Water/Sewer Treatment Plant Facility Inspections, Confined Space Assessments)
- Site-Specific Aerial Mapping
- Utility Corridor Survey
- Supplemental Topographic Survey
- Environmental Data Collection
- High Resolution Images and Video

Section 4.5:

Experience of Key Personnel and Project Team

Section 4.5: Experience of Key Personnel and Project Team

Prime Consultant: Craig A. Smith & Associates LLC (CAS)

Overview:
CAS is a Florida-licensed, full-service civil engineering firm specializing in civil engineering, surveying, utility locating, and construction management. Headquartered in Deerfield Beach with offices across Palm Beach, Broward, and Miami-Dade Counties, CAS has served public and private clients throughout South Florida for over 45 years.

Responsibilities:

- Prime consultant providing **overall project management** and single-source responsibility.
- In-house services: civil, drainage, roadway, water/wastewater, and stormwater engineering; surveying; CADD; subsurface utility engineering (SUE); construction management; and grant funding assistance.

Key Staff:

Name	Project Position	Years of Experience	Qualifications	Firm
Stephen C. Smith, P.E.	Contract Manager	39	BS	CAS
Priscilla Cygielnik, P.E.	Engineer of Record	25	MBA	CAS
Orlando A. Rubio, P.E.	VP of Stormwater Engineering	37	BS	CAS
Daniel E. Shonk, P.E., S.I.	Project Manager	21	BS	CAS
Greg A. Giarratana	Senior Supervising Engineer	47	BS	CAS
Todd V. Larson	Engineering Department	47	BS	CAS
Clay Shrum	Senior Field Representative	40	–	CAS
Albert J. Caruso, E.I.	Project Engineer	38	–	CAS
Robert D. Keener, P.S.M.	Survey / Geomatics	47	PSM	CAS
David Lookabill	Survey Coordination Manager	41	–	CAS
James F. Driscoll	Subsurface Utility Engineering	34	–	CAS
Alan Lopez	SUE Manager	24	–	CAS

Experience: CAS has successfully completed municipal projects of all sizes, including water mains, sewer lines, force mains, pump station rehabilitation, water treatment plant improvements, stormwater management, roadway design, regulatory compliance, master planning, and hydraulic modeling. Recent clients include: City of Belle Glade, City of Margate, Sunshine Water Control District, City of Sunny Isles Beach, Glades County, City of Deerfield Beach, City of Oakland Park, Hardee County, City of Lauderhill, Town of Golden Beach, Town of Pembroke Park, among others.

Subconsultants

MUEngineers, Inc. (MUE) – Structural Engineering

Responsibilities: Structural engineering and inspection services for municipal, commercial, and residential projects, including threshold, 40-year, and special inspections; structural design and restorations.

Personnel: Marcus Unterweger, PE; Ricardo Madriz; Yusuf Rangoonwala

Experience with CAS:

- Margate WWTP-Chlorine Building Assessment and Restoration
- Margate WTP-Maintenance Building Assessment
- Margate WWTP Electrical Building-Exterior Repairs
- Belle Glade Pedestrian Bridge Design
- Egret Pump Station, Hallandale Beach
- Belle Glade Torry Island Seawall Walkway Pavilion

RADISE International, L.C. – Geotechnical & Materials Testing

Responsibilities: Geotechnical engineering, drilling, construction materials testing, QA/QC, permitting, and reporting.

Personnel: Jamshid Sajadi, PE; Nitesh Goli

Experience with CAS: Provided geotechnical services for utility projects, including water main, sewer force main, stormwater/drainage, roadway, and pump station projects for: Town of Pembroke Park, Indian Trail Improvement District, Spring Lake Improvement District, City of Moore Haven, Glades County/CCPWA, Hardee County, Okeechobee County, City of Belle Glade, Sunny Isles Beach, City of Margate.

Smith Engineering Consultants, Inc. (SEC) – Electrical & Mechanical Engineering

Responsibilities: Electrical, instrumentation, SCADA design for water/wastewater, stormwater, street lighting, and lift/pump stations.

Personnel: Larry Smith, Principal Electrical Engineer; Luther Fair, Senior PM Electrical; David Jones, PE, Mechanical Engineer

Experience with CAS: Electrical design for Acreage Community Park South Expansion, Sun-N-Lake Mantanzas Wastewater Lift Station, Glades County Washington Park WW Lift Station, Spring Lake Improvement District Water Treatment Plant No. 1 & No. 2 Improvements

VN Engineers, Inc. – Traffic/Transportation Engineering

Responsibilities: Traffic engineering, signalization, traffic operations, roadway safety, FDOT compliance.

Personnel: Burak Konuk, PE, PTOE; Tracy Kaplan, PE

Experience with CAS: SR-9/I-95 Spanish River Interchange, SR-842/Broward Blvd at NW 9th Ave, FDOT Districtwide Minor Projects/Production Support.

Integration Experience

- CAS has successfully **led multi-disciplinary teams**, managing subconsultants MUE, RADISE, SEC, and VN Engineers to deliver integrated civil, structural, geotechnical, electrical, and transportation solutions.
- CAS maintains **single-source responsibility**, overseeing design, construction, and QA/QC across all disciplines.
- Proven history of collaboration across South Florida over the past **five years**, ensuring schedule, budget, and regulatory compliance.

Employment with CAS: 36 yrs
Employment with other firms: 3 yrs

Mr. Smith has over 39 years of experience in the engineering, survey and utility construction fields.

Mr. Smith's responsibilities include management of daily business operations for a 55+ member civil engineering, utility locates and surveying firm with gross sales of $7+ million. He oversees all areas of business including engineering, surveying, construction management services, subsurface utility engineering, accounting and human resources. Specifically, Mr. Smith also oversees all transportation/roadway and stormwater projects including studies, reports and design. He ensures proper allocation of resources, staffing, financial management, quality control and timely project completion.

Selected Relative Experience:

Utility Master Plan, Design and Construction Management for Town Wide 6 Phase Stormwater Improvement Plan and Water Main Replacement - Town of Golden Beach, Miami-Dade County, Florida. Responsible for the master planning, project management, resource allocation, scheduling, budgeting and quality assurance of the stormwater and watermain and utility undergrounding design. Also responsible for the project management of the stormwater and water main construction and implementation.

Stormwater Master Plan, Design and Construction Management for City Wide Priority Based Stormwater Improvement Plan - City of Oakland Park, Broward County, Florida. Responsible for the master planning, project management, resource allocation and quality assurance of the stormwater design, as well as the project management of the stormwater construction and implementation.

Stormwater Master Plan, Design and Construction Management for City Wide 6 Phase Stormwater Improvement Plan - City of Sweetwater, Miami-Dade County, Florida. Responsible for the master planning, project management, resource allocation, scheduling, budgeting and quality assurance of the stormwater design, as well as the project management of the stormwater construction and implementation.

Andrews Avenue Widening and Intersection Improvements - Broward County, Florida. Responsible for the roadway widening and stormwater design improvements from Cypress Road to Racetrack Road, including intersection improvements at McNab Road and Racetrack Road. Performed project management for construction observation services.

Biscayne Boulevard Widening and Intersection Improvements - Miami-Dade County, Florida (FDOT District 6). Responsible for the roadway widening and stormwater design improvements from NE 163rd Street to 203rd Street, including intersection improvements.

Employment with CAS: 1 yrs
Employment with other firms: 24 yrs

Priscilla M. Cygielnik, P.E.

Project Manager/Production Team Leader
Engineering Department

Ms. Cygielnik has over 25 years of experience managing public-sector infrastructure projects, including 20 years in municipal leadership overseeing Public Works functions such as engineering, water and sewer utilities, stormwater, capital improvements, and facilities. She develops project scopes, master plans, and grant applications; prepares construction documents in accordance with engineering standards and permitting requirements; and coordinates with clients, regulatory agencies, and project teams through field and office engagement. Her work includes plan review for municipal compliance and delivery of complex infrastructure improvements funded through federal, state, and local programs.

Selected Relative Experience:

Broward County Surtax, Broward County, FL - Executed design for two major Broward County Surtax funded roadway initiatives to provide capacity at FAU Research Park Boulevard and create a destination for the City Center in Pioneer Grove/SE 2nd Avenue. Completed the construction for the replacement of the SE 13 Avenue Bridge and design for the future replacement of the SE 15 Avenue Bridge in the Cove Neighborhood.

Stormwater Master Plan, Deerfield Beach, FL – As Department Director, initiated the Stormwater Utility Fee and developed the City's Stormwater Master Plan to identify and fund more than $4 million annually in operations, maintenance and capital projects. Improved the financial performance of the enterprise fund securing grants and financing to accelerate deferred capital projects and rates of collection via a non-ad valorem fee. Administered $10M in American Rescue Plan Act (ARPA) and Hazard Mitigation Grant Program (HMGP) funds to construct drainage improvements in three of the City's most flood prone areas: West Deerfield, Pioneer Grove Local Activity Center, and SE 8th Avenue.

Integrated Utilities Master Plan, Deerfield Beach, FL - Implemented the Integrated Utilities Master Plan for the City of Deerfield Beach and performed a rate adjustment study adopting 5-year rates to finance deferred, critical Water Plant and Utilities improvements to include injection and well rehabilitation, automatic meter installations, chlorine and ammonia conversions and updated programmable logic controllers.

$33M Bond for City Facilities Replacement, Deerfield Beach, FL - Delivered major city buildings to include Braithwaite Center for Active Aging, Bezos Preschool, Johnny L. Tigner Center and West Community Center renovations. Replaced lifeguard towers that exceeded their useful life. Oversaw design and construction of the International Fishing Pier renovations underway due to damages from Tropical Storm Nicole. Replaced the boat ramp dock at Pioneer Park and Villages of Hillsboro Park with a more resilient design and better accessibility.

Orlando A. Rubio, P.E.

- University of Miami –Technical Professional Program
- University of Wisconsin – HEC & WSPRO
- CEU's – On going

Licensure

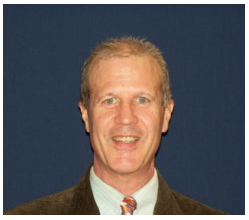
- Florida Licensed Professional Engineer - # PE48265

Employment with CAS: 23 yrs
Employment with other firms: 14 yrs

Mr. Rubio has over 37 years of experience in water resources engineering, specializing in stormwater management and surface water systems. He develops project scopes, stormwater master plans, federal grant applications, and construction plans in accordance with engineering standards and best practices. Mr. Rubio performs advanced stormwater modeling using ICPR, HEC-RAS, and CHAN software, prepares environmental resource permit packages, and coordinates with permitting agencies. He conducts field and office visits with clients and agency staff and reviews plans and engineering designs for municipal compliance.

Selected Relative Experience:

City of Sweetwater Stormwater Improvements (Phase I, IIA, III, & IV) - Miami-Dade County, Florida. As Engineer of Record, designed and permitted stormwater improvements within an area of significant historical flooding concerns. Improvements included the design of stormwater gravity collection systems with 8 stormwater pumping stations designed by other CAS staff. Performed computer modeling for each phase. Provided construction engineering services as requested by the City's CEI firm.



Okeechobee County Southwest Drainage Improvements - Okeechobee County, Florida. As Engineer of Record, designed and permitted stormwater improvements in accordance with the CAS-developed master plan within an area of significant historical flooding concerns. Obtained FEMA HMGP funds for project. Provided construction management services and project certification.

Ranch Lakes Estates Stormwater Improvements (Phases I, II, & III) - Moore Haven, Florida. Design and permitting of stormwater improvements within an area of significant historical flooding concerns. Applied for and obtained grant funding for project via FEMA-HMGP. Improvements included stormwater gravity collection system and 2 stormwater pumping stations designed by other CAS staff.

Sunshine Water Control District - West Outfall Canal Improvements – Phases 1B & 1C. As EOR, performed the hydraulic analysis, permitting, design, bidding, and construction management of the conceptual and initial phase. The West Outfall Canal is the primary conveyance canal for the SWCD's west basin serving 3,361-acres. The canal project will improve stormwater conveyance to Pump Station No. 2 by widening and deepening the existing canal. The canal improvements propose to remove 19,500 cubic yards of material of the entire canal to proposed bottom elevation. The channel modifications will allow the pump station to perform more efficiently. Phase I of the project will improve 2,900 linear feet of the overall 10,200 linear feet canal. The project also included public outreach to individual homeowners to remove encroachments within the canal right-of-way.

Albert J. Caruso, E.I.

Project Engineer
Engineering Department

Areas of Expertise

- Project Management
- Utility Design
- Utility Calculations
- Permitting
- Construction Services
- Cost Estimates
- Feasibility Studies
- Utility Master Plans
- Stormwater Master Planning, Design, Implementation and Management

- Phase I Environmental Audits

Education

- Middlesex County College Edison, New Jersey Associates Degree - Engineering Technology 1978

Registration

- Engineering Intern - New Jersey

Employment with CAS: 28 yrs
Employment with other firms: 10 yrs

Mr. Caruso has over 38 years of experience in engineering design, permitting, and construction management, and remains fully involved in projects from conception through completion. He leads the development of feasibility studies, Phase I Environmental Reports, Preliminary Engineering Reports, and stormwater and utility master plans. His expertise includes the full implementation of water, sewer, force main, and stormwater projects—from design and permitting with local, state, and federal agencies to construction-phase management. He prepares funding applications for FEMA-PDMC, USDA, CDBG, and FDEP programs and evaluates projects for cost-effectiveness and value engineering. Mr. Caruso coordinates closely with municipalities, contractors, clients, and permitting agencies to ensure projects meet schedule, budget, and regulatory requirements. His responsibilities also include preparing cost estimates and budgets, overseeing bidding services, managing project close-out documentation, and providing final certifications.

Selected Relative Experience:

Design and Project Management for Town-Wide, Six Phase Stormwater Improvement Plan and Water Main Replacement – Town of Golden Beach, Florida. Responsible for the stormwater and water retrofit engineering design, Miami-Dade County DERM/HRS permitting and cost estimating. Also responsible for the project management of the stormwater and water main construction, implementation, and certifications.

Stormwater and/or Utility Master Plan - Town of Golden Beach/Bal Harbour Village/Village of Biscayne Park/Town of Pembroke Park/City of Oakland Park/ City of Sweetwater, Florida. Responsible for the overall conceptual design of utility rehabilitation including utility undergrounding and improvements for the above-mentioned Municipalities. Also responsible for the information gathering, database preparation, preliminary cost estimating, prioritization of future projects, mapping and narratives.

Jacobson Site Plan - City of Belle Glade, Florida. Provided site plan traffic layout (on-site and off-site), conceptual engineering design for stormwater, water and sewer improvements for a 65.8-acre redevelopment for an industrial zoned property. Developed a due diligence investigation for the project site addressing electrical, water use and utility availability, stormwater impacts, flood zone implications, and zoning and permitting requirements.

Daniel E. Shonk, P.E., S.I.

Project Manager/Designer
Engineering Department/Survey Department

Mr. Shonk has 21 years of experience in the fields of surveying and engineering design of numerous public and private sector utility and infrastructure projects for Utility Companies and the Department of Transportation. He retains extensive experience in the design of water, wastewater systems, gas pipelines, roadway/drainage, site design/development, production well rehabilitation, construction management and construction field inspection.

Selected Relative Experience:

City of Hallandale Beach Egret Master Wastewater Triplex Lift Station Improvements – Hallandale Beach, FL: Providing project management during engineering design and construction for the conversion of an existing triplex wet pit dry pit wastewater pump station to a triplex submersible lift station. The existing structure will be converted into a submersible lift station with three 1,800 gpm submersible pumps. The proposed rehabilitation will include installing a new influent structure on the east side of the pump station in which the existing 30-inch diameter influent pipe will be exposed into a rectangular open channel type structure.

City of Hallandale Beach NE 7th Street Force Main Improvements – Hallandale Beach, FL: Providing project management during engineering design and construction management for the installation of approximately 3,900 linear feet of new 20" force main with all appurtenances along NE 7th Street due south and east of the Hollywood Dog Track in Hallandale Beach along with a 60-foot jack-and-bore under railroad tracks at the intersection of NE 7th Street and Dixie Highway.

Hardee County Utilities Wauchula Hills Sanitary Sewer Improvements: Phase 7 – Hardee County, FL: Providing project management for the engineering design and construction for the installation of approximately 3,915 linear feet of 8-inch gravity sanitary sewer and associated manholes, a duplex wastewater lift station with a 6-foot diameter by 16-foot deep wetwell, 380 linear feet of 4-inch force main and 2,080 linear feet of 8-inch force main extending along US Route-17. The project includes abandonment and removal of existing septic tanks and connection of all residence to the new sanitary sewer collection system via sanitary sewer lateral installations. Restoration will entail complete road replacement within the construction limits along with restoration of driveway aprons and sod with right-of-way.

Greg A. Giarratana

Senior Supervising Engineer

Engineering Department

Areas of Expertise

- Water & Sewer Utility Engineering
- Water Treatment Plant Design
- Wastewater Treatment Plant Design
- Hydraulic Computer Modeling
- Potable Water Wells
- Pipeline Design
- Pump Station Design
- Leachate Treatment
- Land Fill Design
- Construction Management
- Permitting
- Sludge Treatment & Disposal

Education

- Bachelor or Science – Civil Environmental Engineering, Roger Williams University

Affiliations

- American Society of Civil Engineers (ASCE)
- American Water Works Association (AWWA)
- Water Environment Federation (WEF)

Employment with CAS: 27 yrs
Employment with other firms: 21 yrs

Mr. Giarratana has 48 years of experience in the civil and environmental engineering fields, including water and wastewater treatment plant designs, permitting, construction management, certification, troubleshooting existing treatment systems, pump stations, sanitary sewer force mains, collection systems and potable water pipelines. Mr. Giarratana is responsible for managing civil and environmental projects including their initial planning, financing, designing, hydraulic modeling, permitting, construction management and certification of completion.

Selected Relative Experience:

City of Lauderhill Water Treatment Plant Green Leaf Filter Rehabilitation – Lauderhill, FL - conducted a plant assessment consisting of an on-site review and evaluation of the raw water source, plant facilities, treatment and mechanical equipment. Construction included the replacement of two (2) Green Leaf filters at the city's water treatment plant. Work also included the replacement of underdrain components, vacuum piping, solenoid and vacuum tank valves, effluent weirs, and media. Tanks were sand blasted internally and externally, then repainted.

Water and Sewer Treatment Plants including Water Utility Headquarters Building - Wauchula Hills, Hardee County, Florida. Responsible for preliminary planning, design, permitting and construction of a wastewater treatment plant and effluent re-use disposal system including a 360,000 gpd oxidation ditch, two clarifiers, digesters, lined effluent upset pond and an effluent pump station. The project included a potable water treatment plant, two (2) potable water wells, and a custom designed 9,000 sq. ft. Utility Department headquarters office building.

Lake Region Water Treatment Plant Raw Water & Potable Water Transmission System – Palm Beach County Water Utilities, Florida. Responsible for the planning, design and permitting of 91,200 linear feet of potable water mains to connect the cities of Pahokee, Belle Glade and South Bay to the new Glades Utility Authority's (GUA's) regional water treatment plant. The project includes the design of the raw water piping to seven (7) well sites. The project allowed these three (3) cities to abandon and decommission utilizing Lake Okeechobee as their water source.

Miccosukee Tribe Of Florida

Responsible for planning, design, permitting, computer hydraulic modeling of the potable water distribution system including the addition of a new WTP, and a treatment / office building, The WTP included a forced draft aeration system, a 360,000 gpd carbon absorption process with 5-micron pre-filters, a 500,000-ground storage tank, chlorination addition, high service pumps, and a telemetry system.

Wauchula Hills Water and Sanitary Sewer Improvements – Phase IV, Hardee County, Florida. Responsible for design, permitting and construction management of the water and sanitary sewer improvements included approximately 6,125 linear feet of 8" water main and 5,277 linear feet of 8" gravity sanitary sewer including connection to 51 private residences and the decommissioning of septic tanks and potable water wells. This project was funded through a multi-year special legislative appropriation.

Education

- Florida Atlantic University, Boca Raton, FL
  BS in Civil Engineering 2024

Employment with CAS: 2 yrs

Johnathan Lash

Project Engineer
Engineering Department

Johnathan Lash is a Civil Engineer and Project Engineer with a B.S. in Civil Engineering from Florida Atlantic University (2024), currently providing construction inspection and project support for municipal infrastructure projects with Craig A. Smith & Associates, LLC. His experience includes on-site observation and inspection of directional bore sewer force mains, review of record drawings, FDEP engineering certification, permit closeout coordination, pay application and change order review, and preparation of daily and weekly construction reports. Additionally, Johnathan has contributed CAD drafting and design support for stormwater and roadway improvement projects for the Cities of Oakland Park and Belle Glade, demonstrating strong technical knowledge, regulatory compliance expertise, and effective coordination with contractors, municipal staff, and multidisciplinary project teams.

Selected Relative Experience:

City of Riviera Beach – Forcemain Bore C-17 & M Canal Project
2024 **– Present**

Provides on-site construction inspection and testing observation for 12-inch and 42-inch HDPE directional bore sewer force mains.
Reviews and comments on record drawings; perform FDEP engineering certification of completed work.
Assists with Army Corps permit closeout and preconstruction meetings. Review construction calendar, pay applications, and change orders. Prepare daily and weekly construction reports.

CAD Drafting & Support – Municipal Projects:

City of Oakland Park: NE 12 Terrace & NW 43 Place Stormwater Drainage Improvements, Lake Emerald Area Stormwater Improvements

City of Belle Glade: Basin D Stormwater Improvement, SW Ave C & D Loop Roadway Improvement

Employment with CAS: 30 yrs
Employment with other firms: 17 yrs

Mr. Keener has 47 years of experience in the survey, engineering and utility construction fields.
Mr. Keener has been employed with CAS since April of 1995. Mr. Keener began his career at CAS as a Project Surveyor, advancing to Senior Surveyor and Mapper In charge of surveying in a satellite office and advanced to Vice President in 2005. Mr. Keener will serve as Principal Surveyor for all surveys and will coordinate all survey activities with various disciplines as needed. All surveying pertaining to utility related services such as Radar Tomography, utility surface mapping, utility excavations, etc. will also be overseen and certified by Mr. Keener. He has previously performed plat reviews for municipal clients.
Mr. Keener holds a Florida Surveyors and Mappers License and is a member of the Florida Surveying and Mapping Society of Florida.

Selected Relative Experience:

595 Express Subsurface Utility Engineering and 3D Radar Tomography - Broward County, Florida. Mr. Keener Served as Principal Surveyor for the 3-Dimensional Subsurface Utility Engineering (3D SUE) project completed for the FDOT at the Interstate 595 reversible lanes project in Broward County, Florida. Mr. Keener oversaw the reestablishment of horizontal and vertical control, the mapping of utility surface markings and utility excavation holes, as well as Radar Tomography utilized in various areas along the entire route. Mr. Keener performed all quality control and quality assurance for the project.

Golden Beach Drive & Collins Avenue – Town of Golden Beach, Florida. Mr. Keener Served as Principal Surveyor for the route survey within the rights-of-ways of Golden Beach Drive, out to the three islands and along Collins Avenue (SR A1A) for drainage improvements due to major flooding issues; total roadway reconstruction, undergrounding of all utilities; water main replacement and miscellaneous surveys, as needed. Route spanned approximately three miles. Surveying also included all city parks and a beach pavilion.

Seacoast Utility Authority: Northlake Boulevard/US-1 Water & Sewer Force Main Replacement – Town of Jupiter, Florida. Mr. Keener Served as Principal Surveyor for Route survey along Northlake Boulevard and US-1 (approximately 2.8 miles), including identification of right-of-way, property lines, above ground improvements, utility easements, tree survey, cross sections and subsurface utility engineering (utility locates). Mr. Keener performed quality control and quality assurance for the project.

WWTP Triplex Lift Station Rehabilitation – City of Margate, Florida. Mr. Keener Served as Principal Surveyor for the boundary, topographic survey and utility locates of existing buried utilities, including recovery of horizontal and vertical control relative to project datum as previously established.

Golden Beach Drive & Collins Avenue – Town of Golden Beach, Florida. Mr. Keener Served as Principal Surveyor for the route survey within the rights-of-ways of Golden Beach Drive, out to the three islands and along Collins Avenue (SR A1A) for drainage improvements due to major flooding issues; total roadway reconstruction, undergrounding of all utilities; water main replacement and miscellaneous surveys, as needed. Route spanned approximately three miles. Surveying also included all city parks and a beach pavilion.

David Lookabill

Survey Coordination Manager
Survey/Geomatics Department

Areas of Expertise

- Land Surveying
- Boundary / Topo
- Lot Surveys
- Control Surveys
- Utility Surveys
- 3D Radar Tomography
- GPS
- Route Surveys
- Crew Supervision
- Construction Layout
- Quantity Surveys and Calculations
- Utility Coordination
- Directional Drills

Education

- MSI, Port Saint Lucie, Florida – 2011, A.S.
- Indian River Community College, Stuart, Florida – 2006, Survey Law
- Davidson County Community College, Lexington, NC – 1997, AutoCAD 1 & 2
- Guilford Technical Community College, Jamestown, NC – 1988, Civil Drafting and Civil Engineering CAD/CADD

Employment with CAS: 11 yrs
Employment with other firms: 30 yrs

Mr. Lookabill has 41 years of experience in surveying, engineering, and utility construction. Beginning his career as a Rod Man, he advanced to Survey Crew Leader and now serves as Survey Coordination Manager at CAS. He brings extensive experience in surveying, directional drilling, fuel pipeline staking, and as-built documentation nationwide. Since joining CAS in 2014, he has been responsible for field management, client coordination, survey crew supervision, and field quality control.

Selected Relative Experience:

SFWMD Benchmark Recovery, Clewiston, Florida. Project to establish or re-establish vertical control from Clewiston, Florida to the Big Cypress Indian Reservation. First order bench loops were run utilizing differential digital leveling through benchmarks as researched and either verified or re-set.

Long Key State Park Shoreline Restoration – Monroe County, Florida. Provided field surveying of approximately 4,900 LF of shoreline at Long Key State Park. Scope of services entailed a topographic/bathymetric survey which included mean high and mean ow water lines, extended waterward out to either 500 linear feet or wading depth., included beach profiles spaced approximately 200 feet along the beach.

Bahia Honda State Park Shoreline Restoration – Monroe County, Florida. Provided field surveying for approximately 2,200 LF of shoreline at Bahia Honda State Park. Scope of services entailed a topographic/bathymetric survey which included mean high and mean ow water lines, extended waterward out to either 500 linear feet or wading depth., included beach profiles spaced approximately 200 feet along the beach.

Fort Pierce Inlet State Park Roadway Improvements – St. Lucie County, Florida. Provided field surveying along State Road A1A and approximately 200 LF along the existing access road leading into Fort Pierce Inlet State Park in St. Lucie County, Florida. Scope of services entailed map of specific purpose survey which located all visible above ground improvements, including above ground utilities within the accessible areas. Along A1A cross sections were taken to 100 feet each way of the entrance road at approximately 50-foot intervals and cross sections were taken at approximately 25-foot intervals.

South Florida Water Management District – Certified Everglades Restoration Project (CERP)

Tasked to establish vertical control for future restoration projects in the Florida Everglades. Monumentation was set and first order bench loops run through them using differential digital leveling for future reference based on initial NGS monumentation (pairs).

Army Corp of Engineers (USACOE) – Lake Okeechobee Topographic Surveys, Clewiston, Florida

Topographic survey of portions of Lake Okeechobee and associated rim and feeder canals. Performed topographic surveys utilizing real time kinematic GPS equipment for the landward portions of lake Okeechobee, including structures, canals, banks, toes, etc. Fathometer and real time kinematic GPS equipment used for under water portion of survey. Horizontal and vertical control was based on NGS monumentation as located.

Areas of Expertise

- Boundary / Topographic Surveys
- Lot Surveys
- Control Surveys
- Utility Surveys
- 3D Radar Tomography
- GPS
- Route Surveys
- Crew Supervision
- Construction Layout
- Quantity Surveys and Calculations

Employment with CAS:5 yrs
Employment with other firms: 2 yrs

Zachary Powers

Survey Crew Chief

Mr. Powers has over 7 years of experience in the survey field. He began his career as an instrument man quickly advancing to Survey Crew leader. He has varied experience in many facets of surveying with route surveys, including the use of a high definition scanner (HDS) and traditional survey methods. Responsibilities include field management, client field coordination, survey crew management and quality control in the field.

Selected Relative Experience:

SFWMD C23-24 South Reservoir Project, Palm Beach County, Florida. The project consists of 6.1 miles of Central and Southern Florida Flood Control Project Canal C23-24 and the replacement of one SFWMD water control structure (S-456) with a new central and southern Florida flood control structure. CAS, as a subconsultant to Phillips and Jordan, is providing all surveying services which includes survey control, preconstruction topographic survey cross sections, post construction topographic survey cross sections, structure staking and record surveys, miscellaneous staking, pre and post construction surveys, site boat ramps, high-definition survey scans of structures and ongoing quality control checks for the contractor during construction. Project started September 2024 and is ongoing. Survey cost is $458,834.

Fort Zachary Taylor State Park Shoreline Restoration Survey, Monroe County, Florida. CAS provided surveying services for approximately 3,050 LF of shoreline at Fort Zachary Taylor Historic State Park. Scope of services entailed a map of topographic survey which included mean high and mean low water lines, extending waterward out to either 500 linear feet or wading depth, including beach profiles spaced approximately 100 feet along the beach. In addition, groin structures, off shore break water and edge of vegetation/pavement was delineated. A certified Map of Topographic Survey was provided as a final deliverable. The project started in April 2024. Project Cost: $38,128.

Central Island Pump Station & Drainage Improvements, City of Sunny Isles Beach, Florida. The stormwater improvements for this project entailed engineering design, permitting, survey, utility locating and construction management services for the installation of two stormwater pump stations with an upgraded gravity stormwater collection system to drainage basins (A & B) to provide flood relief for the City's Center Island due to sea level rise. A route survey was performed physically locating all above ground visible improvements and utility markings with the existing right-of-way for Basin A (approximately 51 acres) A survey baseline was established at 100-foot intervals and cross sections were taken at 50-foot intervals extending 10-feet beyond the right-of-way line and approximately 200 linear feet of seawall in the areas of two proposed outfalls. The seawall was located and cross sections taken out into the Dumfoundling Bay. Surveying services included a sketch and legal description for utility easements required for the new stormwater force mains. Utility locates included 2D GPR, electromagnetic designation and fifty (50) soft digs to identify existing buried utilities. The survey and design was completed on time and within budget at a cost of $443,865.

Areas of Expertise

- Land Surveying
- Boundary / Topographic Surveys
- Lot Surveys
- Control Surveys
- Utility Surveys
- 3D Radar Tomography
- GPS
- Route Surveys
- Crew Supervision
- Construction Layout
- Quantity Surveys and Calculations

Employment with CAS: 11 yrs.

David Raines

Survey Crew Chief
Survey/Geomatics Department

Mr. Raines has over 11 years of experience in the survey, engineering and utility construction fields. Mr. Raines began his surveying career as an Instrument man quickly advancing to Survey Crew Leader. He has varied experience in many facets of surveying. He has extensive experience in Route Surveys, including the use of a High-Definition Scanner (HDS) and traditional survey methods. Mr. Raine responsibilities include field management, client field coordination, survey crew management and quality control in the field.

Selected Relative Experience:

Central Island Drainage Improvements, Sunny Isles Beach, Florida. Route survey including all above ground features within and extending ten feet beyond existing rights-of-ways and off-site surveying for proposed stormwater pumping stations and associated outfalls. Scope of work included 2D GPR utility locates within the project corridor for all streets between North Bay Road east to A-1-A (Collins Avenue) and 174th Street North to 183rd Street.

Sanitary Sewer Pumping Station No.1 (Egret) Rehabilitation, Hallandale Beach, Florida. Surveying included establishing benchmarks and horizontal control for future survey work. All above ground, visible utilities, as well as physical features, including the existing exterior pump station and interior floor data were located and included in the Topographic Survey. Scope of work also included the locations of utility locates using 2D GPR surface marks of onsite buried utilities for updating existing facility record drawings and design of improvements.

25th Street Drainage Improvements, Phase 2, Pembroke Park, Florida. Route survey included all above ground features within and extending ten feet beyond existing rights-of-ways and off-site surveying for the proposed stormwater pumping station and associated outfall. Scope of work included 2D GPR utility locates and the locations of utility test holes within the project corridor, which included all streets between SW 25th Street south to SW 27th Street and the entrance to Patrick Beehan Park east to Park/Bryan Rd.

Curry Hammock Park, Monroe County Florida. (Florida Keys) Route survey along the Overseas Highway (US Highway 1) in two areas for the design of box culvert/bridge upgrades to improve water flow. The Survey included the locations of all visible improvements, above and below ground utilities, drainage structures as well as trees and landscaped areas to the edge of heavy vegetation and subsurface utility engineering (utility locates).

Bahia Honda State Park, Monroe County Florida. (Florida Keys) Route survey along the entry road from the Overseas Highway (US 1) to the park employee lodging area for design of drainage improvements due to frequent flooding.

Areas of Expertise

- Field Controller Software (data collection, setup, calibration)
- Total Station Operations & Calibration
- GPS & GNSS Survey Equipment
- Boundary & Topographic Surveys
- Roadway & Intersection Design Surveys
- Construction Stakeout (residential, commercial, industrial, utilities)
- Route and Right-of-Way Surveys
- Aerial, Mobile & Terrestrial LiDAR
- FAA sUAS Operations & Data Capture

Employment with CAS: 1 yr
Employment with other firms: 12 yrs

Alexander Chick
Survey Crew Chief

Alexander Chick is a Survey Party Chief with thirteen years of surveying experience across South Florida. He is proficient in field controller software and in the calibration and operation of total stations to ensure accurate and precise measurements. His background includes boundary surveys, detailed topographic surveys, and route surveys for engineering design. He has collected design data for numerous county and municipal roadways and intersections and has extensive experience with construction stakeout for residential, commercial, and industrial projects, as well as roadway and underground utility work.

He is an FAA Certified Part 107 Drone Pilot, Remote Pilot Certificate #4693879, an NSPS Certified Survey Technician I (#0225-8908), and holds an FDOT Temporary Traffic Control (TTC) Intermediate Certificate (#81017).

Chick came to CAS from Lanzo Construction where he was a Survey Party Chief. He provided on-site leadership and worked under the direction of licensed surveyors. In this role, he performs a wide range of surveys, including boundary, topographic, hydrographic, and right-of-way surveys, as well as aerial, mobile, and terrestrial LiDAR work.

From December 2023 to March 2025, he served as a Survey Party Chief for Biscayne Engineering/Atwell, where he was responsible for leading survey crews and completing similar survey types across roadway, infrastructure, and site development projects. Prior to that, he worked as a Survey Party Chief with GeoPoint Surveying, Inc., where he managed on-site survey operations for public and private sector projects, including aerial, terrestrial, and hydrographic data collection.

His technical strengths include GPS and GNSS equipment use, LiDAR integration, survey computations, and quality control of field data. He is experienced in coordinating with engineers and contractors and in adapting survey methods to meet project requirements efficiently and accurately.

James F. Driscoll

Vice President of
Subsurface Utility Engineering

Areas of Expertise

- 3D Radar Tomography
- Subsurface Utility Engineering
- Utility Locating
- Ground Penetrating Radar
- Utility Coordination

Affiliations

- National Utility Locating Contractors Association (NULCA)

Employment with CAS: 31 yrs
Employment with other firms: 3 yrs

Mr. Driscoll has over 34 years of experience in the engineering, survey and utility location fields. Mr. Driscoll has performed over 6,000 G.P.R. surveys and over 12,000 miles of utility surface designating throughout the United States. Additionally, Mr. Driscoll has performed in excess of five million square feet of 3D Radar Tomography scanning projects at various locations throughout the United States. He is proficient with state-of-the-art, traditional, and GPS surveying equipment and is substantially proficient with EM designating equipment, vacuum excavation equipment and various GPR systems with special emphasis on 3D Radar Tomography systems. He also provides assistance in the performance of electronic designating, layout, and completion of vital soft dig information for vacuum excavation projects. And serves as Division Vice President, Training Manager and QC Auditor.

Selected Relative Experience:

City of Tamarac, Utility Location and Ticket Management Services – Tamarac, Florida Mr. Driscoll serves as the field manager and coordinator overseeing One Call Locates and Ticket Management for the City of Tamarac for all water and sewer locates. Mr. Driscoll oversees ticket management and day-to-day coordination for the City.

City of Oakland Park, Utility Location and Ticket Management Services – Oakland Park, Florida, Mr. Driscoll serves as the field manager and coordinator overseeing One Call Locates and Ticket Management for the City of Oakland Park for all water and sewer locates. Mr. Driscoll oversees ticket management and day-to-day coordination for the City.

City of Lauderhill, Utility Location and Ticket Management Services , Lauderhill, Florida. Mr. Driscoll serves as the field manager and coordinator overseeing One Call Locates and Ticket Management for the City of Lauderhill for all water and sewer locates. Mr. Driscoll oversees ticket management and day-to-day coordination for the City.

City of Delray Beach, Utility Location and Ticket Management Services , Lauderhill, Florida. Mr. Driscoll serves as the field manager and coordinator overseeing One Call Locates and Ticket Management for the City of Delray Beach for all water and sewer locates. Mr. Driscoll oversees ticket management and day-to-day coordination for the City.

City of Margate, Utility Location and Ticket Management Services - Margate, Florida. Mr. Driscoll serves as the field manager and coordinator overseeing One Call Locates and Ticket Management for the City of Margate for all water and sewer locates. Mr. Driscoll oversees ticket management and day-to-day coordination for the City.

Alan Lopez

Locates Manager/SUE Manager
SUE / Utility Locates

Mr. Lopez has 24 years of experience in the utility locating, SUE, survey and utility construction fields.
Mr. Lopez has been employed with CAS since February 2004, starting as a soft dig crew member, and through experience, advanced from utility locator to Senior Locator and Field/SUE Manager overseeing all locating field operations. Mr. Lopez has performed or overseen in excess of 5,000 vacuum soft digs, as well as thousands of ground penetrating radar surveys and utility mapping efforts.

Mr. Lopez is a Certified Underground Utility Locator and GPR Technician. Mr. Lopez is also MOT certified, confined space entry certified and OSHA 10hr Certified.

Selected Relative Experience:
Town of Jupiter Utility Location and Ticket Management Services – Jupiter, Florida. Mr. Lopez has served Field Manager for the Town of Jupiter Sunshine One Call contract since 2015. Currently Mr. Lopez oversees ticket management and day to day coordination for the Town.
Palm Beach County Utility Location and Ticket Management Services – Palm Beach, Florida. Mr. Lopez has served Field Manager for the Palm Beach County Sunshine One Call contract since 2022. Currently Mr. Lopez oversees ticket management and day to day coordination for the County.
City of West Palm Beach Public Utilities, Utility Location and Ticket Management Services - City of West Palm Beach, Florida. Mr. Lopez has served as a utility locator, Senior Locator and Field Manager overseeing One Call Locates and ticket management for the City of West Palm Beach.
Town of Davie Public Utilities, Utility Location and Ticket Management Services - Town of Davie, Florida. Mr. Lopez has served as utility locator and Field/Client Manager for this sprawling utility system. Davie is the largest municipality in Broward County by land area and serves a significant population. Facilities include water, sewer, reclaim, raw water and effluent pipelines. Currently Mr. Lopez oversees ticket management and day-to-day coordination for the Town of Davie.
City of Coconut Creek Utility Location and Ticket Management Services – Coconut Creek, Florida. Mr. Lopez has served Field Manager for this large city-owned utility system since 2003. Facilities include water, sewer, reclaim, and city owned networked communications. Currently Mr. Lopez oversees ticket management and day to day coordination for the City of Coconut Creek.

Clay R. Shrum, Sr.

Senior Field Representative

Mr. Shrum has 40 years experience in municipal water and sewer utility infrastructure including water and wastewater treatment plant process and operations. He has served as a water treatment plant operator, water and sewer vocational instructor, Superintendent of Public Works, Utilities Director/Utilities Superintendent and Director of Planning and Development for various municipal entities in Florida.

Selected Relative Experience:

City of Sebring – Water Treatment Plant Operator, Sebring, Florida
Project Dates: 1985-1989
As Water Treatment Plant Operator, Mr. Shrum was responsible for monitoring and operating the equipment within the City's water treatment plant, ensuring the water being produced met safety standards, including collecting samples for testing, maintaining equipment, recording and maintaining operational data, and adhering to all regulatory guidelines set by environmental agencies like the EPA, all while prioritizing safety procedures.

Town of Zolfo Springs – Superintendent of Public Works, Hardee County, Florida
Project Dates: 1992-1993
Responsible for managing, operating and maintaining the Town's utility infrastructure.

Town of Lake Placid Regional Utilities – Utilities Director, Lake Placid, Florida
Project Dates: 1993-1997
Responsible for the Town's drinking water, wastewater treatment facility, and reclaimed water infrastructure. Managed daily operations and provided direction and support to staff, ensuring the utility department operated safely and efficiently.

Spring Lake Improvement District – Water Superintendent/Utilities Super Intendent/Director of Operations/Director of Planning and Development, Sebring, Florida
Project Dates: 2009-2024
Project Description: Responsible for the management and operations of the District's water, wastewater and stormwater infrastructure along with planning and development as per the various management positions held with the District over the last 16 years.

Areas of Expertise

- Project Management
- Design Review
- Code Conformance & Enforcement
- Grant Application
- Grants Management
- Utility Operations
- Utility Coordination
- Sediment and Erosion Control
- Emergency Management

Education

- University of Tampa- BS in Chemistry and Marine Science
- University of Tennessee – Graduate School Chemistry
- Drinking Water Treatment Operations
- Wastewater Treatment Operation
- FEMA NIMS Training Level 100, 200, 300, 400,700,800.
- OSHA Training
- CEU's

Licensure

- Florida Licensed Water Treatment Plant Operator 5083A
- Florida Licensed Wastewater Treatment Plant Operator 6341B
- Level 1 and 2 Code Enforcement Certified
- Certified Advanced Erosion and Sediment Control Inspector

Employment with CAS: 5 yrs
Employment with other firms: 42 yrs

Todd V. Larson

Construction Manager/Senior Field Representative

Mr. Larson has 47 years of experience in public improvement and private development projects. His private development work includes full project lifecycle management, design review committee participation, development fee calculations, zoning and code plan review, site inspections, and review of certifications by the engineer of record. In the municipal sector, he has extensive experience in grant application, grant management, project management, and project closeout. Mr. Larson has worked on projects funded through enterprise funds, county parks, surtax and MPO grants, FDOT and FDEP grants, CDBG, FEMA disaster recovery and PDMA grants, and USDA Rural Development programs.

Selected Relative Experience:

Town of Pembroke Park, Broward County, FL – Public Services Director Supervised the operations of the roads and streets, utilities department, building department, parks department, engineering, zoning and code enforcement departments. Performed plan reviews for engineering, zoning and general interests of the town. Served on the Development Review Committee. Supervised and performed inspections for utilities and zoning. Calculated Town impact fees, engineering fees and made recommendations for changes in fees and codes to Town Commission. Served on the Town Code of Ordinance Review Committee. Prepared Capital Improvement Plans, recommended priority of projects based on Commission Priorities and applied for appropriate funding sources to fund improvements.

Town of Pembroke Park, Broward County, FL–Director of Emergency Operations As Director of Emergency operations managed the Municipal Emergency Operations Center, applied for grant funding, administered reimbursement and mitigation assistance grants to upgrade Town Stormwater infrastructure to reduce future flood risks. Worked with Town Engineer on appeal of flood maps and adjustments to flood hazard areas.

Town of Pembroke Park, Broward County, FL- Public Works and Utilities Worked with the Town Engineer to develop and implement storm water and waste water master plans. Worked to update master plan as systems were improved and additional needs were discovered. Reviewed plans for improvements to public Rights of Way and prioritized projects based on life safety and cost benefit. Applied for and administered grants and managed projects for compliance.

City of South Bay, Palm Beach County, FL – Utilities Director Operated and Managed Water and Wastewater Treatment Systems. Obtained grant funding, managed improvement projects and planned to maintain compliance. Served as Chief Building Official and coordinated reviews and inspections.

MUEngineers, Inc.

Marcus Unterweger, P.E., S.I., LEED AP

Principal/Principal Engineer

BENEFITS FOR THE VILLAGE OF TEQUESTA

- **26+ years in professional practice**
- **Previous working experience with various municipalities in Florida including Broward County, City of Miami, City of Hallandale Beach, City of Aventura, Palm Beach County, City of Lake Park, City of Fort Lauderdale, City of Clewiston, City of Pompano Beach, City of Hollywood, City of Coral Springs, Town of Belle Glade, City of Delray Beach, and City of Boca Raton**
- **Project Role: Mr. Unterweger will oversee the project from start to finish. He will represent MUE at meetings, presentations, and/or site visits. He will interact directly with the client, design team and contractors. Mr. Unterweger has extensive experience in the public sector and has structurally designed several public safety complexes and fire stations throughout his career.**
- **LEED Certified**

PROFESSIONAL EXPERIENCE

Mr. Unterweger is the Principal of MUEngineers, Inc. He is a Florida registered professional engineer with over twenty-six years of professional experience. His experience includes the structural design of educational facilities, municipal facilities, high-rise buildings, healthcare facilities, churches, clubhouses, building restoration, office buildings, pedestrian bridges and parking garages.

Marcus Unterweger has owned and operated MUEngineers since 2010, and leads a team of smart, pioneering professionals who share his vision and commitment to delivering superior results for the customers.

RELEVANT PROJECT EXPERIENCE

Port Everglades Consolidated Maintenance Facility Building, Hollywood, FL-*Principal-in-Charge*. MUE provided comprehensive schematic design plans relating to the consolidation of all port maintenance functions, including a gas station and vehicle maintenance facility. The project is now in Phase II aiming for a final set of construction documents for September 2025.

Consulting Services for Port Everglades, Hollywood, FL-*Principal-in-Charge*. A member of the team for the continuing services for civil engineering related to Port Everglades. Our current scope of work includes assessments, upgrades, and modifications to the Port Seacor building

Public Works Complex, Oakland Park, Florida-*Principal-in-Charge***.** MUE provided structural inspection services during the construction of three new buildings at the Public Works Complex site for the City of Oakland Park. The three buildings (Fleet, Operations and Warehouse Buildings) were constructed with tilt-up panel installation.

Water Wastewater Plant-Wind Hardening, Coral Springs, Florida-*Principle-in-Charge*. MUE is a member of the team for the assessment of the structural adequacy of six existing building structures and providing structural hardening details to ensure compliance with the current FBC standards at the water-wastewater treatment plant for the City of Coral Springs.

Master Pump Station #458, North Lauderdale, Florida- *Principal in Charge*. MUE is a member of the team for this pursuit with the City of North Lauderdale. Our scope included the structural design of foundations and support of a new above ground storage tank, jockey pumps and 5-ton monorail system.

Wildflower Park, Boca Raton, Florida-Principal-in-Charge. MUE is providing structural design services for a new partially open park pavilion structure with enclosed bathrooms and concession area. Additionally, foundation designs for miscellaneous site structures, including light poles, sitting walls and artwork.

Seawall Assessment and Restoration, Aventura, Florida-Principal-in-Charge. MUE was involved in the restoration of four sections of seawalls located along canals (5.2 miles) for the City of Aventura. Visual observations of the seawalls from both the land and the water and roughly 388 seawall piles were assessed, and our firm prepared the structural design for the repair details and procedures of the deteriorated structures.

Torry Island Seawall & Walkway, Belle Glade, Florida - Principal in Charge – MUE's role on this project was to structurally design a new 800ft long new bulkhead/seawall structure and concrete boardwalk structure. Additionally, MUE engineered foundations and anchor points to secure floating dock structures designed by another company.

Broward County Professional Engineering Consultant Services, Continuing Contract, Various, Broward County, Florida- *Principal-in-Charge*. MUE was a member of the team for this continuing contract with Broward County RFP, as a sub-consultant. We have begun the process of three phases for this contract, a park walkway observation deck/tower remodel, and a gazebo restoration/remodel and light pole assessments and foundation design.

MUEngineers, Inc.

Ricardo Madriz, P.E., LEED AP

Vice President/Sr. Project Manager

BENEFITS FOR THE VILLAGE OF TEQUESTA

- **20+ years in professional practice**
- **Experience with most type of building structures including hotels, restaurants, water and waste water treatment facilities, city and county recreational parks, office buildings, industrial buildings, car dealerships, townhouses, sing family residential structures, exclusive luxury residential mansions, port terminals, warehouses, lift stations, pedestrian bridges, boardwalks, residential construction waterside of the coastal construction line, schools, gymnasiums, auditoriums, religious facilities, parking garages, historic structures, restoration of existing concrete and steel structures, airport terminals, baggage handling system replacements, sport facilities, etc.**
- **Project Role: Mr. Madriz will oversee the daily project management, ensuring timelines are met, project is moving forward, reviewing project engineers work and answering and solving questions, communicating with the entire design team and final overall structural drawings.**
- **LEED Certified**

PROFESSIONAL EXPERIENCE

Mr. Madriz is the V.P. of Engineering for MUE and brings more than twenty years of structural engineering practice and skill to the table. He is incredibly knowledgeable in building structures and analysis, the latest software, and current building codes and industry standards.

Ricardo Madriz has experience in the structural design of educational facilities, municipal, facilities, high-rise buildings, building restoration, residential buildings, water related structures, office buildings and parking garages.

EDUCATION

Master of Engineering:
McGill University, 2004

Bachelor of Civil Engineering
McGill University, 2002

REGISTRATION

Registered Engineer
State of Florida
Reg. No. PE 68444

RELEVANT PROJECT EXPERIENCE

Water Treatment Plant, Boca Raton, Florida-Project Manager-MUE provided structural design and engineering related to a new one-story compliance building as well as modifications and restoration of the lift pump station and enclosures for the City of Boca Raton.

Coral Springs Westside Maintenance Facility, Coral Springs, FL- *Project Manager*. Our office is a member of the team for this RFQ as a sub-consultant. We are providing structural consultant engineering for the renovation, redesign and repurposing of the Westside Maintenance Facility, Fire Training Academy and Police Firing Range for the City of Coral Springs.

Port Everglades Consolidated Maintenance Facility Building, Hollywood, FL-*Project Manager.* MUE provided comprehensive schematic design plans relating to the consolidation of all port maintenance functions, including a gas station and vehicle maintenance facility. The project is now in Phase II aiming for a final set of construction documents for September 2025.

McNair Park, Pompano Beach, Florida-Project Manager**.** MUE is a member of the team for this RFQ. Our scope involves the structural design of a one-story building expansion, a new free-standing restroom and concession building, a new press box structure, picnic shelter and new football goal post foundations.

Pedestrian Bridge, All Aboard Train Station, Miami, Florida-Project Manager. MUEngineers, Inc. was involved in the structural evaluation and design of a precast and steel pedestrian bridge to connect the All-Aboard train station to the existing station. We designed the bridge structure and foundation system, all gravity and lateral loads and provided structural construction documents and calculations.

Pompano Beach Water Treatment Plant, Pompano Beach, Florida – Project Manager - MUEngineers, Inc. structurally designed modifications made to the exterior building and window replacement.

South Florida Water Management District, Southwest Ranches, Florida- *Project Manager* - MUEngineers, Inc. provided professional engineering services for the design of a one story, 3,000sf maintenance building, a 1,050sf covered parking area and a dumpster enclosure for the South Broward Drainage District.

Architectural Consultant Services, City of Fort Lauderdale, FL-*Project Manager*. MUE is a member of the team for this pursuit of the City of Fort Lauderdale. There have been two projects stemming from this RFQ thus far: Provident Park improvements and remodel and repair of the City Hall Drive Thru.

Broward County, Professional Architectural and Engineering Services Contract, Various, Broward County, Florida- Project Manager - MUEngineers, Inc. was a member of the team for this continuing contract with Broward County RFP, as a sub-consultant. This RFP was awarded in May 2016 and is ongoing. The scope of work for projects completed or active includes modifications of various park picnic shelters and Markham Park, renovations to a county building and the remodel of West Regional Courthouse in Plantation.

White Course Park, Doral, Florida-Project Manager. MUE was responsible for the structural design and engineering of a new restroom building, foundation systems for new picnic shelters, foundations for light poles and wayfinding signage, and foundations for pre-engineered playground shade structures.

MUEngineers, Inc.

Yusuf Rangoonwala, P.E.

Vice President/Project Manager

- **12+ years in professional practice.**
- **Previous working experience with various municipalities in Florida including Broward County, Palm Beach County and City of Delray Beach, City of Dania Beach, City of Pompano Beach, City of Homestead, City of Oakland Park, City of Fort Lauderdale.**
- **Project Role: Mr. Rangoonwala will be the structural engineer, engineering the plans, creating, and analyzing models and calculations with the latest software and producing structural drawings. He has experience in a multitude of structures, structural design analysis and modeling.**

PROFESSIONAL EXPERIENCE

Mr. Rangoonwala is currently a Vice President for MUE. He has recently passed his professional engineering exam in Florida and has over nine years of professional experience. His experience includes the structural design of manufacturing facilities, Residential and Commercial buildings, high-rise buildings, residential houses, office buildings, and parking garages.

Yusuf also has over two and a half years of work experience in India as a Structural Engineer. Mr. Rangoonwala also has previous work experience in the petrochemical and oil and gas refineries industries.

EDUCATION

Master of Science: Structural Engineering
Virginia Tech,
Virginia, USA, 2016

Bachelor of Engineering: Civil Engineering
University of Mumbai,
India, 2012

REGISTRATION

Registered Engineer
State of Florida
Reg. No. PE 90777

PROFESSIONAL AFFILIATIONS

American Society of Civil Engineers

American Institute of Steel Construction

American Concrete Institute

RELEVANT PROJECT EXPERIENCE

Retail Potable Water and Wastewater Master Plan RFQ, Various Broward County, FL-*Project Manager*. MUE is the structural engineering consultant for this master plan contract. Thus far, we have provided structural observations and assessments for twenty existing wastewater pumping stations and six water repump stations located throughout Broward County. MUE provided a structural condition rating, a description of our findings and assessment for each station observed.

Homestead Recreational Facility, Homestead, Florida-*Project Manager*. MUE provided structural design and engineering related to a new one-story building that includes a concession stand, storage areas, restrooms, and a covered outdoor seating area to serve the adjacent park.

CW Thomas Community Center, Dania Beach, Florida-*Project Manager*-A member of the team for this pursuit involving the structural design of a new 14,600sf community and aquatics center including an indoor basketball court, gymnasium, classrooms, offices, locker rooms and kitchen area.

City Hall Renovation, North Lauderdale, FL-Project Engineer**.** MUE is the member of the team for this specific contract. Our role will be the assessment and recommendations related to adding a second level to an existing municipal building.

Cagni Park, North Miami, Florida-*Project Manager*. Member of the team for a new one-story community center and aquatics building, totaling 12,500sf. Additionally, designed a one-story maintenance building.

Port Everglades, Spangler Gate & Gate 33, Security Booths, Fort Lauderdale, Florida- Project Manager. Our role on this project was the structural design of eight new security booths to existing concrete slabs. In addition, we designed two new prefabricated bathroom booths and two new prefabricated electrical room booths at main entrances to Port Everglades: Spangler Gate, Eller Drive and Gate 33.

Sawgrass to Seagrass Center, Deerfield Beach, Florida-*Project Manager*. MUE is a member of the team for the structural design of a new 17,000sf public facility center in Deerfield Beach. The ground floor features an open parking garage and office spaces, while the second level includes open terrace areas, a new community center and an exhibition space. MUE will provide structural special inspections during the construction phase.

Senior Activity Center, Pompano Beach, Florida- *Project Manager* -A member of the team for the City of Pompano Beach for the structural design and engineering related to a new one-story, ~8,472sf senior community center. The building consists of multiple activity rooms, kitchen, laundry facilities, storage rooms, office spaces, restrooms, a gymnasium and reception and lounge areas.

River Oaks Stormwater Preserve, Fort Lauderdale, Florida-Project Engineer**.** Our role in this public project is to provide structural design and engineering services related to a new 600-foot wood boardwalk and pre-manufactured wood gazebo structure.

James Archer Smith Splash Pad, Homestead, Florida-*Project Engineer*. Our role on this project is structural design and engineering related to a new fifty-foot diameter splash pad and aquatic features for the City of Homestead.

RADISE INTERNATIONAL

Jamshid Sajadi, Ph.D, P.E.
RADISE International, LC
Lead Geotechnical Engineer

Mr. Sajadi has over 37 years of experience in geotechnical and materials engineering and construction materials testing. His geotechnical engineering experience includes the design of shallow and deep foundation systems, retaining walls, flexible and rigid pavement systems, dam and levee embankment design and construction, sheet pile walls design and construction, soil-Bentonite Slurry/Bentonite cement cut-off walls design and construction, seepage analysis, field pump test, and dewatering systems.

In addition to his geotechnical design experience, Mr. Sajadi has extensive materials engineering, testing and inspection experience involving rigid and flexible roadway and bridge construction. During the past twenty-four years of his professional career in Florida, he has managed numerous geotechnical engineering and materials testing projects for the Florida Department of Transportation, South Florida Water Management District, Broward, Palm Beach, and Miami-Dade Counties, City of Fort Lauderdale, Miami, and West Palm Beach

PROFESSIONAL REGISTRATION AND CERTIFICATIONS:

- Registered Professional Engineer, Florida #55756
- Member American Society of Civil Engineers (ASCE)
- Member Florida Engineering Society (FES)
- Tau Beta Pi & Chi Epsilon Engineering Honorary Societies

EDUCATION

- Ph.D. in Civil Engineering (Geotechnical), West Virginia University, 1987
- MS, Civil/Geotechnical Engineering, West Virginia University, 1982
- B.S, Civil Engineering, West Virginia University, 1980

REPRESENTATIVE EXPERIENCE

I-95 (I-95 Mobility Project), Broward and Palm Beach Counties, Florida, FL. Managed Engineering Services and Evaluation along with Foundation System and Retaining Structures Analyses and Installation for Widening Including Bridges, Roadways, Interchanges, Mechanically Stabilized Earth Walls, Noise Barrier walls, and Mast Arm Foundations. Managed and supervised the installation of drilled shafts and driven piles.

PD & E Study, Eller Drive at Port of Everglades, Broward County, Florida, FL. Lead Geotechnical Engineer – Managed Subsurface Exploration and Performed Foundation Evaluation Including Three Bridges, Roadways, Interchanges, and Mechanically Stabilized Walls.

S.R. 824 (Las Olas Boulevard) Widening, Ft. Lauderdale, Broward County, Florida, FL. Geotechnical Engineer –Managed subsurface exploration and provided foundation design recommendations for this Florida Department of Transportation project which involved 5 bridges (over Coconut Isle, Siesta Way, Royal Palm Drive, Isle of Venice and Nurmi Drive). Managed and supervised the installation of drilled shafts and driven piles.

Foundation Stabilization of State Road 60, Martin County, Florida, FL. Lead Geotechnical Engineer — Managed and Supervised Engineering Services and Geotechnical Evaluation, Including Design of Preloading Surcharge Embankment and Relevant Instrumentation.

I-95 at Royal Pal, Palm Beach County, Florida, FL. Geotechnical Engineer — Evaluated the cause of Settlement/Washout behind the Culvert Bridge.

I-95 Mobility 2000 Project, Palm Beach County, Florida, FL. Geotechnical Engineer — Managed and Supervised the Installation of Drilled Shafts and Driven Piles.

Sawgrass Expressway, Broward County, Florida, FL. Geotechnical Engineer— Managed and Supervised the Installation of Auger-Cast Pile for the Construction of the Noise Barrier Walls.

Saw Grass Expressway near the Lyon Road, Broward County, Florida, FL. Geotechnical Engineer— Supervised the Remediation of the Sinkhole.

Eller Drive PD&E Study, Broward County, Florida, FL. Geotechnical Engineer— Managed subsurface exploration and provided geotechnical engineering analysis for 3 bridges, 10 mast arm poles, ramps and roadways.

RADISE INTERNATIONAL

Nitesh Goli, P.E. PMP
RADISE International, L.C.
Geotechnical Engineer

Mr. Nitesh Goli has over 8 years of experience in providing inspections, geotechnical engineering services for water resources, transportation and commercial building projects. He is skilled in providing soils borehole logging, pre and post construction surveys, vibration monitoring and visual classifications (ASTM D2488).

He is experienced in analyzing geotechnical data, performing the appropriate field site inspections and monitoring, calculations and preparing geotechnical and technical reports. He has also managed, supervised and met with contractors on site, and advised on civil engineering issues.

PROFESSIONAL REGISTRATION AND CERTIFICATIONS

- Professional Engineer, FL (PE100769)
- PMP Certified
- FDOT/CTQP QC Manager
- PCI Certified Level 1and 2 Quality Control Inspector
- FPCA & CMEC 450 Specification Certification
- PTI Certified Level 1 and 2 Unbonded PT Field Installer/ Inspector
- APNGA Portable Nuclear Gauge Safety & USDOT Hazmat Certification
- Smart Pile Data Acquisition and Review- Level 1
- ACI Concrete Field Testing

EDUCATION

- M.S. Civil Engineering, Florida Atlantic University- Florida
- M.S. Geotechnical Engineering, JNT University, Hyderabad, India
- Diploma in Project Management, HC University, Hyderabad, India
- B.S. Engineering, Osmania University, Hyderabad, India

REPRESENTATIVE EXPERIENCE

Floating Dock at Peanut Island Replacement, Palm Beach County, FL
Managed geotechnical engineering services including field investigations, laboratory testing and geotechnical engineering report. Provide engineering analyses and recommendations for the proposed improvements. FB-Deep software was used to evaluate the estimated axial pile capacity for an 18-inch Precast, Prestressed Concrete (PPC) pile and LPile software from Ensoft, Inc. was used to model the pile-soil-lateral load interaction.

S-332B and S-332C Pump Station Replacements, Miami-Dade County, FL
Managed geotechnical engineering services including field investigations, laboratory testing and geotechnical engineering data report. Provide subsurface necessary along the defined alignments of canals and embankments and at the location of the structures for the geotechnical analysis and design to support a project design.

Broward County Mast Arms, Broward Co., FL. Senior Geotechnical Engineer -- Field exploration/testing and laboratory testing for 20 planned intersections for mast arm traffic signal conversions and pavement improvements. Provided laboratory testing, asphalt core services and pavement evaluation.

I-75 Express Lanes – Segment E, Broward County, FL. Senior Geotechnical Engineer –– Provided geotechnical engineering services for the improvements along the I-75 (SR9) corridor. The length of the project was about 12 miles from the Miami-Dade County/Broward County line to North of I-595 Interchange.

FPL Germantown-Boca Teeca 138kV Line (T30047), Palm Beach County, FL
Managed geotechnical engineering services including field investigations, laboratory testing and geotechnical engineering report. The purpose of this study was to perform an exploration of the subsurface conditions near the proposed replacement transmission structures in order to provide geotechnical engineering information for the design of the foundations for the proposed transmission structures.

Larry M. Smith, P.E.

Principal Electrical Engineer

Smith Engineering Consultants,Inc.

Riviera Beach, Florida
(561) 616-3911 ext. 202
(561) 818-3600
Larry@SmithEngineeringConsultants.com

Professional Profile

Larry has over 30 years of experience as an electrical engineer in the areas of electric utilities, water and wastewater utilities, solid waste, water control structures and pump stations, airport electrical systems, architectural projects, telecommunications, roadway, sports field, and specialty lighting. He demonstrates skills in engineering and design, project management, client relations, and staff administration.

Software Skills

AutoCAD, MicroStation AGI32 and Microsoft Office.

Education

BS - Electrical Engineering, Florida Atlantic University, 1987

Post Graduate Research - Electrical Engineering (Telecommunications), Florida Atlantic University, 1987-1988

Licenses/Certifications

Florida P.E. No. 45997
North Carolina P.E. No. 033663
Technical Assistance Analyst, Florida No. T-0828

Awards

Florida Engineering Society, Outstanding Service to the Profession 2010-2011

Florida Engineering Society, Engineer of the Year 2007 - 2008

Years with SEC:

24

Years of Experience:

34

Project Experience

Palm Beach County Lift Stations- Larry is the Engineer of Record (EOR) for the SCADA/telemetry system improvements for over 80 lift stations throughout Palm Beach County's service area. New remote terminal units (RTU), including associated antenna towers, were added to provide remote status reporting to the central monitoring location. New pump control panels were designed to replace those that were in poor condition. New level transducers and programmable logic controllers (PLC) were provided for modernized pump control. Radio surveys were performed at 80 sites plus an additional 20 sites prior to the design providing the County with additional data in order to better understand the limits of their lift station communication ranges.

City of Sunrise, Sawgrass WTP Improvements- Larry is the EOR for electrical systems for miscellaneous improvements to the City's existing water treatment plant. This included the electrical power distribution, controls, and instrumentation. Four (4) existing transfer pumps at the clearwell were upgraded with larger motors. Two (2) of the pumps received new reduced voltage starters and the other two (2) new variable frequency drives (VFD's). Other improvements included new metering pumps for the sodium hypochlorite, the replacement of three (3) concentrate booster pumps/ motors, a new air compressor, and the removal of the existing ozone generator.

City of West Palm Beach Lift Station SCADA Upgrade - Larry is the EOR for the replacement of the City's existing base station and RTUs that serve over 100 lift stations throughout the City of West Palm Beach. The existing SCADA system was comprised of several different types of RTUs along with proprietary base station software that was not able to accommodate RTUs with an open communications protocol. Therefore SEC specified a new base station, including both system hardware and software, to allow different types of RTUs to be installed in the field that previously would not have been able to communicate with the base station. We also specified the new RTUs to replace those at the lift stations that were aging and in need of replacement. This new SCADA system provided the necessary flexibility that helped the City to save operating and maintenance costs by allowing for non-proprietary, lower cost RTUs to be installed throughout their service territory.

City of West Palm Beach Water Treatment Plant Generator- Larry is the EOR for the power, control, and instrumentation systems for a new 2,000 kW, 4,160 volt generator installation at the City's existing Water Treatment Plant. He designed the electrical systems, including three new automatic transfer switches, for the relocation of the existing 1,000 kW generator to the City's public works complex. Control and Instrumentation systems were integrated with the existing paralleling switchgear at the water treatment plant.

South Martin Regional Utilities- Larry provided the electrical engineering services for the construction of the MBR Pilot project at the existing WWTP. This included the design of a new motor control center for the MBR blowers, pumps, and other appurtenant equipment. Variable frequency drives were provided for motor control, and a new PLC panel was provided for overall system control.

Town of Jupiter Utilities Projects- Smith Engineering Consultants, Inc. has worked with the Town of Jupiter on several of their recent utilities projects. We have successfully resolved power quality issues within the Nano-filtration Plant. We have made improvements to the existing high service pumps by designing new variable frequency drives (VFD's) to replace existing reduced-voltage motor starters. Also recently we have designed the electrical systems for new and replacement surficial aquifer wells, which included 4,160V power distribution. Larry Smith has personally worked on numerous projects for the utilities department for nearly 25 years.

David Jones, P.E.
Senior Mechanical Engineer

Smith Engineering Consultants, Inc.

Fort Lauderdale, Florida
(954) 590-0488
David@SmithEngineeringConsultants.com

Professional Profile

David has over 40 years as a mechanical engineer including over 30 years of HVAC & Plumbing project engineering experience. Specific experience includes project supervision, contract administration, client contact, HVAC load calculations, HVAC equipment selection, HVAC system design, & complete plumbing design. Additional skills include AutoCad drafting, & proficiency with the FL energy code calculation. Types of projects include a wide variety of industrial, commercial, light manufacturing, & residential.

Software Skills

AutoCAD, MicroStation, and Microsoft Office.

Education

Project Experience

City of West Palm Beach, Renaissance Pump Station - Mechanical design for a new stormwater pump station consisting of three (3) electric motor operated pumps with both upstream and downstream water level monitoring. Mechanical design included motor operated gates for control structures, ventilation of the main electrical room, and plumbing. Also included was the design for a chemical treatment and injection system that treated the stormwater as it was pumped into its storage pond. Designed the mechanical systems for trash rakes that were later installed at this pump station.

Northern Palm Beach County Improvement District, Mirasol Pump Station - Mechanical design for a new stormwater pump station. This pump station consisted of six (6) electric motor operated pumps with both upstream and downstream water level monitoring. A backup diesel generator was designed to provide power for full pumping capacity. Mechanical design included motor operated gates for control structures, air conditioning of the main electrical room, and plumbing.

Village of Wellington (ACME Improvement District), Stormwater Pump Stations No. 3, 4, 5, and 6 - Mechanical design for several new stormwater pump stations throughout the Village of Wellington. These pump stations consisted of electric motor operated pumps with both upstream and downstream water level monitoring. A backup diesel generator was designed at each pump station to provide power for full pumping capacity. Mechanical design included motor operated gates for control structures, ventilation of the main electrical rooms, and plumbing. He also designed the mechanical systems for the trash rakes that were later installed at these pump stations.

City of Lake Worth Master Pump Station - Mechanical design for two (2) redundant air-conditioning systems to cool the electrical equipment room. These split (DX) systems were of a low profile, space saving design so as to maximize the available space for the electrical equipment. Air conditioning of the variable frequency drives (VFD's) serves to extend the life of these expensive devices.

Gateway Community Development District - Mechanical design for two (2) redundant air-conditioning systems to cool the electrical equipment room. These split (DX) systems were of a low profile, space saving design so as to maximize the available space for the electrical equipment. Air conditioning of the variable frequency drives (VFD's) serves to extend the life of these expensive devices.

City of West Palm Beach, Gaines Park - Mechanical design for the renovation of the existing multi-purpose building for the City of West Palm Beach, and the addition of approximately 20,000 square feet of interior space. The mechanical design included a new air conditioning system along with new potable water & sanitary piping.

Palm Beach County Water Utilities District SRWRF-Hagen Ranch Rd. Facilities Condition Assessment - *Electrical Engineer* responsible for the data gathering, evaluation, and report generation justifying the replacement of electrical equipment in 11 buildings at the South Regional Water Reclamation Facility (SRWRF).

Palm Beach County Water Utilities District SRWRF-Hagen Ranch Rd. Facilities Master Plan - *Electrical Engineer r*esponsible for the data gathering, evaluation, and report generation for justifying new electrical facilities to handle the 2200 kWD of electrical demand being added to the existing 3700 kWD. Also provided a time line shown in this Facilities Master Electrical Plan.

Palm Beach County Water Utilities District WWTP Facility Facilities Condition Assessment - *Belle Glade & Pahokee Facilities, Electrical Engineer r*esponsible for both locations data gathering, evaluation, and report generation justifying the replacement of electrical equipment in 13 buildings at a cost estimate of $745,000

Palm Beach County Water Utilities District, North West Regional WWTP - *Electrical Engineer r*esponsible for both locations data gathering, evaluation, and report generation justifying the replacement of electrical equipment

City of Fort Lauderdale, George T. Lohmeyer WWTP - Responsible for the Electrical Design and Instrumentation application for the upgrading of Variable Frequency Drives(VFDs) for 3-1800 HP motors

SFWMD C43-West Basin Reservoir - *Electrical Engineer r*esponsible for the Electrical Design and Instrumentation application for 10 gate structures to manage water level in the Calooshatchee River. Coordinated with geotechnical team to place 338 piezometers and 64 RTUs along the dam and Townsend Canal to monitor the dam's integrity. This project represents the largest project letting ever from the SFWMD.

SFWMD S-333N - *Electrical Engineer* responsible for the Electrical Design and Instrumentation application for a drum operated gate structure to manage water level in the L-29 Canal

Solid Waste Authority of Palm Beach County - Arc Flash Study - *Electrical Engineer r*esponsible for the data gathering, evaluation, and report generation for updates to the Site 7 Facilities Arc Flash Study involving 2- 13kV and 25 - 5kV transformers, and 8 - 5kV switchgears.

Sample Project Experience

Pompano Beach Water Treatment Plant – Electrical and instrumentation design for miscellaneous chemical pump system upgrades.

Pompano Beach Water Treatment 10 MGD Membrane Filtration – Design for the electrical system for the membrane system.

Jupiter Water Treatment Plant (WTP) Concentrate Treatment Facility – Design the replacement of across the line starters with VFDs. Upgrade of the instrumentation for controls. Also, as part of the upgrade, the replacement of the lighting and AC for the electrical room.

Palm Beach County (PBC) Water Utilities Department (WUD) – The upgrade and replacement of Programmable Logic Controllers (PLC) and SCADA Systems thru out the plant.

North Springs Improvement District (NSID) – Designed the electrical and instrumentation for the plant expansion of new filters, softener upgrades and gravity thickener. The design of the expansion of the electrical and the instrumentation.

Lake Worth Utilities WTP – Designed the Chlorine system electrical improvements and upgrades for the treatment plant. Included the review of existing electrical system along with the necessary modifications.

Atlantis, FL WTP- Designed and construction services for the replacement of the generator system for the WTP.

Broward County North Regional Wastewater Treatment Plant (NRWWTP) – The electrical and instrumentation design of the replacement of the outfall liquid rheostat drives.

Broward County North Regional Wastewater Treatment Plant (NRWWTP) – The electrical design of the deep well injection building, deep wells and the enlargement of the main electrical room and generation for the plant.

PBC WUD South Regional Water Reclamation Facility- Loop Diagrams and As-built Electrical Drawings

PBC WUD Belle Glade Wastewater Treatment Facility (WWTF) – Belle Glade Switchgear Assessment

PBC WUD- Countywide Arc Flash assessment studies and reports

C43-West Basin Reservoir - Designed Power, Lighting, and Instrumentation for 12 gate structures and for the Dam monitoring.

C43-West Basin Reservoir S-470 Pump Station- Designed 5kv and below Power, Lighting, and Instrumentation/SCADA for pump station consisting of (4) four 2500HP, 5KV pumps.

Town of Palm Beach – D-10 Storm Water Pump Station Improvements – Designed and construction management for power, lighting and instrumentation for the station.

BURAK KONUK, P.E., PTOE, IMSA III

PROFESSIONAL REGISTRATIONS
- Professional Engineer FL #81581
- 2014 Professional Traffic Operations Engineer (PTOE) #3689
- IMSA Traffic Signal Level III #129654
- FDOT Temporary Traffic Control (TTC) - Intermediate #67109
- FDOT Specifications Package Preparation

PROFESSIONAL AFFILIATIONS
- Intelligent Transportation Society of Florida (ITS Florida)
- Institute of Transportation Engineers (ITE)
- Greater Tampa Section ITE (Past President)
- International Municipal Signal Assoc. (IMSA)
- Project Management Institute (PMI)
- American Society of Civil Engineers (ASCE)
- American Society of Highway Engineers (ASHE)
- National Society of Professional Engineers (NSPE)

Mr. Konuk has 15 years of diversified experience in transportation engineering and has served as Engineer of Record (EOR) for different City/County/DOT roadway design projects, including new construction, widening, and resurfacing projects ranging from local roads to large-scale highway projects. Traffic experience includes a wide range of traffic engineering studies, intersection analysis, signal warrant analysis, signal retiming, intersection control evaluation (ICE) (completed FDOT 2019 ICE training for Managers/Approvers) and design of signalization, Intelligent Transportation Systems (ITS), Advanced Transportation Management Systems (ATMSs), lighting, signing and pavement markings (S&PM), and Temporary Traffic Control Plan (TTCP). He is proficient in design standards, procedures, practices, guidelines including Highway Capacity Manual, MUTCD and MUTS. He is well-versed in industry standard computer design software and tools such as: MicroStation, INROADS, ProjectWise, Agi32 Lighting Analysis Software, AutoCAD, MS Project, MS Visio, MS Visual Basic™, Fortran77, ArcGIS ESRI, GuideSign, Bluebeam Revu, AutoTURN, HCS, SIDRA, SYNCHRO and SimTraffic.

EXPERIENCE:

Project Manager, SR-80/Southern Boulevard Ramps and SR-7/US-441 Widening, Palm Beach County, Florida, FDOT District 4. This infrastructure improvement project includes the widening of SR-80 to accommodate new right and left turn lanes, as well as the widening of SR-7/US-441 for additional turn lane capacity. The project also includes the widening of the existing bridges over the C-51 canal to support the expanded roadway infrastructure. As Project Manager, responsibilities included overseeing the delivery of comprehensive design support services, including roadway plans, technical specifications, engineering analysis, and detailed calculations. All work was completed in compliance with FDOT policies, procedures, and the systems engineering process. (January 2023 – Present).

Project Manager, Crystal Lake Drive & NW 45th Street Improvements, FDOT District 4 LAP 445529-1, Deerfield Beach, Florida. This LAP-funded multimodal improvement project for the City of Deerfield Beach focuses on enhancing pedestrian safety, accessibility, and corridor lighting along Crystal Lake Drive and NW 45th Street. Scope of work includes design and construction of new 5-foot detached sidewalks to eliminate existing gaps, ADA-compliant curb ramp upgrades, and installation of up to four raised mid-block crosswalks at key community locations. The project also includes a comprehensive roadway lighting design using FPL-approved materials, supported by photometric analysis and final plans for FPL construction. A proposed mini-roundabout at the intersection of Crystal Lake Drive and NW 45th Street aims to improve traffic flow and safety. (February 2023 – Present).

Traffic Engineer, FDOT District Four, SR-80 exit ramps at SR 7/441. SR7/441 at SR 80, addition of turn lanes storage lengths, Palm Beach County, Florida EOR for the design of the signalization and lighting for the widening of the intersection. The proposed design will include the addition of triple lefts, dual rights, a signalized U-Turn and through lanes. Traffic analysis, utilizing SYNCHRO, including pedestrian movements is being performed. Signalization will include new mast arms, pole-mounted signals for the U-Turns and Bridge-Mounted signals for the North/South movements. Lighting analysis and design includes standard LED lighting, high mast lighting and underdeck lighting. (03/2023 – Current).

TRACY KAPLAN, P.E.

Ms. Kaplan provides 22 years of experience as a Project Engineer for general civil engineering projects. Her highway background focuses on utility coordination, drainage studies, hydraulics analysis, utility relocations, lighting, and pavement marking and signing. She designs and reviews drawings as required assuring the quality, quantity, and completeness of the design. She is familiar with federal, state, and local design standards and is a proficient user of Microstation, Geopak, and ASAD.

EXPERIENCE

SR-5/US-1, from South of Eve Street to South of Harbourside Drive, Palm Beach County, FL (11/2017-Present) Project Manager for the design of a four-lane typical section, 3R project including drainage improvements, signalization, lighting, utility coordination and safety upgrades. Project included signing and marking plans and shoulder reconstruction to allow for a continuous bicycle lane.

Spanish River Boulevard / I-95 Interchange, Boca Raton, FL. (06/2011 – 09/2015) Project Engineer responsible for the signing and pavement markings, signalization and lighting the new designed interchange. This project includes a new exit onto Spanish River Blvd. from I-95 with new ramps for Yamato Blvd. The project includes 13 bridges as well as reconstruction on Spanish River Blvd. and Yamato Rd. VN is now doing plan review for this converted DB project.

SR-870/Commercial Boulevard at NE 15th Avenue in Broward County, FL. (01/2014 – 01/2015) Project Manager for the roadway and signalization preparation of construction plans and documents for the improvements of this signalized intersection. This project includes performing signalization analysis and design for adding protective/permissive left-turns for westbound vehicles. Preparing a community awareness plan and long-range estimate/engineers estimate updates. Prepare complete signalization plans including traffic control for Constructability, Biddability, and Production.

SR-842/Broward Boulevard at NW 9th Avenue in Broward County, FL. (01/2014 – 01/2015) Project Manager for the preparation of construction plans and documents for the improvements of this signalized intersection. This project includes performing upgrading roadway features, signalization analysis and design for upgrading the existing strain pole installation to mast arms and adding protective/permissive left-turns for eastbound and westbound vehicles. Preparing a community awareness plan and long-range estimate/engineers estimate updates. Prepare complete signalization plans including traffic control for Constructability, Biddability, and Production.

I-95 Blue Heron Boulevard Interchange Improvements in Palm Beach County, FL. (02/2014 – 02/2015) Project Manager for the preparation of signing and pavement marking and signal plans for the improvements of the I-95 Blue Heron Boulevard Interchange. This project includes performing signing and pavement marking analysis and design, signalization analysis and design and completing subcomponent plans for constructability, biddability and production digital delivery submittals.

Spangler Boulevard By-pass Road Phase 1 Improvements, Fort Lauderdale, FL. (11/2010 – 02/2013) Project Engineer for the design of the signalization at Eisenhower Boulevard and SE 20th Street, signal warrant analysis at Eisenhower Boulevard and Spangler Boulevard, and demolition plans. Design includes all calculations, utility coordination, signal timings, signal operating plans, coordination, plans, and specifications for the project.

I-595 Design Build Expansion, Broward County, FL (03/2009 - 01/2010) Project Engineer responsible for the analysis and review of the highway geometry for all project zones. Highway geometry components included the mainline, express lanes and ramps. This Private-Public Partnership project (P3) extends from I-75 to I-95.

Lake Worth Road (S.R. 802) from SR 7 to Cypress Isle Way; Palm Beach County, FL. (04/2008 – 01/2010) Project Engineer responsible for utility coordination, roadway plans, signing and pavement marking plans, specifications package, and quantities for this RRR project on Lake Worth Road. This project included guardrail replacement, median design, sidewalk replacement, and drainage structure repair. Plans are being prepared following FDOT Roadway Design Standards.

District Wide Plans Review and Design Support Services, Department of Transportation, District IV; FL (2008 - 1/2010). Project Engineer responsible for conducting constructability, biddability and quality control reviews of roadway plans as general consultant to the Department. Reviews included areas of utility conflicts, roadway geometry, drainage, signing & markings, signalization and lighting. The plans were reviewed for compliance with both applicable and current AASHTO and FDOT standards.

Section 4.6:
Relevant Completed Project Experience

CRAIG A. SMITH & ASSOCIATES

CITY OF PEMBROKE PARK FLORIDA
The Small Town that Means Big Business

Section 4.6: Relevant Completed Project Experience

Craig A. Smith & Associates, LLC (CAS) is a multidisciplinary engineering and design firm with extensive in-house capabilities to deliver Civil Engineering (2); Surveying & Mapping (7) ; Drainage/Stormwater (8); Construction Engineering Inspection (CEI)(10); and Project Management (11) services for building construction, facility renovations, and infrastructure improvement projects of limited to moderate scope.

Our long-lasting, strategic partners expand and strengthen our multidisciplinary engineering capabilities on complex infrastructure and facility projects. MUEngineers provides specialized Structural engineering (2). Smith Engineering Consultants (SEC) offers comprehensive Mechanical, Electrical, and Plumbing (MEP) engineering services (2). VN Engineers brings extensive experience in transportation, traffic, and roadway engineering (3) Radise International contributes advanced geotechnical engineering services (5) Together, these partners enhance our ability to deliver fully integrated engineering services across all project phases.

PROFESSIONAL CATEGORY: (2) CIVIL ENGINEERING SERVICES

- **Project Name: 7th Street Wastewater Force Main Improvements, Hallandale Beach, Florida**
  Client Entity: City of Hallandale Beach
  Client Contact: Jesus Padron, Project Manager, Phone: (954) 457-3042,
  Email: jpadron@hallandalebeachfl.gov
  Client Address: 630 NW 2nd Street, Hallandale Beach, FL 33009
  Start Date: August 2021
  End Date: Under Construction
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Daniel E. Shonk
  Other Key CAS Staff: Al Caruso, Robert Keener, James F. Driscoll, Todd V. Larson
  Scope of Work: The scope of work for this project entails survey, utility locates, design and construction management for the installation of approximately 3,900 linear feet of new 20" force main with all appurtenances along NE 7th Street due south and east of the Hollywood Dog Track in Hallandale Beach along with a 60-foot jack-and-bore under railroad tracks at the intersection of NE 7th Street and Dixie Highway. Utility locates include 40 soft digs and 2D GPR services for buried utilities verification. The design is 100% complete. The project is currently in the bidding phase.
  Project Challenges & Approach: *Engineering analysis was made to determine the optimal feasible location of the wastewater Force Main in a utility congested corridor prior to final engineering design.*
  Design Cost (including Construction Management): $412,110
  Construction Cost Estimate: $4,800,000

Construction Cost: TBD
Change Orders: TBD

- **Project Name: Caloosahatchee River Northeast Septic to Sewer Service Project – Phase 6, Moore Haven, Florida**
  Client Entity: Glades County/City-County Public Works Authority (CCPWA)
  Client Contact: Larry Tibbs, City Manager, Phone: (863) 946-0711,
  Email: Citymanager@moorehaven.org
  Client Address: 299 Riverside Drive, Moore Haven, FL 33471
  Start Date: May 2024
  End Date: On-going (Construction Phase)
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Daniel E. Shonk
  Other Key CAS Staff: Greg Giarratana, Robert Keener, James F. Driscoll, Todd V. Larson
  Scope of Work: CAS was tasked with the design and construction management for the installation of a wastewater collection system consisting of 8" gravity sewer and associated manholes to replace thirty-six (36) falling residential septic systems along portions of Avenue F including Railroad Avenue from 8th Street East to 6th Street and the section of Railroad Avenue between 4th Street East to 3rd Street. The project included sewer lateral installations to each property and complete road replacement within the limits of construction.
  Design Cost (including Construction Management): $145,440
  Construction Cost Estimate: $1,040,000
  Construction Cost: $864,084
  Change Orders: TBD

- **Project Name: Torrey Preserve Extension Wastewater and Potable Water Improvements, Hardee County, Florida**
  Client Entity: Hardee County Utilities
  Client Contact: Bobby Keene, Capital Project Manager, Phone: (863) 773-3465,
  Email: bobby.keene@hardeecounty.net
  Client Address: 2428 Commerce Court, Bowling Green, Florida 33834
  Start Date: August 2023
  End Date: January 2025
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Daniel E. Shonk
  Other Key CAS Staff: Greg Giarratana, Robert Keener
  Scope of Work: CAS is providing professional engineering services for the design, permitting and construction management for the installation of potable water and sanitary sewer system expansion consisting of approximately 3,360 linear feet of 4-inch sanitary sewer force main and 2,050 linear feet of 10-inch water mains along Bostick Road. The project was completed on time and under budget.
  Design Cost (including Construction Management): $119,046
  Construction Cost: $684,420
  Change Orders: -($25,597)

- **Project Name: U.S.-27 Utility Corridor Infrastructure East Side Sewer Addition, Glades County, Florida**
  Client Entity: Glades County/City-County Public Works Authority (CCPWA)
  Client Contact: Paul Carlisle, County Manager, Phone: (863) 496-6000,
  Email: pcarlisle@myglades.com
  Client Address: 299 Riverside Drive, Moore Haven, Florida 33471
  Start Date: September 2023
  End Date: April 2025
  Prime Consultant: CAS

Principal In-Charge: Stephen C. Smith
Project Manager: Greg Giarratana
Other Key CAS Staff: Robert Keener, James F. Driscoll
Scope of Work: The project scope consisted of sanitary sewer improvements which entailed the installation of approximately 6,000 linear feet of 10-inch PVC force main, 400 linear feet of 12-inch HDPE horizontal directional drill subaqueous crossing under the Caloosahatchee River. The project also included the installation of a duplex submersible master wastewater lift station in the proximity of the Sportsman Village RV Wastewater Treatment Plant along Daniels Road. The lift station wetwell is 8- feet in diameter by 24 feet deep and the pumps are rated 492 gpm at 91 TDH.
This project was completed on time and budget.
Design Cost (including Construction Management): $362,800
Construction Cost: $1,992,246
Change Orders: $18,500 (change order was required for furnishing and installing additional electrical conduit and wiring to lift station)

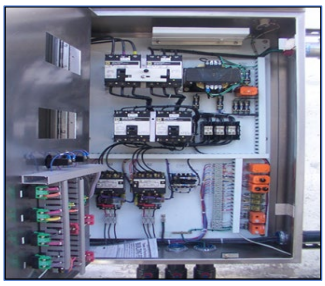
- **Project Name: Egret Tri-plex Wastewater Lift Station, Hallandale Beach, Florida**
  Client Entity: City of Hallandale Beach
  Client Contact: Jesus Padron, Project Manager, Phone: (954) 457-3042,
  Email: jpadron@hallandalebeachfl.gov
  Client Address: 630 NW 2nd Street, Hallandale Beach, FL 33009
  Start Date: July 2021
  End Date: Under Construction
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Daniel E. Shonk
  Other Key CAS Staff: Greg Giarratana, Robert Keener, James F. Driscoll, Todd V. Larson
  Scope of Work: The scope of work consisted of the conversion of an existing triplex wet pit dry pit wastewater pump station to a triplex submersible lift station. The existing pump station is located in between the northeastern corner of the Gulfstream Racetrack and the Golden Isles Park and Tennis Center on Layne Blvd. The station was constructed in 1967 and consists of three large centrifugal pumps with the largest pump being 200 HP. The existing structure will be converted into a submersible lift station with three 1,800 gpm submersible pumps. The proposed rehabilitation will include installing a new influent structure on the east side of the pump station in which the existing 30-inch diameter influent pipe will be exposed into a rectangular open channel type structure. The proposed structure will be approximately 20 deep where a mechanical sewage grinder rated at 2,500 gpm will be installed on a rail system for easy installation and removal. The proposed structure will be enclosed with a concrete top slab with an aluminum hatch to access the mechanical grinder for service and or removal. The project will also include electrical, control panel and emergency generator upgrades. The design is 100% complete. The project is currently in the bidding phase.
  Design Cost (including Construction Management): $426,222
  Construction Cost Estimate: $3,500,000
  Construction Cost: $6,000,000
  Change Orders: TBD

PROFESSIONAL CATEGORY: (7) SURVEYING AND MAPPING.

- **Project Name: FAU Research Boulevard (SW 11th Way) Roadway Improvements – Survey & Subsurface Utility Mapping**
  Client Entity: City of Deerfield Beach
  Client Contact: Artem Stunnikov, P.E., Project Manager, Phone: 305-535-7719,
  Email: artem.stunnikov@kimley-horn.com
  Client Address: 434 S. Swinton Avenue, Delray Beach, FL 33444
  Start Date: February 2023
  End Date: February 2024
  Prime Consultant: Kimley-Horn & Associates, Inc.
  Subconsultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Robert D. Keener
  CAS Key Staff: David Lookabill – Survey Crew Leader/Survey Coordination Manager; James F. Driscoll – Vice President of SUE; Alan Lopez – SUE Field Supervisor/SUE Manager
  Scope of Work: The project consisted of providing utility location and verification services along FAU Research Park Boulevard between NE 48th Street and SW 10th Street for approximately 6,200 linear feet. Subsurface utility engineering included ground penetrating radar (GPR) in addition to electromagnetic induction (EM) to perform/verify horizontal locations of existing buried utility lines. Eight-nine (89) utility test holes (soft digs) were performed, and reports provided for each with utility depth, elevation, size, material and type. Survey physically located all above ground, visible utilities and show together with soft dig locations and utilities as marked on the surface by the Craig A. Smith & Associates Locating Department. All information was shown relative to the Florida State Plane Coordinate Grid System, East Zone, North American Datum of 1983 (NAD '83) with the 2011 adjustment, horizontally and the North American Vertical Datum of 1988 (NAVD '88) vertically. A base map was created in current software parameters and provided to the Client as well as a Certified Map of Specific Purpose Survey adhering to the Standards of Practice for surveying in the State of Florida, (Chapter 5J–17) of the Florida administrative code, for engineering design purposes.
  Project Cost: $67,150.

- **Project Name: Water Utility System Mapping Updates (Zone CA) – Survey & Subsurface Utility Mapping**
  Client Entity: City of Ft. Lauderdale
  Client Contact: Richard D. Pryce, PSM, Vice President Survey & GIS, Phone: 954-739-6400,
  Email: rpryce@craventhompson.com
  Client Address: 100 N. Andrews Avenue, Ft. Lauderdale, FL 33301
  Start Date: December 2022
  End Date: May 2023
  Prime Consultant: Craven & Thompson, Inc.
  Subconsultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Robert D. Keener
  CAS Key Staff: Donald Drake – Survey Crew Leader; James F. Driscoll – Vice President of SUE; Alan Lopez – SUE Field Supervisor/SUE Manager
  Scope of Work: Provided surveying and subsurface utility engineering for the water utility system mapping updates delineated within the CA Smith Zone located within the City's northeast service area. The project area contained approximately 168,960 linear feet or 32 miles of existing 8" water pipelines. The scope of work included 2D ground penetrating radar to verify depths and sizes of the existing water mains within the prescribed right-of-way corridor including identify/verifying location of existing isolation valves, air-release valves, fire hydrants and approximately 12,000 associated water meters. Survey physically located the utility surface marks for existing water mains provided by the CAS Utility Locates Department and above ground valves, fire hydrants, air release valves, etc. relative to the defined scope. Missing and/or unknown pipes based on the GIS data supplied by the client were mapped as applicable. The

Certified Surveyors Report adhered to the Standards of Practice for Surveying, (Chapter 5J – 17) of the Florida Administrative Code.
Project Cost: $291,234.



- **Project Name: Lindell Boulevard Roadway Improvements - Survey & Subsurface Utility Mapping**
  Client Entity: City of Delray Beach
  Client Contact: Kaitlin E. Townsend, P.E., Project Manager, Phone: 561-290-0962,
  Email: Kaitlin.townsend@kimley-horn.com
  Client Address: 434 S. Swinton Avenue, Delray Beach, FL 33444
  Start Date: February 2022
  End Date: July 2022
  Prime Consultant: Kimley-Horn & Associates, Inc.
  Subconsultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Robert D. Keener
  CAS Key Staff: David Lookabill – Survey Crew Leader/Survey Coordination Manager; James F. Driscoll – Vice President of SUE; Alan Lopez – SUE Field Supervisor/SUE Manager
  Scope of Work: CAS performed survey and subsurface utility engineering for roadway and drainage improvements of Lindell Boulevard. The project was divided into two segments. Segment 1 consisted of Lindell Blvd from the west side of the FEC Railroad right-of-way (ROW) north to Curlew Road and Segment 2 ran from Curlew Road north to SW 10th Avenue and then east to Linton Blvd. The scope of work included a topographic survey for the entire corridor including easements and a title search as needed to complete ROW mapping and resolve discrepancies. Topographic survey cross-sections were conducted at 50-foot intervals and at the center of each driveway along with planimetric data for all surface features. The survey extended 5 feet beyond the ROW, 10 feet beyond the ROW at driveways, 50 feet beyond all returns at intersections and 100 feet beyond each round-a-about. In addition, visible drainage structures were located and top, bottom and pipe invert with direction and size were captured. Also trees 4" in caliper or great were shown on the basemap (tree survey). Subsurface utility engineering included soft digs at seventy-five (75) designated locations to verify depths, sizes and materials of conflicting buried utilities. **The surveying portion of the project was completed two weeks ahead of schedule and within the initial budget.**
  Project Cost: $98,470

- **Project Name: General Subsurface Utility Mapping**
  Client Entity: City of Hollywood
  Client Contact: Jaime Castillo, Public Utilities Manager, Phone: 954-967-4357
  Email: jcastillo@hollywoodfl.org
  Client Address: 2600 Hollywood Boulevard, Hollywood, FL 33020
  Status: 2004-2021, 2025 -to-date (Multi-Year Continuing Contract)
  Prime Consultant: CAS
  CAS Key Staff: Stephen C. Smith, P.E. – President; James F. Driscoll – Vice President of SUE; Alan Lopez – SUE Field Supervisor/SUE Manager
  Scope of Work: For 17 years CAS has been contracted with the City of Hollywood to perform complete subsurface utility locate services for 600 miles of water main, 300 miles of sewer main, as well as force main, street lighting and water and wastewater treatment plant utilities for the 27 square mile municipality since March of 2004. CAS also provided utility locates for the city's engineering support services division for projects designed in-house including the North Lake Area, 14th Avenue, Pembroke Road and Johnson Street.
  Project Cost: $250,000 (Annually) ($4,250,000 over 17 years)

- **Project Name: General Subsurface Utility Mapping Services**
  Client Entity: City of Oakland Park Public Works
  Client Contact: Chris Lipps, Public Works Assistant Director, Phone: 954-630-4441
  Email: chrisl@oaklandparkfl.gov

Client Address: 5100 NE 12th Terrace, Oakland Park, FL 33334
Status: On-Going (Multi-Year Continuing Contract)
Prime Consultant: CAS
CAS Key Staff: Stephen C. Smith, P.E. – President; James F. Driscoll – Vice President of SUE; Alan Lopez – SUE Field Supervisor/SUE Manager
Scope of Work: CAS is contracted by the City of Oakland Park to perform complete subsurface utility locate services of 83 miles of water main, 929 miles of gravity sewer main, as well as force main, street lighting and water treatment plant utilities for the 5,128 acres of the municipality since August 3, 2022. CAS also provides utility locates for the city's engineering support services division for projects designed in-house such as the S-36 Pedestrian Access Bridge project.
Project Cost: $40,000 (Annually)

PROFESSIONAL CATEGORY: (8) DRAINAGE AND STORMWATER

- **Project Name: Center Island Stormwater-Tidal Pump Station, Golden Beach, Florida**
  Client Entity: Town of Golden Beach
  Client Contact: Alexander Diaz, Town Manager, Phone: (305) 932-0744,
  Email: alexdiaz@townofgoldenbeach.us
  Client Address: One Golden Beach Drive, Golden Beach, Florida 33160
  Start Date: November 2020
  End Date: June 2022
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Orlando Rubio
  Other Key CAS Staff: Robert D. Keener, James F. Driscoll, Todd V. Larson
  Scope of Work: A professional general engineering services contract has been maintained with the Town of Golden Beach since 2000. The Town issued a Task Order to CAS to provide engineering, design, permitting, surveying, utility locating and construction management services for the design of a duplex stormwater pump station with 18HP pumps rated at 2,340 GPM to provide flood relief during a storm event occurring in high tide. CAS secured an SRF loan for the Town in the amount of $915,000.
  Design Cost (including Construction Oversight): $234,315
  Construction Cost: $1,235,288
  Change Orders: -($,444,379) (as a cost-savings measure Town decided to directly purchase all electrical equipment associated with the project)

- **Project Name: SW 2nd Street Drainage Improvements, City of Pompano Beach, Florida**
  Client Entity: City of Pompano Beach
  Client Contact: John Sfiropoulos, City Engineer, Phone: 954-786-4060,
  Email: john.sfiropoulos@copbfl.com
  Client Address: 1201 NE 5th Avenue, Pompano Beach, FL 33060
  Start Date: September 2018
  End Date: March 2023
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Orlando Rubio
  Key CAS Staff: Robert D. Keener, Todd Larson
  Scope of Work: Engineering services for proposed drainage along SW 2nd Street between Dixie Highway and Cypress Road, SW 1st Avenue between SW 2nd Street and Atlantic Blvd. CAS met with City of Pompano Beach to discuss City concerns with flooding at the described project limits and identify potential solutions. It is anticipated the proposed drainage improvements could include a combination of new swale systems and new exfiltration trenches where feasible and utilization of existing stormwater outfalls. The project scope is limited to implementation of new stormwater management systems and does not include major roadway re-grading or full reconstruction. CAS services include surveying, utility

locates services, engineering design, permitting, bidding and negotiating services, construction management services and final certifications through project closeout.
Project Challenges & Approach: *The project's existing site conditions include low site grade elevations, lack of available land space and low soil permeability rates making it challenging to implement new stormwater management design elements such as swales, retention areas and exfiltration trench. Additional challenges included congested corridors with various existing utilities that make it difficult to accommodate proposed exfiltration trenches within the road right of ways. The project design approach included maximizing offsite discharge rates to maximum allowable rates using two existing outfalls, creating new swale areas and implementing exfiltration trenches to the greatest extent possible. The design also included improving stormwater conveyance by expanding the current drainage system to encompass the entire drainage areas through new interconnected catch basins and utilization of both existing stormwater outfalls.*
Design Cost: $143,833
Construction Cost: $923,895
Change Orders: None

- **Project Name: SE 8th Avenue Stormwater Improvements**
  Start Date: April 2024
  End Date: September 2025
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Orlando Rubio
  Other Key CAS Staff: Stephen C. Smith, P.E. - President; Priscilla Cygielnik, P.E.; Orlando Rubio, P.E.; Robert D. Keener, P.S.M. – Vice President-Survey; James F. Driscoll – Director of Utility Locates
  Scope of Work: CAS provided professional engineering and surveying services for proposed stormwater improvements for the SE 8th Avenue area. The area which has been defined and 30% (conceptual) design plans prepared by Geosyntec Consultants, was identified as a priority capital improvement area in the City's 2021 Stormwater Master Plan. The project area limits were occupied primarily by residential properties defined by SE 4th Street on the north, SE 7th Street on the south, SE 6th Avenue on the west side and SE 8th Avenue on the east side. The project drainage area was approximately 20 acres. The City and the residents of this area have reported frequent flooding and the results from the Existing Conditions Assessment performed under the Stormwater Management and Flood Resiliency Strategies Master Plan, have validated the flooding reports. The scope of work included a route survey, utility locates services, utility test holes, geotechnical engineering services (by others), engineering design, permitting and bidding services. Survey baseline was established at 100-foot intervals and cross sections taken to ten (10) feet beyond each right of way at fifty-foot intervals. Plan view elevations will be shown as relative to North American Vertical Datum of 1988 at each section and at pertinent points for facilitation of Engineering Design. All visible, above ground improvements and utilities we also located. Subsurface ground penetrating radar (GPR) was used in addition to electromagnetic induction (EM) to perform/verify horizontal locations of existing utility lines. Thirty-five (35) utility test holes (soft digs) were performed, and reports provided for each with utility depth, elevation, size, material and type. A preliminary drainage analysis was conducted to determine the feasibility of proposed site improvements for conformance with established drainage criteria. The drainage analysis included pipe sizing analysis and incorporated water quality treatment measures in the design in accordance with the South Florida Water Management District and Broward County permit requirements. Hydrologic and hydraulic modeling of the area was conducted for multiple design storm events of the current and proposed conditions. CAS prepared engineering plans in conformance with the requirements of the City of Deerfield Beach, City Master Drainage plan and applicable minimum design standards.
  Design Cost (including Construction Oversight): $379,160
  Construction Cost Estimate: $2,857,847
  Actual Construction Cost: $3,201,448

- **Project Name:** Glades County – Comprehensive Vulnerability Assessment
  Client Entity: Glades County
  Client Address: 500 Avenue J SW, Moore Haven, FL 33471
  Client Contact: June Fisher, County Manager Phone: 863-946-6000
  Email: countymanager@myglades.com
  Start Date: July 2024
  End Date: March 2026
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Orlando Rubio, PE
  Key CAS Staff: Stephen C. Smith, P.E. – President; Orlando A. Rubio, P.E. – Vice President of Engineering; Al Caruso, E.I. - Design Engineer; Robert D. Keener, P.S.M. – Vice President of Survey
  Scope of Work: Craig A. Smith & Associates, LLC (CAS) is providing professional surveying, GIS mapping, and engineering services in support of the Comprehensive Vulnerability Assessment for Glades County, prepared in accordance with the Florida Department of Environmental Protection Grant Work Plan Agreement No. 23PLN111. This assessment, conducted pursuant to Florida Statute 380.093, encompasses all County-owned and maintained critical assets within Glades County and evaluates their exposure to flooding and climate change impacts. The work includes the use of the most recent publicly available Digital Elevation Model (DEM), locally collected elevation data, and recognized analysis and modeling methodologies to ensure consistency with State standards and DEP guidance. Although Glades County is a non-coastal community, it remains vulnerable to climate-related stressors, including increased rainfall frequency and intensity. The assessment focuses on identifying at-risk infrastructure, drainage networks, transportation routes, and community facilities to develop data-driven strategies that enhance resilience and inform future adaptation planning. CAS's scope of services includes comprehensive surveying, GIS data development and management, asset inventory, risk and exposure analysis, and preparation of a detailed vulnerability assessment report in compliance with the State's Standard Scope of Work for Vulnerability Assessments.
  Design Cost: $200,000

- **Project Name:** City-Wide Stormwater Master Plan, Belle Glade, Florida
  Client Entity: City of Belle Glade
  Client Contact: Lomax Harrelle, City Manager, Phone: 561-996-0100,
  Email: lharrelle@belleglade-fl.com
  Client Address: 110 Dr. Martin Luther King, Jr. Blvd., West Belle Glade, Florida 33430
  Start Date: May 2021
  End Date: October 2022
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Orlando A. Rubio
  Other Key CAS Staff: Robert D. Keener, Al Caruso
  Scope of Work: CAS re-evaluated and recommended future improvements to the City's stormwater system. The Master Plan identified stormwater runoff issues, outlined a systemic phased approach to achieve reduced flooding in flood prone areas, incorporated stormwater quality treatment measures, increase the efficiency of the existing drainage system, including replacement of stormwater structures and identified the additional infrastructure required to achieve these goals. The Master Plan also included construction cost estimates and the development of a comprehensive phasing program for stormwater improvements. This project was completed on time and within budget.
  Design Cost: $188,695
  Change Orders: None
  Cost: $75,000
  Change Orders: None

PROFESSIONAL CATEGORY: (10/11) CONSTRUCTION ENGINEERING INSPECTION (CEI)/PROJECT MANAGEMENT

- **Project Name: Riviera Beach Force Main Directional Bore C-17 Canal & M-Canal Project - CEI**
  Client Entity: City of Riviera Beach
  Client Contact: Joshua Niemann, Executive Director, Phone: 561-845-4053,
  Email: jniemann@rivierabeach.org
  Client Address: 600 W. Blue Heron Boulevard, Riviera Beach, FL 33404
  Start Date: May 2025
  End Date: Ongoing (20% complete)
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Priscilla Cygielnik, Project Manager
  Scope of Work: CAS provides engineering services during construction which includes visits to the site at intervals appropriate to stages of construction to provide construction observation as necessary for certifications to the appropriate agencies. CAS will conduct a final inspection with the appropriate agencies to determine if the work is acceptable and assist the owner with project close-out procedures. CAS is acting as the client's representative, providing one qualified full-time construction inspector to perform observation services to ensure the project is constructed in accordance with the engineering plans and grant funding requirements. The project includes the construction of approximately 585 linear feet of 12-inch HDPE directional bore sewer force main crossing the C-17 Canal and approximately 720 linear feet of 42-inch HDPE directional bore sewer force main crossing the M Canal. The project included the removal of all pipe and structures from the existing old force main aerial crossings.
  Construction Management: $366,000
  Construction Cost: $3,159,000
  Change Orders: None

- **Project Name: City of Sweetwater Stormwater Improvements: Phase 8A - CEI**
  Client Entity: City of Sweetwater
  Client Contact: Eric Gomez, P.E, City Engineer, Phone: 305-455-6585,
  Email: egomez@cityofsweetwater.fl.gov
  Client Address: 500 S.W. 109 Avenue Sweetwater, FL 33174
  Start Date: Febraury 2021
  End Date: August 2022
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Orlando A. Rubio
  Scope of Work: CAS provided engineering services during construction which included visits to the site at intervals appropriate to stages of construction to provide construction observation as necessary for certifications to the appropriate agencies. CAS conducted a final inspection with the appropriate agencies to determine if the work is acceptable and assist the owner with project close-out procedures. CAS acted as the client's representative and provided one qualified full-time construction inspector to perform observation services to ensure the project was constructed in accordance with the engineering plans. Services included daily observation of contractor's activities to document conformance to the design plans and technical specifications, as well as coordination between contractor and design engineer as needed to resolve field conflicts or issues. Documentation included daily, weekly and monthly reporting and photos of construction activities. Reporting included installed quantities to confirm accuracy of contractors monthly pay request.
  Construction Management: $110,180
  Construction Cost: $939,930
  Change Orders: $252,333 (owner-initiated additional 576 LF of roadway and drainage improvements along NW 14th Terrace, modification of 2 drainage structures, 116 LF of flowable fill installation and 40 LF of pipe reinstallation, removal of existing flowable fill in conflict with cross pipe connections to

drainage structures and filed modifications to 1 drainage structure due to conflict with existing sidewalk)

- **Project Name: Lift Station No.7 Rehabilitation, Margate, Florida**
  Client Entity: City of Margate
  Client Contact: Curt A. Keyser, Utilities Director, Phone: (954) 884-3631
  Email: ckeyser@margatefl.com
  Client Address: 901 NW 66th Avenue, Suite A, Margate, FL 33063
  Start Date: December 2022
  End Date: April 2025
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Greg Giarratana
  Other Key CAS Staff: Robert Keener, James F. Driscoll
  Scope of Work: Lift Station No. 7 Rehabilitation Project consisted of decommissioning the existing wet pit/dry pit lift station and reinstalling a new wet well and valve vault. This included the installation of all stainless-steel piping inside the proposed wet well, relining existing structures, manholes, gravity sewer, fencing, system start-up and upgrading the electrical equipment, control panel and SCADA system.
  Project was completed within the prescribed schedule and under budget.
  Design Cost: $92,438
  Construction Cost: $968,365
  Change Orders: -($86,480)

- **Project Name: Sanitary Sewer Improvements for Portions of Avenue D & E and 7th Street – Phase 5A, Glades County, Florida**
  Client Entity: Glades County/City-County Public Works Authority (CCPWA)
  Client Contact: Paul Carlisle, County Manager, Phone: (863) 496-6000,
  Email: pcarlisle@myglades.com
  Client Address: 299 Riverside Drive, Moore Haven, Florida 33471
  Start Date: March 2020
  End Date: August 2023
  Prime Consultant: CAS
  Principal In-Charge: Stephen C. Smith
  Project Manager: Greg Giarratana
  Other Key CAS Staff: Robert Keener
  Scope of Work: CAS was tasked to provide preliminary engineering, final design, permitting, bidding, project management and construction services for the removal of approximately thirty (30) failing septic systems which included wastewater infrastructure components such as abandoning existing septic tanks and installing a 4-inch sewer force main and duplex submersible wastewater lift station with a connection to an existing 10-inch gravity sewers manhole. The project included portions of Avenue D and Avenue E and 7th Street and complete road replacement within the limits of construction and restoration.
  Design Cost (including Construction Management): $150,488
  Construction Cost: $934,259
  Change Orders: $57,798 (sanitary sewer conflict with existing stormwater drainage pipes which required lowering of gravity sewer pipe including core hole into existing sewer manhole and an additional installation of a sanitary sewer lateral at the Intersection of Elmwood Ave. and El Dorado St.)

- **Project Name: El Jardin Stormwater Improvements – Phase I, El Portal, Florida**
  Client Entity: Village of El Portal
  Client Contact: Christia Alou, Village Manager, Phone: (305) 795-7880
  Email: villagemanager@villageofelportal.org
  Client Address: 500 NE 87th Street, El Portal, Florida 33138
  Start Date: October 2017

End Date: July 2021
Prime Consultant: CAS
Principal In-Charge: Stephen C. Smith
Project Manager: Orlando Rubio
Other Key CAS Staff: Al Caruso, Robert D. Keener, James F. Driscoll
Scope of Work: The project consists of stormwater improvements for the El Jardin area which covers Basin 5 of the Village's Stormwater Master Plan which was developed and completed by CAS in 2003. The scope of work for the Phase I project included hydraulic modeling, route survey, utility locates, engineering design and construction of drainage pipes, catch basins, exfiltration trenches and a drainage easement acquisition for an existing outfall location between 10 NE 86th street and 18 NE 86th street.
Design Cost (including Construction Oversight): $206,689
Construction Cost: $359,261
Change Orders: $36,619 (minor additional asphalt work – leveling course ($5,429) and an owner-initiated change order for asphalt intersection repairs at the (triangular) area at NE 1st Avenue just north of NE 86th Street ($31,190)

NOTE: ALL STAFF LISTED FOR EACH ABOVE PROJECT ARE STILL EMPLOYED WITH CAS.

PROFESSIONAL CATEGORY: (2) STRUCTURAL ENGINEERING SERVICES

McNair Park

2023
Pompano Beach

MUE was a member of the team on this project for the City of Pompano Beach. Our role included the structural design and engineering related to improvements at McNair Park, such as, a new ~5,000sf concession, bathroom and gym building; new bleacher seating for 1800 people; a new press box structure and foundation system; and the foundation designs for a pre-engineered picnic shelter, football goal posts, basketball posts and new free-standing light posts.

Client:
Bermello Ajamil + Partners, Inc., A Woolpert Company
900 SE 3rd Avenue
Suite 203
Fort Lauderdale, FL 33316

Mr. Randy Hollingworth,

954-278-3240

Water Treatment Facility

Ongoing
Boca Raton

MUE is part of the team for the renovation and addition to the Water Treatment Plant for the city of Boca Raton, as the structural subconsulant. Our scope on this unique project is the structural design and engineering related to the concrete restoration details for cracked and spalled concrete components, a new one-story compliance building, steel framed roof structure connected to the existing chlorine contact basin, and modifications at the low lift pump station and flash mixer.

MUE is also providing the structural special inspections during the construction phase of this project.

Client:
Justin Architects, Inc.
Mr. Juan Justiniano, Principal
2400 E. Commercial Blvd
Suite 201
Fort Lauderdale, FL 33308
(954) 771-2724

Broward County Pump Stations

Ongoing
Various, Broward County

MUE is the structural engineering subconsulant on this master plan contract with Broward County. The Retails Potable Water and Wastewater Master plan is an ongoing project with multiple phases. Thus far, MUE provided structural observations and assessments for twenty existing wastewater pumping stations and six water repump stations located throughout Broward County. MUE provided a structural condition rating, a description of our findings and assessment for each pumping and repump station observed.

Area of Expertise:
Category 116 – Electrical Systems Engineering

City of West Palm Beach

Lift Station Improvements and Rehabilitation (LS Nos.: 4, 7, 44, 52, 75, 74, and 153)

Project Location:
West Palm Beach, FL

Estimated Construction Cost:
$750,892

Actual Construction Cost:
$689,768

Consultant Fee: $68,946

Within Budget: Yes

On Schedule: Yes

Amendments to Contract: None

Description of Work Performed:

This project consisted of the rehabilitation of several existing lift stations and included electrical design, including power, controls, instrumentation and telemetry/SCADA for the installation of new pump control panels and remote telemetry units (RTU's), throughout the City of West Palm Beach's service area. The design portion of the project began in 2015 and was completed in 2019. Construction began in 2016 and is ongoing.

Project Scope:

Electrical engineering, preparation of engineering design and construction plans, cost estimates, contract documents, bidding, permitting, construction management and construction observation, and certification through project close-out.

Key Personnel:

Larry Smith, P.E. – President;
Steve Hockman – Senior Project Manager;
Frank Roth, E.I. – Electrical Engineer and Senior Field Representative

Smith Engineering Consultants, Inc.

Category 116 – Electrical Systems Engineering

City of West Palm Beach
Tamarind Avenue Lighting

Project Location:
West Palm Beach, FL

Estimated Construction Cost:
$1,456,824

Actual Construction Cost:
$1,265,214

Consultant Fee: $43,167

Within Budget: Yes

On Schedule: Yes

Amendments to Contract: None

Description of Work Performed:

Smith Engineering Consultants, Inc. designed the electrical systems, including new decorative lighting poles and fixtures, along Tamarind Avenue from Banyan Blvd. to Palm Beach Lakes Blvd. The electrical systems included a new electrical service and power distribution for photoelectric controlled street lights. Calculations for the roadway illumination were made in accordance with city requirements, and light pole details prepared for the selected decorative lighting. The design portion of the project began in 2016 and was completed in 2018. Construction began in 2018 and is ongoing.

Project Scope:

Illumination calculations (photometrics), electrical engineering, preparation of engineering design and construction plans, cost estimates, contract documents, bidding, permitting, construction management and construction observation, and certification through project close-out.

Key Personnel:

Larry Smith, P.E. – President;
Steve Hockman – Senior Project Manager;
Frank Roth, E.I. – Electrical Engineer and Senior Field Representative

Smith Engineering Consultants, Inc.

Palm Beach County, WUD

Countywide Telemetry Information Management System (TIMS) Design Upgrades

Project Location:
Palm Beach County, FL

Estimated Construction Cost:
$1,505,839

Actual Construction Cost:
$1,328,117

Consultant Fee: $155,052

Within Budget: Yes

On Schedule: Yes

Amendments to Contract: None

Description of Work Performed:

This project was a countywide electrical design, including power, controls, instrumentation and telemetry/SCADA for the installation of new pump control panels and remote telemetry units (RTU's), throughout Palm Beach County WUD's service area. The scope of services includes over 80 lift stations with a variety of the following (1) add new RTU, radio and antenna with ultrasonic level transducer (2) replace control panel (3) add generator receptacle. The existing relay logic and level control systems will be replaced with PLC's using level control and high level float. The design portion of the project began in 2016 and was completed in 2017. Construction began in 2017 and was completed in 2019 without liquidated damages.

Project Scope:

Radio survey, controls engineering, preparation of engineering design and construction plans, cost estimates, contract documents, bidding, permitting, construction management and construction observation, and certification through project close-out.

Key Personnel:

Larry Smith, P.E. – President;
Steve Hockman – Senior Project Manager
Frank Roth, E.I. – Electrical Engineer and Senior Field Representative

PROFESSIONAL CATEGORY: (3) TRANSPORTATION, TRAFFIC AND ROADWAY ENGINEERING

SR-5/US-1, from South of Eve Street to South of Harborside Drive, Palm Beach, FL

Professional Services:
11/2017 – 4/2021

Project Owner:
FDOT

VN Engineers, Inc Fee:
$228,306.51

Reference:
Haiyan Ou, P.E., Project Manager

Phone:
954-777-4641

Services Provided:
- *Highway Design*
- *Drainage*
- *Signalization*
- *Lighting*
- *Utility Coordination*

The limits of this SR 5 (US-1) 3R Project extend from South of Eve Street to South of Harbourside Drive, for a length of approximately 0.490 miles. The project involves milling and resurfacing as well as widening to accommodate designated bicycle lanes. The typical section consists of an urban four-lane divided roadway with a posted speed of 45 mph. The existing roadway passes through residential and business section in The City of Delray Beach.

The scope includes re-grading existing swales along the corridor to mitigate storage loss and upgrading the signing and pavement markings to comply with MUTCD as well as the City of Delray Beach Engineering Standards. In addition, video detection and loop detection has been incorporated at signalized intersections,. Designated bicycle lanes are to be incorporated throughout the project limits. The lighting at the intersection of US-1 and Linton Blvd. has been designed to meet the lighting retrofit criteria.

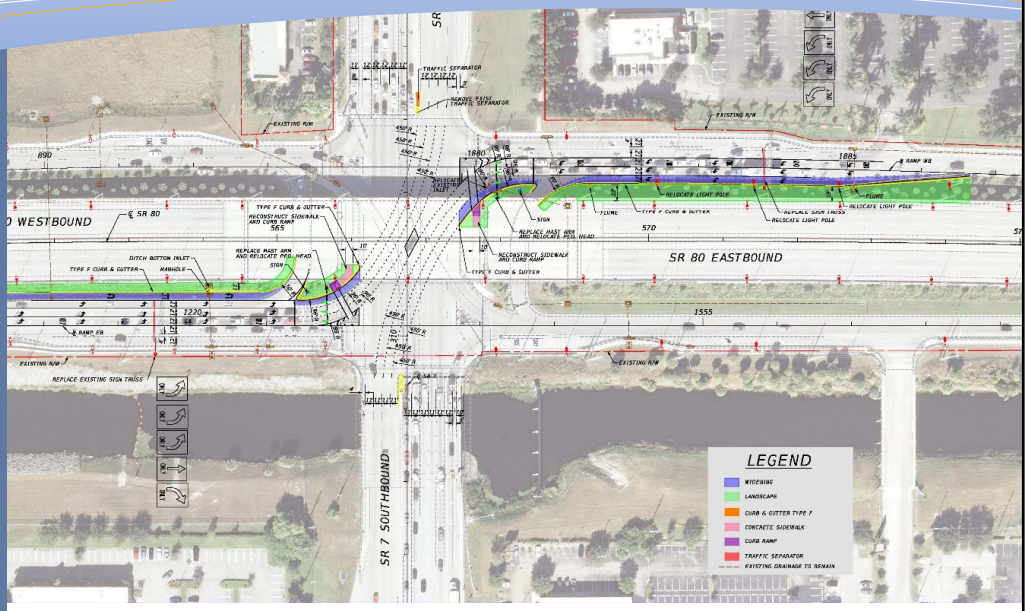
VN Engineers is responsible for the design of a four-lane typical section, 3R project including drainage improvements, signalization, lighting, utility coordination and safety upgrade.

Design Services for SR-80/Southern Blvd. Ramps and SR-7/US-441 Palm Beach County, FL

Professional Services:
8/2020 – Present

Project Owner:
FDOT

Client:
JMT



VN Engineers, Inc. Fee:
$98,000

Reference:
Josh Baimel, P.E.

Phone:
(954) 233-6560

Services Provided:

- *Design Services*

This project involves providing design services for the widening of SR-80 to allow for the addition of both right and left turn lanes, as well as the widening of SR-7 to accommodate new turn lanes. The scope also includes the widening of the existing bridges over the C-51 canal to support the expanded roadway infrastructure.

VN Engineers delivered comprehensive design support services, including the preparation of plans, specifications, detailed engineering analyses, calculations, and other technical documentation in full compliance with FDOT policies, procedures, and requirements. These contract documents are intended for use by the contractor to construct the project and ensure that all components are properly tested, inspected, and accepted upon completion. All design efforts were completed in adherence to the systems engineering process.

LAP 445529-1 City of Deerfield Beach: Crystal Lake Drive & NW 45th Street Improvements Deerfield Beach, FL

Professional Services:
August 2024 - Present

Project Owner:
Jacobs Engineering

Estimated Cost of Project:
$249, 657.77

Reference:
Lou Medina

Phone:
407-903-5001

Services Provided:
- *Public Involvement*
- *Roadway Analysis*
- *Lighting Analysis and Plans*
- *Signing/Pavement Analysis and Plans*

Project Overview:
The City of Deerfield Beach is advancing the design of a multimodal improvement project to enhance pedestrian safety, accessibility, and roadway lighting along Crystal Lake Drive and NW 45th Street. The scope includes sidewalk infill, curb ramp upgrades, roadway lighting, mid-block crosswalks, and a proposed mini-roundabout.

Project Scope Highlights:
- Design of new 5’ detached sidewalks along both sides of Crystal Lake Drive and NW 45th Street to close existing sidewalk gaps.
- Roadway lighting design along both corridors using FPL-approved materials, supported by photometric analysis and final lighting plans for FPL construction.
- Evaluation and upgrade of curb returns and ADA ramps to meet accessibility standards.
- Installation of up to four raised, mid-block crosswalks in locations based on pedestrian needs, school bus stops, and community amenities.
- Consideration of bike sharrow markings informed by previous traffic studies.
- Design of a mini-roundabout at the intersection of Crystal Lake Drive and NW 45th Street to improve traffic operations and safety.

RADISE INTERNATIONAL

PROJECT SUMMARY

Project Name:
Miami Forever Bond - Drainage Improvements, Miami-Dade County, FL

Owner:
The City of Miami

Client:
Wantman Group, Inc

Client Contact:
Mr. Raymond Valido, PE
Wantman Group, Inc.
11401 SW 40th St #455
Phone: (786) 878-5015

The City of Miami is using the Miami Forever Bond to fund a series of projects that will improve five of the City's most pressing needs categories: Sea-Level Rise and Flood Prevention, Roadways, Parks and Cultural Facilities, Public Safety and Affordable Housing. Wantman Group, Inc. (WGI) was retained by the City to provide civil engineering services for roadway and drainage improvements at four locations throughout the City. RADISE was subcontracted by WGI to provide Geotechnical Engineering services to aid in the design of the roadway and drainage improvements for the four sites.

RADISE provided geotechnical engineering testing, as well as soil analysis and recommendations. Services provided included standard penetration test (SPT) borings, asphalt cores, auger borings, and open-hole exfiltration tests in general accordance with the South Florida Water Management District (SFWMD) procedures. Maintenance of Traffic (MOT) was required including signage and flagmen. In addition, the collected soil samples retrieved from the roadway borings, were visually classified using the Soil Classification System of the American Association of State Highway and Transportation Officials (AASHTO), in general accordance with American Society of Testing and Materials (ASTM) A limited laboratory testing program was assigned and performed to identify soil index properties and the environmental classification for the site.

RADISE prepared a Geotechnical Report summarizing the field-testing data, discussing the subsurface soil and groundwater conditions, and presenting our conclusions and recommendations for construction of the proposed roadway in accordance with FDOT Standard Specifications for Road and Bridge Construction.

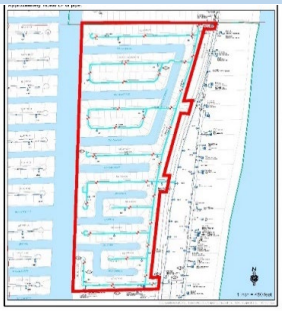
RADISE ROLE:

GEOTECHNICAL ENGINEERING SERVICES

Field Exploration and Testing
- Standard Penetration Test (SPT) Borings

Laboratory Testing
- Moisture Content Tests
- Full Sieve Analysis Tests
- Organics Content Tests

Engineering Services
- Soil Classification and Profiles
- Recommendations for Clearing and Grubbing, Underground Utilities, Select Fill Composition, Placement and Compaction



PROJECT SUMMARY

Project Name:
Bermuda Riviera Small Water Mains Improvements

Owner: The City of Fort Lauderdale, FL
Client: Keith and Associates.

Project Information:
Location: Fort Lauderdale, FL
Dates: 05/2018 to 06/2018

Client Contact:
Mr. Roberto Goncalves, Jr.
301 East Atlantic Blvd, Pompano Beach, FL.
Phone: 954.788.3400
Email: RGoncalves@keithteam.com

The Bermuda Riviera Small Water Mains Improvements project is in the Bermuda Riviera district in the City of Fort Lauderdale, Florida. It is predominantly bordered by NE 32nd Avenue on the south, NE 42nd Court on the north, NE 34th Avenue on the east, and the Atlantic Intracoastal Waterway on the west. It is our understanding that the Project is expected to include improvements to the existing small water mains within the project area along with the restoration of land surface areas including pavement structure along the roadways within the project area. The water main improvements will also include the construction of aerial pipe crossings along Castle Harbor Drive and Fort Royal Isle.

RADISE provided Geotechnical Engineering Services including field exploration/testing and laboratory testing services. The field exploration program consisted of obtaining (20) Pavement Cores from the existing roadways within Bermuda Riviera District area. Also, performed eighteen (18) SPT borings in the cored pavement holes to depths of 10 to 12 feet and two (2) SPT borings to depths of 30 feet below the existing pavement surface. The work also included a measurement of the groundwater level at each of the drilled boreholes.

Representative soils samples collected from the boring were examined and classified based on visual observations supplemented by representative laboratory test results in general accordance with Unified Soil Classification System. Laboratory index tests performed consisted of full Sieve Analysis, Percent Passing No. 200 Sieve, Natural Moisture and Organics Content tests.

RADISE provided a Geotechnical Services Report which includes the detailed graphical logs of the soil borings, groundwater levels, subsurface soil stratigraphy and classifications. RADISE also provided engineering recommendations for the proposed Arial pipe crossing including ACIP piles installation, and for various components of the project including clearing and grubbing; excavation safety; select fill composition, placement and compaction criteria; underground utilities construction; site and subgrade preparation and, protection of the existing structure.

PROJECT ELEMENTS

- Water Mains Improvements
- Arial Pipe Crossing
- Pavement Structure

RADISE ROLE:

GEOTECHNICAL ENGINEER OF RECORD

Field Exploration and Testing

- Pavement Coring
- SPT Borings
- Groundwater Measurement

Laboratory Testing

- Moisture Content Tests
- Full Sieve Analysis Tests
- Percent Passing No. 200 Sieve Tests
- Organics Content Tests

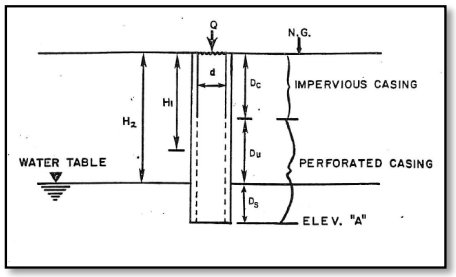
Engineering Services

- Soil Classification and Detailed Profiles
- Exfiltration Tests Result
- Recommendations:
  - Arial Pipe Crossing – ACIP Pile Foundation System
  - Pavement Design Consideration
  - Clearing and Grubbing
  - Underground Utilities & Structures
  - Excavation
  - Dewatering
  - Pipe Bedding
  - Backfill and Compaction
  - Protection of the Existing Structures

PROJECT SUMMARY

Project Name:
Miami-Dade Masterplan Sites – Drainage Improvements

Owner: Miami-Dade County, FL



Client: Miami-Dade Department of Public Works & Waste Management

Project Information:
Location: Miami-Dade County, FL
Dates: January 2018 – June 2020

Client Contact:
Mr. Rene Diaz, Engineer II
Department of Transportation & Public Works Stormwater Drainage Design
Phone: (305) 375-3444
ReDiaz@miamigov.com

The Miami Dade Masterplan sites Project located in Miami-Dade, Florida, includes drainage improvements for multiple streets in the City of Miami, Florida. The purpose of this study was to provide geotechnical engineering information to aid in the design of drainage improvement of the proposed multiple streets (i.e. Masterplan Sites) in City of Miami, Florida.

RADISE International provided geotechnical and environmental engineering testing, as well as soil analysis and recommendations for five different locations situated in the Aventura/Hallandale Beach area. Services provided included performing standard penetration test (SPT) borings, and open-hole exfiltration tests in general accordance with the South Florida Water Management District (SFWMD) procedures. In addition, the collected soil samples retrieved from the roadway borings, were visually classified using the Soil Classification System of the American Association of State Highway and Transportation Officials (AASHTO), in general accordance with American Society of Testing and Materials (ASTM).

RADISE prepared a Geotechnical Report summarizing the field testing data, discussing the subsurface soil and groundwater conditions, and presenting our conclusions and recommendations for construction of the proposed roadway in accordance with FDOT Standard Specifications for Road and Bridge Construction.

For the multiple drainage testing, a Miami-Dade County Public Works representative was present to witness the procedure of each exfiltration test conducted by our geotechnical/drilling crew.

PROJECT ELEMENTS
- Roadway/Drainage Design Recommendations

RADISE ROLES:

GEOTECHNICAL AND MATERIALS TESTING

Field Exploration
- 220 Linear Feet of SPT Borings
- 11 Exfiltration Tests

Laboratory Testing
- Visual Classification (AASHTO)

Factual Data Report Preparation and Submittal

Section 4.7:
Project Implementation Strategy and Approach

Section 4.7: Project Implementation Strategy and Approach

TECHNICAL CAPABILITIES AND PROJECT APPROACH

Craig A. Smith & Associates (CAS) offers comprehensive technical capabilities and a proven approach to managing and coordinating municipal capital improvement projects. Our methodology emphasizes efficiency, quality, and collaboration, ensuring projects are completed on schedule, within budget, and in full compliance with all applicable regulations and professional standards.

Project Coordination and Manpower Planning

CAS maintains a highly experienced and multidisciplinary team capable of managing all phases of design and construction. Our staff includes civil, geotechnical, electrical, and survey professionals, supported by skilled project managers and field personnel. We implement detailed manpower planning, including resource allocation, scheduling, and prioritization of design and construction tasks to prevent conflicts and ensure an efficient workflow. Subconsultants are engaged only as needed, with CAS serving as the primary point of coordination to streamline project execution.

Our management team maintains continuous communication with all stakeholders—Town staff, contractors, regulatory agencies, and subconsultants—to provide seamless project coordination and rapid resolution of any issues. We operate as an extension of the Client's staff, providing the technical and administrative support needed to achieve project goals.

Quality Control and Assurance

CAS employs a rigorous quality control (QC) and quality assurance (QA) program throughout all project phases. This includes:

- Internal QA/QC reviews at 30%, 60%, 90%, and 100% design milestones.
- Coordination between design disciplines to ensure accuracy, constructability, and compliance with program requirements, codes, and professional standards.
- Review and verification of contractor submittals, pay applications, and change orders to maintain adherence to contract documents and project scope.
- Regular technical reviews by principals and project managers to identify and mitigate design or construction deficiencies.

GENERAL PROJECT APPROACH

CAS will utilize a phased approach towards assisting the Town in problem solving and for implementation of assigned projects. Our general project approach is as follows:

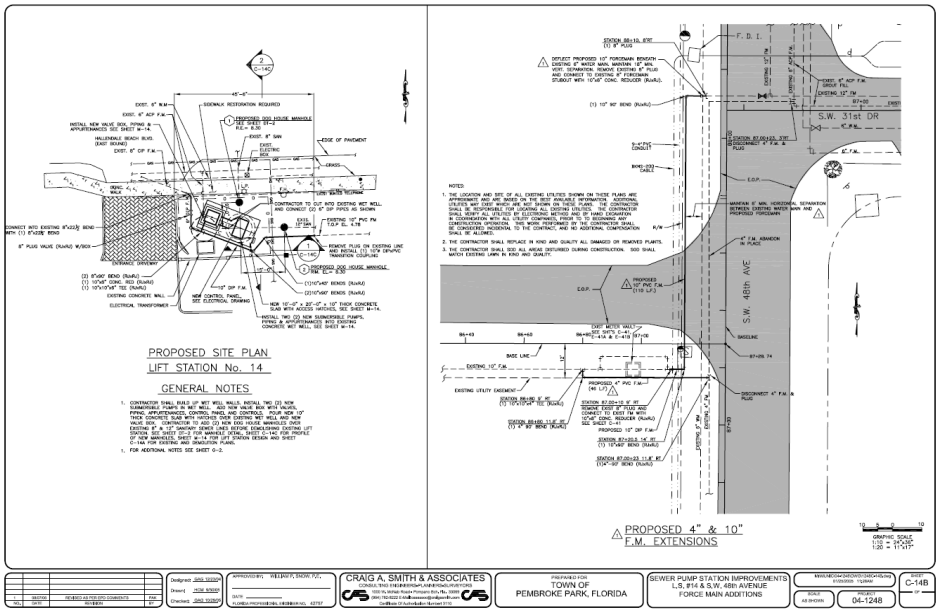
PHASE I – PROJECT DEVELOPMENT AND PLANNING

- Meeting with Town staff to develop the project scope (for each work authorization as assigned)
- Develop a fee proposal to match the project scope as per established fee schedule
- Finalize the scope and proceed with a kickoff meeting with Town staff
- Perform pre-design field condition assessment
- Develop project prioritization and phasing (as needed)
- Conduct modeling/feasibility studies & reports (as needed)
- Provide grant funding assistance (as needed)
- Finalize design criteria
- Prepare preliminary (conceptual) engineering design/plans
- Outline specifications
- Prepare preliminary construction cost estimate
- Public involvement/community outreach (as needed)

CAS will develop project scope, prioritize and phase design work for projects in a manner that will avoid schedule conflicts and allow for an efficient flow of work. CAS believes a **high level of consistent communication** will be essential in providing a successful completion of the assigned projects. Our management team will maintain a high level of communication with continuous accessibility to CAS staff and all other team members (sub-consultants). The CAS Team's goal is to seamlessly operate as an extension to Town staff to satisfactorily complete projects on time and on or under budget.

PHASE II – SURVEY & ENGINEERING DESIGN

- Survey site as needed
- Soil borings and testing as required
- Review existing record drawings, utility atlases and evaluate field conditions
- Utility Locates utilizing available technologies, such as, *Vacuum Soft Digs, EM Designation , 2-D GPR and use of 3D Radar Scanning*
- Utilize necessary engineering design methods
- Utility coordination (cable/ telecommunication companies, FPL, gas companies, etc.)
- Establish design requirements
- Establish permitting requirements
- Prepare 30% & 60% design plans as required
- Quality control meetings with CAS staff
- Meet with Town staff to review project design, schedule and budget
- Update preliminary project quantities and estimated costs
- Update engineering design plans per review
- Quality assurance review with Town staff



CAS' **unified design process** along with its unique utility locating capabilities allows for accurate design deliverables at an accelerated schedule. (i.e., 60% design plan deliverables at traditional 30% design phase). CAS' unified design process includes survey and utility locates which will be provided "in-house" by CAS thus, eliminating the need for subconsultants for the development of basemaps and allowing for a streamlined efficient and more cost-effective design. Acquiring comprehensive and accurate utility locates in order to develop complete basemaps will be critical to the successful completion of most projects, eliminating design deficiencies.

PHASE III – FINAL ENGINEERING AND BIDDING

- Preparation of 90% design and final (100%) design plans
- Preparation of final specifications and contract documents
- Quality assurance review with client
- Finalize cost estimate; develop bid tabulation (schedule of values)
- Meet with client staff to review final project design, schedule and budget
- Finalize permitting (Broward County Health Dept., FDEP, FDOT, EPA, SFWMD, etc.)
- Provide plan adjustments and finalize for bidding
- Advertise for bidding
- Bid project (typical 30 days); solicit qualified bidders
- Prepare bid addendums and answer contractor RFI's
- Assist client in receipt of bids
- Review bids and bidder qualifications
- Recommend award
- Assist client with contract management

A 90% Design Review meeting will be scheduled with Town staff for final comments and revisions prior to submitting to regulatory agencies for permitting. CAS has over 45 years of experience and understanding of the regulations and statutes in South Florida and as they pertain to utility and infrastructure projects in Palm Beach and Broward County. Permitting Agency Coordination which includes compliance with the necessary regulations and proper communication with agencies is an important aspect of every project. Coordinating with permitting agencies during the early stages of the project to identify any "permitting challenges" that may impact the schedule of the project is very important. CAS's experience and relationships with local regulatory agencies combined with a proactive approach will ensure each project is permitted in a timely manner. Coordination with pertinent regulatory agencies for projects under this contract may include but not be limited to the **County Health Department, Florida Department of Transportation (FDOT), Environmental Protection Agency (EPA), South Florida Water Management District (SFWMD), Florida Department of Environmental Protection (FDEP).**

PHASE IV – CONSTRUCTION MANAGEMENT

- Pre-construction meeting
- Shop drawing submittal and approval
- Prepare safety plan
- Mobilize and prepare site
- Project field stake-out
- NPDES permits & MOT plans
- Shop drawing submittal and approval
- Begin construction
- Construction observation and reporting
- Construction administration
- Public Involvement/Community Outreach Coordination
- Adherence to contract/permitting requirements
- Prepare & issue certificate for periodic payment
- Final construction & restoration
- Final punch-list
- Project close out

1. **Public Outreach Meeting**
   The CAS team will attend a public stakeholder outreach meeting at the Client's facilities or other assigned locations and provide public outreach strategies and resources as needed.

2. **Pre-Construction Services and Meeting**
   The CAS team will prepare the agenda and facilitate the pre-construction conference with selected Contractor and Client staff. Prepare and issue written minutes of meeting. The pre-construction meeting agenda may include, but is not limited to:
   - Organization and team member roles
   - Project communications
   - Procedures for shop drawing submittals and submittals during construction
   - Discussion of project safety
   - Pollution prevention
   - Phasing and Sequencing Plan
   - Work Schedules
   - Communications/coordination protocols with the Client and stakeholders
   - Project Closeout
   - Maintenance of Traffic (MOT)
   - Scheduling progress meetings
   - Change order process management
   - Progress payments and progress reporting
   - Inspections and testing
   - Utilities locating requirements
   - Record drawings
   - Warranties
   - Substantial Completion

3. **Review of Required Documents and Submittal from Contractor**
The CAS team will receive, log and review the required documents submitted by the contractor. The document review will include miscellaneous submittals, such as schedule of values, cost loaded CPM schedule and sequencing, Quality Assurance Plan, MOT Plan, Safety Plan, Pollution Prevention Plan, Phasing Plan, Contractor's list of sub-contractors and suppliers, Requests for Information (RFI), as well as compliance submittals; such as, shop drawings, inspections and testing reports.

4. **Review of Contractor's Update to the Construction Schedule and Sequencing**
The CAS team will review the contractor's monthly updates to the proposed project schedule. The CAS team will review and validate to ensure that construction of the project is on schedule or advise the Client Project Manager of any variance from the originally approved project schedule.

   Review of contractor submittals to address progress updates as part of budget tracking and requirements of each project during construction and at project close out, if required.

5. **Review of Contractors Applications for Payment**
The CAS team will perform review and verify the completed pay requests submitted monthly by the contractor based on observed and documented work completed and materials stored on-site during the pay period as well as supporting documentation submitted by the contractor as an attachment to the pay request.

6. **Progress Meetings**
The CAS team will conduct, prepare agendas and minutes for monthly construction progress meetings. The progress meeting agenda will include, but is not limited to, the following items: review of the previous minutes, project safety, Client and resident issues, permitting, construction schedule, submittals, RFIs, quality control issues, construction sequencing & phasing, MOT, change orders and payment applications.

7. **Change Order Review and Assistance**
The CAS team will review all submitted requests for work change directives and change orders and assist the Client Project Manager with the facilitation of each directive and/or change order. Services provided in this task include minor modifications to the design drawings and any plan reproduction required.

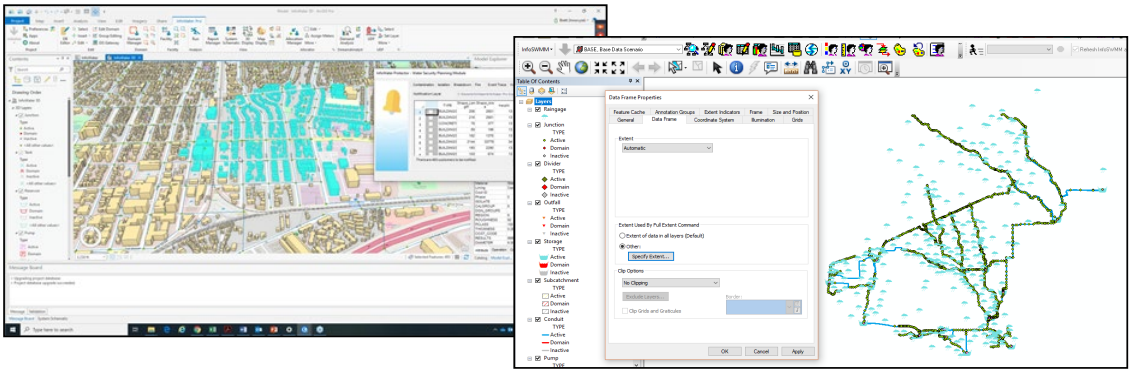
8. **Construction Observations**
The CAS team will provide construction observation in our role as the Resident Project Representative (RPR) on-site during the Construction Phase. Tasks to be performed by the RPR will include: attendance at meetings or conferences and addressing Contractor's Request for Additional Information (RAI's), serving as the owner's liaison with the contractor, maintaining orderly files for communication, progress photos, submittals and reports, maintaining a daily log book of activities and review of completion certificates.

9. **Substantial Completion**
The Engineer of Record (EOR) and RPR will perform a joint inspection, with the Client Project Manager, of the work completed for each project to determine if the requirements of the substantial completion have been met. The CAS team will generate the Substantial Completion Inspection Punch List that includes items to be addressed prior to Final Inspection.

10. **Final Inspection and Acceptance**
Services included under this task are the Final Inspection in coordination with the Client Project Manager for review of the completed project and verification that all items listed on the Substantial Completion Inspection Punch List have been satisfied. Upon review, the CAS team will provide written opinion to the Client and the financing authority that the Contractor has completed all work required as required under the contract documents. The CAS team will also submit the certification documentation to regulatory agencies as required.

11. **Record Drawings**
The CAS team will review the Record Drawings prepared by the contractor's professional surveyor, registered in the State of Florida, with every pay contractor pay request, and a comprehensive final review upon the completion of construction project. The record drawings will include post-construction project information and identify any significant deviation from the approved project design.

12. **Project Close Out**
In conformance with contract documents, The CAS team will review, and deliver to the Client Project Manager, the required contract documentation to be submitted by the Contractor as listed under the construction agreement. In addition, The CAS team will provide one complete set of final shop drawing submittals and approved signed and sealed as-built drawings as prepared by the Contractor.



13. **Final Payment and Release of Retainage**
In conformance with the contract documents, the CAS team will verify that:
- The contractor's accounts are in order; considering items such as original contract sum, additions and deductions (per Change Order Summary) and any changes or adjustments required of the Schedule of Values that have been accepted.
- Retainage amount is correct.

- Certificate of Final Completion has been issued.
- Final acceptance has been obtained from the permitting agencies.
- The Contractor has provided a Final Release in accordance with the contract.

- All required certificates of inspection and occupancy have been obtained from public authorities, utility companies, and other public agencies.
- Completed Record Drawings have been received and accepted by the Client.
- Notification of consent to surety, if any, to make Final Payment to Contractor.
- Amount of Liquidated Damages withheld (if applicable).
- Contractor's Warranty.

CAS has a knowledgeable and experienced construction management team which is important for keeping a construction project on schedule, realizing potential cost savings and minimizing construction impacts. CAS has experienced staff to provide effective contract administration including cost estimating, schedule review, shop-drawing submittal review, processing of change orders and any other related construction management activities. CAS will ensure key construction project elements are documented and updated regularly and that any issues are addressed efficiently. CAS will ensure that the contractor is held accountable, abiding to design documents and meeting all contractual obligations. Construction progress reporting, to the client will include summary of work completed, critical issues requiring resolution in order to maintain project schedule, planned budget versus actual cost to-date, planned work schedule for the next month and identification of any upcoming conflicts or other critical items requiring tracking and updating.

**Design support will be provided throughout the construction period of each project as necessary.*

HYDRAULIC MODELING

CAS may provide hydraulic modeling for the Client's wastewater conveyance/collection and drainage system as necessary. Sections of sewer force main or drainage pipes identified to require upsizing will be noted and incorporated into the overall design of capital improvement projects as needed. CAS engineering staff is proficient in the following software modelling programs: Civil 3D Hydraflow Storm Sewers, Streamline Technologies - ICPR version 4.07, ACOE HEC-RAS, SewerCAD and WaterCAD.

PUBLIC OUTREACH

In municipal capital improvements projects numerous engineering disciplines may be included such as Civil Engineering, Geotechnical, Electrical and Surveying among other services, which need to be coordinated in a manner to deliver the desired results for the client. In addition, communications

coordination with Client Staff, Elected Officials, Residents, Tenants and near-by Business Owners and Schools is an absolute necessity for utility improvements that may impact these stakeholders. Managing sensitive project issues and conditions such as ensuring Homeowners having access to their properties (day/night/weekends) and keeping water or sewer service interruptions at a minimum are top priorities. Preservation of historic trees, disruption of residential properties, open access to commercial businesses, negative traffic impacts and safety implications associated with construction maybe additional considerations that should be addressed early on. Dealing with these challenging and most concerning public issues first, will garner and establish a workable trust and comfort level for all affected moving forward for any such project.

There are many ways to notify those directly and indirectly affected by construction inconveniences depending on the type and duration of the project; diagram door-hanger notices, community meetings, Client dedicated project website postings, water bill stuffers, Client television programming, Client Commission meeting announcements, public charrettes, Client Phone Bank system, social media outlets and mailers are all effective tools. Also, it is important to understand that project misinformation, rumors and bad information generated by the public can be resolved through the above-mentioned channels as well. Equally important and seldom emphasized are the benefits of these utility improvement projects. They too, can be conveyed through all the channels mentioned above.

A project's success largely depends on how one takes advantage of community engagement opportunities at the 30%, 60% and 90% Design Drawing stages. By employing consensus-building interactive community engagement methods for the purpose of determining various design elements, the community becomes an active part of the decision-making process. For example, there are two (2) active methods for public participation in accordance with the State of Florida FDOT Public Involvement Handbook, Chapter 8 that are very useful in garnering community consensus.

1. **Dot Density/ Metrics**– allows the public to indicate by visual depiction their preferences (Real-time Polling) and encourages interaction with the consultants and engineers.

2. **Rank & Rate Comment Sheet** – this method simply has the participants "Rank/Rate" the options using and placing assigned numerical values to the options. This method can serve as a cross-reference to re-affirm the public's visual preferences.

Using these two Public involvement methods streamlines and provides a quantitative measurement of the Design element selection process. The most important aspect of these two (2) methods is that the data collected is completely quantifiable and eliminates any misinterpretations.

ABILITY TO MEET PROJECT SCHEDULES

CAS prides itself on our ability to **tailor our services to meet our clients' needs**. We are proud of our past history of successful design projects. This success is a result of our **highly experienced staff members** who have created a cohesive team ensuring projects are completed in a **timely and cost effective manner.** CAS is dedicated to execute assigned project schedules established at the beginning of each project. The CAS Team will include a pre-design conference to establish the project contact with the Client, regulating agency and CAS. From this meeting a detailed project schedule will be established. Design and Construction team progress updates will be provided on a monthly basis. Additional project progress reports will be provided to the Client upon request and to all involved with the project.

Otherwise status of each milestone identified at the initial project "kick-off" meeting will be updated on a monthly basis or as agreed along with any updates to project schedules.

CAS will assist in implementing goals established in each project scope during the design and construction phase of each project. **Many similar projects for other municipalities that CAS provides engineering services for are grant funded and therefore have established deadlines that MUST be met in order to secure funding. CAS staff are well accustomed to working and completing projects within strict deadlines.**

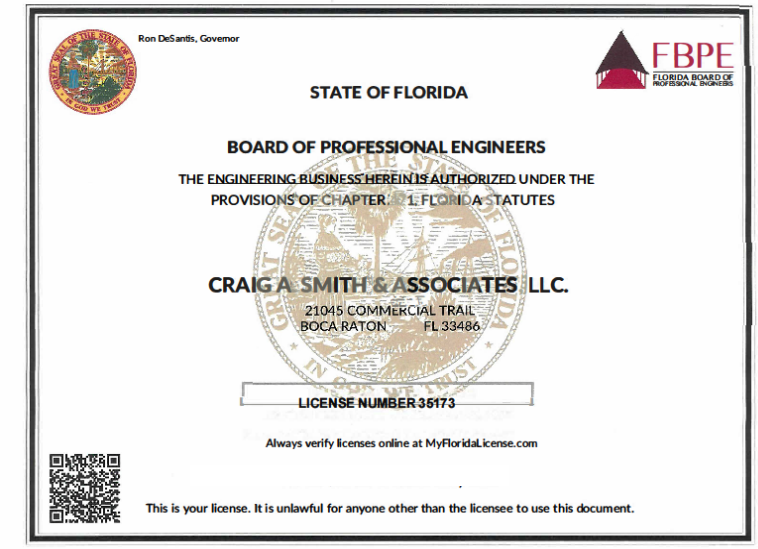
PROJECT MONITORING & BUDGETING

In order to get the most accurate budget price at the pre-construction phase and the construction phase, the CAS Team details all design items into many small parts that will add up to one whole part (Bill of Materials or Schedule of Values). By doing this our cost estimates are very accurate. Our track record with cost estimates to bids has usually been within 5-10%. The CAS Team' philosophy utilizes this phased approach towards assisting the Client in problem solving and for implementation of public works and planning projects. **"Schedule, Cost Control and Teamwork"** - The CAS Team approach is to develop milestones and defined deliverables with the Client in order to meet the Client's requirements. We will identify potential issues early in the project so necessary action can be taken to keep the project on schedule.

The CAS Team will provide you with the design and construction schedule for review and approval prior to commencement, including critical path items. CAS will review the project schedule with the client staff as agreed and verify that it is consistent with the requirements of the contract for design, bidding and construction. Any changes to the schedule, milestones or deadlines shall be approved by the client. CAS will advise the Client of any areas where the schedule is not in compliance with the contract.

We will update the cost of each project as needed in order to stay on budget. If an issue develops with the schedule, cost or the budget, we advise the Client and develop a plan for corrective measures with the staff. We consider the Client and The CAS Team as one team, all striving for the same goal of a quality product on schedule and on or below budget. The CAS Team Technical Reviews will be conducted throughout the project schedule by the principal and project managers of our firm as part of our commitment to quality engineering.

The CAS Team will prepare an opinion of probable construction cost in accordance with the American Association of Cost Engineering (AACE) at the following stages of each assigned project (as needed):



- 30% schematic design
- 60% design development
- 90% design development
- 100% construction documents

Cost estimates will be prepared for guidance in project evaluation and implementation from the information available at the time the estimate is developed. The final cost of each project will depend on actual labor and material cost, competitive market conditions, final project scope, implementation schedule, and other variable conditions.

SOUTH FLORIDA WATER MANAGEMENT DISTRICT

September 5, 2025

REGISTERED VENDOR NO.: 1000000089

Mr. Aneesh Goly P.E., PhD., Principal
Craig A. Smith & Associates, LLC
4152 W Blue Heron Blvd, Suite 116
Riviera Beach, FL 33404

CERTIFICATION EFFECTIVE DATE:
September 5, 2025

CERTIFICATION EXPIRATION DATE:
September 5, 2028

Dear Mr. Goly:

Congratulations, the South Florida Water Management District (District) has recertified your firm as a Small Business Enterprise (SBE). This certification is valid for three (3) years and may only be applied when business is conducted in the following area(s):

Professional, Civil, Drainage, Water and Wastewater, and Mechanical Engineering Services; Mapping & Surveying; Underground Utility Locating; Construction and Project Management; Grant Writing Feasibility Studies; Permitting Services; As Built Certifications; Drone Aerial Imaging

You submittal of bids or proposals to supply other products or services outside of the specialty area(s) noted above will not count toward SBE participation. If you require certification in other specialty areas, please contact the Procurement Bureau, SBE Section, for additional information.

Renewal is required every three (3) years and should be requested a minimum of 45 days prior to the above expiration date.

If any changes occur within your company during the certification period such as ownership, affiliate company status, address, telephone number, licensing status, gross revenue, or any information that relates to your SBE Certification status, you must notify this office in writing immediately. It is imperative that we maintain current information on your company at all times.

Certification is not a guarantee that your firm will receive work, nor an assurance that your firm will remain in the District's vendor database.

We look forward to a mutually beneficial working relationship.

Sincerely,

Jennifer Dollar
SBE Program Specialist

Suite 116
Riviera Beach, FL 33404
agoly@craigasmith.com

Dear Mr. Goly:

The Florida Department of Transportation has reviewed your application for prequalification package and determined that the data submitted is adequate to technically prequalify your firm for the following professional services types of work per Rule 14-75, F.A.C.:

3.1 - Minor Highway Design

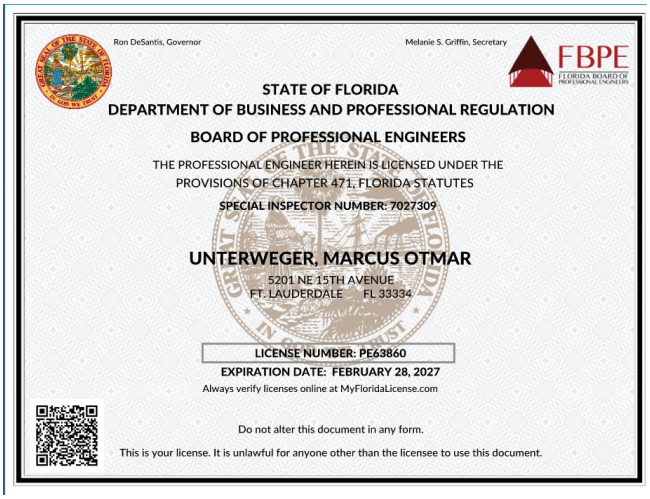
7.1 - Signing, Pavement Marking and Channelization

8.1 - Control Surveying
8.2 - Design, Right of Way & Construction Surveying
8.4 - Right of Way Mapping

Your firm is now technically prequalified with the Department for Professional Services in the above referenced work types. The overhead audit has been accepted, and your firm may pursue projects in the referenced work types with fees of any dollar amount. This status shall be valid until June 30, 2026, for contracting purposes.

Approved Rates

Home Overhead	Facilities Capital Cost of Money (FCCM)	Premium Overtime	Home Direct Expense	Published Fee Schedule
172.61%	0.325%	Reimbursed	3.15%	No



Per Title 23, U.S. Code 112, there are restrictions on sharing indirect cost rates. Refer to Code for additional information.

Should you have any questions, please feel free to contact me by email at FDOT.PSPrequalification@dot.state.fl.us.

Sincerely,

Philip Pitts

By responding to this sealed Solicitation, the Bidder/Proposer makes all representations required by the Solicitation and further warrants and represents that Bidder/Proposer acknowledges that it has received and examined copies of the entire Solicitation documents including all of the following addenda:

Addendum No.: I Dated: 10/22/25 Addendum No.: II Dated: 11/4/25

Addendum No.: III Dated: 11/5/25 Addendum No.:_____ Dated: _____

☐ No Addendum Issued

2. Conflicts of Interest*

Respondent covenants that it presently has no interest and shall not acquire any interest which would conflict in any manner of degree with the performance of the Services covered under this Agreement. Furthermore, Respondent warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for Respondent to solicit or secure this Agreement and that it has not paid or agreed to pay any person, company, corporation, individual, or firm, other than a bona fide employee working solely for Respondent any fee, commission, percentage, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Respondent, and its subconsultants at any tier, certify that they have not entered into any contract, subcontract, or arrangement in connection with the Project covered under this Agreement, or of any property included or planned to be included in the Project, in which any member, officer, of employee of Respondent or its subconsultants, during its tenure, or for two years thereafter, has any interest, direct or indirect. Respondent, and its subconsultants at any tier, shall insert the following provision into each of their contracts and subcontracts: "No member, officer, or employee of the subconsultant, during their tenure or for two years thereafter, shall have any interest, direct or indirect, in this contract or the proceeds thereof."

Do you have any Conflicts of Interest to report?

☐ Yes

■ No

**Response required*

When equals "Yes" Please upload a document listing all your Conflict of Interest

3. No Contingency Affidavit*

Affiant certifies the following:

a. Neither Firm nor any principal, employee, agent, representative or family member has promised to pay, and Firm has not and will not pay, a fee the amount of which is contingent upon the Town of Pembroke Park awarding a contract.

b. Firm warrants that neither it, nor any principal, employee, agent, or representative has procured, or attempted to procure, a contract with the Town of Pembroke Park in violation of any of the provisions of the Broward County conflict of interest and code of ethics ordinances.

c. Consultant acknowledges that a violation of this warranty may result in the termination of any contracts and forfeiture of funds paid, or to be paid, to the Consultant if awarded a contract.

Please Confirm

*Response required

4. **Copeland Anti-Kickback Affidavit***

Affiant certifies that no portion of any sums will be paid to any employees of the Town of Pembroke Park, its elected officials, or its consultants, as a commission, kickback, reward or gift, directly or indirectly by Proposer or any member of Proposer's firm or by any officer of the corporation in exchange for business with the Town of Pembroke Park.

Please Confirm

*Response required

5. **Certifications***

Respondent certifies that they comply (or will comply) with the statements concerning, but not limited to: Compliance with Laws, Conflict of Interest, Convictions, Debarment, Discriminatory Vendor, Drug Free Workplace, Equal Employment Opportunity, E-Verification System, Gopher Tortoise Relocation, Immigration and Nationality Act, Lobbying, Non-Collusion, Prohibited Interests, Public Entity Crime and Scrutinized Companies.

Please Confirm

*Response required

6. **Compliance with Laws***

Respondent shall comply with all laws, rules, codes, ordinances, and licensing requirements that are applicable to the conduct of its business, including those of Local, State and Federal agencies having jurisdiction and authority. These laws, shall include, but not be limited to, Chapter 287, Florida Statutes, the Uniform Commercial Code, the Immigration and Nationalization Act, the Americans with Disabilities Act, the United States Occupational Safety and Health Act, the United States Environmental Protection Agency, the State of Florida Department of Environmental Protection, Code of Federal Regulations and all prohibitions against discrimination on the basis of race, religion, sex, creed, national origin, handicap, marital status, sexual orientation, gender identity or expression or veteran's status. Violation of such laws shall be grounds for termination of the Agreement.

Please Confirm

*Response required

7. **Convictions***

Respondent has fully informed Owner of all convictions of the firm, its affiliates (as defined in section 287.133(1) (a), Florida Statutes), and all directors, officers, and employees of the firm and its affiliates for violation of state or federal antitrust laws with respect to a public contract for violation of any state or federal law involving fraud, bribery, collusion, conspiracy or material misrepresentation with respect to a public contract. This includes disclosure of the names of current employees who were convicted of contract crimes while in the employ of another company.

Please Confirm

*Response required

8. **Debarment***

Respondent certifies to the best of their knowledge and belief, that they and their principals 1) are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Municipal, County, State or Federal department or agency, 2) have not, within a three-year period preceding execution of this Agreement, been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records; making false statements; or receiving stolen property, 3) are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated above, 4) have not within a three-year period preceding execution of this Agreement had one or more public transactions (Federal, State or local) terminated for cause or default, and 5) will advise Town immediately if their status changes and will provide an explanation for the change in status.

☐ Please Confirm

**Response required*

9. **Drug-Free Workplace Certification***

In accordance with Florida Statute 287.087 (current version), Respondent hereby certifies the following:

1. Publishes a written statement notifying that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the workplace named above, and specifying actions that will be taken against violations of such prohibition.
2. Informs employees about the dangers of drug abuse in the workplace, the firm's policy of maintaining a drug free working environment, and available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug use violations.
3. Gives each employee engaged in providing commodities or contractual services that are under proposal a copy of the statement specified above.
4. Notifies the employees that as a condition of working on the commodities or contractual services that are under proposal, the employee will abide by the terms of the statement and will notify the employer of any conviction of, pleas of guilty or nolo contendere to, any violation of Chapter 893, or of any controlled substance law of the State of Florida or the United States, for a violation occurring in the workplace, no later than five (5) days after such conviction, and requires employees to sign copies of such written statement to acknowledge their receipt.
5. Imposes a sanction on, or requires the satisfactory participation in, a drug abuse assistance or rehabilitation program, if such is available in the employee's community, by any employee who is so convicted.
6. Makes a good faith effort to continue to maintain a drug free workplace through the implementation of the Drug Free Workplace Program.

"As a person authorized to sign this statement, I certify that the above named business, firm or corporation complies fully with the requirements set forth herein".

By clicking confirm below, Respondent certifies that the information as provided in this Drug-Free Workplace Certification, is truthful and correct at the time of submission.

☐ Please Confirm

**Response required*

13. **Discriminatory Vendor***

Respondent certifies that they are not subject to Section 287.134 (2)(a) which specifies that an entity or affiliate who has been placed on the discriminatory vendor list may not submit a Proposal on a contract to provide any goods or services to

a public entity, may not submit a Proposal on a contract with a public entity for the construction or repair of a public building or public work, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with public entity.

■ Please Confirm

*Response required

14. Equal Employment Opportunity*

Respondent shall not discriminate on the basis of race, color, sex, sexual orientation, gender identity, age, national origin, religion, and disability or handicap in accordance with the Provisions of: Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000 et seq.), Title VII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), Florida Civil Rights Act of 1992 (§ 760.10 et seq.), Title 41 CFR Part 60 for compliance with Executive Orders 11246 and 11375, Title 49 CFR 23 and Title 49 CFR 26 for Disadvantaged Business Enterprises, Age Discrimination Act of 1975 (42 U.S.C. § 6101, et seq.), Title 49 CFR 21 and Title 49 CFR 23, Nondiscrimination on the basis of handicap, Title 49 CFR 27, Americans with Disabilities Act of 1990 (42 U.S.C. 12102, et. Seq.), Federal Fair Labor Standards Act (29 U.S.C. § 201, et seq.), and any other Federal and State discrimination statutes. Respondent shall furnish pertinent information regarding its employment policies and practices as well as those of their proposed subcontractors as the Secretary of Labor, or Town may require. The above shall be required of any subcontractor hired by Respondent. All Equal Employment Opportunity requirements shall be included in all non-exempt subcontracts entered into by Respondent. Subcontracts entered into by Respondent shall also include all other applicable labor provisions. No subcontract shall be awarded to any non-complying subcontractor. Additionally, Respondent shall insert in its subcontracts a clause requiring subcontractors to include these provisions in any lower tier subcontracts that may in turn be made. Respondent shall comply with all state laws and local ordinances, except that any preferential consideration of local in-state subcontractors is NOT allowed.

■ Please Confirm

*Response required

15. E-Verification System*

Respondent and its subcontractors shall utilize the U.S. Department of Homeland Security's E-Verify system, https://www.uscis.gov/, in accordance with Section 448.095, Florida Statutes, to verify the employment eligibility of: (1) all persons employed by Respondent during the contract term to perform any duties within Florida, and; (2) all persons, including subcontractors, assigned by Coordinating Consultant to perform work pursuant to this Contract. Respondent meeting the terms and conditions of the E-Verify System are deemed to be in compliance with this provision. Respondent and its subcontractors shall provide Town with affidavits stating that they do not employ, contract with, or subcontract with an unauthorized alien. Town is obligated to terminate this Agreement upon a good faith belief that Respondent or its subcontractors has knowingly violated Section 448.095, Florida Statutes. E-Verification Identification

■ Please Confirm

*Response required

16. E-Verification Identification Number*

Provide your E-Verification Identification Number 2210038

*Response required

17. Immigration and Nationality Act*

Respondent shall comply with all immigration laws as outlined in 8 USC § 1324a- Unlawful employment of aliens. Town will not intentionally award Town contracts to any Respondent who knowingly employs unauthorized Alien workers . Any violation of the employment provisions outlined in the Immigration and Nationality Act throughout the term of any Agreement with Town may result in immediate termination of the Agreement. Town will consider the employment of unauthorized aliens a violation of Section 274A (e) of the Immigration and Nationality Act. Such violation will be cause for unilateral

cancellation of the Agreement, by Town, if Consultant knowingly employs unauthorized aliens.

■ Please Confirm

*Response required

18. Lobbying*

Respondent confirms that it will not, in connection with the Agreement, directly or indirectly

A. offer, confer, or agree to confer any pecuniary benefit on anyone as consideration for any Town officer or employee's decision, opinion, recommendation, vote, other exercise of discretion, or violation of a known legal duty, or
B. offer, give, or agree to give to anyone any gratuity for the benefit of, or at the direction or request of, any Town officer or employee. For purposes of clause (2), "gratuity" means any payment of more than nominal monetary value in the form of cash, travel, entertainment, gifts, meals, lodging, loans, subscriptions, advances, deposits of money, Services, employment, or contracts of any kind.

■ Please Confirm

*Response required

19. Non-Collusion*

Respondent agrees that neither it, nor any of its officers, partners, agents or employees have entered into any agreement, participated in any collusion, or otherwise taken any action which is in restraint of a free competitive solicitation in connection with this Agreement, and that Respondent intends to do the work with its own bona fide employees or subcontractors and has not provided a Proposal for the benefit of another Consultant/Vendor. Furthermore, Respondent certifies that its affiliates, subsidiaries, directors, officers, and employees are not currently under investigation by any governmental authority and have not in the last ten (10) years been convicted or found liable for any act prohibited by law in any jurisdiction, involving conspiracy or collusion with respect to submitting a Proposal on any public contract.

■ Please Confirm

*Response required

20. Prohibited Interests*

Respondent, and its subcontractors at any tier, certify that they have not entered into any contract, subcontract, or arrangement in connection with the project covered under this Request for Proposal, or of any property included or planned to be included in the project, in which any member, officer, of employee of the Respondent or its subconsultants, during its tenure, or for two years thereafter, has any interest, direct or indirect.

■ Please Confirm

*Response required

21. Public Entity Crime*

Pursuant to 287.133, Florida Statute, A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a Proposal, or reply on a contract to provide any goods or services to a public entity; may not submit a Proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit Proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in s. 287.017, Florida Statutes for

CATEGORY TWO for a period of 36 months following the date of being placed on the convicted vendor list.

☐ Please Confirm

**Response required*

22. Scrutinized Companies*

Respondent certifies that it is not listed on (a) the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Florida Statues, or is engaged in a boycott of Israel; (b) the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Terrorism Sector List, created pursuant to Section 215.473, Florida Statutes; or (c) is engaged in business operations in Cuba or Syria. Respondent further understands and accepts that any contract issued as a result of this Proposal shall be subject to Section 287.135, Florida Statutes, and subject to immediate termination by Town in the event there is any misrepresentation or false certification on the part of Respondent.

☐ Please Confirm

**Response required*

PROPOSER AFFIRMATION

I, the undersigned affiant, being first duly sworn as an authorized agent of the below-named firm, does hereby affirm and attest under penalty of perjury as the proposed Consultant for the Town of Pembroke Park that the certifications and statements provided above on behalf of Consultant are true to the best of affiant's knowledge and belief and that Consultant is compliant with all requirements outlined in these Town of Pembroke Park's Affidavits. Consultant acknowledges it is required to comply with and keep current all statements sworn to in the above affidavits and will notify the Town of Pembroke Park immediately if any of the statements attested hereto are no longer valid.

6.2 AFFIDAVIT REGARDING PROHIBITION ON CONTRACTING WITH ENTITIES OF FOREIGN COUNTRIES OF CONCERN

Pursuant to Section 287.138, Florida Statutes (which is expressly incorporated herein by reference), the Town of Pembroke Park may not knowingly enter into a contract with an entity which would give access to an individual's personal identifying information if (a) the entity is owned by the government of a foreign country of concern; (b) the government of a foreign country of concern has a controlling interest in the entity; or (c) the entity is organized under the laws of or has its principal place of business in a foreign country of concern.

This affidavit must be completed by an officer or representative of an entity submitting a bid, proposal, or reply to, or entering into, renewing, or extending, a contract with the Town of Pembroke Park which would grant the entity access to an individual's personal identifying information.

1. Craig A. Smith & Associates LLC ("entity") does not meet any of the criteria in paragraphs (2)(a)-(c) of Section 287.138, F.S.

Town of Pembroke Park Consultant Response Form

6.3 CONSULTANT QUESTIONNAIRE

The completed Consultant Questionnaire form should be submitted with the solicitation response. Failure to timely submit with the response may affect may result in Consultant being deemed non-responsive.

If a response requires additional information, the Consultant should upload a written detailed response; each response should be numbered to match the question number. The completed questionnaire and attached responses will become part of the procurement record. It is imperative that the person completing the form be knowledgeable about the proposing Firm's business and operations.

1. Legal Business Name: Craig A. Smith & Associates LLC

2. Doing Business As / Fictitious Name: (if applicable): _____

3. Federal Employer I.D. No. (FEIN): 86-3889398

4. Website address: (if applicable): www.craigasmith.com

5. Principal place of business address: 1425 E. Newport Center Drive Deerfield Beach, FL 33442

6. Office location responsible for this project: 1425 E. Newport Center Drive Deerfield Beach, FL 33442

   Telephone No.: 954-782-8222

7. Type of business *(check appropriate box):*

   - ☐ Corporation (specify the State of Incorporation):
   - ☐ Sole Proprietor
   - ☐ Limited Liability Company (LLC)
   - ☐ Limited Partnership
   - ☑ General Partnership (State and County filled in)
   - ☐ Other – Specify: _____

8. AUTHORIZED CONTACT(S) FOR YOUR FIRM:

   Name: Stephen C. Smith

   Title: President

   E-mail: Ssmith@craigasmith.com

   Telephone No. 954-782-8222

Name: _____

Title: _____

E-mail: _____

Telephone No. _____

9. List name and title of each principal, owner, officer, and major shareholder:

a) Aneesh Goly - Owner

b) _____

c) _____

d) _____

10. Affiliated Entities of the Principal(s):

List the names and addresses of "affiliated entities" of the Firms' principal(s) over the last five (5) years (from the solicitation opening deadline) that have acted as a prime Consultant with the Town. Affiliated entities of the principal(s) are those entities related to the Consultant by the sharing of stock or other means of control, including but not limited to a subsidiary, parent or sibling entity.

a) Craig A. Smith & Associates Inc.

b) _____

c) _____

d) _____

11. Has your firm, its principals, officers or predecessor organization(s) been debarred or suspended by any government entity within the last three (3) years? *If yes, specify details in an attached written response.*

☐ Yes ☑ No

12. Has your firm, its principals, officers or predecessor organization(s) ever been debarred or suspended by any government entity? *If yes, specify details in an attached written response the reinstatement date, if granted.*

☐ Yes ☑ No

13. Specify the type of specialized service your firm offers: _____

_____

_____

14. How many years has your firm been in business while providing the services offered within this solicitation? 45 years.

15. Is your firm's business regularly engaged in and routinely providing services offered within this solicitation?

☑ Yes ☐ No

16. Has your firm ever failed to complete any professional services during the last three (3) years? *If yes, specify details in an attached written response.*

☐ Yes ☑ No

17. Is your firms or any of its principals or officers currently principals or officers of another organization? *If yes, specific details in an attached written response.*

☐ Yes ☑ No

18. Have any voluntary or involuntary bankruptcy petitions been filed by or against your firm, its parent or subsidiaries or predecessor organizations during the last three (3) years? *If yes, specify details in an attached written response.*

☐ Yes ☑ No

19. Has your firm's surety ever intervened to assist in the completion of a contract or have Performance and/or Payment Bond claims been made to your firm or its predecessor's sureties during the last three years? *If yes, specify details in an attached written response, including contact information for owner and surety company.*

☐ Yes ☑ No

20. Non-Collusion Certification: Consultant shall disclose, to their best knowledge, any Town of Pembroke Park officer or employee, or any relative of any such officer or employee as defined in Section 112.3135 (1)(c), the Florida Statues who is an officer or director of, or has a material interest in, the Vendor's business, who is in a position to influence this procurement. Any Town of Pembroke Park officer or employee who has input into the writing of specifications or requirements, solicitation of offers, decision to award, evaluation of offers, or any other activity pertinent to this procurement is presumed, for purposes hereof, to be in a position to influence this procurement. Failure of a Consultant to disclose any relationship described herein shall be reason for debarment *(check one)*.

☑ Consultant certifies that this offer is made independently and free from collusion;

or

☐ Consultant is disclosing names of officers or employees who have a material interest in this procurement and is in a position to influence this procurement. *Consultant must include a list of name(s), and relationship(s) with its submittal.*

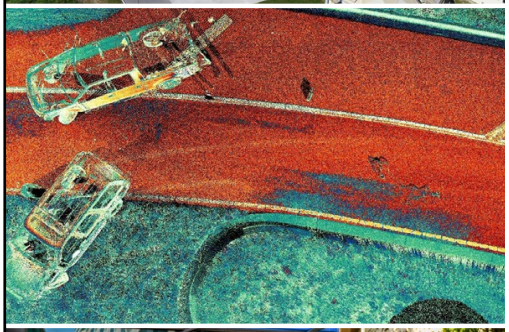
6.4 DESIGNATION OF QUALIFIED DISCIPLINE FORM

NAME OF COMPANY:

Craig A. Smith & Associates LLC

(Name of Firm submitting RFQ)

Proposers must have experience in the related areas below described in Section 3.0 Scope of Services of the RFQ. Accordingly, Proposers shall specify whether such experience requirement is satisfied by the Proposer and/or any of its proposed sub-consultants by identifying the applicable entity along with the category of experience and number of years of experience as required in Section 4.0 Submittal Requirements. Resumes and experience submitted with the Proposal must specify and substantiate the experience and qualifications provided herein in the same format as below, as needed.



CHECK CATEGORY (DISCIPLINE) YOU ARE APPLYING:

- ☐ **1. ARCHITECTURAL SERVICES**
- ☑ **2. CIVIL. STRUCTURAL AND MECHANICAL, ELECTRICAL, PLUMBING (MEP) ENGINEERING SERVICES**
- ☑ **3. TRANSPORTATION, TRAFFIC AND ROADWAY ENGINEERING**
- ☐ **4. LANDSCAPE ARCHITECTURAL SERVICES**
- ☐ **5. ENVIRONMENTAL ENGINEERING SERVICES**
- ☐ **6. PLANNING AND COMMUNITY DEVELOPMENT**
- ☑ **7. SURVEYING AND MAPPING**
- ☑ **8. DRAINAGE AND STORMWATER**
- ☐ **9. BUILDING INSPECTIONS, PLANS REVIEW AND PERMITTING**
- ☑ **10. CONSTRUCTION ENGINEERING INSPECTION (CEI)**
- ☑ **11. PROJECT MANAGEMENT**

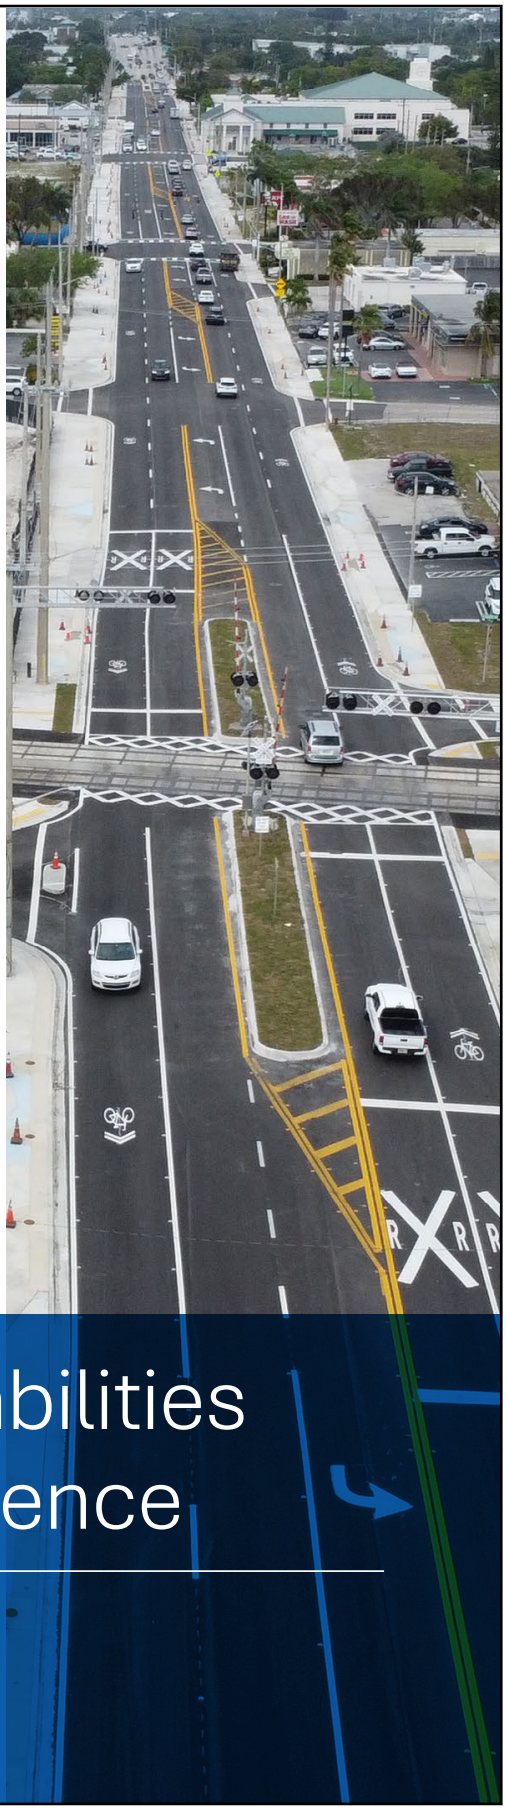
RE: RFQ No. 25-02 – Architectural and Engineering Services through Continuing Contracts (CCNA)

Dear Evaluation Committee,

HBC Engineering Company (HBC) is pleased to submit our qualifications to provide professional Architectural and Engineering services to the **Town of Pembroke Park under RFQ 25-02.** We recognize the Town's continuing contract program as a strategic vehicle to deliver infrastructure projects that enhance community resilience, mobility, and public facilities. HBC is a Florida-registered, multidisciplinary firm established in 2006, providing civil, structural, transportation, water resources, and MEP engineering services to municipalities throughout South Florida. Our commitment is to deliver responsive, cost-effective, and high-quality services in full accordance with the Town's schedules and technical standards.

HBC understands that this continuing contract will support the Town's ongoing capital program through task assignments that may include roadway and drainage improvements, structural evaluations, public facility renovations, water and wastewater system upgrades, landscape and irrigation design, and building system modernization. We will provide comprehensive support from planning and concept development through permitting, bidding, and construction administration. Our team will apply FDOT, FDEP, and Town standards to deliver safe, sustainable, and permittable solutions.

Our staff of more than 80 professionals includes licensed engineers, architects, inspectors, and planners experienced in continuing contracts across Broward, Palm Beach, and Miami-Dade Counties. We warrant that HBC shall maintain in good standing all required licenses, certifications, and permits throughout the contract term and shall perform all services in full compliance with federal, state, and local laws. Our approach emphasizes quality assurance, clear communication, and predictable delivery—values that have earned HBC its reputation for excellence and reliability in public-sector engineering.



As authorized representative, Adebayo Coker, PE, President and Contract Manager of HBC Engineering Company, located at 5200 NW 33rd Avenue, Suite 211, Fort Lauderdale, FL 33309, is empowered to negotiate terms, render binding decisions, and commit HBC's resources for this contract. He may be reached directly at (305) 632-5280 or acoker@hbcengineeringco.com

HBC appreciates the Town's commitment to maintaining safe, resilient, and sustainable infrastructure and welcomes the opportunity to serve as a trusted partner in delivering projects that reflect Pembroke Park's vision and values. We stand ready to commence work immediately upon award.

Respectfully

Adebayo Coker, PE

2. Professional Capabilities and Project Experience

HBC

FIRM QUALIFICATIONS

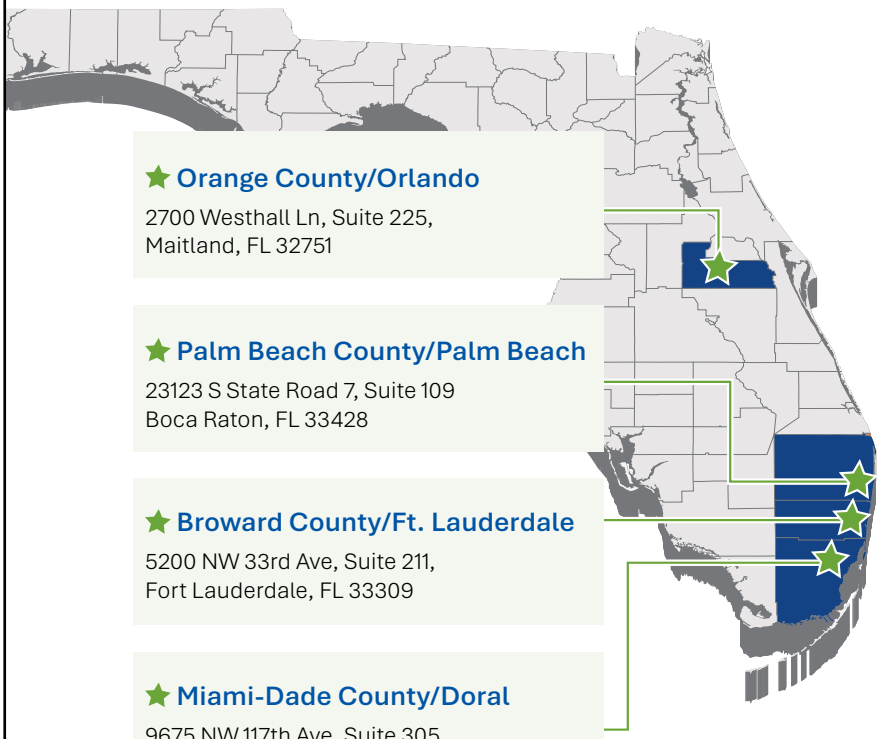
Established in 2006, HBC is a Florida-registered engineering consulting firm offering full-service architectural and engineering capabilities to public agencies throughout the state. With more than 80 professionals, HBC provides integrated planning, design, and construction support services encompassing civil, structural, transportation, environmental, architectural, and building systems engineering. The firm is structured to deliver comprehensive solutions under continuing contracts, supporting municipalities, counties, and special districts with responsive, cost-effective technical services.

HBC's experience spans over 100 continuing services contracts and more than $5.2 billion in constructed project value. The firm's multidisciplinary expertise covers roadway and drainage improvements, water and wastewater systems, site development, building renovation, and facility infrastructure upgrades. HBC has successfully completed assignments for the Florida Department of Transportation (FDOT), Florida's Turnpike Enterprise (FTE), Greater Miami Expressway Agency (GMX), and numerous local governments across Miami-Dade, Broward, and Palm Beach Counties. This depth of municipal and state experience demonstrates the firm's ability to meet the Town's requirements for professional A&E services through the CCNA process.

HBC's in-house team includes licensed Professional Engineers, planners, and construction inspectors who manage projects from concept development through design, permitting, and construction support. Our scope of services includes preliminary studies, site assessments, drainage and utility analysis, roadway and intersection design, grading and paving plans, water and wastewater system design, signing and pavement marking plans, lighting and signal coordination, cost estimating, and construction phase assistance. The firm's internal QA/QC program ensures full compliance with FDOT, FDEP, and local standards, providing consistency, accuracy, and regulatory assurance at every stage.

HBC's project approach emphasizes coordination, efficiency, and long-term value. Each task is led by an experienced project manager supported by discipline specialists who understand municipal procedures, procurement protocols, and permitting requirements. The firm's success is grounded in strong client partnerships, proactive communication, and the ability to mobilize technical resources quickly to meet the Town's ongoing project needs.

Certified as a DBE, MBE, SBE, and MWBE in Florida, and as DBE and LDB in Miami-Dade County, HBC actively supports diversity and equitable participation in public contracting. Through local presence, extensive multidisciplinary resources, and a record of performance with municipal clients, HBC is fully qualified and prepared to provide professional architectural and engineering services for the Town of Pembroke Park under this continuing contract.



100+	5.2B+	19	490+	80+
Continuing services contracts	Construction dollar value of projects	Years of relevant experience	Municipal, county, and state contracts	Professionals across Florida

HBC offers a wide range of services, including:

- Roadway and intersection improvements
- Drainage and stormwater system design
- Water and wastewater utility design
- Grading, paving, and earthwork plans
- Site civil design for municipal facilities
- Permitting and regulatory coordination (FDOT, FDEP, SFWMD, RER)
- Erosion and sedimentation control plans
- Signing and pavement marking plans
- Maintenance of Traffic and construction phasing
- Cost estimating and bid document preparation
- Constructability reviews
- Utility coordination
- Transportation and traffic engineering studies
- Environmental and permitting support
- Data collection and field verification
- Public involvement and stakeholder coordination
- Post-design support and construction phase services

Locations

Our offices are strategically located across South Florida, including Broward, Miami-Dade, Palm Beach, and Orange Counties, enabling HBC to efficiently support the Town's continuing architectural and engineering needs. Each office is staffed with multidisciplinary professionals and equipped with advanced design and coordination tools to deliver responsive service and technical excellence.

Why the HBC Team?
HBC understands the Town of Pembroke Park's commitment to maintaining safe, resilient, and well-planned community infrastructure. The Town's focus on improving public facilities, enhancing drainage and mobility systems, and supporting sustainable growth aligns directly with HBC's core expertise and regional experience. Our team is prepared to assist the Town in advancing its capital improvement and redevelopment objectives through practical, cost-efficient, and regulatory-compliant engineering and architectural solutions.

From project initiation through completion, HBC is committed to precision, accountability, and responsiveness. With deep familiarity with South Florida's permitting environment, local conditions, and infrastructure needs, HBC stands ready to support the Town with multidisciplinary services that promote resilience, functionality, and long-term value.

HBC TEAM AWARDS & RECOGNITIONS

Miami-Dade County
Proclamation – HBC Engineering Day, October 22, 2025

American Council of Engineering Companies(ACEC)
2023 Outstanding Project Award- Venetian Causeway Improvements Bridges PD&E Study

American Society of Civil Engineers (ASCE)
2024 Engineer of the Year Award - Claudia Bustamante
2023 Awards & Board Installation Dinner Certificate of Appreciation
2023 - Silver Sponsor of the ASCE
2022 Awards & Board Installation Dinner Certificate of Appreciation
2022 - Silver Sponsor of the ASCE

Cuban American Association of Civil Engineers (CAACE)
2021 Project of the Year Category III Award for the Miami-Dade County Water and Sewer Department (MDC-WASD) Central District Wastewater Treatment Plant (CDWWTP) Oxygen Production Facility

Florida Department of Transportation (FDOT)
2006 Special Achievement Award
2005 Highway Engineering Award
2004 Team Achievement Award - Biscayne Boulevard III

The Intelligent Transportation Society of Florida
2024 Outstanding Achievement Award - Daniel Rodriguez

The Miami-Dade County Office of the Mayor and Board of County Commissioners
2020 Certificate of Appreciation - Bronze Sponsor of the 7th Annual District 1 Black Heritage Festival
2019 Certificate of Appreciation - Platinum Sponsor of the 6th Annual District 1 Black Heritage Festival

Nigerian Women Association of Georgia (NWAG)
2023 Sponsor Award

HBC is engineering progress with purpose, precision in motion, and built on trust and vision.

Why These Awards Matter

Each award reaffirms our dedication to technical excellence, value-driven solutions, and collaborative relationships. They serve as milestones on our mission to serve clients with integrity and impact.

Let's build something award-winning—together.

TECHNOLOGICAL CAPABILITIES & CUTTING-EDGE PRACTICES

At HBC, we recognize that delivering technologically advanced services to our clients requires a solid internal technological infrastructure. We maintain a robust network of computer-aided design (CAD), building information modeling (BIM), Geographic Information System (GIS) stations, and advanced project management software. These tools enable us to offer precise and efficient design solutions, ensuring all projects meet high standards.

Design Software & Tools: We utilize state-of-the-art CAD and BIM platforms, which allow us to develop accurate and detailed design models that can quickly adapt to project changes. These tools are integrated across our network, ensuring all stakeholders can access the most up-to-date project information.

Project Management Systems: Our sophisticated project management software allows us to track progress, allocate resources, and manage timelines effectively. This ensures that all project phases—from planning to execution—are well-coordinated and meet established milestones. Project managers have real-time access to cost data and performance metrics, helping us deliver projects on time and within budget.

Geospatial & Surveying Technology: To further enhance our precision, we employ advanced geospatial tools such as GIS and GPS for projects requiring surveying or subsurface utility engineering. These technologies provide accurate and reliable data critical for making informed decisions about design and construction.

Drone Technology: We are also pioneers in incorporating drone technology into our surveying and inspection processes. Our uncrewed aerial vehicles (UAVs) capture high-resolution imagery and 3D data, allowing us to conduct aerial surveys, monitor construction progress, and identify potential issues with unparalleled accuracy. Drone technology enables rapid data collection over large areas, reducing time and labor costs while improving project efficiency and safety.

Centralized Networking: HBC maintains a centralized data storage and networking infrastructure, ensuring seamless sharing of CADD files, GIS data, and other critical project information. Our system supports efficient drawing management and cross-disciplinary collaboration, ensuring that all team members across multiple locations can work cohesively.

Sustainable Engineering Practices: We integrate sustainable engineering solutions throughout our projects, advocating for energy-efficient designs and environmentally responsible practices. Our designs prioritize resource management and long-term sustainability, aligned with eco-friendly infrastructure development.

Custom IT Solutions: HBC's Technology Solutions Group extends beyond core engineering services by offering specialized IT services such as database development, web design, and custom application creation. This enables us to enhance project delivery with tailored technological solutions that address each client's and project's needs.

By leveraging cutting-edge technology like drones, efficient project management systems, and centralized technological infrastructure, HBC is well-prepared to deliver innovative, cost-efficient, high-quality services.

SUSTAINABILITY AT OUR WORKPLACE

Paper Reduction & Recycling
Transitioning to digital documentation.

Double-sided printing as default.

Office-wide paper recycling bins.

Energy Efficiency
Using LED or energy-efficient lighting.

Motion-sensor lights in office-wide.

Waste Reduction
Eliminating the use of single-use cups.

Providing reusable kitchenware and dishwashing options.

> *Committed to excellence. Powered by purpose.*

Sustainable Practices in Design

HBC is dedicated to sustainable design practices, reinforced by our continuous approach to fostering efficiency and energy savings on this contract. Our infrastructure improvements and upgrades strategy are rooted in sustainable engineering practices, ensuring that resource utilization and project implementation do not compromise the natural environment or burden future generations.

We have successfully integrated several approaches to meet the sustainable development goals in our previous projects, and we will maintain the same focus on this contract.

For each project we undertake, we propose various methodologies to achieve certification credits for sustainability when necessary. Our efforts will focus on steps, techniques, and technologies to minimize the environmental footprint and energy consumption throughout the planning, pre-design, design, post-design, and post-construction phases.

Some methods we had proposed in previous contracts include:

- Incorporating hydrodynamic separation devices in stormwater systems to enhance water quality.
- Directing stormwater from green areas to underground cisterns for reuse in irrigation.
- Utilizing recycled, low-carbon, and regionally sourced materials in roadway and facility construction.
- Employing smart water management technologies to optimize drainage efficiency and reduce consumption.
- Limiting disturbance to existing vegetation and natural site features during construction.
- Integrating low-maintenance landscaping sustained primarily by natural rainfall.
- Providing electric vehicle charging infrastructure to support municipal sustainability goals.
- Implementing green infrastructure elements such as bioswales and rain gardens.
- Designing pervious pavement systems to enhance groundwater recharge and mitigate flooding.

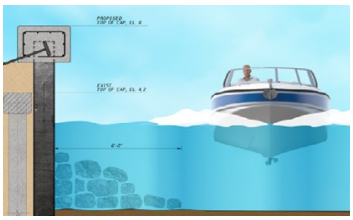
Internally, HBC extends this commitment to its operations through paper reduction, energy-efficient lighting, and waste minimization programs at all office locations. These firm-wide efforts reflect a continuous culture of sustainability—ensuring our projects and our practices contribute to the long-term resilience and environmental health of the communities we serve.

PROJECT SUMMARY

The following projects highlight HBC's extensive experience providing comprehensive architectural and engineering services for municipalities, counties, and state agencies throughout Florida. Each example demonstrates the firm's capacity to manage complex, multidisciplinary assignments that align with the Town of Pembroke Park's continuing contract scope. HBC's portfolio includes r**oadway reconstruction, drainage and stormwater improvements, utility upgrades, site development, architectural restoration, and construction administration services** delivered on schedule and within budget. Supported by more than 80 in-house professionals and a network of specialized subconsultants, HBC applies the same technical rigor, coordination, and quality assurance framework to every project, ensuring full regulatory compliance and long-term value for public clients.

Brothers to the Rescue Restoration & Relocation | BCC Engineering

The Brothers to the Rescue Monument Restoration and Relocation project involves the preservation, rehabilitation, and relocation of a memorial honoring four civilian aviators who lost their lives during a humanitarian mission. The scope includes architectural restoration, historic preservation, and mechanical and electrical engineering services to ensure functionality and integrity of the monument. Work encompasses lighting design, ADA-compliant accessibility, and coordination with FDOT and the City of Hialeah Gardens for placement along SR 25/Okeechobee Road from east of NW 116 Way to east of NW 87 Avenue. The project emphasizes cultural significance, public use enhancement, and long-term structural preservation.

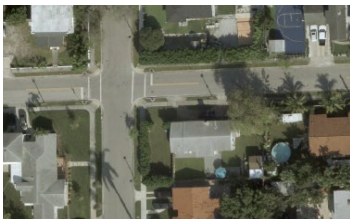


Golden Glades Multi-Modal Transportation Facility | FDOT/Lead Engineering Contractors

The Golden Glades Multimodal Transportation Facility project enhanced mobility and connectivity within one of Miami-Dade County's key transportation hubs. V3 Architectural Group provided architectural and interior design services in coordination with FDOT and Miami-Dade County. The project included a new entrance monument, upgraded pedestrian and bicycle infrastructure, and the addition of multi-bay bus terminals to support multimodal operations. Construction was phased over three and a half years to minimize disruptions to public transit and traffic during peak periods. Improvements incorporated ADA-compliant sidewalks, walkways, and platforms, as well as new bicycle paths, parking, and lockers to promote safe, efficient, and sustainable travel.

Design Build Services for the Reconstruction of NE 2nd Ave from NE 20th Street to NE 36th Street | Miami-Dade County Dept of Transportation and Public Works

HBC is providing full design-build services for the reconstruction of NE 2nd Avenue from NE 20th Street to NE 36th Street. The project includes roadway reconstruction, drainage upgrades, pedestrian and traffic safety enhancements, and new utility infrastructure to improve mobility and resilience. HBC's scope covers engineering design, permitting, and coordination with local agencies. Key elements include new sidewalks, curb and gutter, pavement markings, decorative lighting, and a stormwater management system to mitigate flooding. The work also features installation of 6,100 linear feet of ductile iron water mains and new signalization systems to enhance traffic flow, safety, and community accessibility.



Riverwalk North Seawall Replacement Project | Miami-Dade County Dept of Transportation and Public Works

HBC led the design-build delivery of the NE 2nd Avenue Reconstruction Project from NE 69th Street to NE 91st Street, a 1.9-mile corridor funded through The People's Transportation Plan. The project modernized infrastructure, improved safety, and enhanced multimodal access in the City of Miami. Scope included full roadway reconstruction, widened lanes, bike lanes, sidewalks, on-street parking, and upgraded intersections. HBC designed a new stormwater management system with 2,162 LF of French Drain and over 125 structures, secured DERM permits, and addressed contaminated sites. Additional features included new signals, signage, decorative lighting, and coordinated utility and railroad adjustments to ensure safe, resilient mobility.

Districtwide Traffic Operations Data Collection Contract | Florida Department of Transportation (FDOT) District 4

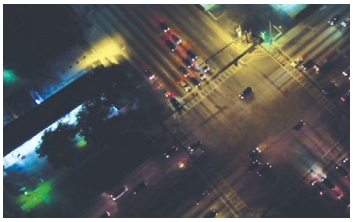
HBC is providing professional traffic engineering data collection services for FDOT District 4 under a Districtwide Traffic Operations contract (Work Group 6.1 – Traffic Engineering Studies). The contract supports multimodal data gathering across five counties to improve operational safety and efficiency. Services include vehicle, pedestrian, and bicycle counts; travel time and delay studies; queue and spot speed analysis; sight distance reviews; and no-passing zone evaluations. Work is executed through Task Work Orders in compliance with FDOT's MUTS and FDM standards. HBC ensures quality through rigorous QA/QC, site inspections, and data validation, delivering reliable results that strengthen FDOT's statewide traffic operations programs.

Raised Intersection at NW 8 Terrace and NW 15 Ave | City of Miami

HBC is providing design and engineering services for the construction of a raised intersection at NW 8th Terrace and NW 15th Avenue to improve pedestrian safety, reduce vehicular speeds, and enhance multimodal connectivity. The project includes full preparation of construction documents encompassing roadway, drainage, signing, and pavement marking plans, supported by topographic surveying and geotechnical analysis. Scope elements include roadway reconstruction within intersection limits, concrete transition approaches, and milling and resurfacing beyond approach areas. Additional features include decorative concrete paver crosswalks, drainage adjustments, and new structures, all designed and permitted in compliance with City of Miami, FDOT, and MUTCD standards.

Continuing Professional Services | City of Aventura

KCI is providing on-call landscape architecture and surveying services through an ongoing contract supporting municipal landscape design review and compliance efforts. The team conducts detailed plan reviews to ensure projects meet city standards, regulatory requirements, and design quality objectives. Services emphasize achieving aesthetic, functional, and sustainable outcomes consistent with municipal codes and long-term maintenance goals. KCI's multidisciplinary approach integrates landscape architecture expertise with precise surveying to verify site conditions, coordinate across departments, and support efficient approvals, reinforcing the city's commitment to high-quality, resilient, and context-sensitive public realm design

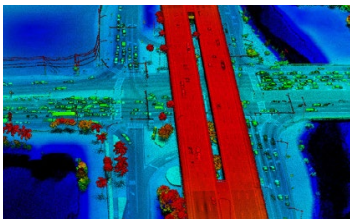


Continuing Contract for General Environmental Engineering | City of Fort Lauderdale

RES provided the City of Fort Lauderdale with comprehensive environmental engineering services through an ongoing support contract spanning multiple projects. The scope included planning, permitting, and restoration activities addressing water quality, sediment impacts, and ecological preservation. Key projects included the Himmarshee Canal Assessment and Tarpon River Restoration, which involved sediment sampling, benthic and hydrographic surveys, environmental monitoring, and coordination with FDEP and USACE following force main breaks. RES also supported the Bonnet House Greenway, minimizing environmental impacts through design alternatives; the Isle of Palms Seawall Replacement, addressing sea-level rise adaptation; and Fort Lauderdale Executive Airport endangered species relocation efforts. These initiatives strengthened the City's environmental resilience, regulatory compliance, and restoration management capacity.

City of Boca Fire Support Building | Palm Beach County

Pacifica Engineering Services provided geotechnical engineering support for the City of Boca Fire Support Building (Building #12), a new Fire Department facility with associated utility installations. The firm conducted one Standard Penetration Test (SPT) boring to 40 feet for the building foundation and two additional SPT borings to 10 feet for directional utility drilling. Deliverables included a comprehensive geotechnical report outlining shallow foundation recommendations, anticipated settlement, groundwater management strategies, and site preparation guidelines. These findings informed the structural design and construction planning, ensuring stability, constructability, and long-term performance of the new municipal support facility.



SR 7/US 441 Transit Corridor Improvements Task 1 | Florida Department of Transportation (FDOT) District 4

HBC provided professional engineering services for the SR 7/US 441 Multimodal Corridor Improvements project, a major FDOT District 4 and Broward MPO initiative to enhance safety, mobility, and user experience along approximately 16 miles of SR 7/US 441 and SR 858/Hallandale Beach Boulevard. The project focused on improving conditions for transit riders, bicyclists, and pedestrians while supporting transit-oriented development. HBC's responsibilities included roadway and drainage design, signing and pavement marking, lighting and signal upgrades, sidewalk and bike lane enhancements, utility coordination, and permitting. Additional work incorporated landscape and streetscape improvements to elevate corridor aesthetics, functionality, and multimodal connectivity within a high-demand transit corridor.

South Corridor Transit Oriented Development (TOD) Master Plan | Miami-Dade County Dept of Transportation and Public Works

The South Corridor Transit Oriented Development (TOD) Master Plan advanced multimodal connectivity along a 20-mile corridor in Miami-Dade County by promoting pedestrian, bicycle, and transit integration. HBC provided technical expertise in infrastructure assessment, connectivity analysis, and safety planning, evaluating facilities within a one-mile walk and bike shed of proposed stations. Using ArcGIS-based tools, HBC conducted field reviews, identified network gaps, and analyzed crash data to recommend safety improvements. Coordination with the Miami-Dade TPO and municipalities ensured alignment with regional initiatives. The plan delivers a data-driven framework for transit-oriented growth, enhancing first/last-mile connections, accessibility, and sustainable mobility across the corridor.

Topographic Survey for SR 838 from Turnpike to I-95 Overpass | Broward County

GPI Geospatial performed a 3D topographic survey for a 4.38-mile segment of SR 838 (Sunrise Boulevard) between the Florida Turnpike and I-95 in Broward County, Florida. The team established horizontal and vertical control in compliance with FDOT standards, defined roadway alignment and right-of-way limits, and set 54 secondary control points for aerial LiDAR calibration. Using a fixed-wing aircraft equipped with LiDAR sensors and a mapping camera, GPI collected aerial data and imagery to generate a detailed point cloud. Field and aerial data were integrated to produce final 3D survey drawings, which were reviewed, signed, and sealed by a licensed Florida Professional Surveyor and Mapper.

3D Design Survey for Oakland Park Blvd. from I-95 to A1A | Broward County

GPI Geospatial, Inc. completed a comprehensive 3D survey for a Broward County transportation corridor, integrating advanced geospatial technologies to support FDOT District 4 requirements. The scope included establishing primary and secondary control, performing full right-of-way 3D mapping using terrestrial LiDAR for hard surfaces, and conducting detailed drainage surveys. Historical baselines and right-of-way lines were recovered and incorporated into final deliverables. GPI provided a complete SURVRD package containing 3D models, survey baselines, and right-of-way data, along with all supporting files for FDOT verification. The project was delivered on schedule and within budget, ensuring precise, reliable survey data for design and construction coordination.

Riviera Beach Water Treatment Plant (WTP) Design-Build Project Phase 1 | City of Riviera Beach

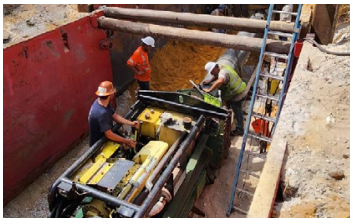
HBC Engineering Company served as a key partner in the progressive design-build delivery of the City of Riviera Beach's Advanced Water Treatment Plant at the Avenue L parcel. Phase 1 encompassed comprehensive design and engineering for a 12.0 MGD advanced water treatment facility, expandable to 16.0 MGD, with supporting site and infrastructure improvements. The scope included treatment and storage facilities, groundwater supply wells, and 18,000 LF of transmission mains supported by hydraulic modeling. HBC's responsibilities also covered stormwater management, site grading, permitting, and regulatory compliance. Through expert civil design and project management, HBC advanced the City's capacity, efficiency, and long-term water reliability goals.

Design-Build Services for the Reconstruction of NW 84th Ave | Miami-Dade County Dept of Transportation and Public Works

HBC serves as the Engineer of Record for a roadway expansion project converting a 1-mile, 2-lane corridor into a 4-lane section with a Two-Way Left-Turn Lane (TWLTL). The project includes full roadway reconstruction, new typical sections, refined horizontal and vertical geometry, and a closed drainage conveyance system connecting to existing outfalls and stormwater facilities. Improvements feature RCP culvert replacements, new stormwater management areas, sidewalks, curb and gutter, updated signage and signalization, and coordinated utility relocations. HBC's scope encompasses permitting, geotechnical investigations, and community-sensitive design, ensuring enhanced safety, multimodal access, and environmental compliance throughout construction.

Buildings Report for Capital Repair Plans | Miami-Dade County Water and Sewer Dept (MDC-WASD)

HBC led the MDC-WASD Buildings Report for Capital Repair Plans Project, performing detailed inspections of structures at the Alexander Orr and Hialeah Water Treatment Plants. The effort covered process areas such as sludge tanks, clarifiers, aeration basins, pump rooms, chemical storage facilities, and supporting structures. HBC developed standardized templates and managed a team of engineers to assess structural and electrical conditions, review as-builts, and prepare 82 comprehensive inspection reports. Deliverables included photographic documentation, repair recommendations, and cost estimates. The project ensured compliance with BCC Resolution No. 229-22 and provided MDC-WASD with reliable data to prioritize capital repairs and rehabilitation planning over a five-year period.



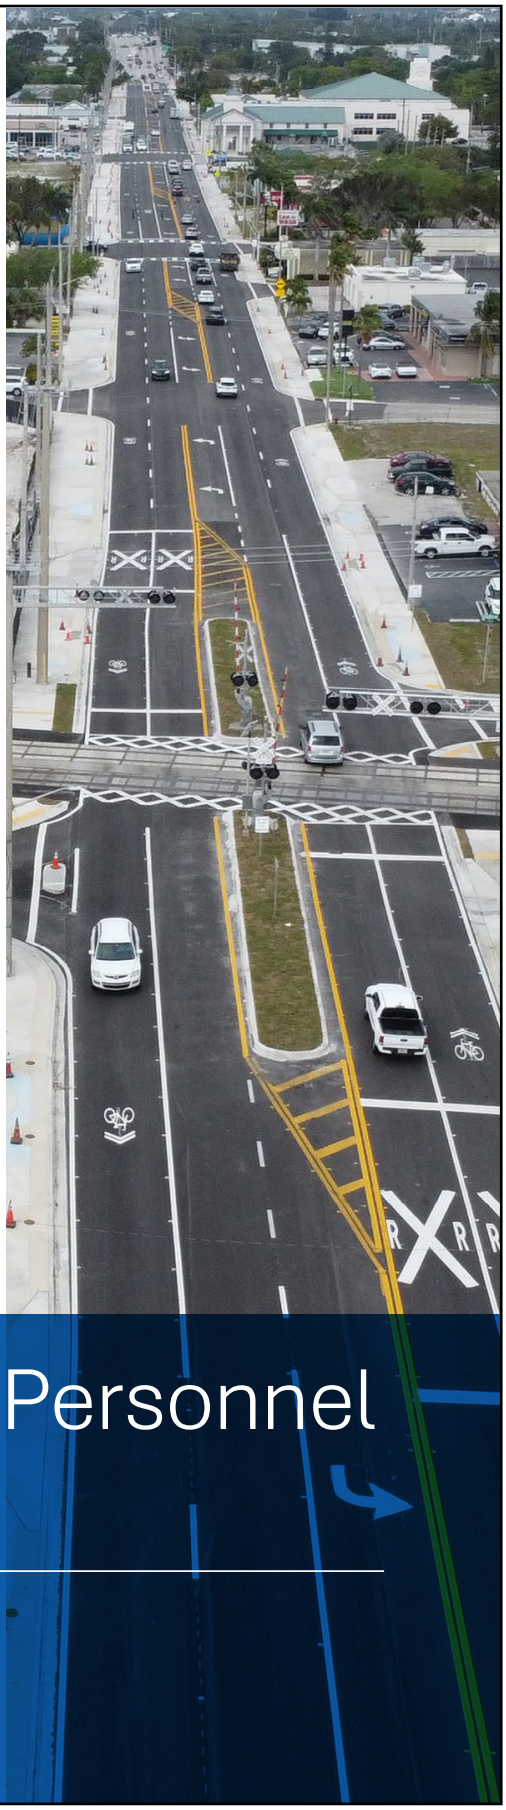
Multiple Parks - 40 Years Recertifications | Miami Dade County Parks

HBC performed visual inspections and structural assessments for multiple Miami-Dade County park facilities, including AB Barnes Park, Country Club of Miami, and Crandon Park. The scope involved evaluating building conditions, documenting deficiencies, and preparing detailed reports addressing both structural and electrical components in accordance with County requirements. HBC's reports included photographs, written evaluations, and prioritized repair recommendations necessary to achieve 40-year recertification compliance. Following completion of identified repairs, HBC prepared and submitted signed and sealed Structural and Electrical Recertification Reports consistent with Miami-Dade County Recertification Section standards, ensuring public safety and extending the service life of these recreational facilities.

CEI Services for the Sanitary Force Main Furnish and Install (F&I) Project - Phase III | Miami-Dade County Water and Sewer Dept (MDC-WASD)

HBC provided Construction Engineering and Inspection (CEI) services for the installation of over 11,000 linear feet of sanitary sewer force mains along West, North, and East Country Club Drive, from William Lehman Causeway to Yacht Club Way in the City of Aventura. The project included pipe sizes ranging from 4 to 20 inches in diameter. HBC managed daily inspection activities, ensuring compliance with MDC-WASD standards and specifications. Responsibilities included reviewing shop drawings, RFIs, and pay applications; conducting coordination meetings; maintaining detailed project records; and managing MOT and SWPPP documentation. HBC also oversaw design modifications, including implementation of a redundant backup sewer system for system reliability.

CEI Services for FDEP Grant Funded 12" Reclaimed Water Main 2-Mile Expansion for Area 10 | City of Delray Beach



HBC provided comprehensive Construction Engineering and Inspection (CEI) services for a multiphased water main improvement project in the City of Delray Beach, funded by a Florida Department of Environmental Protection (FDEP) grant. The project involved installing over 7,500 linear feet of 12-inch and 6-inch HDPE water main using Horizontal Directional Drilling (HDD) and open-cut methods, along with sidewalk, driveway, and pavement reconstruction. HBC's CEI team, led by Christopher Soto, managed daily inspections, utility coordination, and contractor compliance, including critical oversight for installation beneath active FEC Railway tracks. Through proactive management, HBC maintained quality, mitigated conflicts, and delivered the project under budget despite schedule challenges.

CEI Services for Roadway, Sidewalk, & Pedestrian Lighting Improvements Project (LAP) at Cherry Road from Military Trail to Quail Drive |

Palm Beach County

HBC is providing Construction Engineering and Inspection (CEI) services for the Cherry Road Complete Streets Improvements project in Palm Beach County under a task work order contract. The project includes constructing new 8-foot sidewalks on the north side and 6-foot sidewalks on the south side of Cherry Road between N. Military Trail and Quail Road, along with milling, resurfacing, widening, and updated signing and pavement markings. Pedestrian lighting and landscaping are also incorporated to enhance safety and aesthetics. HBC's CEI team manages inspections, progress meetings, quantity verification, documentation, and funding compliance, ensuring quality, safety, and timely reimbursement under federal and state guidelines.

3. Experience of Key Personnel and Project Team

HBC

PROJECT TEAM QUALIFICATIONS

HBC Engineering Company (HBC) is a multidisciplinary Florida firm with more than 80 professionals providing integrated planning, design, and construction support services to public agencies. For the Town of Pembroke Park, HBC offers a single-source team with in-house civil, structural, electrical, transportation, stormwater, utility coordination, GIS, and construction administration capabilities, allowing seamless management from concept through completion. Led by Adebayo Coker, PE, with technical oversight by Edgar Diaz, MS, PE, PSM, project management by Hernan Lugo, MS, PE, CFM, and construction-phase coordination by Christopher Soto, PE, RSO, the team ensures disciplined delivery, regulatory compliance, and consistent communication. HBC is supported by specialized subconsultants in landscape architecture, geotechnical engineering, materials testing, surveying, and environmental permitting selected for their strong qualifications, local experience, and proven performance on municipal continuing contracts.

Staff Name	Role
HBC Engineering Company	Contract Management, QA/QC, Civil, Structural, Utility Coordination, Transportation Engineering, Permitting, Planning, Cost Estimating, Public Involvement, Drainage and Stormwater, Grant Writing, and Construction Administration
V3 Architectural Group, Inc. & JSA Group, Inc.	Architecture
KCI Technologies, Inc.	Landscape Architecture
Tierra South Florida, Inc & Pacifica Engineering Services, LLC	Geotechnical
GPI Geospatial, Inc. & Manuel G. Vera & Associates, Inc.	Surveying & Mapping
Resource Environmental Solutions, LLC (RES) & Pacifica Engineering Services, LLC	Environmental Services
EV Services, Inc	Public Involvement & Communications & Grant Writing & Support
Diaz-Murphy and Associates CES, LLC	Materials Testing

This structure provides the Town with a single, fully accountable point of contact supported by qualified professionals across all required disciplines. Each proposed team member offers at least five years of directly relevant municipal experience in design, permitting, and construction administration, ensuring knowledgeable execution of the scope. **Resumes and credentials included in Appendix A** confirm the team's technical qualifications and capacity to perform the work outlined in the solicitation.

SUBCONSULTANTS' QUALIFICATIONS

HBC Engineering Company (HBC) has assembled a multidisciplinary team with strong regional experience to support the Town of Pembroke Park under RFQ 25-02. The team includes specialized subconsultants in materials testing, surveying and SUE, cost estimating, landscape architecture, structural engineering, geotechnical services, environmental permitting, and architectural design. Each firm brings extensive experience working with Florida municipalities, counties, and state agencies, ensuring comprehensive coverage across civil, structural, electrical, transportation, drainage, geotechnical, environmental, surveying, and architectural disciplines. With offices throughout South Florida, HBC and its partners provide rapid response, familiarity with Town standards, and proven capability to support routine, emergency, and hurricane-related assignments while delivering cost-effective, resilient, and fully compliant solutions aligned with the Town's continuing contract framework.

Diaz-Murphy and Associates CES (DMA) is a certified SBE, WMBE, and DBE firm specializing in construction materials testing, inspection, and quality control services across Florida. Operating FDOT and CMEC-certified laboratories in Miami and Key West, DMA provides verification, CQC, and IA services for FDOT Districts 4 and 6, Florida's Turnpike Enterprise, and multiple municipalities, including major projects such as I-595, I-75, and US-27. The firm consistently delivers responsive, reliable, and fully compliant testing solutions aligned with Palm Beach County's quality assurance standards.

GPI Geospatial, Inc. (GPI), a subsidiary of Greenman-Pedersen, Inc., provides surveying, mapping, and geospatial data services with over 50 years of experience supporting infrastructure programs across Florida. Licensed in 34 states and headquartered in Orlando with offices in Miami and Tampa, GPI specializes in LiDAR, photogrammetry, topographic mapping, hydrographic surveying, and subsurface utility mapping. Their team of licensed professionals delivers high-accuracy GIS-integrated data that meets FDOT, FTE, and municipal standards for transportation and development projects.

RES Florida Consulting LLC d/b/a E Sciences (RES) a Fort Lauderdale-based subsidiary of Resource Environmental Solutions, provides environmental engineering and ecological consulting services statewide. Established in 2000, RES offers expertise in wetland delineation, habitat assessment, water quality management, and remediation, supported by a multidisciplinary team of engineers and scientists. With ongoing FDOT Districtwide Mitigation and Environmental Services contracts, RES applies science-driven design and regulatory compliance to support sustainable infrastructure for Palm Beach County.

JSA Group, Inc. is a Miami-based architecture and interior design firm certified as an SBE and DBE, with Miami-Dade County Technical Certifications in Architecture, ADA Title II Consulting, and Interior Design. Established in 2001, JSA provides creative, compliant, and cost-effective design solutions for educational, healthcare, and institutional facilities, including continuing contracts with Miami-Dade County Public Schools and Citrus Health Network. The firm delivers responsive, code-compliant architectural services for Palm Beach County's facility improvement programs.

KCI Technologies, Inc. is a 100% employee-owned multidisciplinary engineering firm ranked among ENR's Top 100 Design Firms, with over 2,400 professionals in 70 offices nationwide, including Fort Lauderdale. KCI provides integrated services in civil, structural, environmental, MEP, and construction management, supporting FDOT, FTE, and municipal infrastructure programs. Their Florida operations emphasize resiliency, sustainability, and regulatory compliance, offering Palm Beach County comprehensive engineering support under the continuing contract.

Manuel G. Vera & Associates, Inc. (MGV) is a certified FDOT DBE firm established in 1977, specializing in surveying, mapping, subsurface utility engineering (SUE), and utility coordination. Headquartered in Miami with offices in Jupiter and Orlando, MGV manages five FDOT districtwide contracts and serves counties and agencies statewide. With a staff of over 80 professionals and 19 survey/SUE crews, MGV delivers accurate, data-driven solutions that support design, construction, and asset management for Palm Beach County.

Pacifica Engineering Services, LLC (PACIFICA) is a certified MBE, DBE, and SBE firm offering geotechnical engineering, construction materials testing, environmental consulting, and inspection services across Florida. With offices in Delray Beach, Doral, and Orlando, PACIFICA operates FDOT- and CMEC-certified laboratories and employs licensed engineers and certified inspectors. The firm's portfolio includes the PBIA Airfield Improvements, Florida's Turnpike Widening, and STA-1W Pump Stations, providing reliable, cost-effective technical support for Palm Beach County's continuing services.

Tierra South Florida, Inc. (TSF) is a DBE/SBE-certified geotechnical engineering and materials testing firm headquartered in West Palm Beach with offices in Miami Lakes, Tampa, and Orlando. TSFGeo provides subsurface investigations, laboratory testing, and construction inspections supported by FDOT- and CMEC-certified labs and a fleet of 11 drill rigs. With over 38 years of experience, TSFGeo delivers geotechnical, foundation, and pavement design services ensuring safety, accuracy, and compliance for Palm Beach County infrastructure projects.

V3 Architectural Group, Inc. (V3) is a South Florida-based architecture and interior design firm offering comprehensive services in planning, design, construction administration, and project management. The firm has extensive experience delivering continuing service contracts for municipal and institutional facilities, ensuring full compliance with FBC, ADA, and life-safety codes. V3A's multidisciplinary approach emphasizes functional, sustainable, and cost-efficient solutions for Palm Beach County's architectural projects.

EV Services, Inc. (EVSI) is a certified MBE, DBE, and SBE firm established in 2006, specializing in public involvement, government relations, and strategic communications for public infrastructure programs across Florida. With extensive experience supporting FDOT districts, counties, and municipalities, EVSI provides outreach coordination, stakeholder engagement, and grant assistance to ensure transparent, inclusive, and compliant project communication. For this contract, EVSI supports HBC by delivering community relations, public information, and engagement services that strengthen collaboration between the Town of Pembroke Park, its residents, and project stakeholders.

KEY STAFFING FOR THIS PROJECT

HBC's proposed team is composed of seasoned professionals with extensive experience providing architectural, engineering, and construction support services for municipal and county clients across South Florida. Each key staff member brings specialized technical expertise aligned with the Town's scope of work, including civil, structural, transportation, environmental, mechanical, electrical, and architectural disciplines. The team's collective experience under continuing services contracts ensures a streamlined approach to task management, permitting, and coordination with regulatory agencies. Together, these professionals represent the depth, responsiveness, and technical excellence necessary to deliver high-quality results for the Town of Pembroke Park.

HBC Engineering Company

Adebayo Coker, PE | Principal-In-Charge has over 33 years of experience in transportation engineering, project development, and design management across Florida. He has successfully led multidisciplinary teams for FDOT, Miami-Dade County, Palm Beach County, and other major clients, overseeing roadway, transit, and multimodal infrastructure projects from planning through construction. His expertise spans PD&E studies, roadway design, traffic operations, and CEI oversight, supported by his strong background in QA/QC and regulatory coordination. Adebayo's leadership ensures the integration of sustainable and cost-effective solutions that enhance mobility, safety, and resilience. A licensed Professional Engineer in Florida and FDOT-certified QA/QC Manager, he provides high-level oversight and technical direction to ensure the Town of Pembroke Park's continuing contracts meet all professional and performance standards.

Edgar Diaz, MS, PE, PSM | QA/QC Manager has 38 years of experience in civil and utility infrastructure design, construction management, and project controls. He has managed multidisciplinary teams for FDOT, Palm Beach County, and Miami-Dade County, ensuring technical accuracy and regulatory compliance across large-scale public works and water/wastewater programs. His background includes directing quality reviews, risk mitigation, and performance tracking for projects under the USEPA Consent Decree and Ocean Outfall Legislation programs. As a licensed Professional Engineer in Florida and Puerto Rico and a Professional Surveyor and Mapper in Florida, Edgar applies rigorous QA/QC processes that uphold design integrity and schedule adherence. His leadership ensures each project delivered under the Town of Pembroke Park's RFQ 25-02 meets the highest standards of quality, safety, and accountability.

Hernan Lugo, MS, PE, CFM | Project Manager brings 27 years of experience in civil engineering, specializing in roadway, drainage, and stormwater infrastructure for transportation and municipal projects across Florida. As Project Manager, he leads multidisciplinary teams through design, permitting, and construction coordination, ensuring compliance with FDOT, FDEP, and SFWMD standards. His portfolio includes managing the SR-817/University Drive Improvements, Boca Rio Road Widening, and NW 25th Street Reconstruction, where he emphasized constructability, cost-efficiency, and

resiliency. Licensed in Florida and Texas and certified as a Floodplain Manager and Building Contractor, Hernan delivers sustainable, technically sound infrastructure aligned with the Town of Pembroke Park's objectives under RFQ 25-02.

Christopher Soto, PE, RSO | Construction Manager | Senior Project Engineer / FDOT LAP Program Specialist | Constructability Reviewer has 13 years of experience in Construction Engineering and Inspection (CEI) for roadway, bridge, and utility infrastructure projects across Florida. He oversees construction activities, manages inspection teams, and ensures compliance with FDOT, LAP, and municipal standards for safety, quality, and schedule adherence. Christopher has led CEI assignments for FDOT Districts 4, 5, and 6, Palm Beach County, and the City of Delray Beach, including the Half Mile Road, Cherry Road, and 12" Reclaimed Water Main projects. His expertise spans constructability review, MOT compliance, permitting, and stakeholder coordination. A licensed Professional Engineer and FDOT Advanced MOT–certified Radiation Safety Officer, Christopher applies a disciplined, hands-on management approach that ensures efficient, high-quality project delivery under the Town of Pembroke Park's RFQ 25-02 continuing services program.

Gonzalo Barrera, PE | Civil Engineering has over 7 years of experience specializing in roadway, signalization, and drainage design for FDOT and municipal infrastructure projects. His expertise includes 3D roadway modeling, signing and pavement marking, and Temporary Traffic Control (TTC) plan development, ensuring compliance with FDOT, MUTCD, and ADA standards. Gonzalo has served as Project Engineer and Deputy PM for projects such as the SR-7/US-441 Transit Corridor Improvements, SR-817/University Drive Widening, and NE 2nd Avenue Reconstruction Design-Build. Proficient in AutoCAD, MicroStation, and OpenRoads Designer, he combines technical precision with innovative design to improve multimodal connectivity and safety.

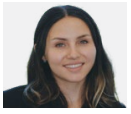
Sreelatha Nandivada, MS, PE | Structural Engineering has 22 years of experience in bridge design, structural analysis, and load rating for transportation and coastal infrastructure projects. She has led structural design and assessments for bridges, seawalls, and retaining walls, applying AASHTO, ASCE, and FDOT standards to ensure durability and safety. Her experience includes the Hollywood Seminole Indian Reservation Pedestrian Bridge for STOFI, PBC Water Treatment Plant No. 2 Expansion, and multiple FDOT and NCDOT bridge programs. Proficient in STAAD.Pro, LEAP Bridge, RISA, and AASHTOWare BrR, Sreelatha integrates advanced modeling with field-driven insight to deliver resilient, code-compliant solutions. Licensed in multiple states, including Florida, she brings specialized expertise in coastal resilience and structural integrity.

Orlando Penate, PE, IMSA III | Electrical Engineering has over 20 years of experience in lighting design, power distribution, and electrical infrastructure for transportation and municipal projects across Florida. He has served as Engineer of Record for roadway and facility lighting, wastewater infrastructure, and Intelligent Transportation Systems (ITS), ensuring full compliance with FDOT, FPL, and NEC standards. His portfolio includes the SR-826/Snapper Creek Expressway LED Lighting Conversion for GMX, the SR-710/Blue Heron Boulevard Lighting Improvements, and the Riverwalk North Seawall Replacement Project for the City of Fort Lauderdale. A licensed Professional Engineer and Level II Infrared Thermographer, Orlando's technical leadership integrates energy efficiency, safety, and code compliance.

Moatz Saad, PhD, PE, PTOE, IMSA II | Transportation/Traffic Engineering has 13 years of experience specializing in traffic operations, safety analysis, and multimodal corridor planning. He leads the development of traffic simulation models, impact studies, and safety evaluations for FDOT, GMX, and multiple municipalities, integrating advanced tools such as Synchro, VISSIM, and GIS to optimize system performance. His project experience includes managing the SR-7/US-441 Transit Corridor Improvements, the SR-25/US-27 Okeechobee Road Traffic Analysis, and the Advanced Traffic Management System (ATMS) Implementation for Miami-Dade County. A licensed Professional Engineer and Professional Traffic Operations Engineer, Dr. Saad combines research-based insight with practical field experience to enhance safety, mobility, and reliability across urban transportation networks.

Eugene Hunter, IMSA I | Construction Administration has over 35 years of experience in Construction Engineering and Inspection (CEI) for roadway, bridge, and municipal infrastructure projects across Florida. He specializes in construction oversight, contract documentation, and field coordination for FDOT and Local Agency Program (LAP) projects, ensuring strict adherence to specifications, quality standards, and safety compliance. Gene's experience spans bridge rehabilitation, drainage, signalization, lighting, and stormwater improvements, including key projects such as the Seminole Boulevard Multi-Use Trail and Pedestrian Lighting Project and the SR-817/University Drive Widening. Certified in CTQP, MOT, and Stormwater Management, he excels in managing field inspections, pay items, and contractor coordination to maintain schedule integrity and cost control.

Rodolfo Caceres, PE, IMSA I | Contract Support Specialist/Resident Compliance Specialist has 21 years of experience in Construction Engineering and Inspection (CEI) services for transportation and municipal infrastructure. He specializes in contract administration, field verification, pay item tracking, and compliance oversight for FDOT, Florida's Turnpike Enterprise, and Broward County projects. His work includes managing Requests for Information (RFIs), change orders, and payment applications while coordinating between contractors, inspectors, and project managers to ensure adherence to contract documents and schedules. Rodolfo's project experience includes the Systemwide Queue Warning System on SR-91 & SR-429 and the CEI Contract for Boynton Beach Boulevard Improvements, where he led documentation control, progress reporting, and safety compliance.



Scott Smith, IMSA I | Senior Inspector has over 28 years of Construction Engineering and Inspection (CEI) experience specializing in bridge rehabilitation, roadway improvements, and structural inspection for FDOT and municipal clients. He provides on-site oversight for construction, testing, and documentation, ensuring compliance with project specifications, safety regulations, and QA/QC standards. His portfolio includes the Donald Ross Road Bascule Bridge Replacement, Sheridan Street Bridge Rehabilitation, and Blue Heron Boulevard Bridge projects. Scott's certifications include CTQP Asphalt Levels I & II, Earthwork Levels I & II, Drilled Shaft Inspection, and FDOT Advanced MOT, complemented by FEMA and FDEP stormwater and IMSA signal inspection credentials.

Francisco Rodriguez, IMSA I | Inspector has over 27 years of experience in Construction Engineering and Inspection (CEI), specializing in roadway, bridge, and Intelligent Transportation System (ITS) infrastructure. He has performed inspections and documentation for major FDOT and Turnpike projects, ensuring compliance with design specifications, materials testing standards, and MOT requirements. His field expertise includes overseeing CCTV, MVDS, DMS, and fiber optic installations under districtwide ITS and roadway improvement contracts for FDOT Districts 1 and 4, Florida's Turnpike Enterprise, and Palm Beach County. Certified in FDOT CTQP Drilled Shaft, Advanced MOT, and multiple ITS CEI specialties, Francisco brings technical rigor and proactive field coordination to each assignment.

Woudeline Lucdor | Data Collection has 6 years of experience in traffic data collection, transportation engineering, and environmental analysis. She supports corridor and intersection evaluations through traffic counts, speed studies, and geometric data collection for FDOT and Miami-Dade County projects. Her work includes the FDOT District 4 Districtwide Traffic Operations Data Collection, SR-25/US-27 Okeechobee Road Traffic Analysis, and MDC-DTPW Northeast Corridor Transit Study, where she assisted in gathering multimodal data for mobility and capacity assessments.

Julia Beliz, EI | GIS has over 3 years of experience supporting transportation, water, and wastewater infrastructure projects through advanced geospatial analysis and data integration. She develops and manages GIS models for infrastructure planning, sediment control, and capacity assessment, integrating environmental and engineering datasets to enhance project decision-making. Her work includes GIS-based modeling for the Carraízo Sediment Control Project, site assessments for the City of Riviera Beach Water Treatment Plant, and geospatial coordination for Miami-Dade County Water and Sewer Department's Capital Improvement Program. Proficient in ArcGIS Pro, Python, and AutoCAD, Julia translates complex spatial data into actionable insights that support permitting, environmental compliance, and infrastructure design.

Sonny Abia, PhD, PE | Utility Coordination has over 35 years of experience managing complex transportation and municipal projects across Florida. He has led coordination efforts with multiple Utility Agency Owners (UAOs) and agencies for major FDOT and Miami-Dade County projects, including the SR-817/University Drive Improvements, NE 2nd Avenue Reconstruction Design-Build, and SR-7/US-441 Transit Corridor Improvements. His expertise includes conflict resolution, development of Final Utility Certification packages, and multi-agency permitting under FDOT and FHWA standards. A licensed Professional Engineer and TTC Advanced Certified professional, Dr. Abia combines technical precision, regulatory insight, and field coordination to ensure compliant, constructible, and cost-efficient utility solutions.

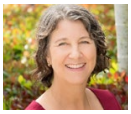
Teodoro Tefel, PE | Cost Estimates/Schedule and Project Control has over 38 years of experience in roadway design, transportation planning, and infrastructure management. His expertise includes developing preliminary engineering reports, feasibility assessments, and construction cost estimates for FDOT and municipal projects, ensuring accuracy, constructability, and budget alignment. Teodoro has managed planning and design efforts for complex projects such as the SR-25/US-27 Okeechobee Road Reconstruction, SR-826/Palmetto Expressway Improvements, and Boca Rio Road Widening. A licensed Professional Engineer in Florida with FDOT Advanced MOT certification, he integrates technical precision, schedule control, and fiscal accountability across all project phases.

Melannie Gomez | Public Involvement has 3 years of experience leading community engagement, stakeholder coordination, and outreach communication for municipal and transportation projects across South Florida. She has supported major initiatives for the City of Hollywood, City of Fort Lauderdale, and Miami-Dade County DTPW, facilitating public meetings, developing outreach materials, and managing multilingual communication strategies to enhance project transparency and participation. Her recent work includes the Johnson Street Complete Streets Study, Riverwalk North Seawall Replacement, and NW 84th Avenue Reconstruction projects, where she coordinated public notices and interactive engagement tools to gather community input.

Key Subconsultants

Alejandro Diaz | Material Testing (DMA) with 15 years of experience in construction materials testing, verification, and quality assurance for transportation and infrastructure projects across Florida. He specializes in managing materials laboratories and supervising verification testing for concrete, asphalt, and earthwork in compliance with FDOT and FTE standards. Alejandro has overseen districtwide materials programs for FDOT Districts 4 and 6, providing QA/QC support, MAC reporting, and coordination with CEI teams to ensure all placed materials meet required standards. His portfolio includes laboratory management for the Golden Glades Multimodal Transportation Facility, MDX Expressway projects, and FTE districtwide testing programs. Known for his precision and leadership in material certification and compliance, Alejandro ensures all testing and documentation align with contract requirements and state specifications in support of the Town of Pembroke Park's RFQ 25-02 continuing services program

Esther Monzon-Aguirre | Planning and Community Development | Grant Writing and Support (EV) Esther has over 33 years of experience in strategic communications, public involvement, and legislative advocacy for major infrastructure and development programs across South Florida. As President of EV Services, Inc., she has led public outreach and stakeholder coordination for complex, high-profile projects including the WASD Consent Decree Program, the Miami International Airport Park 6 Parking Garage, and the Baywalk Pedestrian Bridge over SR-395. Her expertise spans strategic planning, community engagement, grant writing, and consensus-building among public agencies, elected officials, and the community.



Julio Sanchez, RA | Building Inspections, Plans Review and Permitting (JSA) with over 48 years of experience in architecture, interior design, and building code compliance across Florida. He specializes in building inspections, plan review, and permitting for commercial, institutional, and public facilities, ensuring full adherence to the Florida Building Code, FFPC, UFAS, ADAAG, and local regulations. Julio has managed architectural design and construction administration for major clients such as Miami-Dade County Public Schools, the City of Pembroke Pines, and Miami-Dade Transit. His extensive background includes ADA Title II consulting and barrier removal projects, with expertise spanning healthcare, hospitality, and educational facilities.

Todd Mohlet, RLA, ISA, IA | Landscape Architecture (KCI) with over 30 years of experience in landscape, irrigation, and urban design for public and private sector projects throughout Florida. His expertise includes corridor beautification, park master planning, and sustainable irrigation systems, combining water-efficient technologies with resilient plant design. Todd has served as Senior Landscape Architect for projects such as the City of Dania Beach Corridor Landscape Master Plan, SR-818/Griffin Road Medians, and the Lyons Road Corridor Enhancement for the City of Coconut Creek. Licensed in Florida, Georgia, and South Carolina, and certified as an Irrigation Designer, Contractor, and Arborist, he brings deep knowledge of site planning, construction oversight, and ecological stewardship.

Mark R. Sowers, PSM| Surveying & Mapping (MGV) with 37 years of experience leading survey, mapping, and subsurface utility engineering (SUE) services across Florida. As Survey Director at Manuel G. Vera & Associates, Inc., he manages field operations, QA/QC reviews, and coordination with FDOT, municipalities, and private sector clients to ensure accuracy and compliance with regulatory standards. His background includes eight years with FDOT District 4, where he served as District Surveyor and chaired the Survey Technical Advisory Committee, advancing statewide standards for control networks and data accuracy. Mark's recent projects include FDOT District 4 Districtwide Surveying and Mapping, the I-95/45th Street Diverging Diamond Interchange, and Pembroke Road Mobile LiDAR Services. A licensed Professional Surveyor and Mapper in Florida and active member of the Florida Surveying & Mapping Society, he brings technical precision and management expertise to support the Town of Pembroke Park's RFQ 25-02 objectives for reliable, high-quality geospatial services.

Nadia G. Locke, PE, LEED AP| Environmental Engineering (RES) with over 37 years of experience leading environmental planning, permitting, and mitigation projects across Florida. She specializes in environmental compliance, stormwater design, wetland and wildlife studies, and climate resilience planning for municipal and transportation clients. Nadia has managed environmental engineering contracts for the City of Fort Lauderdale, City of Miami Beach, and FDOT District 4, including the Districtwide Mitigation and Wildlife Services Program and multiple site assessment and remediation projects. A licensed Professional Engineer, LEED Accredited Professional, and FDEP-certified Stormwater and Erosion Control Instructor, she integrates sustainable practices and regulatory expertise to ensure environmental protection and infrastructure resilience.

Raj Krishnasamy, PE | Geotechnical Engineering (TSF) with 38 years of experience in geotechnical engineering, materials testing, and construction inspection across Florida. As President of Tierra South Florida (TSFGeo), he has overseen more than 7,500 public and private projects, providing technical direction and QA/QC oversight for geotechnical investigations, subsurface exploration, and foundation design. His experience includes managing continuing contracts for FDOT District 4, Broward County, and the Town of Pembroke Park, with notable projects such as the I-95/45th Street Diverging Diamond Interchange, Seneca Town Center Development, and Chaves Lake Park Improvements.

Jose A. Vidal, AIA, LEED AP | Architecture (V3) with over 32 years of experience in architecture, planning, and interior design for public and private sector projects across Florida. As President of V3 Architectural Group, he has delivered complex civic, transportation, mixed-use, and institutional facilities from concept through construction, including the Golden Glades Multimodal Transportation Facility, Dolphin Station Park-and-Ride, and Doral Government Center Improvements. Jose's expertise spans design-build and fast-tracked projects emphasizing constructability, ADA accessibility, and sustainability. A licensed architect and LEED Accredited Professional, he combines design excellence with technical precision to create durable, functional, and context-sensitive architecture.

INTEGRATION OF PRIME AND SUBCONSULTANTS

HBC has extensive experience managing integrated engineering and operations contracts, coordinating effectively with subconsultants to deliver complex infrastructure improvements across Florida. Over the past five years, our team has successfully executed multidisciplinary projects under continuing and task work order contracts, demonstrating clear alignment of roles, responsibilities, and authority to ensure quality, efficiency, and compliance.

HBC In association with

4. Relevant Completed Project Experience

HBC

RELEVANT COMPLETE PROJECT EXPERIENCE

HBC Engineering Company (HBC) and its multidisciplinary team possess extensive experience delivering the range of professional services identified in this solicitation. The following summaries present representative projects completed within the past five years that demonstrate HBC's technical qualifications, project management expertise, and successful performance across the architectural, engineering, and surveying disciplines for which we are submitting statements of qualification (Form 6.4). Each project was selected for its direct relevance to the Town of Pembroke Park's continuing contract scope—showcasing our capability in planning, design, permitting, and construction-phase coordination for public infrastructure improvements.

For each discipline, the projects summarized on the following pages include detailed information on client references, project descriptions, estimated and awarded contract values, design fees, and change orders. Collectively, these examples illustrate HBC's proven ability to deliver cost-effective, resilient, and fully compliant design and construction support services for municipal, county, and state agencies throughout South Florida.

See **Appendix B** for more project details

ARCHITECTURAL SERVICES

Brothers to the Rescue Restoration & Relocation | V3 Architectural Group, Inc.

Client Name & Contact Name	City of Hialeah Gardens | BCC Engineering | Oscar Oliva	Client Contact Telephone	(305) 670-2350
Client Address	6401 SW 87th Ave, Ste 200 Miami, FL 33173	Client Contact E-Mail Address	ooliva@bcceng.com
Description of Work	Restoration and relocation of the Brothers to the Rescue Monument, including architectural design, historic preservation, lighting, and ADA-compliant public access coordination with FDOT and the City of Hialeah Gardens.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$216 M	Amount of Initial Design Fees	$216 M

Golden Glades Multi-Modal Transportation Facility | V3 Architectural Group, Inc.

Client Name & Contact Name	FDOT | Lead Engineering Contractors | Fernando Sanchez	Client Contact Telephone	(305) 615-3272
Client Address	1109 S. Marion Ave. Lake City, FL 32025	Client Contact E-Mail Address	fsanchez@lead-ec.com
Description of Work	Architectural and interior design for the Golden Glades Multimodal Transportation Facility, including entrance monument, bus terminals, pedestrian circulation, bicycle paths, and public access enhancements.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$57 M	Amount of Initial Design Fees	$57 M

See **Appendix B** for more project details

CIVIL, STRUCTURAL, & MEP ENGINEERING SERVICES

Reconstruction of NE 2nd Ave from NE 20th Street to NE 36th Street | HBC Engineering Company

Client Name & Contact Name	Miami-Dade County Dept of Transportation and Public Works | Alejandro Sauleda, PE	Client Contact Telephone	(305) 375-4866
Client Address	701 NW 1st Ct, Ste 1700 Miami, FL 33136	Client Contact E-Mail Address	Alejandro.Sauleda@miamidade.gov
Description of Work	Comprehensive civil and structural design-build services for NE 2nd Avenue reconstruction, including roadway, drainage, utility, and signalization upgrades to enhance safety, mobility, and infrastructure resilience.		
Construction Estimate of Project Cost	$10M	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$11.5M	Amount of Initial Design Fees	$805K

Riverwalk North Seawall Replacement Project | HBC Engineering Company

Client Name & Contact Name	City of Fort Lauderdale | Ana Ziegler, EE/PM II	Client Contact Telephone	(954) 828-5817
Client Address	100 N Andrews Ave, Ft Lauderdale, FL 33301	Client Contact E-Mail Address	aziegler@fortlauderdale.gov
Description of Work	Structural design for Riverwalk North Seawall replacement, including new sheet pile wall, dock installations, utility relocations, electrical upgrades, and post-design construction support.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$386K	Amount of Initial Design Fees	$386K

TRANSPORTATION, TRAFFIC, & ROADWAY ENGINEERING SERVICES

Districtwide Traffic Operations Data Collection Contract | HBC Engineering Company

Client Name & Contact Name	Florida Dept of Transportation District 4 | Ysamary Vergara	Client Contact Telephone	(954) 777-4380
Client Address	3400 W Commercial Blvd, Ft Lauderdale, FL 33309	Client Contact E-Mail Address	Ysamary.Vergara@dot.sate.fl.us
Description of Work	Districtwide Traffic Operations Data Collection for FDOT D4, providing traffic engineering services including counts, speed studies, delay analysis, and QA/QC to support operational and safety improvements across regional multimodal corridors.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$1.5M	Amount of Initial Design Fees	N/A

Raised Intersection at NW 8 Terrace and NW 15 Ave | HBC Engineering Company

Client Name & Contact Name	City of Miami | Lidia Duardo, PE	Client Contact Telephone	(305) 416-1020
Client Address	444 SW 2nd Ave. Fl 4, Miami, FL 33130	Client Contact E-Mail Address	lduardo@miamigov.com
Description of Work	Design and engineering of a raised intersection for traffic calming, including roadway, drainage, signing, and pavement marking plans to improve safety and multimodal connectivity.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$70K	Amount of Initial Design Fees	$70K

See **Appendix B** for more project details

LANDSCAPE ARCHITECTURAL SERVICES

Continuing Landscape Architectural Services for City of Aventura | KCI Technologies, Inc.

Client Name & Contact Name	City of Aventura | Jake Ozyman	Client Contact Telephone	(305) 466-8970
Client Address	19200 W Country Club Drive Aventura, FL 33180	Client Contact E-Mail Address	jozyman@cityofaventura.com
Description of Work	Comprehensive on-call landscape architecture and surveying services, including plan reviews to ensure design excellence, regulatory compliance, and alignment with city landscape standards and construction cost estimates.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$50K	Amount of Initial Design Fees	$50K

ENVIRONMENTAL ENGINEERING SERVICES

Continuing Contract for General Environmental Engineering | RES Florida Consulting, LLC

Client Name & Contact Name	City of Fort Lauderdale | Todd Hiteshew	Client Contact Telephone	(954) 828-4357
Client Address	949 NW 38th Street Ft Lauderdale, FL 33309	Client Contact E-Mail Address	thiteshew@fortlauderdale.gov
Description of Work	Ongoing environmental engineering services for the City of Fort Lauderdale, including water quality assessments, sediment sampling, permitting, habitat surveys, contamination evaluations, NEPA documentation, and regulatory compliance support for restoration and infrastructure projects.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$959K	Amount of Initial Design Fees	N/A

City of Boca Fire Support Building | Pacifica Engineering Services, LLC

Client Name & Contact Name	KEITH and Associates, Inc. | Jorge Valle-Pellot, PE	Client Contact Telephone	(561) 469-0992
Client Address	301 E Atlantic Blvd, Pompano Bch, FL 33060	Client Contact E-Mail Address	jvalle@keithteam.com
Description of Work	Geotechnical engineering services including SPT borings, soil analysis, and reporting with foundation design recommendations, settlement evaluation, groundwater management, and site preparation guidance to support structural design and construction.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$11.5K	Amount of Initial Design Fees	N/A

PLANNING AND COMMUNITY DEVELOPMENT

SR 7/US 441 Transit Corridor Improvements Task 1 | HBC Engineering Company

Client Name & Contact Name	FDOT District 4 | Robert Lopes, PE	Client Contact Telephone	(954) 777-4425
Client Address	3400 W. Commercial Blvd. Ft. Lauderdale, FL 33309	Client Contact E-Mail Address	robert.lopes@dot.state.fl.us
Description of Work	Planning and engineering services supporting multimodal corridor improvements, including roadway, drainage, lighting, and streetscape enhancements to promote transit-oriented development, safety, connectivity, and economic growth along major urban corridors.		
Construction Estimate of Project Cost	$4.3M	No. of Change Orders | Construction No. of Change Orders | Design Contract	1 1
		Value of Change Orders | Project Value of Change Orders | Design	$5M $1M
Amount of Initial Contract Award	$4.3M	Amount of Initial Design Fees	$949K

See **Appendix B** for more project details

South Corridor Transit Oriented Development (TOD) Master Plan | HBC Engineering Company

Client Name & Contact Name	Miami-Dade County Dept of Transportation & Public Works | Elia Nunez	Client Contact Telephone	(305) 447-3504
Client Address	701 NW 1st Court, Ste 1700, Miami, FL 33136	Client Contact E-Mail Address	Elia.Nunez@aecom.com
Description of Work	Comprehensive planning services supporting multimodal connectivity and transit-oriented development through infrastructure assessments, safety analysis, GIS-based evaluations, and stakeholder coordination to enhance pedestrian, bicycle, and transit accessibility within urban corridors.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$110K	Amount of Initial Design Fees	$110K

SURVEYING AND MAPPING

Topographic Survey for Sunrise Blvd from Turnpike to I-95 Overpass | GPI Geospatial, Inc.

Client Name & Contact Name	CORE Engineering Group | Rebecca Lausier	Client Contact Telephone	(407) 421-1948
Client Address	100 East Pine St, Ste 110 Orlando, FL 32801	Client Contact E-Mail Address	rlausier@ourcoregroup.com
Description of Work	GPI Geospatial, Inc. provided comprehensive 3D topographic surveying services including field control, aerial lidar mapping, and data integration to produce FDOT-compliant survey deliverables reviewed and sealed by a licensed Professional Surveyor and Mapper.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$184K	Amount of Initial Design Fees	$184K

3D Design Survey for Oakland Park Blvd. from I-95 to A1A | GPI Geospatial, Inc.

Client Name & Contact Name	Trace Consultants Inc. | Favio Laverde, PE	Client Contact Telephone	(305) 281-1195
Client Address	12485 SW 137th Ave. Miami, FL 33186	Client Contact E-Mail Address	flaverde@traceci.com
Description of Work	GPI Geospatial, Inc. provided comprehensive 3D surveying services integrating traditional and terrestrial lidar methods, including control, drainage, and right-of-way surveys, delivering FDOT-compliant data and mapping files.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$372K	Amount of Initial Design Fees	$372K

DRAINAGE & STORMWATER

Riviera Beach Water Treatment Plant Design-Build Project Phase 1 | HBC Engineering Company

Client Name & Contact Name	City of Riviera Beach | Steven Lynk, PE, BCEE, DBIA	Client Contact Telephone	(512) 346-1100
Client Address	600 W Blue Heron Blvd, Riviera Beach, FL 33404	Client Contact E-Mail Address	lynksv@cdmsmith.com
Description of Work	HBC Engineering Company provided drainage and stormwater engineering services, including stormwater management design, hydraulic modeling, permitting, and infrastructure upgrades to enhance system capacity, flood resilience, and regulatory compliance.		
Construction Estimate of Project Cost	$350M	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$2.1 M	Amount of Initial Design Fees	$2.1 M

See **Appendix B** for more project details

Design-Build Services for the Reconstruction of NW 84th Ave | HBC Engineering Company

Client Name & Contact Name	Miami-Dade County Dept of Transportation & Public Works | Alejandro Sauleda, PE	Client Contact Telephone	(305) 375-4866
Client Address	701 NW 1st Court, Ste 1700, Miami, FL 33136	Client Contact E-Mail Address	alejandro.sauleda@miamidade.gov
Description of Work	HBC Engineering Company provided drainage and stormwater engineering services including closed conveyance design, culvert replacement, stormwater facility design, permitting, and hydraulic coordination to enhance roadway capacity, flood protection, and environmental compliance.		
Construction Estimate of Project Cost	$50M	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$50M	Amount of Initial Design Fees	$548K

BUILDING INSPECTIONS, PLANS REVIEW & PERMITTING

Buildings Report for Capital Repair Plans | HBC Engineering Company

Client Name & Contact Name	Miami-Dade County Water and Sewer Dept | Jose Vizoso	Client Contact Telephone	(786) 552-4369
Client Address	3071 SW 38th Ave, Miami, FL 33146	Client Contact E-Mail Address	jose.vizoso@miamidade.gov
Description of Work	HBC Engineering Company provided drainage and stormwater-related inspection services, assessing facility conditions, identifying deficiencies, and developing standardized reports with repair recommendations to support capital improvement planning and regulatory compliance.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$392K	Amount of Initial Design Fees	$392K

40 Years Recertification of West Transfer Station Building Project | HBC Engineering Company

Client Name & Contact Name	Miami-Dade County Dept of Solid Waste Mgmt | Ravi Kadambala, PhD, PE, BCEE	Client Contact Telephone	(305) 514-6672
Client Address	2525 NW 62nd St, 5th Fl Miami, FL 33147	Client Contact E-Mail Address	ravi.kadambala@miamidade.gov
Description of Work	HBC Engineering Company performed comprehensive building inspections and plan reviews, evaluating structural and electrical conditions, identifying deficiencies, and preparing compliance reports to support permitting and recertification requirements.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
		Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
Amount of Initial Contract Award	$55K	Amount of Initial Design Fees	$55K

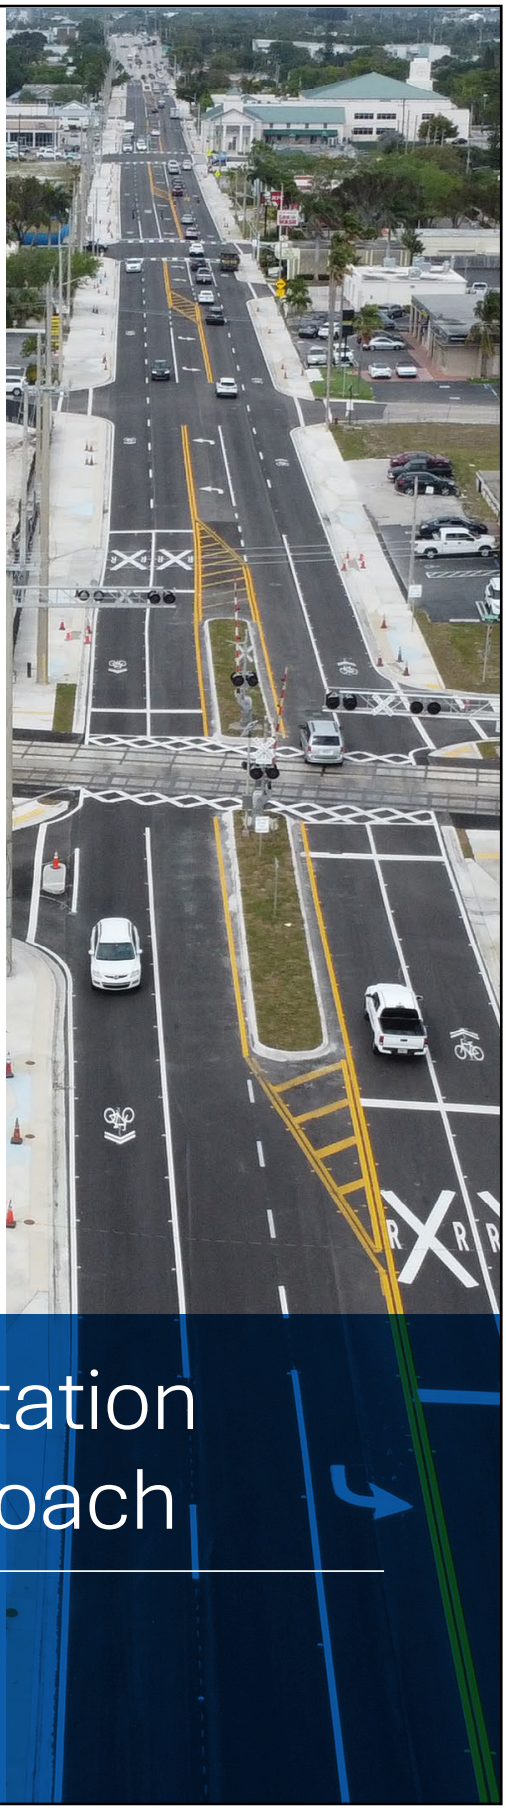
CONSTRUCTION ENGINEERING INSPECTIONS (CEI)

CEI Services for the Sanitary Force Main Furnish & Install Project - Phase III | HBC Engineering Company

Client Name & Contact Name	Miami-Dade County Water and Sewer Dept | Miguel Pichardo	Client Contact Telephone	(786) 258-2573
Client Address	3071 SW 38th Ave, Miami, FL 33146	Client Contact E-Mail Address	Miguel.Pichardo@ miamidade.gov

See **Appendix B** for more project details

Description of Work	HBC Engineering Company provided CEI services overseeing sanitary sewer force main installation, managing inspections, documentation, safety compliance, and coordination to ensure adherence to MDC-WASD standards, specifications, and construction requirements.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
Amount of Initial Contract Award	$4M	Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
		Amount of Initial Design Fees	$4M



CEI Services for FDEP Grant Funded 12" Reclaimed Water Main 2-Mile Expansion | HBC Engineering Company

Client Name & Contact Name	City of Delray Beach | Cynthia Buisson, PE	Client Contact Telephone	(561) 243-7196
Client Address	100 NW 1st Ave. Delray Beach, FL 33444	Client Contact E-Mail Address	FuentesC@mydelraybeach.com
Description of Work	HBC Engineering Company provided CEI services overseeing water main installation using HDD and open-cut methods, ensuring construction compliance, safety, quality control, and proactive coordination with utilities and stakeholders.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
Amount of Initial Contract Award	$1.6M	Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
		Amount of Initial Design Fees	$1.6M

PROJECT MANAGEMENT

CEI Services for Cherry Road from Military Trail to Quail Drive | HBC Engineering Company

Client Name & Contact Name	Palm Beach County David West	Client Contact Telephone	(561) 684-4180
Client Address	301 N. Olive Avenue West Palm Beach, FL 33401	Client Contact E-Mail Address	DWest1@pbc.gov
Description of Work	HBC Engineering Company provided comprehensive project management services overseeing construction, documentation, and coordination, ensuring quality control, compliance, stakeholder communication, and timely delivery within budget under a continuing services contract.		
Construction Estimate of Project Cost	N/A	No. of Change Orders | Construction No. of Change Orders | Design Contract	N/A N/A
Amount of Initial Contract Award	$60K	Value of Change Orders | Project Value of Change Orders | Design	N/A N/A
		Amount of Initial Design Fees	$60K

5. Project Implementation Strategy and Approach

HBC

UNDERSTANDING OF THE PROJECT

HBC Engineering Company (HBC) understands that the **Town of Pembroke Park** is seeking qualified, licensed, and experienced firms to provide **Architectural and Engineering (A&E) Services through Continuing Contracts** in accordance with the **Consultants' Competitive Negotiation Act (CCNA), F.S. 287.055**. The goal of this solicitation is to establish a pool of multidisciplinary consultants to support the Town on an as-needed, work-order basis for diverse capital improvement and infrastructure projects.

This continuing contract framework enables the Town to efficiently engage professional firms for assignments involving **planning, design, permitting, and construction administration** without separate procurements for each task. Typical projects will have construction costs not exceeding **$7.5 million** or professional service fees below $500,000, with scopes, schedules, and budgets defined through individual **Task Work Orders (TWOs).** HBC fully appreciates the flexibility and responsiveness such contracts require and has structured its team to deliver **rapid mobilization, efficient execution, and high-quality deliverables.**

Comprehensive Understanding of the Town's Needs

HBC recognizes that this contract will serve multiple Town departments and support a wide range of project types, from public facility improvements and roadway rehabilitation to stormwater management, utilities, and community enhancement initiatives. Our professionals are deeply familiar with Broward County and South Florida design standards, local permitting processes, and funding compliance requirements. Acting as an extension of Town staff, we provide practical, cost-conscious, and sustainable design solutions that balance functionality, aesthetics, and fiscal responsibility.

HBC and its trusted partners are equipped to perform the full spectrum of services outlined in the RFQ, including:

- Architectural Design
- Civil and Structural Engineering
- Transportation, Traffic, and Roadway Design
- Landscape Architecture
- Environmental Engineering
- Planning and Community Development
- Surveying and Mapping
- Drainage and Stormwater
- Building Plan Review, and Permitting
- Construction Engineering Inspection (CEI)

This integrated structure ensures HBC can manage **multi-phase, multidisciplinary assignments** while maintaining technical consistency, accuracy, and compliance across all projects.

Approach to Contract Delivery

HBC's approach centers on **responsiveness, communication, and accountability.** Each TWO will be managed by a **dedicated Project Manager,** serving as the single point of contact responsible for resource coordination, schedule control, and budget management.

- **Project Management & Communication:** Continuous coordination with the Town's Project Manager ensures transparency. All correspondence, deliverables, and updates will be tracked through HBC's ProjectWise and Deltek systems for efficient document control.
- **Schedule Control:** Detailed work plans with defined milestones and QA/QC checkpoints will be established for each TWO to prevent delays and maintain workflow continuity.

- **Quality Assurance / Quality Control:** Every deliverable undergoes internal peer review to ensure compliance with applicable codes and standards, including Florida Building Code, FDOT, Broward County, and Town criteria.
- **Budget Oversight:** HBC will monitor expenditures using Earned Value Analysis and provide monthly reports summarizing progress, completion percentages, and cost utilization.

Our structured management framework has been successfully applied on similar continuing contracts for **FDOT Districts 4 and 6, Palm Beach County, and numerous South Florida municipalities,** allowing us to deliver multiple concurrent assignments efficiently and consistently.

Commitment to Quality and Partnership

HBC is committed to providing the Town with **safe, resilient, and sustainable infrastructure solutions.** Our designs integrate energy efficiency, stormwater resiliency, and long-term maintenance considerations to maximize the Town's return on investment. We view this contract as a partnership built on **trust, performance, and collaboration.**

With a highly experienced local team and established subconsultants, HBC offers the technical expertise, responsiveness, and integrity needed to meet the Town's high standards. Our multidisciplinary capabilities and proven management systems uniquely position us to deliver **innovative, cost-effective, and dependable professional services** that advance the Town's infrastructure and community development goals.

ARCHITECTURAL SERVICES

The HBC Team, supported by **JSA Group (JSA)** and **V3 Architectural Group (V3A),** provides comprehensive architectural services tailored to the Town cultural values, community needs, and technical standards. The Town's investments in housing, education, cultural, and community facilities demand an architectural approach that integrates **functionality, sustainability, and cultural identity.** Our Team embraces this collaborative philosophy, working closely with the Town Community Development and Public Works departments to deliver projects that balance cultural heritage with modern efficiency. Our methodology emphasizes stakeholder engagement, sustainable design solutions, and iterative refinement to ensure each project reflects Town's priorities while meeting technical and regulatory requirements.

Architectural services encompass the full project lifecycle:

- **Planning & Program Verification:** Establishing baselines through needs assessments, space planning, feasibility studies, and documentation in Program Verification Reports.
- **Design Development:** Preparing drawings and documents that define the project's size, layout, and character, in compliance with the Town Design Guidelines.
- **Contract Documents:** Delivering 50% and 100% Contract Documents, including architectural, structural, MEP, and fire protection plans, with technical specifications and clear, constructible details.
- **Bidding & Award:** Preparing consolidated bid sets, assisting during contractor selection, and clarifying contract requirements.
- **Construction Administration:** Providing architectural supervision, site inspections, and contract administration to maintain design integrity through completion.
- **Project Management:** Aligning schedule, resources, and deliverables with Town's expectations, while maintaining strong communication and oversight throughout.

Value-Added Services:

- **3D Visualization and Modeling:** Production of renderings and physical models to support project communication and community outreach.
- **Sustainability and Energy Efficiency:** Incorporation of modern roofing, HVAC, and lighting systems to optimize energy performance and long-term asset management.
- **Cultural Integration:** Sensitivity to Town traditions and community input, ensuring facilities reinforce cultural identity while meeting contemporary needs.

The Architect services will be led by **Jose Vidal, AIA, LEED AP (V3A)** and **Julio Sanchez, RA (JSA)**, both with over 30 years of experience. HBC Team is committed to being a **responsive and long-term architectural partner** to the Town. With proven experience in Residential, Health Care, Houses of Worship, Retail, Hospitality, Educational, Planning, and Institutional facilities, our team brings the organizational depth, technical capability, and awareness to deliver projects that enhance the Town's infrastructure, strengthen resilience, and support its long-term vision.

CIVIL ENGINEERING

Our Civil Engineering services encompass the planning, design, and management of infrastructure projects that enhance community resilience, mobility, and sustainability. We provide comprehensive solutions for roadway and drainage systems, water and wastewater infrastructure, site development, stormwater management, parking lot design, and pavement management. Our approach integrates technical expertise, innovative design, and regulatory compliance to deliver cost-effective, constructible, and environmentally responsible projects. From concept through construction, our team collaborates closely with clients, agencies, and stakeholders to ensure each project meets its functional, aesthetic, and long-term performance goals.

HBC delivers comprehensive civil engineering services that address the unique needs of municipalities such as the Town of Pembroke Park, leveraging a multidisciplinary approach that integrates technical precision, regulatory compliance, and site-specific design strategies. Our team provides detailed site evaluations, technical analysis, and complete civil site design services, including grading, drainage, utilities, stormwater management, and multimodal access planning, for public infrastructure and community development projects. We have successfully supported the delivery of government and municipal facilities, including parks, recreational complexes, civic buildings, and critical water and wastewater treatment infrastructure. Our experience also encompasses residential, commercial, and industrial developments, along with specialized waterfront improvements such as seawalls, marinas, and riverwalks, which are particularly relevant to coastal communities.

With an understanding of the Town's permitting processes and regulatory frameworks, HBC maintains productive working relationships with local, state, and federal agencies, ensuring efficient project approvals and timely delivery of construction documents. Our integrated services are designed to identify site constraints early, optimize land use, and enhance constructability while advancing sustainable and resilient solutions. By applying best practices in stormwater design, climate adaptation, and green infrastructure, HBC ensures that every civil engineering assignment not only meets current standards but also strengthens the Town's long-term resilience against flooding, sea level rise, and other environmental challenges.

This discipline will be led by **Jose Lopez, PE, (HBC),** and **Teodoro Tefel, PE (HBC),** senior professionals with extensive experience in civil engineering design and plans production. Our staff members have extensive experience working on municipalities, counties, and FDOT projects, and they are supported by multidisciplinary specialists in drainage, utilities, and survey, to ensure seamless coordination across all project elements. We

are committed to delivering civil engineering design solutions that meet or exceed all technical requirements and reflect the unique priorities of the Town. Each project will be developed with an emphasis on safety, context sensitivity, and enhancing mobility. Our team will function as an extension of the Town staff, providing responsive communication, transparent progress tracking, and technically sound deliverables. By aligning advanced engineering practices with the Town's vision, we will deliver civil engineering projects that strengthen the Town infrastructure, transportation network, support economic vitality, and improve the quality of life for all users.

Structural Engineering

HBC applies a rigorous engineering process beginning with site reconnaissance, structural assessments, and geotechnical coordination to establish appropriate design criteria. Using state-of-the-art modeling and analysis tools, our engineers design foundations, framing, and structural systems that meet or exceed required load-resistance factors for gravity, wind, and seismic conditions. Constructability, life-cycle performance, and material optimization are prioritized at every stage to reduce costs while maintaining safety and compliance. HBC performs detailed field inspections, load testing, and condition evaluations to identify structural deficiencies, deterioration, or distress early. These assessments inform repair, rehabilitation, or replacement recommendations while maintaining safety and code compliance. HBC's engineers collaborate closely with architects, geotechnical engineers, and contractors to ensure seamless integration of all structural components. Early constructability reviews help reduce RFIs, minimize delays, and maintain alignment with permitting and inspection requirements under the Florida Building Code and Town of Pembroke Park Building Division.

All deliverables undergo a rigorous QA/QC process led by senior engineers to ensure accuracy, consistency, and compliance with Town of Pembroke Park, FBC, and industry standards. Our internal reviews encompass independent design checks, peer review, and cross-disciplinary coordination to maintain design integrity and reduce construction risks.

The HBC Structures Team, led by **Sreelatha Nandivada, MS, PE, (HBC),** and **Roberto Rubio, MS, PE (HBC),** provides comprehensive structural engineering services in accordance with the Florida Building Code (8th Edition – 2023) and applicable Town of Pembroke Park design standards. With more than three decades of experience, HBC's licensed structural engineers deliver safe, efficient, and cost-effective designs for municipal facilities, infrastructure, and commercial developments. Our work emphasizes durability, constructability, and long-term performance across a wide range of building types, including residential, commercial, and community facilities.

HBC is committed to delivering resilient, code-compliant, and constructible structural designs that support the Town of Pembroke Park's vision for safe, sustainable, and long-lasting facilities. Our engineers apply proven methods, technical precision, and proactive communication to ensure every structure stands as a lasting investment for the Town's communities.

Electrical Engineering

HBC Team provides comprehensive electrical engineering services that ensure safe, efficient, and sustainable building systems for municipal, institutional, and commercial facilities. Our team delivers fully integrated design and consulting services that enhance building performance, reduce operational costs, and comply with the latest Florida Building Code (FBC), energy efficiency standards, and local regulations.

Comprehensive System Design and Evaluation

HBC's engineers are experienced in system inspections, load analysis, and feasibility studies for both new construction and renovation projects. We evaluate existing electrical systems to assess condition, performance, and code compliance, and provide detailed conceptual and schematic designs to guide project development. Our goal is to optimize comfort, functionality, and efficiency while minimizing lifecycle costs. HBC's electrical engineers specialize in power distribution design,

panelboard layouts, load calculations, and lighting system consulting for both interior and exterior environments, including parking lots, memorials, athletic fields, and public facilities. We perform short-circuit, coordination, and arc-flash studies to ensure system safety and reliability. Our lighting designs balance functionality, energy efficiency, and aesthetics, using LED and smart control technologies to reduce long-term maintenance costs.

HBC provides emergency response engineering for critical facility repairs, power system failures, and post-storm assessments. Our engineers are available for rapid mobilization to restore essential operations and develop corrective design measures. We also assist clients with scope development, cost estimating, and technical specifications to support future capital projects. Through innovation and collaboration, HBC delivers electrical engineering solutions that enhance system performance, energy efficiency, and occupant safety. Our multidisciplinary expertise enables seamless integration between building systems, architecture, and civil infrastructure, ensuring the Town's facilities remain resilient, efficient, and compliant with evolving standards and community needs. This discipline will be led by **Orlando Penate, EE, PE, IMSA III (HBC)**, a senior professional with extensive experience in electrical engineering design and plans production.

TRANSPORTATION, TRAFFIC, AND ROADWAY ENGINEERING

The HBC Team provides the Town with full-service **Transportation, Traffic, and Roadway Engineering,** encompassing roadway design, stormwater and drainage design, sidewalk and shared use paths, RRR projects, traffic calming, master planning, streetscapes, traffic engineering studies, transportation planning, parking studies, signal timing, traffic operations studies, intersection design and traffic control, pedestrian and bike studies, intelligent transportation systems (ITS) analysis, design, and implementation,, and transit and transportation planning. Our team of licensed Florida Professional Engineers has experience delivering FDOT and municipal projects, ensuring compliance with FDOT standards, MUTCD, MUTS, and FHWA guidance. Our capabilities include but are not limited to the following:

ROADWAY ENGINEERING

Roadway and Highway

HBC is qualified to provide roadway design services for both minor and major projects across the Town. This includes Resurfacing, Restoration, and Rehabilitation (RRR) of rural corridors, as well as the reconstruction and widening of urban highways with new curb and gutter, intersection improvements, and multimodal enhancements. Minor projects generally involve pavement preservation, traffic operations upgrades, minor drainage modifications, and utility adjustments. Major projects usually address full roadway reconstruction, capacity expansion, and more complex design features, such as traffic engineering, Maintenance of Traffic (MOT), and stormwater permitting. Our team understands that all work must be context-sensitive, environmentally responsible, and resilient to future growth, while maintaining safe and efficient mobility for the Town's residents, businesses, and visitors during construction. Our technical approach to roadway design is built on integrating sound engineering practices with innovative tools and stakeholder coordination. We have extensive experience working with Florida Department of Transportation (FDOT) and American Association of State Highway and Transportation Officials (AASHTO) criteria, while adapting designs to align with the cultural and community context of the surrounding properties.

We recognize that roadway projects present critical challenges, and our approach emphasizes proactive solutions. ROW constraints are addressed early in the process to minimize the need for land acquisition and safeguard Town assets. Utility conflicts are identified through SUE investigations and resolved before the final design to avoid construction delays. Drainage and floodplain sensitivities are mitigated by implementing resilient stormwater practices that protect the Town infrastructure, while meeting regulatory requirements. Community connectivity is preserved through careful staging, ensuring that access to residences, enterprises, and emergency services remains uninterrupted during construction. To maintain budget and schedule control, we employ the Earned Value Method and conduct iterative design reviews, enabling early issue resolution and preventing scope creep.

Innovation is central to our design philosophy, and we deploy advanced tools to improve accuracy, efficiency, and collaboration. LiDAR and 3D modeling are used to evaluate cross slopes, pavement conditions, and utility conflicts with greater precision, ensuring designs are constructible. Bluebeam Revu supports concurrent digital Quality Control (QC) reviews, enabling real-time collaboration with Town staff and other stakeholders. Constructability models are prepared to test staging options, MOT schemes, and community access impacts, ensuring issues are identified and resolved before construction begins. By combining these tools with proven workflows, we deliver plans that reduce risk, enhance quality, and accelerate the project delivery.

Pavement Analysis and Design

The HBC Team is skilled in providing pavement design solutions, including structural evaluation, life cycle cost analysis, and selecting cost-effective materials to ensure long-term durability. We will follow the FDOT established comprehensive guidelines for pavement design to ensure the construction of durable and efficient roadways. These guidelines are detailed in the Flexible Pavement Design Manual, which outlines procedures and criteria for designing flexible pavements, covering aspects such as soil classification, stabilization techniques, drainage considerations, and layer thickness calculations.

Maintenance of Traffic (MOT)

Maintaining adequate access to all surrounding facilities and developing an efficient and practical Traffic Control Plan (TCP) is essential to how the public perceives the project and the department. Our team members are well-trained in FDOT procedures and requirements and understand that safety is paramount. The TCP developed by our Team will address constructability while minimizing impacts for all modes of transportation and provide a safe work zone for the traveling public and the workers. Our MOT design will be performed in accordance with MUTCD and FDOT standards. Bicycle, pedestrian, and transit operations will be accommodated throughout construction. Pedestrian access will always be maintained on at least one side of the road with temporary access to the bus stops. Work at existing bus stops will be sub-phased to maintain temporary bus pads.

Minor and Major Bridge Design

The HBC Team has expertise in both minor bridge structures and more complex, significant bridge designs. Our engineers are skilled at addressing structural challenges while ensuring safety and durability, incorporating advanced techniques like precast segmental bridges and steel girder construction. HBC uses a comprehensive approach to bridge design, as found in the FDOT Structures Manual. This manual covers various aspects of bridge design, including criteria for lanes, medians, and shoulders, as well as geometric features and cross slopes. It also provides guidelines for bicycle lanes, sidewalks, and shared-use paths to ensure safe and efficient travel for all users. The manual emphasizes the importance of context-based design, tailoring bridge designs to the specific needs and conditions of the area.

Bridge Rehabilitation and Load Rating

We specialize in bridge rehabilitation, prolonging the service life of aging structures, and performing comprehensive bridge load rating studies to ensure safety compliance. Our Team is proficient in integrating modern technologies to monitor bridge performance over time. Our experienced engineers follow the FDOT Load Rating Manual, which outlines the procedures and criteria for evaluating the load-carrying capacity of bridges to ensure their safety and reliability. The approach includes identifying and classifying bridge components, using computer programs for analysis, and implementing quality control measures. The manual also provides guidelines for updating load ratings based on inspection reports and maintaining accurate records in the Bridge Management System (BMS).

Bridge Inspection

The HBC Team is also experienced in the inspection of major bridges, ensuring these complex structures remain operational, safe, and compliant with FDOT and AASHTO standards. All bridge inspections will be performed in accordance with the FDOT comprehensive bridge inspection program to ensure the safety and reliability of all public highway bridges in the state. The program includes regular inspections, detailed evaluations, and maintenance activities. FDOT's Bridge Inspection Manual outlines the procedures and criteria for inspecting bridges, including identifying and classifying structural components, assessing their condition, and implementing

necessary repairs or replacements. The manual also provides guidelines for maintaining accurate records in the Bridge Management System (BMS) and updating inspection reports based on the latest findings.

Stormwater and Drainage Design

The HBC Team provides stormwater management and drainage solutions that mitigate flooding risks while maintaining water quality. Our solutions include green infrastructure, low-impact development (LID), and pump station designs to manage urban stormwater runoff. Our drainage approach covers all aspects of drainage design, including hydrologic, hydraulic, stormwater management, and coastal engineering services in accordance with the FDOT Drainage Manual. The goal is to ensure a safe, resilient, and economical drainage system while preserving the quality of Florida's environment.

Utility Coordination

We have a proven track record in utility coordination and relocation services, working with local utility companies and public agencies to minimize conflicts and ensure efficient project delivery. HBC's utility coordination approach will follow the FDOT Utility Accommodation Manual for the location, manner, installation, and adjustment of utility facilities along, across, under, or on the public right-of-way.

Complete Streets and Pedestrian Improvements

The HBC Team excels at planning and designing Complete Streets that accommodate all users. Our traffic engineering expertise ensures that pedestrian and cyclist facilities are incorporated into the overall design, enhancing safety and mobility for all modes of transportation. Our approach aims to "put the right street at the right place," emphasizing consideration of all roadway users as well as the context of the road. Thoughtful roadway design can reduce or eliminate "human error" by accounting for human limitations and behavior patterns. This approach helps promote safety, enhance mobility, improve quality of life, and promote economic development based on the roadway's context.

Signalization and ITS Design

Our Team provides expertise in traffic signal design, ITS, and advanced traffic management solutions to reduce congestion and improve the efficiency of the Town's roadways. This includes integrating signal priority for transit vehicles and designing systems that collect real-time traffic data to enhance safety and mobility. Our comprehensive approach to signalization aims to provide an orderly and predictable movement of traffic throughout the roadway system. The design and layout of signals must comply with various standards, including the PBC Standards, FDOT Standard Specifications, Standard Plans, Traffic Engineering Manual (TEM), Structures Manual, Manual on Uniform Traffic Studies (MUTS), and Manual on Uniform Traffic Control Devices (MUTCD). Key aspects of signalization design include structural supports following AASHTO's LRFD Specifications, guidelines for attachments to barriers, certification of traffic control devices, the use of LED light sources, retroreflective backplate borders, specific placement of signal heads for through lanes, and ensuring vertical clearance requirements are met.

Signing and Pavement Marking

The pavement markings within the project limits will comply with the PBC Standards, the FDOT Design Manual (FDM), FDOT Standard Plans, Specifications, TEM, and MUTCD. An existing sign inventory will be performed to determine which signs need replacement to comply with FDOT and MUTCD criteria. Bicycle and pedestrian signage will be enhanced. Additional enhancements will be considered to improve pedestrian safety, such as median refuge areas or hardened centerlines and relocating crosswalks closer to the intersection for added visibility. We will evaluate the need for green bicycle lane markings at conflict locations. Special emphasis crosswalks will be added at all signalization intersections.

Lighting and Electrical Engineering

Our experienced staff brings extensive expertise in coordinating lighting design with roadway improvements and landscaping. HBC Team has successfully delivered multiple lighting and electrical projects involving designs performed by power companies. We will ensure that the lighting design is prepared in accordance with agreements between the Town and the power companies and is seamlessly integrated with the roadway

improvements and landscaping, showing the location of the streetlights provided by the power company on the Utility Adjustment Plans. Our Team is dedicated to delivering comprehensive lighting plans for buildings, civil sites, parking lots, roadways, intersections, interchanges, and overhead sign lighting. We have a proven track record of over 300 signalized intersection retrofits and many years of experience working on similar projects.

This discipline will be led by **Jose A. Lopez, PE (HBC)**, and **Teodoro Tefel, PE (HBC),** senior professionals with extensive experience in transportation and traffic engineering. Our staff members have extensive experience working on municipalities, counties, and FDOT projects, and they are supported by multidisciplinary specialists in drainage, utilities, and survey, to ensure seamless coordination across all project elements.

TRANSPORTATION AND TRAFFIC ENGINEERING

System Planning: HBC applies a systems-based methodology to evaluate future transportation needs, considering land use, socioeconomic growth, and emerging mobility trends. Our planners and engineers conduct scenario-based forecasting to assess demand under varying conditions, including connected and autonomous vehicle adoption, climate resiliency, and transit-oriented development. We develop ITS/TSM&O Master Plans and long-range strategies that prioritize Town corridors and facilities while leveraging state and federal programs for funding support. Our team capabilities include long-range transportation plans, multimodal corridor evaluations, ITS strategic planning, equity-focused policy reviews, and climate resiliency integration. We have delivered the development of corridor-wide operations and safety studies along SR-7/US-441; planning support for the Port Everglades Vision Plan; and systems planning efforts in coordination with FDOT District 4 and Miami-Dade County TPO.

Transportation Statistics

Accurate data collection and analysis form the foundation of our planning process. HBC collects multimodal datasets; traffic volumes, turning movements, pedestrian and bicycle counts, travel times, and origin-destination information; using both traditional and advanced technologies such as drones, radar detectors, and Bluetooth/ Wi-Fi sensors. We also design and maintain permanent and temporary monitoring sites for long-term system performance tracking. Our team capabilities include data processing, statistical validation, GIS integration, and development of dashboards and visualization tools for Town staff. Our experience include FDOT Districtwide Traffic Operations Data Collection contracts (D4 CAU65), and Miami-Dade DTPW Northeast Corridor FTA CatEx project.

Traffic Engineering Studies

HBC conducts comprehensive traffic engineering studies focused on identifying and resolving operational, efficiency, and safety challenges across municipal and regional transportation networks. Our capabilities include signing, marking, and signal inventories; traffic counts; intersection and collision diagram development; signal warrant analyses; and travel time and delay studies. Using advanced tools such as Synchro, SimTraffic, VISSIM, HCS, and GIS-based crash diagnostics—along with drone surveys, AI-driven video analytics, and the Surrogate Safety Assessment Model (SSAM), we deliver data-driven, proactive safety evaluations. Recent experience includes corridor analyses along SR-7/US-441 from Sheridan Street to Oakes Road, which involved signal warrant evaluations for multiple access points and the development of conceptual plans and microsimulation models to support FDOT coordination.

Traffic Data Collection and Operational Analysis

HBC will collect comprehensive traffic data using advanced equipment, including road tube counters, MioVision Scout units, radar speed guns, and drones, supported by a skilled field team. This data will drive operational analysis, evaluating roadway geometrics, signal timing, access management, signage, and overall system performance under both no-build and build scenarios. Using calibrated microsimulation models such as Synchro/SimTraffic, VISSIM, and VISUM, HBC will analyze Level of Service (LOS), delays, and travel times per the Highway Capacity Manual (HCM). Intersection Control Evaluations (ICE) for critical intersections and a conceptual Plan will also be developed to ensure safe and efficient traffic operations.

Traffic Safety Analysis

HBC specializes in traffic safety analysis, leveraging field reviews, five-year crash data, and drone assessments to identify High Crash Locations (HCL) at segments, intersections, and pedestrian crossings. The analysis includes reviewing geometric design, operations, pedestrian and bicycle facilities, and crash patterns while considering FDOT's five-year work program. Using S4A crash analysis spreadsheets, collision diagrams, and statistical comparisons with districtwide averages, we assess crash trends and safety risks. Improvement recommendations align with FHWA's Proven Safety Countermeasures, the FDOT Design Manual (FDM), and the CMF Clearinghouse and are coordinated with CEI, Structural, and Design teams for feasibility. Final recommendations are documented in a QA/QC-reviewed report, including cost estimates and benefit-cost analyses.

Traffic Signal Timing

Our team optimizes traffic signal timing to enhance mobility, minimize delays, and improve safety for all users, including pedestrians and cyclists. We perform data collection activities such as turning movement counts, detection verification, and travel time studies to establish accurate baselines for timing plans. HBC's engineers develop and fine-tune corridor-wide signal coordination and arterial progression plans using Synchro, Vistro, and VISSIM, while ensuring clearance intervals and pedestrian phases meet FDOT TEM, MUTCD, and NCHRP Signal Timing Manual standards. Our experience includes corridor retiming projects across Broward County and FDOT District 4, including 13-signal optimizations, database migration for ATMS upgrades, and implementation of Leading Pedestrian Intervals (LPIs) to enhance multimodal safety.

Intelligent Transportation Systems (ITS)

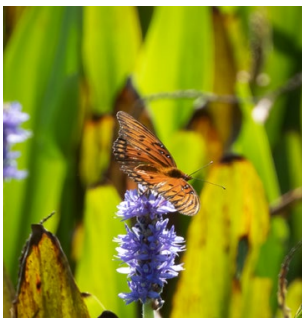
HBC delivers cutting-edge Intelligent Transportation Systems (ITS) solutions that improve real-time mobility, safety, and network resilience. Our approach follows FDOT's Systems Engineering Management Plan (SEMP), FHWA Rule 940, and FDOT FDM Chapter 233, emphasizing stakeholder-driven needs assessments, Concepts of Operations (ConOps), and Requirements Traceability Matrices (RTM) to ensure interoperability and long-term system performance. Our capabilities include design and deployment of Wrong-Way Vehicle Detection Systems (WWVDS), Adaptive Traffic Control Systems (ATCS), Dynamic Message Signs (DMS), CCTV, smart work zones, and fiber optic communications networks, as well as planning for Connected Vehicle (CV) infrastructure, Automated Traffic Signal Performance Measures (ATSPM), and EV charging integration. Notable experience includes the FDOT District 6 Smart Work Zone Master Plan—the first Virtual TMC deployment in Florida—adaptive signal control presentations for the Seminole Tribe near the Hard Rock Casino, and EV infrastructure design for Miami-Dade DTPW featuring one of the nation's first bus pantograph charging stations.

Together, HBC's integrated traffic engineering, safety analysis, signal timing, and ITS expertise support the Town's mobility, safety, and resiliency goals through technical excellence, innovative solutions, and a structured QA/QC framework ensuring accuracy, reliability, and compliance.

HBC's Transportation Planning and Traffic Engineering division will be led by Moatz Saad, PhD, PE, PTOE, IMAS II (HBC) and Daniel Rodriguez ME, PE, IMSA III (HBC). Their expertise has been proven through numerous municipal, FDOT, and county projects, where we have delivered measurable improvements in safety, efficiency, and mobility. For the Town, this means data-driven solutions that reduce crashes, optimize signal operations, and enhance the overall travel experience for all roadway users. HBC Engineering's track record of producing practical, cost-effective, and agency-approved traffic studies, timing plans, and ITS deployments demonstrates that we are not only qualified but also the trusted partner to advance the Town's traffic engineering and operations priorities across its transportation network.

LANDSCAPE ARCHITECTURAL SERVICES

The HBC Team, supported by **KCI Technologies (KCI),** offers comprehensive landscape architecture services that align with the Town's vision for safe, resilient, and sensitive environments. Our landscape architecture approach emphasizes the integration of functional transportation design with environmental stewardship and cultural expression. Key services include:



- **Site and Corridor Planning:** Development of context-sensitive landscape and streetscape designs that enhance safety, mobility, and livability.
- **Streetscape and Multimodal Enhancements:** Pedestrian, bicycle, and transit-oriented improvements that comply with ADA, FDOT, and local design standards.
- **Sustainable Stormwater Integration:** Incorporation of bioswales, rain gardens, and green infrastructure into roadway corridors.
- **Planting and Irrigation Systems:** Design of resilient, maintainable planting palettes and irrigation systems tailored to Florida's climate.
- **Construction Administration**: Jobsite inspections, contract administration, and collaboration with maintenance staff to ensure designs are practical, sustainable, and long-lasting.

The HBC Team provides the Town with a **holistic design team** that not only satisfies technical requirements but also reinforces cultural identity, community pride, and environmental sustainability. Their combined expertise ensures:

- Seamless coordination with roadway, drainage, and utility engineers.
- Designs that reflect Town's goals while supporting long-term maintenance and cost efficiency.
- A proven track record of delivering **safe, functional, and visually distinctive environments** for both urbanized and rural areas.

Our Landscape Architecture discipline will be led by **Kirk Hoosak, RLA (KCI)** and **Todd Mohler, RLA (KCI)**, bringing more than 50 years of combined experience. Our team consists of landscape architects, arborists, environmental specialists, and irrigation designers. With a strong Florida presence, our landscape architecture team offers immediate responsiveness to Town needs. The HBC Team's integrated practice ensures that every project, from gateways and corridors to community and recreational spaces, supports Town's long-term infrastructure goals while respecting community and environmental stewardship.

ENVIRONMENTAL ENGINEERING

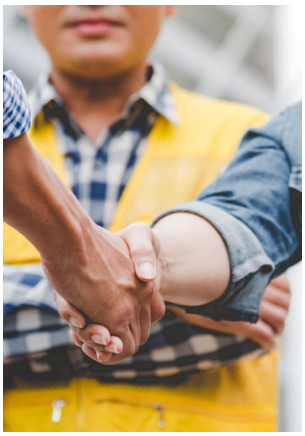
Our Civil Engineering services, supported by **Resources Environmental Solutions (RES)** and **Pacifica Engineering Services (PES),** encompass the Ecological, Wetland Delineation, Endangered/Protected Species Surveys, Wetland Mitigation Plans, Environmental Site Assessment and Remediation, Environmental Permitting, Environmental Risk Analysis, Field Data Collection, Remediation Plans for underground storage tanks, hazardous waste materials, Asbestos Removal and Wetland Mitigations. Our approach integrates technical expertise, innovative design, and regulatory compliance to deliver cost-effective, constructible, and environmentally responsible projects. From concept through construction, our team collaborates closely with clients, agencies, and stakeholders to ensure each project meets its functional, aesthetic, and long-term performance goals.

Environmental Services

Our Team understands the need to balance development with the protection of natural resources. We work with our clients to identify protected natural resources, including wetlands, coastal/marine resources (mangroves, corals, seagrass), upland trees, and threatened and endangered fauna/flora that may conflict with their proposed infrastructure projects. Our Team includes SWS Professional Wetland Scientists, UF Florida Master Naturalists, and ISA Certified Arborists who can perform quantitative and qualitative assessments of protected natural resources and who work directly with our civil engineers to design projects to avoid/minimize resource impacts or develop mitigation strategies to offset unavoidable impacts. Mitigation strategies may include habitat restoration design for freshwater wetlands, uplands, coastal wetlands, or marine habitats, as well as mitigation bank coordination. We have extensive experience in all areas of environmental assessment, coordination, and

reporting in compliance with the FDOT PD&E Manual. We are experts in NEPA and accelerated project delivery. Our Team communicates effectively with regulatory agencies and leverages well-established relationships with government agencies, all of which help support our ability to successfully complete the required assessments and develop suitable solutions beneficial to our clients. We have completed several environmental impact reviews (EIR) for various projects and documents, including scoping, planning, design and design-build projects, LAP projects, One-Stop-Permitting, Intergovernmental Coordination and Review (ICARS), and RFP/Bid documents from initial concept developments through construction to ensure continuous compliance with NEPA and environmental regulations.

Soil Exploration



Our geotechnical engineers conduct complete subsurface investigations using borings, Standard Penetration Tests (SPT), Cone Penetration Tests (CPT), and rock coring. When site conditions warrant, we employ advanced tools such as pressuremeters, dilatometers, and geophysical methods. Initial site reconnaissance identifies accessibility constraints, overhead clearance, and MOT requirements before mobilization. Soil and rock samples are classified in the field and tested in certified laboratories. All exploration activities follow FDOT manuals and procedures, with QA/QC reviews performed by senior staff to ensure accuracy.

Soil Testing and Classification

Certified laboratories perform classification and index property testing such as moisture content, grain size distribution, Atterberg limits, compaction, and Limerock Bearing Ratio (LBR) tests, using FDOT-approved specifications. Our team maintains a calibrated equipment inventory (ovens, sieves, hydrometers, compaction hammers, LBR frames) to ensure reliable data. TSF and GEO bring decades of experience in construction materials testing and inspection, supporting timely evaluations of soils, aggregates, concrete, asphalt, and stabilization materials for Town projects.

This discipline will be led by **Nadia Locke, PE, LEED AP (RES)** and **Wesley Foster, PE, SI, MBA (PES)**, senior professionals with extensive experience in environmental and geotechnical engineering. Our environmental team is supported by multidisciplinary specialists to ensure seamless coordination across all project elements.

PLANNING & COMMUNITY DEVELOPMENT

HBC Team provides comprehensive planning and community development services that support the Town of Pembroke Park in shaping sustainable, livable, and economically vibrant communities. Our multidisciplinary team integrates urban design, engineering, environmental, and socio-economic expertise to deliver well-balanced plans that align with community values, growth management objectives, and regulatory frameworks.

HBC's planners and engineers are highly experienced in land use, zoning, and comprehensive planning, ensuring that growth and redevelopment efforts align with both the Town's Comprehensive Plan and the Florida Community Planning Act. We assist municipalities in updating Comprehensive Development Codes and Land Development Regulations, crafting policies and design standards that promote orderly development, mobility, resiliency, and sustainability. Our approach emphasizes compatibility between land use, infrastructure capacity, and environmental preservation.

HBC develops Park, Greenway, and Recreation Master Plans that enhance community health, connectivity, and quality of life. We assess recreational needs, perform site suitability analyses, and design open spaces that integrate stormwater management, native landscaping, and pedestrian accessibility. Our team has successfully planned and designed community parks, multi-use trails, and waterfront greenways that support active and passive recreation.

HBC recognizes that successful community planning requires broad stakeholder input. We facilitate public involvement and consensus building through workshops, design charrettes, and digital engagement platforms that promote transparency and inclusivity. Our planners synthesize feedback into actionable strategies and create visually compelling architectural renderings and conceptual plans to communicate design intent and build consensus among residents, officials, and developers. To support strategic growth, HBC conducts market research, demographic, and socio-economic analyses that inform planning recommendations, zoning revisions, and policy updates. We use GIS and data visualization tools to analyze land use trends, mobility patterns, and infrastructure needs—translating complex data into clear, decision-ready insights for local leaders.

HBC's planning philosophy emphasizes smart growth, resiliency, and community identity. We help local governments develop implementable plans that balance development with environmental stewardship and fiscal responsibility. Our team is dedicated to guiding the Town toward a sustainable future through comprehensive, inclusive, and forward-thinking planning solutions.

This discipline will be led by **Juan Flores, PhD, MBA, AIPA (HBC)** senior professionals with extensive experience in civil engineering design and plans production. Our staff members have extensive experience working on municipalities, counties, and FDOT projects, and they are supported by multidisciplinary specialists in drainage, utilities, and survey, to ensure seamless coordination across all project elements.

LAND SURVEYING AND GIS MAPPING

The HBC Team, supported by **GPI Geospatial (GPI)** and **Manuel G. Vera & Associates (MGV),** offers a full suite of professional surveying and mapping services in support of the Town, including but not limited to ALTA, boundary and topographic surveys, geographic information system (GIS), construction layout and as-builts, subsurface utility surveying, preparation of plat and subdivision documents and other related services. Together, our subconsultants bring over 70 years of combined experience delivering high-quality surveying, mapping, and subsurface utility engineering services for FDOT, municipalities, and other clients throughout Florida.

Our capabilities include:

Control Surveying

Our Professional Surveyors and Mappers (PSMs) are licensed in Florida and proficient in establishing and verifying horizontal and vertical control networks. Using GPS/RTK, digital leveling, and monument recovery from FDOT, NGS, and local agencies, we provide primary control to support all survey tasks.

Design, Right-of-Way, and Construction Surveying

Both firms have extensive FDOT and Town experience delivering boundary, right-of-way, as-built, hydrographic, topographic, and construction layout surveys. Our Team expertise in SUE augments these services by accurately designating and verifying subsurface utilities (QL A/B), ensuring that design and construction decisions are based on complete, conflict-free data.

Photogrammetric Mapping

Both MGV and GPI are industry leaders in aerial lidar and photogrammetry, operating a fleet of fixed-wing aircraft and lidar sensors to capture large-scale transportation corridors. Our aerial lidar and photogrammetric mapping support FDOT Districts 4 and 6, and we are fully equipped to provide the Town with design-grade mapping products.

Right-of-Way Mapping

Our staff regularly prepares legal descriptions, ROW maps, and sketches supported by boundary surveys, title research, and control surveys. We work closely with FDOT ROW groups and property appraisers to ensure accuracy and compliance with FDOT and state mapping standards.

Our survey teams integrate advanced tools, including terrestrial laser scanning, mobile lidar, 3D static scanning, hydrographic sonar/GPS systems, and UAVs, to deliver highly accurate 3D design surveys. These datasets integrate seamlessly into CADD platforms such as AutoCAD Civil 3D and MicroStation, supporting efficient design workflows for roadway, bridge, drainage, and utility projects.

This discipline will be led by Frank Paruas, PSM (GPI) and Mark Sowers, PSM (MGV), all with extensive FDOT and Town experience in ROW mapping, control surveying, 3D design surveys, transportation surveying, photogrammetry, and lidar integration.

Our combined team is fully qualified to meet the requirements outlined in this RFQ for Surveying and Mapping services. We bring the necessary licensed staff, technical personnel, and advanced equipment to ensure accuracy, reliability, and efficiency. Importantly, both GPI and MGV are familiar with Town's standards, and project environments, ranging from urban to rural. This ensures seamless integration of survey deliverables into design and construction phases while upholding the Town's expectations for quality and accountability.

DRAINAGE AND STORMWATER

HBC team offers extensive experience in **drainage and stormwater management** design, permitting, and implementation for municipal and county agencies across South Florida. Our approach integrates hydrologic, hydraulic, and environmental engineering principles to deliver **cost-effective, resilient, and sustainable** stormwater solutions that protect property, infrastructure, and natural resources while maintaining compliance with all applicable local, state, and federal regulations.

HBC provides **Drainage Improvement Design** services that include system modeling, master planning, and infrastructure upgrades to address localized flooding, capacity deficiencies, and water quality concerns. Our engineers use advanced tools such as **ICPR, SWMM, HEC-RAS, and AutoCAD Civil 3D** to simulate system performance under varying storm events and sea-level rise scenarios. We evaluate existing drainage networks, propose new conveyance systems, and design detention/retention facilities, exfiltration trenches, and pump stations as needed to enhance system efficiency and resilience.

We perform detailed **Feasibility Analyses for drainage and stormwater projects,** assessing hydraulic conditions, soil characteristics, environmental impacts, and regulatory constraints to determine the most viable and cost-effective alternatives. These analyses often serve as the foundation for capital improvement planning and grant applications.

HBC has successfully completed numerous **flood control and erosion mitigation projects,** implementing best management practices (BMPs) such as vegetative stabilization, channel protection, and low-impact development (LID) features. Our team evaluates watershed-scale hydrology to ensure that improvements reduce downstream impacts and maintain compliance with **South Florida Water Management District (SFWMD), Broward County,** and **FDOT** drainage criteria. Our engineers are highly experienced in obtaining permits from agencies such as **SFWMD, FDEP, USACE, and Broward County Environmental Protection** divisions. We prepare complete regulatory submittals including drainage reports, environmental assessments, and as-built certifications. In addition, HBC assists municipalities in **preparing and supporting grant applications** for stormwater infrastructure funding through FEMA, FDEP, and other resilience-based programs.

Every drainage project undertaken by HBC prioritizes long-term sustainability, adaptability to changing climate conditions, and operational efficiency. Our team integrates **green infrastructure practices**, water-quality treatment systems, and flood-resilient design strategies to help the Town achieve its goals for safety, sustainability, and environmental stewardship.

This discipline will be led by **Hernan Lugo, PE, CFM, MS (HBC),** senior professionals with extensive experience in civil engineering design and plans production. Our staff members have extensive experience working on

municipalities, counties, and FDOT projects, and they are supported by multidisciplinary specialists in drainage, utilities, and survey, to ensure seamless coordination across all project elements.

BUILDING INSPECTION AND PLAN REVIEW

The **HBC Team** provides comprehensive building code and sustainable design services to ensure that all projects for the Town of Pembroke Park are safe, compliant, energy-efficient, and environmentally responsible. Our staff includes Florida-licensed professional engineers, registered architects, and certified **Code Compliance Officers** experienced in enforcing and interpreting the **Florida Building Code (FBC 2023), Florida Statutes Chapter 162,** and local zoning ordinances. HBC integrates code compliance with sustainable design, accessibility, and energy-modeling practices to deliver projects that exceed regulatory standards while promoting long-term performance and community well-being.

Building Code Analysis

HBC's code specialists and design professionals perform full-scope analyses to ensure each project meets applicable codes from schematic design through occupancy. Our services encompass structural, fire-life-safety, mechanical, electrical, plumbing, and accessibility provisions. HBC routinely coordinates with Building Officials, Fire Marshals, and Planning & Zoning staff to ensure compliance reviews are thorough, accurate, and aligned with local adoption of the Florida Building Code.

Plans Review Services

HBC understands the importance of thoroughly evaluating construction plans to ensure full compliance with applicable codes and regulations. Our team will conduct detailed reviews across multiple disciplines, **structural, electrical, mechanical, plumbing, and zoning,** to ensure alignment with the Town's requirements. By identifying potential issues early in the process, we help prevent costly modifications during construction, facilitating smoother project execution.

Inspection Services

HBC's team of certified inspectors brings extensive expertise in conducting on-site inspections. We ensure that construction projects comply with approved plans and meet all safety and code requirements. Our inspectors are certified by the **Miami-Dade County Board of Rules and Appeals (BORA),** ensuring that they are fully qualified to perform the required inspections. HBC's inspection staff will also possess valid **Florida driver's licenses and assigned company vehicles,** ensuring they can travel legally to various sites for field inspections.

In addition to standard inspections, our team is fully equipped to handle specialized and emergency inspections as needed. Each inspector is equipped with **mobile devices** to stay connected and receive real-time updates, and they will also carry **OSHA-required Personal Protective Equipment (PPE),** such as steel toe shoes, hard hats, and high-visibility vests, ensuring compliance with safety standards while performing inspections.

Accessibility Standards

HBC ensures that all designs meet or exceed the **Americans with Disabilities Act (ADA)** and **Florida Accessibility Code for Building Construction (FACBC)**. Our accessibility reviews begin at concept design and continue through construction documentation to confirm barrier-free access for all users. Our capabilities include ADA/FACBC plan reviews, accessible route layout, tactile and signage requirements, restroom and fixture clearances, and construction compliance inspections.

Sustainability Strategy

HBC integrates sustainability principles into every project, aligning with **LEED, Florida Green Building Coalition (FGBC)**, and Energy Star certification frameworks. Our sustainable-design specialists evaluate materials, energy performance, and water efficiency to reduce environmental impact and operational costs while supporting Town's goals for resiliency and stewardship. Our team will provide sustainable-design benchmarking, LEED/

FGBC certification documentation, lifecycle cost analysis, and stormwater and heat-island mitigation strategies.

Energy Modeling and Performance Analysis

HBC's energy engineers develop predictive models to evaluate energy performance and code compliance under **FBC Energy Conservation Volume II** and **ASHRAE 90.1.** Our approach optimizes mechanical systems, lighting, and envelope design to meet or exceed minimum energy-efficiency standards while maximizing occupant comfort. HHBC team will provide energy simulation (IES-VE, eQUEST, DOE-2), envelope and HVAC optimization, life-cycle cost and payback analyses, and compliance documentation for permitting.

Knowledge of Codes and Regulations

HBC demonstrates in-depth knowledge of the **Florida Building Code (2023), Florida Fire Prevention Code, Florida Energy Conservation Code, ADA,** and **ICC Standards.** Our staff maintains ongoing training and certification through the **Florida Building Code Administrator and Inspectors Board (BCAIB)** and participates in continuing education on evolving building and energy codes. This ensures that Town of Pembroke Park's projects remain compliant with the latest regulatory updates and best practices in sustainable development.

Our Code Compliant and Plan Review Division will be led by **Sonny Abia, PhD, PE (HBC)** and **Roberto Moreno, EC, BN, PX, CBO, CFM (HBC).** HBC's multidisciplinary expertise enables the Town of Pembroke Park to achieve regulatory compliance, accessibility, and sustainability objectives efficiently and transparently.

CONSTRUCTION ENGINEERING AND INSPECTION (CEI)

The HBC Team's focus on every project is to deliver value through safe, high-quality, and efficiently constructed infrastructure that meets the expectations of the Town and the public. Public health, safety, and welfare are central to our work, whether serving as Engineer of Record, Construction Engineering Inspection (CEI), or Construction Administrator. Our engineers collaborate closely with field inspectors, bringing both design and field perspectives that enhance constructability and decision-making. Lessons learned from years of construction management experience are applied to every design, supported by detailed documentation, consistent communication, and a rigorous QA/QC program.

HBC's construction management approach emphasizes proactive coordination, transparency, and accountability. Prior to pre-construction, we conduct kickoff meetings with Town representatives to establish communication protocols and project expectations. Throughout construction, our team maintains direct communication with the Town's Project Manager, providing regular progress updates, addressing non-compliance, and implementing a Community Action Plan to minimize public disruption. We perform timely reviews of shop drawings, RFIs, and contractor schedules, ensuring that delays and potential risks are promptly identified and mitigated.

Our inspectors maintain comprehensive records through electronic and hard-copy filing systems, including photos, videos, and drone documentation approved under applicable regulations. We enforce contract compliance, verify materials and testing documentation, and issue non-conformance reports where necessary. HBC also provides cost estimating, pay application review, and change order evaluation to ensure fiscal integrity. Acting as an extension of the Town, we coordinate seamlessly among contractors, designers, and stakeholders to maintain progress, quality, and safety, delivering projects that reflect the Town's commitment to excellence.

Our Construction Engineering and Inspection (CEI) discipline will be led by **Christopher Soto, PE (HBC),** with over 13 years of experience, to ensure all identified conflicts are properly addressed and will not arise as claims during construction. We will use Bluebeam Studio to record interdisciplinary and constructability reviews.

PROJECT MANAGEMENT APPROACH

HBC is ready to support the Town of Pembroke Park in this Continuing Service Contract (CSC) supported by our experience managing several contracts with similar scope in South Florida and more specifically in Palm Beach County (PBC), City of Delray Beach, City of Homestead, and Florida Department of Transportation (FDOT). HBC is currently the prime consultant for the PBC Traffic Annual Services Contract, FDOT D4 CCS, FDOT D4 Traffic Operations Data Collection, and FDOT D6 Districtwide Scoping Report.

We understand that effective communication with the Town of Pembroke Park representatives, subconsultants, external agencies, and stakeholders is crucial for the success of this contract and any Task Work Order (TWO) assignment under this contract. The proposed HBC Contract Manager (CM) and single point of contact, Hernan Lugo, PE, CFM, MS, is a proactive leader committed to being available around the clock. He possesses firsthand experience working on this type of contract. Hernan's experience includes management of several CCS for Palm Beach County (PBC) and the Florida Department of Transportation (FDOT). The knowledge and experience with similar types of contracts ensure that the communication protocols and design services will meet the Town's high standards.

Due to the broad scope of work of this project, a tailored Project Management Plan (PMP) will be developed to document the approach to be used to successfully certify each TWO assignments for construction. This approach is based on promoting proactive communication and efficient, organized, and timely completion of the project tasks according to the schedule, budget, and contract requirement by defining and establishing a detailed scope of work, associated risk, necessary task sequencing, quality control, budget control, resources allocation, and schedule control. This PMP will include all communication protocols to maintain open communication channels with the Town's representatives and among all project stakeholders. These communication protocols will be established at the project kickoff meeting, including designated points of contact, communication channels, and response times. We will utilize collaborative project management software, such as Microsoft Teams, to facilitate real-time communication and document sharing.

As part of HBC culture, communication between HBC's Contract Manager and the Town's representative is vital for the success of any contract. We strive to respond to emails and phone calls within a 2-hours window, respond to construction RFI's within 24 hours, and to provide meeting minutes within 48 hours. In addition to this, the HBC Team includes a Public Involvement unit to ensure that community members have multiple opportunities to participate during the design process. Our approach to public involvement is flexible and adaptable, recognizing that engagement activities should be tailored to match the magnitude and complexity of each project. We have experience with hybrid and in-person public meetings, hearings, and workshops.

Managing CSC requires an enhanced level of attentiveness to see TWO assignments through to completion. As such, we will focus on proactive, responsive service and quality production, ensuring accountability from ALL staff. Project files will be shared with the entire team via HBC's ProjectWise site. We do the little things right, such as "over communicating" to keep the Town PM in the loop and acquiring information ourselves to avoid surprises. We also strive to streamline the process and be good partners to achieve a better outcome. This focused mindset gets elevated during the latter design phases, where sound engineering, correctness, and responsiveness are vital. We identify issues and manage them before they negatively impact the project by resolving them at the lowest levels and escalating to Town's PM for matters such as third-party roadblocks. HBC will manage all sub-consultants on the Team, bring our expertise to the table, and select the appropriate design team for each TWO assignment. We have previously worked with all our key Team members and are familiar with each person's strengths and expertise. Our goals are minimize the Town PM's involvement in each TWO and exceed the expectations of the Town PM on each TWO assignment.

The vast experience of our Team has enabled us to develop a proven and comprehensive approach to performing

the duties for Professional Engineering Services in accordance with this CCS and will be used to engage most of the TWOs assignments under this contract. The following general approach will be followed for all TWO's related to plan development:

1. Meet with the Town TWO PM to define the scope and expectations. Review the TWO schedule to ensure that the task can be completed within the term of the contract.
2. Perform a risk assessment, and based on the project scope, assign a team with the right blend of skills and experience levels.
3. Gather all existing information including but not limited to As-Builts, Right-of-Way (R/W) maps, surveys, maintenance records, previous studies, permits, GIS database.
4. Perform a field review with TWO Team and the Town staff to confirm scope and site conditions and ensure a clear and mutual understanding of the project's objectives, while identifying solutions focused on minimizing project risks, complexities, and reducing costs to the Town.
5. Refine scope of services and provide accurate staff hours estimate meeting the budget expectation for the Town PM for review/approval.
6. Negotiate and execute TWO and receive Notice to Proceed (NTP).
7. Rediscover project schedule.
8. Submit TWO specific QC Plan within 10 days of NTP.
9. Perform initial utility contact.
10. Develop preliminary design documents such as Basis of Design Report (BODR), Typical Section, Pavement Design, among others.
11. Prepare and submit permit applications
12. Project coordination with stakeholders, agencies, and Town Departments.
13. Prepare construction documents and deliverables for each phase submittal.
14. Identify and execute any Maintenance Memorandum of Agreement (MMOA) or Local Funding Agreements (LFA).
15. Obtain required clearances from the different Town Departments and other agencies having jurisdiction.
16. Public Involvement.
17. Secure License agreements/maintenance maps/easements.
18. Prepare specifications package and final estimates.
19. Keep Town PM appraised of status, utilizing Monthly Progress Reports, Progress Meetings, and interim emails. Progress Reports include activity, schedule, and financial details.
20. Reconcile unused funds back into the main contract after project letting and execute a TWO for post-design services if not included in the original TWO scope.
21. Support construction via RFI responses, shop drawing reviews and plan revisions.
22. Reconcile unused post-design funds back into main contract after final acceptance.

For Construction Engineering and Inspection (CEI) assignments, HBC is proposing an Emergency Rapid Response team that will be available 24/7 for any project needs, concerns, and emergencies. Our solution-oriented CEI Division is fully committed to this contract, ensuring 100% availability to meet the Town's needs. Our CEI Division consists of carefully selected local experts, including Senior Project Engineers, Project Administrators, Contract Support Specialists, Resident Compliance Specialists, Senior Inspectors, and Inspectors. These professionals bring extensive qualifications and a wealth of experience from successful CEI projects across Miami-Dade, Broward, and Plam Beach County, and FDOT. Our staff possesses over 75 years of combined CEI Roadway and Bridge Engineering experience, providing deep familiarity with the Town's

policies, procedures, and best practices. This knowledge aligns perfectly with the Town's goals and objectives for upcoming projects, enabling us to execute tasks efficiently and effectively without the need for a learning curve. Our experience with the Town equips us to handle any challenges that may arise during service on this contract. HBC's Project Administrators are seasoned Construction Engineers with a proven track record. They have the ability to visualize and understand both the overarching goals and the intricate details required for successful CEI execution on high-visibility projects. This comprehensive understanding ensures that each project is managed with attention to both strategic and detailed aspects. Our approach to CEI services is straightforward yet all-encompassing, ensuring the successful delivery of each project. We believe that success in CEI is rooted in providing safety-oriented, effective services that are delivered on time and within budget. Our strategy includes mitigating construction risks that could impact the community, business owners, and stakeholders.

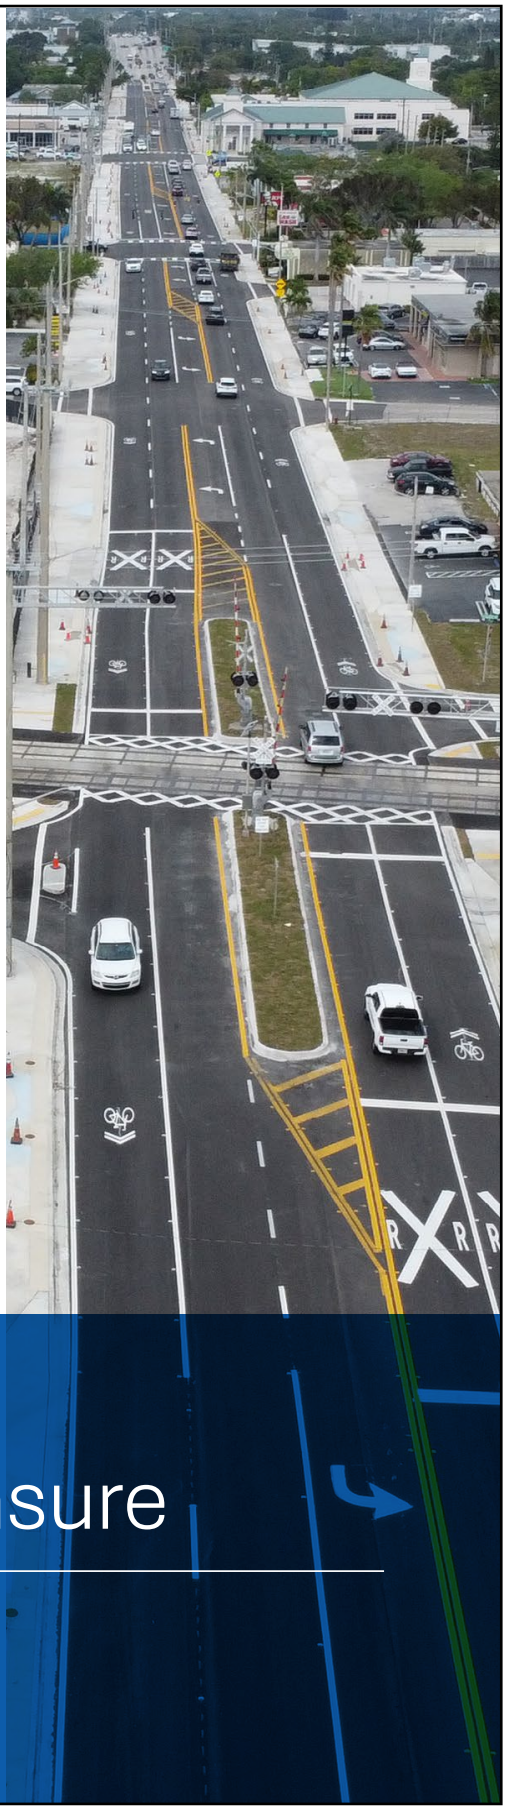
For non-standard TWOs, our CM will immediately assemble the staff needed and information to address the Town needs. Our commitment to you is that we are readily available to work on this contract from day one with no learning curve.

Permitting

HBC has extensive experience navigating the complex permitting and regulatory landscape for construction and improvement projects throughout Florida. Our extensive knowledge and resound professional relationships with the local and state regulatory bodies such as from Palm Beach County (PBC), Florida Department of Environmental Protection (FDEP), Florida Department of Transportation (FDOT), the South Florida Water Management District (SFWMD), South Florida Conservancy District, the Army Corp of Engineers (ACOE), Florida Department of Health (FDOH), and Florida Fish & Wildlife Conservation Commission (FWC) have enable us to successfully secured approvals for each project design by HBC. Our expertise extends to securing permits has led us to develop a proactive and strategic approach to managing the permitting process, ensuring timely submissions, approvals, and regulatory compliance. Additionally, we are well-versed in the requirements of the Town of Pembroke Park and Broward County, ensuring compliance with infrastructure, utilities, and stormwater management regulations.

Recognizing the specific needs of each TWO assignment is crucial to determine the necessary permit for each project. Our approach to permitting is built on early engagement with regulatory authorities, meticulous documentation, and continuous communication to streamline the approval process. We have a strong track record of efficiently managing site development permits, stormwater management approvals, environmental resource permits, building permits, and health department approvals. By anticipating potential permitting challenges and addressing them proactively, we ensure projects remain on schedule and compliant with all regulatory requirements. With our demonstrated expertise in regulatory compliance, we are committed to facilitating a smooth permitting process for each TWO assignment, ensuring all approvals are secured efficiently while upholding the highest standards of safety, environmental responsibility, and project execution.

LESSONS LEARNED: Our design team is actively involved in early coordination with the regulatory agency through pre-application meetings to identify and resolve potential problems that can result in permit delays. Timely response to Request for Additional Information (RAI) is key to expedite permit review.



Quality Assurance and Quality Control (QA/QC)

We understand that the quality of our work is the legacy we leave behind and that which represents our clients, which is why we pride ourselves in incomparable performance, relentless attention to detail, and unsurpassed quality. Throughout the years, HBC has provided industry expertise, timely submittals, and cost-effective service to a broad range of clients, while remaining competitive in the market, ensuring lasting relationships with all of our clients. As we continue to grow, we stand committed to this and we pledge to continue to strive for excellence and the personal attention you deserve. As such, quality is a priority for every project at HBC and exceeding our client expectations is our goal. To achieve the highest quality on every project, we have developed a rigorous

and effective five-steps quality control process with tracked performance. Additionally, a TWO-specific QA/QC plan will be developed for each TWO assigned to the HBC Team. This QA/QC plan will follow a five steps process where an independent reviewer reviews the plans and EOR reviews, agrees and revises plans accordingly, plans are returned to QA/QC department to ensure all comments have been addressed. Reviewers are required to conduct a field visit prior to performing a review to familiarize themselves with site specific conditions and to fully understand the design. All the markup plans, review reports, checklists and other documentation part of the QA/QC process are properly filed. Sub-consultants will be required by contract to follow HBC's QA/QC plan and project schedules will allow adequate time for QA/QC prior to each phase submittal, minimizing the comments received through ERC and allowing to close each review phase faster to move on to the next design phase. QA/QC effort will be led by Mr. Edgar Diaz, P.E with over 38 years of experience in the industry. Mr. Diaz will work hand-to-hand with Mr. Lugo and sub-consultants, to ensure QA/QC plan is properly implemented. Additionally, a constructability review will be performed by our Construction Engineering and Inspection (CEI) Manager Mr. Christopher Soto, PE with over 13 years of experience, to ensure all identified conflicts are properly addressed and will not arise as claims during construction. We will use Bluebeam Studio to record interdisciplinary and constructability reviews. This method ultimately minimizes redundant comments, while improving the overall quality of the review process. The HBC Team will maintain adequate records of the reviews. A marked-up set of prints from the QC review will be included with each review submittal. The responsible professional engineer or professional surveyor that performed the QC review, as well as the QC Manager, will sign a statement certifying that the review was conducted.

HBC has a proven track record of providing our clients with construction documents that minimize claims, supplemental agreements, and delays. Our team's effective collaboration with sub-consultants and contractors ensures that communication lines are well-established across all disciplines. Our management approach emphasizes clarity from the outset, setting the framework for controlling scope, schedule, and budget. We clearly define the responsibilities and authority of all project participants. Our PM, Hernan Lugo, PE, CFM, MS, will serve as your primary point of contact, ensuring direct and consistent communication throughout the project. To address potential deviations from the schedule caused by economic shortages, long lead times, or adverse weather, we will request recovery schedules from contractor(s) as needed. Our goal is to maintain zero negative floats for both substantial and final completions. We employ two-week lookahead schedules to focus on critical path activities, allowing us to anticipate potential delays. This proactive strategy helps us stay ahead of issues, ensuring the construction and funding schedules remain on track. By anticipating challenges and adjusting plans accordingly, we strive to deliver projects on time and within budget despite external constraints. Additionally, HBC will analyze construction schedules based on the critical path method (CPM) for logical and attainable production rates which comply with project contractual requirements. HBC is experienced in Primavera P6 and Microsoft Projects software used for Project Scheduling. HBC will monitor progress throughout construction of the project, discuss construction progress with all project stakeholders in biweekly progress meetings and issue monthly progress reports documenting progress. Should the schedule slip, HBC will meet the contractor and project representatives to discuss schedule recovery methods. HBC will execute contract maintenance throughout the duration of project.

6. Professional Licensure

HBC

HBC Engineering Company's Business Licensure

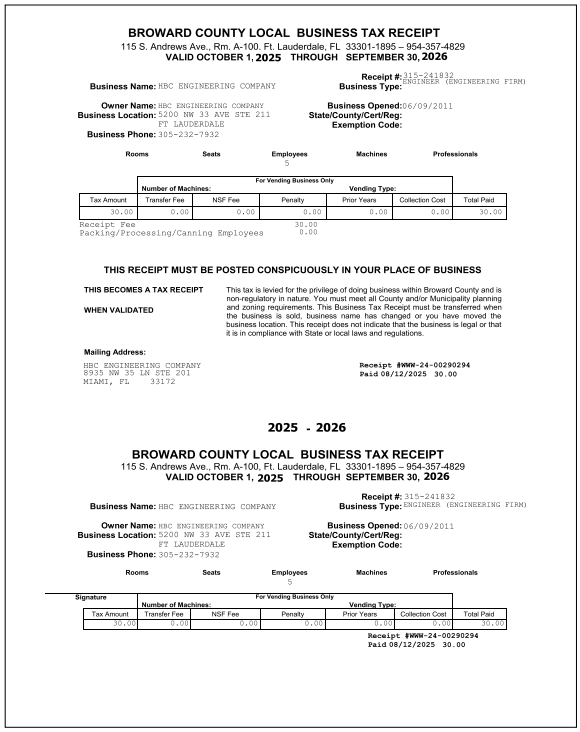
State of Florida
Department of State

I certify from the records of this office that HBC ENGINEERING COMPANY is a corporation organized under the laws of the State of Florida, filed on June 15, 2006.

The document number of this corporation is P06000082280.

I further certify that said corporation has paid all fees due this office through December 31, 2025, that its most recent annual report/uniform business report was filed on January 2, 2025, and that its status is active.

I further certify that said corporation has not filed Articles of Dissolution.



Given under my hand and the Great Seal of the State of Florida at Tallahassee, the Capital, this the Second day of January, 2025

Secretary of State

Tracking Number: 9678191690CC

To authenticate this certificate,visit the following site,enter this number, and then follow the instructions displayed.

acoker@hbcengineeringco.com

Dear Mr. Coker:

The Florida Department of Transportation has reviewed your application for prequalification package and determined that the data submitted is adequate to technically prequalify your firm for the following professional services types of work per Rule 14-75, F.A.C.:

2.0 - Project Development & Environmental (PD&E) Studies

3.1 - Minor Highway Design

3.2 - Major Highway Design
3.3 - Controlled Access Highway Design

4.1.1 - Miscellaneous Structures

4.1.2 - Minor Bridge Design

5.4 - Bridge Load Rating

6.1 - Traffic Engineering Studies

6.2 - Traffic Signal Timing
6.3.1 - Intelligent Transportation Systems Analysis and Design
6.3.2 - Intelligent Transportation Systems Implementation

Approval Date: June 23, 2023 Small Business Enterprise - Goods & Services (SBE-G&S)
Expiration Date: August 31, 2026

Dear Esther C. Monzon-Aguirre,

Miami-Dade County Small Business Development (SBD), a division of the Internal Services Department (ISD), has completed the review of your application and attachments submitted for certification. Your firm is officially certified as a Miami-Dade County Small Business Enterprise. The Small Business Enterprise (SBE) programs are governed by Sections 2-8.1.1.1.1; 2-8.1.1.1.2; 2-10.4.01; 10-33.02 of Miami-Dade County's Codes. This Small Business Enterprise - Goods & Services (SBE-G&S) certification is valid for three (3) years. However, to validate continuing eligibility, SBD may conduct random audit(s) within the three (3) year certification period. **Failure to provide required documentation for a random audit will initiate the decertification process.**

At the time of expiration, your firm will submit a Re-certification Application at least one hundred and eighty (180) days, but not less than, ninety (90) days, prior to the end of the three (3) year certification term via the County's web-based system, Business Management Workforce System (BMWS). This will ensure sufficient time for process by SBD. **Failure to provide the re-certification application and required supporting documentation will initiate the decertification process.**

If at any time there is a material or business structure change in the firm including, but not limited to, ownership, officers, director, scope of work being performed, daily operations, affiliation(s) with other businesses or the physical location of the firm, you must notify this office within thirty (30) calendar days of the effective date of the change(s) via the BMWS. Notification should include supporting documentation. You will receive timely instructions from this office as to how you should proceed, if necessary. **Failure to notify SBD of any changes may result in immediate action to decertify the firm.**

This letter will be the only approval notification issued for the duration of your firm's three-year certification. If the firm attains graduation or becomes ineligible during the three-year certification period, you will be properly notified following an administrative process that your firm's certification has been removed pursuant to the code. Your firm's name and tier level will be listed in the directory for all SBE certified firms, which can be accessed through Miami-Dade County's SBD website: https://www.miamidade.gov/global/business/small-business-home.page. The categories as listed below affords you the opportunity to bid and participate on contracts with Small Business Enterprise measures.

It is strongly recommended that you register your firm as a bidder with Miami-Dade County. To register, you may visit: https://www.miamidade.gov/global/business/procurement/home.page. Thank you for your interest in doing business with Miami-Dade County. If you have any questions or concerns, you may contact our office at 305-375-3111 or via email at sbdcert@miamidade.gov.

Sincerely,

Jeanise Cummings-Labossiere
Section Chief, Small Business Development

Approval Date: June 9, 2025 - Disadvantaged Business Enterprise (DBE)
Anniversary Date: February 8, 2026

Dear Esther C. Monzon-Aguirre,

Miami-Dade County Office of Small Business Development (SBD), is pleased to notify you that your firm is certified under the Florida Unified Certification Program (UCP). Your firm meets the eligibility requirements for certification as a Disadvantaged Business Enterprise (DBE) in accordance with 49 CFR Part 26.

DBE certification is continuous with no expiration date; however, firms are required to attest that there are no changes via the No Change Declaration form on or before the firm's anniversary date to remain certified. You will be notified of your annual responsibilities in advance of the Anniversary Date listed above. You must submit the annual No Change Declaration form no later than the Anniversary Date to maintain your eligibility. Your firm will be listed in the UCP DBE Directory which can be accessed through the Florida Department of Transportation's website: http://www3b.dot.state.fl.us/EqualOpportunityOfficeBusinessDirectory/.

DBE certification is NOT a guarantee of work, but it enables the firm to compete for and perform contract work on all USDOT Federal Aid (FAA, FTA and FHWA) projects in Florida as a DBE contractor, sub-contractor, consultant, sub-consultant or material supplier.

If at any time there is a material change in your firm, you must advise this office by sworn affidavit and supporting documentation within thirty (30) days. Changes include, but are not limited to ownership, officers, directors, management, key personnel, scope of work performed, daily operations, on-going business relationships with other firms, individuals or the physical location of your firm. After our review, you will receive instructions as to how you should proceed, if necessary. Failure to comply will result in action to remove your firm's DBE certification.

It is strongly recommended that you register your firm as a vendor with Miami-Dade County. To register, you may visit: http://www.miamidade.gov/procurement/vendor-registration.asp. Thank you for your interest in doing business with Miami-Dade County. If you have any questions or concerns, you may contact our office at 305-375-3111 or sbdcert@miamidade.gov.

Sincerely,

Jeanise Cummings-Labossiere
Section Chief, Small Business Development

Dear Mr. Zoltek:

The Florida Department of Transportation has reviewed your application for prequalification package and determined that the data submitted is adequate to technically prequalify your firm for the following professional services types of work per Rule 14-75, F.A.C.:

8.1 - Control Surveying
8.2 - Design, Right of Way & Construction Surveying
8.3 - Photogrammetric Mapping
8.4 - Right of Way Mapping

Your firm is now technically prequalified with the Department for Professional Services in the above referenced work types. The overhead audit has been accepted, and your firm may pursue projects in the referenced work types with fees of any dollar amount. This status shall be valid until June 30, 2026, for contracting purposes.

Approved Rates

Dear Mr. Sanchez:

The Florida Department of Transportation has reviewed your application for prequalification package and determined that the data submitted is adequate to technically prequalify your firm for the following professional services types of work per Rule 14-75, F.A.C.:

14.0 - Architect

Your firm is now technically prequalified with the Department for Professional Services in the above referenced work types. Your firm may pursue projects in the referenced work types with fees estimated at less than $500,000.00.* This status shall be valid until September 30, 2026, for contracting purposes.
*Limit for FDOT projects only

Should you have any questions, please feel free to contact me by email at FDOT.PSPrequalification@dot.state.fl.us.

Sincerely,

Philip Pitts

MIAMI, FL 33186

Approval Date: October 17, 2024 - Disadvantaged Business Enterprise (DBE)
Anniversary Date: March 19, 2026

Dear Julio Sanchez,

Miami-Dade County Office of Small Business Development (SBD), is pleased to notify you that your firm is certified under the Florida Unified Certification Program (UCP). Your firm meets the eligibility requirements for certification as a Disadvantaged Business Enterprise (DBE) in accordance with 49 CFR Part 26.

DBE certification is continuous with no expiration date; however, firms are required to attest that there are no changes via the No Change Declaration form on or before the firm's anniversary date to remain certified. You will be notified of your annual responsibilities in advance of the Anniversary Date listed above. You must submit the annual No Change Declaration form no later than the Anniversary Date to maintain your eligibility. Your firm will be listed in the UCP DBE Directory which can be accessed through the Florida Department of Transportation's website: http://www2b.dot.state.fl.us/EqualOpportunityOfficeBusinessDirectory/.

DBE certification is NOT a guarantee of work, but it enables the firm to compete for and perform contract work on all USDOT Federal Aid (FAA, FTA and FHWA) projects in Florida as a DBE contractor, sub-contractor, consultant, sub-consultant or material supplier.

If at any time there is a material change in your firm, you must advise this office by sworn affidavit and supporting documentation within thirty (30) days. Changes include, but are not limited to ownership, officers, directors, management, key personnel, scope of work performed, daily operations, on-going business relationships with other firms, individuals or the physical location of your firm. After our review, you will receive instructions as to how you should proceed, if necessary. Failure to comply will result in action to remove your firm's DBE certification.

It is strongly recommended that you register your firm as a vendor with Miami-Dade County. To register, you may visit: http://www.miamidade.gov/procurement/vendor-registration.asp. Thank you for your interest in doing business with Miami-Dade County. If you have any questions or concerns, you may contact our office at 305-375-3111 or sbdcert@miamidade.gov.

Sincerely,

Jeanise Cummings-Labossiere
Section Chief, Small Business Development

NAICS & Industry Title: (Your firm is eligible to compete for and perform work on all USDOT Federal Aid projects throughout Florida and may earn DBE or ACDBE credit for work performed in the following areas.)

October 18, 2024

Julio Sanchez
JSA Group, Inc.
12229 SW 132ND COURT
MIAMI, FL 33186-6480

Approval Date: March 27, 2023 Small Business Enterprise - Architectural & Engineering (SBE-A&E)
Expiration Date: April 30, 2026

Dear Julio Sanchez,

Miami-Dade County Office of Small Business Development (SBD), has completed the review of your application and attachments submitted for certification. Your firm is officially certified as a Miami-Dade County Small Business Enterprise. The Small Business Enterprise (SBE) programs are governed by Sections 2-8.1.1.1.1; 2-8.1.1.1.2; 2-10.4.01; 10-33.02 of Miami-Dade County's Codes. This Small Business Enterprise - Architectural & Engineering (SBE-A&E) certification is valid for three (3) years. However, to validate continuing eligibility, SBD may conduct random audit(s) within the three (3) year certification period. **Failure to provide required documentation for a random audit will initiate the decertification process.**

At the time of expiration, your firm will submit a Re-certification Application at least one hundred and eighty (180) days, but not less than, ninety (90) days, prior to the end of the three (3) year certification term via the County's web-based system, Business Management Workforce System (BMWS). This will ensure sufficient time for process by SBD. **Failure to provide the re-certification application and required supporting documentation will initiate the decertification process.**

If at any time there is a material or business structure change in the firm including, but not limited to, ownership, officers, director, scope of work being performed, daily operations, affiliations(s) with other businesses or the physical location of the firm, you must notify this office within thirty (30) calendar days of the effective date of the change(s) via the BMWS. Notification should include supporting documentation. You will receive timely instructions from this office as to how you should proceed, if necessary. **Failure to notify SBD of any changes may result in immediate action to decertify the firm.**

This letter will be the only approval notification issued for the duration of your firm's three-year certification. If the firm attains graduation or becomes ineligible during the three-year certification period, you will be properly notified following an administrative process that your firm's certification has been removed pursuant to the code. Your firm's name and tier level will be listed in the directory for all SBE certified firms, which can be accessed through Miami-Dade County's SBD website: https://www.miamidade.gov/global/business/small/business/home.page. The categories as listed below affords you the opportunity to bid and participate on contracts with Small Business Enterprise measures.

It is strongly recommended that you register your firm as a bidder with Miami-Dade County. To register, you may visit: https://www.miamidade.gov/global/business/procurement/home.page. Thank you for your interest in doing business with Miami-Dade County. If you have any questions or concerns, you may contact our office at 305-375-3111 or via email at sbdcert@miamidade.gov.

Sincerely,

Jeanise Cummings-Labossiere
Section Chief, Small Business Development

ANNIVERSARY DATE - Annually on December 10

Dear Ms. Vera:

The Florida Department of Transportation (FDOT) is pleased to announce that your firm has been certified under Florida's Unified Certification Program (UCP) as a Disadvantaged Business Enterprise (DBE) in accordance with 49 Code of Federal Regulation Part 26.

DBE Certification is continuing, but it is contingent upon the firm maintaining its eligibility annually through this office. You will be notified of your annual responsibilities in advance of the Anniversary Date. You must submit the annual AFFIDAVIT FOR CONTINUING ELIGIBILITY no later than the Anniversary Date.

Only firms listed in the UCP DBE Directory are certified by Florida UCP Members. Prime contractors and consultants should verify your firm's DBE certification status, and identify the work area(s) for which the firm is DBE eligible, through this Directory.

Your firm will be listed in Florida's UCP DBE Directory which can be accessed through the Department's website: www.dot.state.fl.us/equalopportunityoffice and then selecting "DBE Directory".

DBE certification is not a guarantee of work. It allows your firm to compete for and perform contract work on ALL USDOT Federal Aid (FAA, FTA, and FHWA) projects in Florida as a DBE contractor, sub-contractor, consultant, sub-consultant or material supplier.

If, at any time there is a material change you must advise this office by sworn affidavit and supporting documents, within thirty (30) days. Changes include, but are not limited to, ownership, officers, directors, management, key personnel.

Wesley Foster, President
PACIFICA ENGINEERING SERVICES, LLC
601 N Congress Avenue
Suite 303
Delray Beach, FL 33445

Dear Mr. Foster:

The Florida Department of Transportation has reviewed your application for prequalification package and determined that the data submitted is adequate to technically prequalify your firm for the following professional services types of work per Rule 14-75, F.A.C.:

9.1 - Soil Exploration
9.2 - Geotechnical Classification Lab Testing
9.3 - Highway Materials Testing
9.4.1 - Standard Foundation Studies
9.5 - Geotechnical Specialty Lab Testing

10.1 - Roadway Construction Engineering Inspection
10.3 - Construction Materials Inspection

Your firm is now technically prequalified with the Department for Professional Services in the above referenced work types. The overhead audit has been accepted, and your firm may pursue projects in the referenced work types with fees of any dollar amount. This status shall be valid until June 30, 2026, for contracting purposes.

Approved Rates

Home Overhead	Facilities Capital Cost of Money (FCCM)	Premium Overtime	Home Direct Expense	Published Fee Schedule
151.84%	0.000%	Excluded	0.07%	Yes

*Rent and utilities excluded from field office rate. These costs will be directly reimbursed on contracts that require the consultant to provide field office.

1

Per Title 23, U.S. Code 112, there are restrictions on sharing indirect cost rates. Refer to Code for additional information.

Should you have any questions, please feel free to contact me by email at FDOT.PSPrequalification@dot.state.fl.us.

Jose M Vidal
V3 Architectural Group, Inc.
8103 NW 33RD STREET
DORAL, FL 33122

Approval Date: March 31, 2025 Small Business Enterprise - Architectural & Engineering (SBE-A&E)
Expiration Date: March 31, 2028

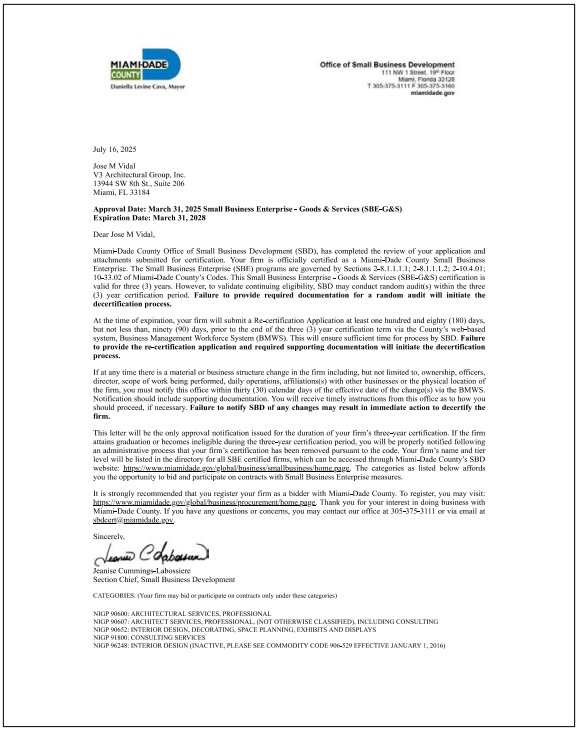
Dear Jose M Vidal,

Miami-Dade County Office of Small Business Development (SBD), has completed the review of your application and attachments submitted for certification. Your firm is officially certified as a Miami-Dade County Small Business Enterprise. The Small Business Enterprise (SBE) programs are governed by Sections 2-8.1.1.1.1; 2-8.1.1.1.2; 2-10.4.01; 10-33.02 of Miami-Dade County's Codes. This Small Business Enterprise - Architectural & Engineering (SBE-A&E) certification is valid for three (3) years. However, to validate continuing eligibility, SBD may conduct random audit(s) within the three (3) year certification period. **Failure to provide required documentation for a random audit will initiate the decertification process.**

At the time of expiration, your firm will submit a Re-certification Application at least one hundred and eighty (180) days, but not less than, ninety (90) days, prior to the end of the three (3) year certification term via the County's web-based system, Business Management Workforce System (BMWS). This will ensure sufficient time for process by SBD. **Failure to provide the re-certification application and required supporting documentation will initiate the decertification process.**

If at any time there is a material or business structure change in the firm including, but not limited to, ownership, officers, director, scope of work being performed, daily operations, affiliations(s) with other businesses or the physical location of the firm, you must notify this office within thirty (30) calendar days of the effective date of the change(s) via the BMWS. Notification should include supporting documentation. You will receive timely instructions from this office as to how you should proceed, if necessary. **Failure to notify SBD of any changes may result in immediate action to decertify the firm.**

This letter will be the only approval notification issued for the duration of your firm's three-year certification. If the firm attains graduation or becomes ineligible during the three-year certification period, you will be properly notified following an administrative process that your firm's certification has been removed pursuant to the code. Your firm's name and tier level will be listed in the directory for all SBE certified firms, which can be accessed through Miami-Dade County's SBD website: https://www.miamidade.gov/global/business/smallbusiness/home.page. The categories as listed below affords you the opportunity to bid and participate on contracts with Small Business Enterprise measures.



It is strongly recommended that you register your firm as a bidder with Miami-Dade County. To register, you may visit: https://www.miamidade.gov/global/business/procurement/home.page. Thank you for your interest in doing business with Miami-Dade County. If you have any questions or concerns, you may contact our office at 305-375-3111 or via email at sbdcert@miamidade.gov.

Sincerely,

Jeanise Cummings-Labossiere
Section Chief, Small Business Development

Expiration Date: March 31, 2028

Dear Jose M Vidal,

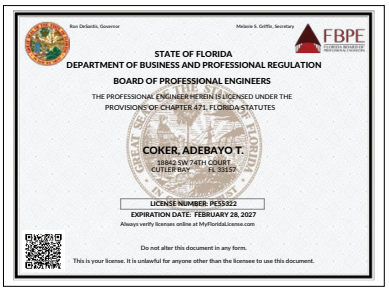
Miami-Dade County Office of Small Business Development (SBD), has completed the review of your application and attachments submitted for certification. Your firm is officially certified as a Miami-Dade County Small Business Enterprise. The Small Business Enterprise (SBE) programs are governed by Sections 2-8.1.1.1.1; 2-8.1.1.1.2; 2-10.4.01; 10A33.02 of Miami-Dade County's Codes. This Small Business Enterprise - Goods & Services (SBE-G&S) certification is valid for three (3) years. However, to validate continuing eligibility, SBD may conduct random audit(s) within the three (3) year certification period. **Failure to provide required documentation for a random audit will initiate the decertification process.**

At the time of expiration, your firm will submit a Re-certification Application at least one hundred and eighty (180) days, but not less than, ninety (90) days, prior to the end of the three (3) year certification term via the County's web-based system, Business Management Workforce System (BMWS). This will ensure sufficient time for process by SBD. **Failure to provide the re-certification application and required supporting documentation will initiate the decertification process.**

If at any time there is a material or business structure change in the firm including, but not limited to, ownership, officers, director, scope of work being performed, daily operations, affiliations(s) with other businesses or the physical location of the firm, you must notify this office within thirty (30) calendar days of the effective date of the change(s) via the BMWS. Notification should include supporting documentation. You will receive timely instructions from this office as to how you should proceed, if necessary. **Failure to notify SBD of any changes may result in immediate action to decertify the firm.**

This letter will be the only approval notification issued for the duration of your firm's three-year certification. If the firm attains graduation or becomes ineligible during the three-year certification period, you will be properly notified following an administrative process that your firm's certification has been removed pursuant to the code. Your firm's name and tier level will be listed in the directory for all SBE certified firms, which can be accessed through Miami-Dade County's SBD website: https://www.miamidade.gov/global/business/smallbusiness/home.page. The categories as listed below affords you the opportunity to bid and participate on contracts with Small Business Enterprise measures.

It is strongly recommended that you register your firm as a bidder with Miami-Dade County. To register, you may visit: https://www.miamidade.gov/global/business/procurement/home.page. Thank you for your interest in doing business with Miami-Dade County. If you have any questions or concerns, you may contact our office at 305-375-3111 or via email at sbdcert@miamidade.gov.



Sincerely,

Jeanise Cummings-Labossiere
Section Chief, Small Business Development

HBC

SECTION 6.0 REQUIRED FORMS

Business Name: HBC Engineering Company

D.B.A.: N/A Federal I.D. No.: 22-3936061

Business Address: 5200 NW 33rd Avenue, Suite 211

City : Fort Lauderdale State: FL Zip: 33309

1. Acknowledgement of Addendum

By responding to this sealed Solicitation, the Bidder/Proposer makes all representations required by the Solicitation and further warrants and represents that Bidder/Proposer acknowledges that it has received and examined copies of the entire Solicitation documents including all of the following addenda:

Addendum No.: 1 Dated: 10/22/2025 Addendum No.: 3 Dated: 11/05/2025

Addendum No.: 2 Dated: 11-04-2025 Addendum No.: Dated:

☐ No Addendum Issued

2. Conflicts of Interest*

Respondent covenants that it presently has no interest and shall not acquire any interest which would conflict in any manner of degree with the performance of the Services covered under this Agreement. Furthermore, Respondent warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for Respondent to solicit or secure this Agreement and that it has not paid or agreed to pay any person, company, corporation, individual, or firm, other than a bona fide employee working solely for Respondent any fee, commission, percentage, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Respondent, and its subconsultants at any tier, certify that they have not entered into any contract, subcontract, or arrangement in connection with the Project covered under this Agreement, or of any property included or planned to be included in the Project, in which any member, officer, of employee of Respondent or its subconsultants, during its tenure, or for two years thereafter, has any interest, direct or indirect. Respondent, and its subconsultants at any tier, shall insert the following provision into each of their contracts and subcontracts: "No member, officer, or employee of the subconsultant, during their tenure or for two years thereafter, shall have any interest, direct or indirect, in this contract or the proceeds thereof."

Do you have any Conflicts of Interest to report?

☐ Yes

☑ No

**Response required*

When equals "Yes" Please upload a document listing all your Conflict of Interest

3. No Contingency Affidavit*

Affiant certifies the following:

a. Neither Firm nor any principal, employee, agent, representative or family member has promised to pay, and Firm has not and will not pay, a fee the amount of which is contingent upon the Town of Pembroke Park awarding a contract.

b. Firm warrants that neither it, nor any principal, employee, agent, or representative has procured, or attempted to procure, a contract with the Town of Pembroke Park in violation of any of the provisions of the Broward County conflict of interest and code of ethics ordinances.

c. Consultant acknowledges that a violation of this warranty may result in the termination of any contracts and forfeiture of funds paid, or to be paid, to the Consultant if awarded a contract.

☑ Please Confirm

**Response required*

4. Copeland Anti-Kickback Affidavit*

Affiant certifies that no portion of any sums will be paid to any employees of the Town of Pembroke Park, its elected officials, or its consultants, as a commission, kickback, reward or gift, directly or indirectly by Proposer or any member of Proposer's firm or by any officer of the corporation in exchange for business with the Town of Pembroke Park.

☑ Please Confirm

**Response required*

5. Certifications*

Respondent certifies that they comply (or will comply) with the statements concerning, but not limited to: Compliance with Laws, Conflict of Interest, Convictions, Debarment, Discriminatory Vendor, Drug Free Workplace, Equal Employment Opportunity, E-Verification System, Gopher Tortoise Relocation, Immigration and Nationality Act, Lobbying, Non-Collusion, Prohibited Interests, Public Entity Crime and Scrutinized Companies.

☑ Please Confirm

**Response required*

6. Compliance with Laws*

Respondent shall comply with all laws, rules, codes, ordinances, and licensing requirements that are applicable to the conduct of its business, including those of Local, State and Federal agencies having jurisdiction and authority. These laws, shall include, but not be limited to, Chapter 287, Florida Statutes, the Uniform Commercial Code, the Immigration and Nationalization Act, the Americans with Disabilities Act, the United States Occupational Safety and Health Act, the United States Environmental Protection Agency, the State of Florida Department of Environmental Protection, Code of Federal Regulations and all prohibitions against discrimination on the basis of race, religion, sex, creed, national origin, handicap, marital status, sexual orientation, gender identity or expression or veteran's status. Violation of such laws shall be grounds for termination of the Agreement.

**Response required*

9. Drug-Free Workplace Certification*

In accordance with Florida Statute 287.087 (current version), Respondent hereby certifies the following:

1. Publishes a written statement notifying that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the workplace named above, and specifying actions that will be taken against violations of such prohibition.
2. Informs employees about the dangers of drug abuse in the workplace, the firm's policy of maintaining a drug free working environment, and available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug use violations.
3. Gives each employee engaged in providing commodities or contractual services that are under proposal a copy of the statement specified above.
4. Notifies the employees that as a condition of working on the commodities or contractual services that are under proposal, the employee **will** abide by the terms of the statement and will notify the employer of any conviction of, pleas of guilty or nolo contendere to, any violation of Chapter 893, or of any controlled substance law of the State of Florida or the United States, for a violation occurring in the workplace, no later than five (5) days after such conviction, and requires employees to sign copies of such written statement to acknowledge their receipt.
5. Imposes a sanction on, or requires the satisfactory participation in, a drug abuse assistance or rehabilitation program, if such is available in the employee's community, by any employee who is so convicted.
6. Makes a good faith effort to continue to maintain a drug free workplace through the implementation of the Drug Free Workplace Program.

"As a person authorized to sign this statement, I certify that the above named business, firm or corporation complies fully with the requirements set forth herein".

By clicking confirm below, Respondent certifies that the information as provided in this Drug-Free Workplace Certification, is truthful and correct at the time of submission.

13. Discriminatory Vendor*

Respondent certifies that they are not subject to Section 287.134 (2)(a) which specifies that an entity or affiliate who has been placed on the discriminatory vendor list may not submit a Proposal on a contract to provide any goods or services to

a public entity, may not submit a Proposal on a contract with a public entity for the construction or repair of a public building or public work, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with public entity.

☑ Please Confirm

**Response required*

14. Equal Employment Opportunity*

Respondent shall not discriminate on the basis of race, color, sex, sexual orientation, gender identity, age, national origin, religion, and disability or handicap in accordance with the Provisions of: Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000 et seq.), Title VII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), Florida Civil Rights Act of 1992 (§ 760.10 et seq.), Title 41 CFR Part 60 for compliance with Executive Orders 11246 and 11375, Title 49 CFR 23 and Title 49 CFR 26 for Disadvantaged Business Enterprises, Age Discrimination Act of 1975 (42 U.S.C. § 6101, et seq.), Title 49 CFR 21 and Title 49 CFR 23, Nondiscrimination on the basis of handicap, Title 49 CFR 27, Americans with Disabilities Act of 1990 (42 U.S.C. 12102, et. Seq.), Federal Fair Labor Standards Act (29 U.S.C. § 201, et seq.), and any other Federal and State discrimination statutes. Respondent shall furnish pertinent information regarding its employment policies and practices as well as those of their proposed subcontractors as the Secretary of Labor, or Town may require. The above shall be required of any subcontractor hired by Respondent. All Equal Employment Opportunity requirements shall be included in all non-exempt subcontracts entered into by Respondent. Subcontracts entered into by Respondent shall also include all other applicable labor provisions. No subcontract shall be awarded to any non-complying subcontractor. Additionally, Respondent shall insert in its subcontracts a clause requiring subcontractors to include these provisions in any lower tier subcontracts that may in turn be made. Respondent shall comply with all state laws and local ordinances, except that any preferential consideration of local in-state subcontractors is NOT allowed.

16. E-Verification Identification Number*

Provide your E-Verification Identification Number 444414

**Response required*

17. Immigration and Nationality Act*

Respondent shall comply with all immigration laws as outlined in 8 USC § 1324a- Unlawful employment of aliens. Town will not intentionally award Town contracts to any Respondent who knowingly employs unauthorized Alien workers . Any violation of the employment provisions outlined in the Immigration and Nationality Act throughout the term of any Agreement with Town may result in immediate termination of the Agreement. Town will consider the employment of unauthorized aliens a violation of Section 274A (e) of the Immigration and Nationality Act. Such violation will be cause for unilateral

cancellation of the Agreement, by Town, if Consultant knowingly employs unauthorized aliens.

☑ Please Confirm

**Response required*

18. Lobbying*

Respondent confirms that it will not, in connection with the Agreement, directly or indirectly

A. offer, confer, or agree to confer any pecuniary benefit on anyone as consideration for any Town officer or employee's decision, opinion, recommendation, vote, other exercise of discretion, or violation of a known legal duty, or
B. offer, give, or agree to give to anyone any gratuity for the benefit of, or at the direction or request of, any Town officer or employee. For purposes of clause (2), "gratuity" means any payment of more than nominal monetary value in the form of cash, travel, entertainment, gifts, meals, lodging, loans, subscriptions, advances, deposits of money, Services, employment, or contracts of any kind.

☑ Please Confirm

**Response required*

19. Non-Collusion*

Respondent agrees that neither it, nor any of its officers, partners, agents or employees have entered into any agreement, participated in any collusion, or otherwise taken any action which is in restraint of a free competitive solicitation in connection with this Agreement, and that Respondent intends to do the work with its own bona fide employees or subcontractors and has not provided a Proposal for the benefit of another Consultant/Vendor. Furthermore, Respondent certifies that its affiliates, subsidiaries, directors, officers, and employees are not currently under investigation by any governmental authority and have not in the last ten (10) years been convicted or found liable for any act prohibited by law in any jurisdiction, involving conspiracy or collusion with respect to submitting a Proposal on any public contract.

☑ Please Confirm

**Response required*

20. Prohibited Interests*

Respondent, and its subcontractors at any tier, certify that they have not entered into any contract, subcontract, or arrangement in connection with the project covered under this Request for Proposal, or of any property included or planned to be included in the project, in which any member, officer, of employee of the Respondent or its subconsultants, during its tenure, or for two years thereafter, has any interest, direct or indirect.

6.1 AFFIDAVIT ATTESTING TO NONCOERCIVE CONDUCT FOR LABOR OR SERVICES

Effective July 1, 2024, Section 787.06, Florida Statutes, a nongovernmental entity executing, renewing, or extending a contract with the Town of Pembroke Park is required to provide an affidavit, signed by an officer or a representative of the nongovernmental entity under penalty of perjury, attesting that the nongovernmental entity does not use coercion for labor or services as defined in Section 787.06(2)(a), Florida Statutes.

By signing below, **I hereby affirm under penalty of perjury that**:

1. I have read Section 787.06, Florida Statutes, and understand that this affidavit is provided in compliance with the requirement that, upon execution, renewal, or extension of a contract between a nongovernmental entity and the Town of Pembroke Park, the nongovernmental entity must attest to the absence of coercion in labor or services.

2. I am an officer or representative of HBC Engineering Company, a nongovernmental entity.

3. HBC Engineering Company does not use coercion for labor or services as defined in the relevant section of the law.

Asphalt Paving Levels 1 and 2

QA/QC Manager

TTC Advanced No. 38977

Expertise
Roadway design, Project Development and Environment (PD&E) studies, construction management, signalization, signing and pavement markings, Maintenance of Traffic (MOT), transportation planning, safety analysis, Quality Assurance/Quality Control (QA/QC).

Adebayo is a highly skilled transportation engineer with responsible and diversified experience in the planning, design, and construction management of major Florida Department of Transportation (FDOT) and Miami-Dade County transportation projects. His areas of expertise involve the production and management of all phases of roadway design projects, including preliminary and final design of limited/controlled access highways and freeways, signalization, signing and pavement markings, Maintenance of Traffic (MOT), rural and urban Resurfacing, Restoration, and Rehabilitation (RRR) projects, and Construction Engineering and Inspection (CEI). He has provided technical leadership on various public and private sector projects and has taken numerous projects from the planning phase through design, construction, and post-design services. He has also been responsible for coordination with clients, subconsultants, permitting agencies, and between project disciplines, as well as the implementation of effective Quality Assurance/Quality Control (QA/QC) plans and the supervision of project personnel on major projects.

Florida Department of Transportation (FDOT) District 4, SR-7/ US-441 Transit Corridor Improvements from Orange Dr to NW 31st Ave LAP - Task 2. Project Manager for the this project that enhances pedestrian and bicycle connectivity along SR-7, providing safer and more accessible pathways. A 6-foot sidewalk will be installed, while an 8-12-foot shared-use path will connect Oakes Rd. to Greenway Park and Riverland Wood Park. Additionally, a 10-foot shared-use path is planned linking residential areas and parks. Also included in the services to ensure safety are signing and pavement markings and high-emphasis crosswalks with lighting. Signalization upgrades include push-button countdowns at key intersections along SR-7, pedestrian detection enhancements, and a midblock Rectangular Rapid Flashing Beacons (RRFB) crossing. *Location: Broward County, FL. Drainage design, stormwater management, roadway design, construction administration, utility coordination, floodplain management, and transportation infrastructure.

Hernan specializes in drainage design, stormwater management, roadway design, and construction administration, with extensive experience in transportation infrastructure projects. He has led and managed projects for the Florida Department of Transportation (FDOT), Miami-Dade County (MDC), and other public agencies, overseeing drainage analysis, floodplain management, utility coordination, and permitting. His expertise includes developing stormwater solutions, conducting Hydrologic and Hydraulic (H&H) modeling, and ensuring regulatory compliance. A licensed Professional Engineer (PE) in Florida and Texas, Hernan is also a Certified Floodplain Manager (CFM) and a Florida Certified Building Contractor. Committed to delivering resilient and efficient infrastructure, Hernan focuses on integrating innovative and cost-effective solutions to enhance roadway and drainage systems.

Florida Department of Transportation (FDOT) District 4, SR-7/US-441 Transit Corridor Improvements LAP Project. Drainage Engineer for multimodal upgrades including new sidewalks, ADA ramp improvements, pedestrian lighting, and new Shared Use Paths. Work includes drainage analysis, utility coordination, signing and pavement marking, and structural elements beneath I-595 bridges**.** *Location: Broward County, FL. Dates: 1/2025-Ongoing. FM No.: 429576-3. HBC Fee: $922K. Construction Cost: $1.67M. Reference: Robert Lopes, PE, (954) 777-4425, robert.lopes@dot.state.fl.us.*

Florida Department of Transportation (FDOT) District 4, SR-817/ University Dr from Nova Dr to SR-84. Project Manager and Roadway Drainage Engineer for corridor upgrades including roadway widening, ramp reconstruction, a new auxiliary lane, drainage system upgrades, and utility relocations to enhance safety and access. *Location: Davie, FL. Dates: 02/2022-Ongoing. HBC Fee: $7M. Reference: Adam Naiem, PE, (954) 777-4440.*

City of Belle Glade, Engineering Services to Design Basin H1 Stormwater Improvements. Project Manager and EOR for modeling and designing stormwater infrastructure improvements to serve existing communities within Sub-Basin H1 of Basin H in the City of Belle Glade. Responsibilities included performing Hydrologic and Hydraulic (H&H) modeling, in accordance with the City's Stormwater Master Plan, to support the design of approximately 7,300 linear feet of new drainage pipe systems ranging from 18" to 54" in diameter, along with 65 new drainage structures, a downstream defender device for water quality treatment, and a new outfall discharging to the South Florida Conservancy District C1 Canal. *Location: Palm Beach County, FL. Dates: 2024-Ongoing. HBC Fee: $343 K. Reference: Neil Appel, CPM, nappel@belleglade-fl.com, 561-286-2016.*

Christopher Soto, PE, RSO

Construction Manager | Sr. Project Engineer/FDOT LAP Program Specialist | Constructability Reviews

Christopher brings extensive experience in Construction Engineering and Inspection for roadway and bridge projects, serving as a Senior Project Engineer and managing inspection teams for complex transportation and utility improvements. His background includes MOT compliance, permitting, shop drawing review, as built documentation, cost estimating, punch list development, and SWPPP preparation. He has delivered CEI services for DOTs, municipalities, and public agencies across Florida, building on prior work in Minnesota, Iowa, and Wisconsin involving roadway, bridge, signalization, land development, and utility infrastructure. Christopher also has strong experience supporting federally funded and LAP projects, including assignments under the FDEP grant programs.

Florida Department of Transportation (FDOT) District 4, CEI Contract for Various Locations along Boynton Beach Boulevard. Senior Project Engineer providing CEI oversight for multimodal corridor improvements including MOT compliance, ADA upgrades, sidewalk and driveway construction, concrete work, stormwater modifications, signal enhancements, lighting, signing and pavement marking, thermoplastic applications, utility adjustments, and documentation. Responsible for coordination, photo documentation, quantities, QC, and MAC. *Location: Boynton Beach, FL. Dates: 5/2024–Ongoing. HBC Fee: $7.1M. Reference: Woodler Blaise, CSM, (772) 579-2553, woodler.blaise@dot.state.fl.us. FM No.: 444079-1-52-01 (T4651). FA# D423036B (CAQ66).*

Miami-Dade County Department of Transportation and Public Works (MDC-DTPW), Design-Build Services for The Underline - Phase II. QA/QC and Constructability Reviewer for a design build project improving the 2.4 mile Metrorail Right of Way from SW 13th Street to SW 19th Avenue to the Vizcaya Station. Work includes signing and pavement markings, wayfinding, landscaping, drainage, electrical, lighting, public involvement, utility coordination, surveying, geotechnical support, and environmental monitoring.. *Location: Miami, FL. Dates: 04/42024-Ongoing. Reference: Mario B. Rojas IV, PE. HBC Fee: $32K. Construction Cost: $20M. Contract No.: DB18-DTPW-01.*

Miami-Dade County Department of Transportation and Publis Works, Design Build Services for the Reconstruction of NE 2nd Ave from NE 20th Street to NE 36th Street. Constructability Reviewer supporting roadway reconstruction, drainage system upgrades, pedestrian mobility improvements, traffic signal enhancements, ADA features, utility adjustments, and corridor coordination. Scope includes documentation, permitting support, CEI integration, and constructability analysis to maintain schedule and quality. *Location: Miami , FL. Dates: 05/2023- Ongoing. Reference: Alejandro Sauleda, PE, (305) 375-4866,* Alejandro.Sauleda@miamidade.gov, *HBC Fee: $1.1M. Construction Cost: $11.5M.*

Civil Engineering

7 Years of Experience

Years with HBC
7 years

Education
B.S. in Civil Engineering, Florida International University (04/28/2018)

Registration(s)
PE (FL) No. 94260 (06/21/2022)

Licenses & Certifications
TTC Advanced, #44555

Expertise
Signalization, roadway design, signing and pavement marking, 3D modeling, drainage design, Temporary Traffic Control (TTC), and transportation safety improvements.

Gonzalo graduated from Florida International University in 2018 with a Bachelor of Science in Civil Engineering. Shortly after, he joined HBC Engineering Company as an Engineer Intern (EI). In 2022, he passed his Professional Engineer (PE) exam and is currently registered as a PE in the State of Florida. He has worked on various aspects of transportation engineering, including roadway design, signing and pavement marking, signalization, drainage design, Temporary Traffic Control (TTC), and 3D roadway modeling, while complying with local, state, and federal guidelines and standards. He is proficient and certified in both AutoCAD and MicroStation OpenRoads Designer CAD software, and a master at 3D modeling development.

Florida Department of Transportation (FDOT) District 4, SR-7/US-441 Transit Corridor Improvements- Task Order 1. Project Engineer responsible for designing roadway and signalization improvements for two corridors within Broward County. The first segment was along SR-7/US-441 from the Miami-Dade/Broward County Line to north of Sample Road. The second segment was along SR-858/Hallandale Beach Boulevard from SR-7/US-441 to SW 58th Avenue. Improvements along SR-858/Hallandale Beach Boulevard include the introduction of a drivable sidewalk connecting SW 58th Avenue to SR-7/US-441, along with paved swale regrading and additional drainage structures and French drains to mitigate potential ponding. Along SR-7/US-441, improvements included signalization and ADA ramp enhancements for 25 intersections, including “stop for pedestrian” signs, countdown pedestrian signals, pedestrian detectors, lighting retrofits, ADA ramps, high-emphasis crosswalks, and bike lane improvements. New signalized midblock crossings with pedestrian channelizing fences were introduced at NW 3rd Street to enhance pedestrian crossing safety, and a new 8’ Shared-Use Path (SUP) north of Southgate Boulevard was designed to provide pedestrian connectivity between eastbound and westbound Cypress Creek Greenway. *Location: Broward County, FL. Dates: 2018–Ongoing. HBC Fee: $1.7M. Reference: Robert Lopes, PE, (554) 777-4425, Robert.Lopes@dot.state.fl.us.*

Florida Department of Transportation (FDOT) District 4, SR-817/ University Drive From Nova Drive to SR 84. Project Engineer responsible for the design of signalization improvements, which include the replacement of a mast arm due to the roadway widening, new lane configurations, and the placement of new pedestrian countdown signals, per MUTCD, at the proposed pedestrian crossing locations. Gonzalo was also responsible for developing the roadway plans and ensuring they complied with project specifications and the FDOT Design Manual (FDM), reviewing and adjusting the 3D model to ensure the 3 segments (SR-817/University Drive mainline, I-595 on-ramp, and Shared-Use Path) all connected to each other and that proposed improvements, earthwork, and quantities were correctly reflected. *Location: Broward County, FL. Dates: 2023–Ongoing. HBC Fee: $1.75M. Reference: Adham Naiem, (554) 777-4440, adham.naiem@ dot.state.fl.us.*

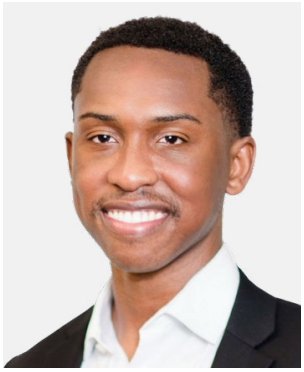
Bentley OpenRoads 3D Modeling

Synchro and Vissim Simulations

Expertise

Roadway design, traffic engineering, traffic safety studies, signalization, Maintenance of Traffic (MOT), temporary traffic control, traffic simulation, data collection, drainage design.

David possesses a proven track record of designing roadway infrastructure projects. He has worked on a wide range of traditional and design-build transportation projects, including highways, bridges, and arterial roads. His expertise includes 3D roadway design using Bentley OpenRoads Designer CADD software to create innovative solutions that meet the needs of clients. David is also a versatile designer that has experience with horizontal geometry and vertical profiles, drainage design, ADA Guidelines, MUTCD, signalization design, and Temporary Traffic Control.



Florida Department of Transportation (FDOT) District 4, SR-817/ University Dr Widening from Nova Dr to SR-84. This project consists of the widening of one lane along an approximately 0.5-mile segment of SR-817/ University Drive from south of Nova Drive to SR-84. This project includes the addition of a choice lane and the widening of the on-ramp connecting to I-595 by one lane. Bike lane and shared-use path modifications will be included within the reconstruction. David is responsible for assisting with the roadway and drainage design and the development of Temporary Traffic Control Plans (TTCPs). *Location: Davie, FL. Dates: 2022–2024. HBC Fee: $1.75M. Reference: Adham Naiem, PE, (954)-777-4440, adham.naiem@dot.state.fl.us. FM# 445624-1-32-01,* Contract No.: CAI67

Miami-Dade County Department of Transportation and Public Works (MDC-DTPW), NW 84th Ave Reconstruction from NW 58th St to NW 74th St Design-Build. Lead Project Engineer Intern responsible for the development of roadway and drainage engineering plans for this project, which involves the reconstruction of 1 mile of existing two-lane roadway to expand it into a 4-lane roadway with Two-Way Left-Turn Lane (TWLTL), where Right-of-Way is available. The overall design effort includes the design of new closed drainage conveyance systems, connection to existing outfall and stormwater retention facilities, replacement of existing Corrugated Metal Pipe (CMP) culverts to Reinforced Concrete Pipe (RCP) culvert crossings. *Location: Miami-Dade County, FL. Dates: 2022–Ongoing. Contract No.: DB21-DTPW-04. HBC Fee: $7M. Reference: Alejandro Sauleda, (305) 375-4866, alejandro.sauleda@miamidade.gov.*

Florida Department of Transportation (FDOT) District 6, Districtwide Traffic Operations Studies Contract for SR-959/Red Rd/SW 57th Ave at SW 19th St. This project evaluated the feasibility of installing a pedestrian crosswalk and determining recommendations for potential improvements, in response to citizen complaints at the study intersection. David performed data collection for this project, which involved 72-Hour traffic volume approach counts, 8-Hour Turning Movement Counts (TMCs), and vehicle gap measurements. Traffic Engineering Manual (TEM). *Location: Miami-Dade County, FL. Dates: 12/2020–01/2021. Reference: Xaviel Llerena, (305) 470-3935, Xaviel.Llerena@dot.state.fl.us. Traffic Control

Expertise

Temporary Traffic Control (TTC), Maintenance of Traffic (MOT), traffic data collection, roadway restoration, utility coordination, safety analysis, signalization, and field reviews.

Derrek specializes in traffic engineering and roadway design, with experience in Temporary Traffic Control (TTC), utility coordination, and traffic data collection. He has worked on various Resurfacing, Restoration, and Rehabilitation (RRR) projects, assisting with scoping reports, field reviews, and compliance assessments to ensure adherence to FDOT Design Manual and ADA Standards. His expertise includes lane closure analysis, traffic control planning, safety evaluations, and utility coordination for state and municipal projects. Derrek has contributed to key projects, such as SR-90/US-41 RRR, SR-932/NE 103rd St RRR, and Miami-Dade County Water and Sewer Department (MDC-DTPW) Maintenance of Traffic (MOT) plans, where he played a vital role in documenting deficiencies and developing improvement recommendations. Certified in Advanced TTC, work zone safety, and traffic control, Derrek applies detailed engineering analysis and problem-solving skills to enhance roadway safety, optimize mobility, and support infrastructure improvements.

Florida Department of Transportation (FDOT) District 6, SR-90/US-41/SW 7th St from Brickell Ave to West of SW 2nd Ave RRR Project.
Engineering Technician assisting the production of a Scoping Report for this project. Derrek is responsible for performing field reviews to observe the existing physical, operational, and safety conditions, and determining if conditions are compliant with the FDOT Design Manual and ADA Standards. Derrek is also responsible for creating tables that document the existing deficiencies along the corridor, providing recommendations to address substandard features within the project limits, and creating an exhibit that summarizes the existing deficiencies and recommended improvements. *Location: Miami, FL. Dates: 2022–Ongoing. Reference: Nicholas Danu, PE, (305) 470-5219, Nicholas.danu@dot.state.fl.us.*

Florida Department of Transportation (FDOT) District 6, SR-932/NE 103rd St from East of NE 2nd Ave to West of NE 6th Ave RRR Project.
Engineering Technician assisting the production of a Scoping Report for this project. Derrek is responsible for performing field reviews to observe the existing physical, operational, and safety conditions, and determining if conditions are compliant with the FDOT Design Manual and ADA Standards. Sreelatha Nandivada, MS, PE

Structural Engineering

22 Years of Experience

Sreelatha specializes in structural engineering, with extensive experience in bridge design, load rating analysis, and structural assessments for transportation infrastructure projects. She has worked on projects for Departments of transportation, including Florida (FDOT), contributing to the design and analysis of steel and concrete bridges, pedestrian structures, and retaining walls. Her expertise includes structural modeling, load ratings, foundation design, seismic analysis, and cold-formed steel design, utilizing advanced software such as RISA, STAAD.Pro, LEAP Bridge, and AASHTOWare BrR. Sreelatha has also been involved in substation structure design, traffic signal support evaluations, and complex industrial projects, applying AASHTO, AISC, and DOT-specific standards. Licensed in multiple states, she holds certifications in bridge safety inspection and LRFR analysis, ensuring structural integrity and regulatory compliance. Passionate about delivering resilient and innovative structural solutions, she is committed to enhancing transportation infrastructure through data-driven engineering practices.

Seminole Tribe of Florida (STOF), Hollywood Seminole Indian Reservation Pedestrian Bridge. Senior Structural Engineer leading the design of a 150 - feed wide stell pedestrian bridge with stairs and elevators to improve connectivity across SR-7 within the Hollywood Seminole Indian Reservation. Scope includes structural analysis of three bridge concepts, field investigations, and phased development of construction documents. Responsible for coordinating with STOF, FDOT, FHWA, and permitting agencies, preparing technical specifications, and supporting bid-phase services. Also contributed to roadway plan development, including typical sections, cross-sections, and signing and marking plans. *Location: Hollywood, FL. Dates: 03/2025-Ongoing. HBC Fee: $2.3M. Reference: Omar Nunez, osenunez@semtribe.com (954) 894-1060. Contract No. 380349.*

Palm Beach County Water Utilites Department (PBC-WUD), Water Treatment Plant No. 2 Expansion. Structural Engineer responsible for supporting the expansion of the PBC-WUD's Water Treatment Plant No. 2, contributing to the structural design coordination and infrastructure modernization to increase treatment capacity, address emerging contaminants, and enhance system reliability. Sreelatha's responsibilities included collaborating with the prime consultant and stakeholders to integrate structural considerations with hydraulic modeling results, supporting process-related infrastructure upgrades, and assisting the evaluation of load-bearing requirements and the structural impacts of proposed improvements. Her role also involved providing input during site-specific field investigations, ensuring structural compliance with permitting requirements, and contributing to the development of resilient, code-compliant design solutions that support long-term operational performance. *Location: West Palm Beach, FL. Dates: 1/2024-Ongoing. HBC Fee: $137K. Reference: Tammy Culpepper, (561) 840-0208. Contract No. 23-038*

Roberto Rubio, MS, PE

Structural Engineering

35 Years of Experience

Years with HBC
2 years

Education
M.S. in Civil Engineering, University of Washington (1987)

Registration(s)
PE (FL) No. 48982 (02/21/1995)

Expertise
Bridge design, structural engineering, construction support, inspection services, marine structures, foundation systems, retaining walls, miscellaneous structures, drainage coordination, roadway elements.

Before joining HBC Engineering Company, Roberto worked with FDOT District 4 as a Consultant Project Manager and has been involved in numerous projects in South Florida. His experience includes duties as an Engineer of Record, Inspector, Quality Control personnel, Lead Structures Design Engineer and Post Design Services. He provided Construction Support Services as a Structural Engineer where he developed repair procedures for prestressed Florida I beams damaged during transportation and installation on bridges, based on applicable FDOT specifications and the PCI Journal. Mr. Rubio was a past Consultant Project Manager for the FDOT District 4.

Florida Department of Transportation (FDOT) District 6, I-95/SR 9A, Pavement Reconstruction from North of NW 29th St. to South of NW 131st St. Structural Engineer/Subconsultant to Engineer of Record for bridge and signage upgrades within the I-95/I-395 interchange, driven by increased truck traffic from the Port of Miami tunnel. Scope included bridge deck overhang removal, new bridge railings, approach slab reconstruction with barrier upgrades, and replacement of overhead span and cantilever truss sign structures. Responsible for 60%, 90%, and 100% plan reviews, design calculations, and shop drawing evaluations. Designed complex truss sign structures using FDOT MathCAD tools, integrating SAP analysis for combined span and cantilever loading conditions. *Location: Miami-Dade County, FL. Dates: 2017-2019. Reference: Krishna Sandepudi, (813) 972-9444, KSandepudi@tylin.com.*

Florida Department of Transportation (FDOT) District 6, HEFT II Florida Turnpike from Sunset Dr. to Bird Rd., Bridges 2 and 5. Structural Engineer. Construction Support Services for Florida Concrete Products, LLC. The services I was entrusted with included development of repair procedures for prestressed Florida I beams damaged during transportation and installation onto bridges, based on applicable FDOT specifications and the PCI Journal. Repairs included spall patches, crack sealing and epoxy injection of cracks, to prevent further damages and ensure the design load capacity of the beams was not reduced. *Location: Miami-Dade County, FL. Dates: 2017-2018. Reference: Carlos Chaparro, (305) 541-0000, CChaparro@fcp.com.*

Florida Department of Transportation (FDOT) District 6, SR 916 (Dixie Hwy.) and NW 135th St. Over Biscayne Canal. Design team member for Engineer of Record. Safety project including minor repairs to bridge over Biscayne Canal C-8, milling and resurfacing, drainage improvements, and reconstruction of curb and gutter, sidewalk, and sidewalk pedestrian ramps. Responsible for the design of permanent steel sheet piling for stabilization of the canal, including end walls for two 5ft diameter culvert pipes, and protection for existing utilities including a fiber optic cable duct bank. Responsible for QC of bridge repair plans and calculations. The bridge is a four span precast slab multibeam bridge carrying five lanes of traffic. Repairs included shear key and post tensioning replacement. *Location: Miami Dade County, FL. Dates: 4/2015-9/2015. Reference: Ali Toghiani, (305) 567-1888, AToghiani@tylin.com.*

Bunrith is a professional engineer with comprehensive experience in structural engineering and construction. He is proficient in CSI Etabs, SAP2000, SAFE, Enercal, Mathcad, Autodesk Civil 3D, MX Road, Autodesk Rivit, Risa 3D, Staad Pro, Microsoft Project, Primavera Project Planner, Microsoft Office, and VBA and Python Programming. He has extensive experience in the structural design of buildings, highway geometrical design, land development, and topographical survey and survey data processing. In 2001, Bunrith started a small engineering and construction company called Angkor Wat Engineering and Construction (AWEC), and maintained the operation until the end of 2013. AWEC had been providing civil engineering, surveying, and construction management services to many major companies and organizations, such as KCI Inc., Taisei Corporation, Kubota, LBI, Konoike Construction Ltd., CTI Engineering, Pisnoka Inc. in association with Zachry Company, Australia Cambodia Foundation, and many more. AWEC had been contracted to work as an independent structural engineering firm in the United States Embassy compound buildings, Cambodian Mekong University construction project, and many more construction projects involving buildings and bridges.

Florida Department of Transportation (FDOT) District 4, : Boca Rio Road from Paletto Park to Glades Road. Structural Engineer responsible for the design of nine mast arms utilizing FDOT Mast Arm Design Spreadsheet v1.7 and preparing corresponding standard mast arm tables. Reviewed and interpreted geotechnical reports to verify that soil parameters met the design assumptions within the analysis model. Selected drilled shaft foundations in accordance with design results and geotechnical recommendations to ensure structural stability and compliance with FDOT standards. *Location: Palm Beach, FL. Dates: 04-2025-Ongoing. Contract No.: 2021502. Reference: Jonathan De Laura, (561) 684-4013, jdelaura@pbc.gov*

Florida Department of Transportation (FDOT) District 4, SR-7/US-441 Transit Corridor Improvements. Structural Engineer responsible for sheet pile analysis and design, geotechnical report review, and coordination of foundation recommendations. Performed structural calculations and drawings per FDOT and AASHTO standards and conducted QA/QC reviews to ensure accuracy, compliance, and constructability.*Location: Broward County, FL. Orlando is a highly experienced professional electrical engineer with a robust background in the civil engineering industry and a comprehensive skill set, including proficiency in AutoCAD, Bentley MicroStation, OpenRoads Designer, and Lighting Analysts AGi32. Throughout his career, he has served as the Engineer of Record for multiple lighting and electrical projects across South Florida. His responsibilities encompass the production and management of all phases of design, ensuring that each project meets stringent standards of quality and efficiency. His extensive experience and technical expertise have established him as a reliable professional in the industry, consistently delivering exceptional results and driving project success.

City of Fort Lauderdale, Riverwalk North Sewall Replacement Project. Senior Electrical Engineer responsible for designing the replacement of existing electrical shore-tie pedestals and pier lighting using marine-grade louvered concrete bollards with Turtle Safe-Certified wildlife lighting fixtures to ensure water/salt resistance and environmental compliance. The scope also includes adjustments to the existing electrical panels, to meet the requirements of the new seawall elevation, which includes the evaluation of the Service Point and Control Panel to determine the required upgrades for load capacity, wire sizing, and voltage drop. The design complies with National Fire Protection Association (NFPA) 303 (Fire Protection Standard for Marinas and Boatyards) and National Electrical Code (NEC) Article 555 (Marinas, Boatyards, and Docking Facilities). This project involves the replacement of the Riverwalk North Seawall, spanning 500 feet west from the Andrews Avenue Bridge toward the train tracks. *Location: Fort Lauderdale, FL. Dates: 2024-Ongoing. Project No.: P11722. Contract No.: 12716-626. HBC Fee: $682,534.41. Reference: Laura De Luca, MS, PE, (954) 828-5817, ldeluca@fortlauderdale.gov.*

Florida Department of Transportation (FDOT) District 4, SR-708/Blue Heron Blvd from West of I-95 to West of Garden Rd. Project Manager and Lighting Design Engineer of Record responsible for leading the planning, coordination, and execution of lighting improvements at the intersection of SR-708/Blue Heron Blvd. and I-95, including adjacent ramps and segments along SR-708/Blue Heron Blvd. from east of I-95 and west of Garden Road. Orlando directed the preparation of the Lighting Design Analysis Report, which addressed photometric requirements, horizontal and vertical illumination calculations at the signalized interchange, and underdeck daytime lighting analysis. Oversaw the development of lighting plans, pay items, and plan notes, and ensured they aligned with FDOT standards. Provided leadership in stakeholder coordination, including Florida Power & Light (FPL), to ensure design feasibility, maintenance integration, and utility compatibility. *Location: Palm Beach County, FL. Reference: Ronald Wallace, PE, (954) 777-4428, Ronald.Wallace@dot.state.fl.us. Contract No.: CAQ79.*

Maikel Fiallo Nunez, PE

Electrical Engineering

24 Years of Experience

Maikel is a professional Electrical Engineer with extensive experience working with utility companies, over 7 years of experience working as a Project Manager and coordinating a workforce team of 30 subcontractors, and 5 years of experience as a Senior Electrical Specialist preparing work orders and supervising field work. Maikel is primarily focused on power system protection, power distribution, and building design. In addition, Maikel has vast experience working as a Lighting Engineer on various projects involving roadway, bridge, navigational, and pedestrian lighting, including lighting retrofits. Maikel also possesses excellent interpersonal skills and is capable of working well under pressure and with cross-functional teams.

Palm Beach County (PBC), SR-804/Boynton Beach Blvd from SR-7 to Florida's Turnpike. Maikel is the Electrical Engineer responsible for the plans production for this project. The objective of this project is to conduct two (2) independent photometric analyses along SR-804/Boynton Beach Blvd from SR-7 to Florida's Turnpike in collaboration with Palm Beach County (PBC) and Florida Department of Transportation (FDOT), where applicable, to identify any concurrent projects and to verify the scope of the Surtax Street Lighting Conversion Project.

- Existing Photometric Analysis to establish the base existing illumination levels with the existing High-Pressure Sodium (HPS) luminaires installed on shared FPL poles and dedicated stand-alone FPL light poles.
- The design of required sanitary force lines

The horizontal analysis at signalized intersections will be performed as a basic service and the vertical as an optional service. This would be considered a maintenance activity and we will be held to the lighting criteria at the time when the lighting was installed. Signal-mounted luminaires will consider only fixtures that are maintained and approved by PBC (ATB2 P601 3000K for small intersections and ATB2 P604 3000K for large intersections).

There are four (4) existing signalized intersections along SR-804/Boynton Beach Blvd within the project limits: Somerset Charter School, Lyons Rd, Acme Dairy Rd, and Florida's Turnpike. *Location: Boynton Beach, FL. Dates: 2021-2023. Reference: May Cheng, PE, (561) 684-4030, mcheng@pbcgov.org.*

Florida Department of Transportation (FDOT) District 4, SR-820/Pines Blvd from the I-75 North On-Ramp to East of NW 118th Ave. Electrical Engineer for the lighting design and post-design services for this in-house design project along SR-820/Pines Boulevard from west of SW 136th Avenue to east of NW 118th Avenue. The scope includes pedestrian lighting on a 10' wide sidewalk and 5 intersection lighting retrofits including FPL luminaires. *Location: Broward County, FL. Dates: 2021-Ongoing. Reference: Karl M. Kennedy, PE, CFM, (954) 518-9040, KKennedy@ppines.com.*

Jose A. Lopez, PE

Transportation/Traffic Engineering

20 Years of Experience

Jose specializes in civil engineering, with expertise in roadway design, signalization, Signing and Pavement Marking (S&PM), storm drainage, and utility relocations. He has served as Engineer of Record (EOR) for various Florida Department of Transportation (FDOT) projects, including districtwide resurfacing, safety improvements, and signalization upgrades. Jose has led public and private capital improvement projects from design through implementation, ensuring compliance with quality, budget, time, and safety standards. His project portfolio includes major roadway reconstructions, traffic signal optimizations, and pedestrian safety enhancements for FDOT, Miami-Dade County, and Florida's Turnpike Enterprise (FTE). He is proficient in Interconnected Pond and Channel Routing (ICPR) V4, FDOT Specifications Package Preparation, and Temporary Traffic Control (TTC) design. Jose is committed to delivering efficient and innovative transportation solutions that enhance mobility and safety.

Florida Department of Transportation (FDOT) District 4, SR-7/US-441 Transit Corridor Improvements. Roadway Engineer responsible for designing roadway improvements from the Miami-Dade/Broward County Line to north of Sample Road and SR-858/Hallandale Beach Blvd. from Edmund Road to SW 58th Avenue throughout 25 intersections that include "yield to pedestrian" signs, count down pedestrian signals, lighting retrofits, ADA ramps, high-emphasis crosswalks, a new signalized restricted crossing, sidewalk/bike lane construction, widening, and flexible pavement design. The design also involved improvements for Shared-Use Paths (SUPs) and sidewalks on SR-7/US-441 between Oakes Rd. and the New River Greenway and SR-838/Sunrise Blvd. from SR-7/US-441 to NW 31st Ave. Jose was also responsible for necessary interdisciplinary coordination. The design improvements excelled in increasing passenger transit and enhancing overall patron experiences. *Location: Broward County, FL. Dates: 2018–Ongoing. HBC Fee: $1.7M. Reference: Robert Lopes, PE, (954) 777-4425, Robert.Lopes@dot.state.fl.us.*

Broward County Public Works Department Highway Construction and Engineering Division, School Zone Flasher Improvements for 6 Broward County Schools. Roadway Engineer of Record (EOR) responsible for developing the school zone flasher improvements design for 6 schools, including Apollo Middle School, Attucks Middle School, Everglades High School, Northeast High School, Mary M. Bethune Elementary School, and Boulevard Heights Elementary School. The design included records research, signalization, Signing and Pavement Marking (S&PM), utility coordination, Subsurface Utility Engineering (SUE), permitting, and public notification. *Location: Broward County, FL. Dates: 2019–2021. HBC Fee: $78K. Reference: Eduardo Martin, (954) 270-3387 emartin@broward.org.*

Advanced MOT

Expertise
Roadway design, Maintenance of Traffic (MOT), Traffic Control Plans (TCPs), Signing and Pavement Marking (S&PM), highway reconstruction, Milling and Resurfacing (M&R), interchange design, roadway widening, drainage analysis, and project management.

***Prior to HBC**

Teodoro has extensive experience working on various civil engineering projects involving roadway design. He has served the roles of Support Engineer, Project Engineer, Senior Roadway Engineer, and Engineer of Record (EOR) successfully, and has been responsible for management and plans review. He has also served as in-house consultant for the review of design variations and exceptions for the Florida Department of Transportation (FDOT) District 6 Design Office. In addition, Teodoro has significant experience in the design of Signing and Pavement Marking (S&PM) plans, Maintenance of Traffic (MOT) plans, Traffic Control Plans (TCPs), and Temporary Traffic Control Plans (TTCPs).

Florida Department of Transportation (FDOT) District 6, Districtwide Resurfacing Scoping Reports. Teodoro is serving the role of Engineer of Record (EOR) and is responsible for preparing districtwide resurfacing scoping reports, by analyzing the existing conditions, to determine deficiencies and establish or substantiate the project purpose and need. He is also developing project alternatives to satisfy the identified deficiencies or needs within the corridor. The evaluation of alternatives includes transit or transportation system improvement options. Most deliverables are preliminary cost sections, based on the engineer's estimates, preliminary drainage analysis and plans, conceptual roadway plans, approved typical section package, and variances and exceptions sections. *Location: Miami-Dade County, FL. Dates: 2023-2026. FM No.: 250759-5-22-01. Contract No.: CAN23. HBC Fee: $1.5M. Reference: Md S Hossain, MS, EI, (305) 470-5342, Md.Hossain@dot.state.fl.us*

Florida Department of Transportation (FDOT) District 1, SR-29 Milling and Resurfacing from North of Wagon Wheel Rd to South of I-75. Teodoro is serving the role of Support Engineer for the Milling and Resurfacing (M&R) and Signing and Pavement Marking (S&PM) tasks on SR-29 from north of Wagon Wheel Road to south of I-75. *Location: Collier County, FL. Dates: 2023-2025. FM No.: 448929-1-32-01. Contract No.: CAN28. HBC Fee: $1M. Reference: Christopher Speese, (239) 225-1973, christopher.speese@dot.state.fl.us.*

Palm Beach County (PBC), Boca Rio Rd Widening from Palmetto Park Rd to Glades Rd. Teodoro served the role of Support Engineer for this project, which involved the reconstruction and widening of Boca Rio Road from Palmetto Park Road to Glades Road in Palm Beach County, Florida. *Location: Palm Beach County, FL. Dates: 2022–2024. HBC Fee: $660K. Reference: Jonathan DeLaura, (561) 684-4013, jdelaura@pbcgov.org.*

Dr. Saad's areas of expertise are Transportation Engineering, Traffic Safety, Traffic Simulation, and Connected and Autonomous Vehicles. He has worked on numerous projects throughout South Florida involving Transportation Management Plans, Microscopic and Macroscopic Traffic Simulations, Dynamic Traffic Assignments, and Smart Work Zones. He has performed traffic impact analyses, safety reviews, and fatality studies successfully. He is highly experienced in implementing statistical models and data mining techniques for analyzing safety and operational performance measures. He also works on analyzing Big Data, such as MVDS, AVI, and Crowdsourced Smartphone Data for traffic safety projects.

Florida Department of Transportation (FDOT) District 4, Districtwide Traffic Operations Data Collection. Project Manager for this contract, in which HBC is conducting routine traffic data collection activities for FDOT District 4 on a TWO basis. Project tasks include collection of turning movement counts, spot speed and speed profile data, volume and classification counts, pedestrian and bicycle data, and travel time and delay data, as well as assisting the District with miscellaneous data collection and traffic studies. *Location: FDOT District 4. Date: Ongoing. HBC Fee: $1.5M. Reference: Ysamary Vergara, (954) 777-4380, Ysamary.Vergara@dot.state.fl.us. FM No.: 230026-6-32-01.Contract No.: CAU65*

Florida Department of Transportation (FDOT) District 4, SR-7/US-441 Transit Corridor Improvements Task 2 LAP Project. Senior Traffic Engineer for the this project that consists of the following improvements along several locations along SR-7/US-441: a new sidewalk, ADA curb ramps, pedestrian signalization improvements and landscape enhancements. Also included along a different segment of along SR-7/US-441 is multiple shared-use paths, new lighting at the I-595 on-ramps and off-ramps, high-emphasis crossings, retaining walls under I-595 bridges, and signing and pavement marking upgrades. *Location: Broward County, FL. Dates: 1/2025-1/2026. FM No.: 429576-3. HBC Fee: $922K. Construction Cost: $1.67M. Reference: Robert Lopes, PE, (954) 777-4425, robert.lopes@dot.state.fl.us.*

Port Everglades, Port Everglades Master Plan. Project Manager for providing the as-needed port master planning services for preparing the Port Everglades 5-year, 10-year, and 20-year planning horizon and conducting On-Port Traffic and Parking study and Parking and Estimated Future Truck Traffic study. The tasks include Traffic Counts and Quantitative Assessment, Qualitative Assessment and FDOT Recommendations, Existing Parking Conditions, Parking Utilization, Port wide Traffic Analysis, and Port wide trucking queue analysis. *Location: Fort Lauderdale, FL. Dates: 2023–Ongoing. Reference: Maria Rivas, PE, (346) 901-6020, maria.rivas@aecom.com.*

Jeremy Braithwaite, IMSA II

Transportation/Traffic Engineering

8 Years of Experience

Jeremy is a traffic specialist with significant experience in the area of data collection and analysis. He has lent that expertise to various projects for HBC. Prior to joining HBC, he worked with Florida International University's (FIU's) Lehman Center for Transportation Research as a field research assistant collecting and analyzing traffic data on projects in Gainesville and Yeehaw Junction. As an intern with FIU's University City project, under its Intelligent Transportation System (ITS) umbrella, the Informed Traveler Program and Applications project, he collected data for use in an FIU-specific transportation mobile application.

Florida Department of Transportation (FDOT) District 4, Districtwide Traffic Operations Studies – Districtwide Ped/Bike Data Collection. Jeremy assisted with the Districtiwde Ped/Bike Data Collection effort, which involved collecting bicycle and pedestrian data at 14 locations throughout Palm Beach, Indian River, and Broward Counties. Jeremy coordinated all data collection efforts, identified equipment setup locations, carried out equipment installation and breakdown, performed remote monitoring of equipment, and processed and furnished the collected data. *Locations: Broward, Palm Beach, and Indian River Counties, FL. Dates: 3/2021–4/2021. Reference: Ravi Wijesundera, (954) 535-5153, Ravi.Wijesundera@kimley-horn.com. FM No.: 230094-6-32-01. Contract No. CAB33.*

Florida Department of Transportation (FDOT) District 4, Districtwide Traffic Operations Studies - Preliminary Safety Assessment for SR-811/Alt. A1A at Center St. Jeremy assisted with the Preliminary Safety Assessment of SR-811/Alt. A1A (Section 93090000) from approximately 600' south of Center Street (MP 10.638) to a point one-half mile north (MP 11.138). The purpose of this Task Work Order (TWO) was to evaluate feasible improvements that can improve safety performance for this section of roadway. *Location: Palm Beach County, FL. Dates: 2/2021–4/2021. FM No.: 230094-6-32-01. Reference: Ravi Wijesundera, (954) 535-5153, Ravi.Wijesundera@kimley-horn.com.*

Florida Department of Transportation (FDOT) District 4, Districtwide Traffic Operations Studies - Preliminary Safety Assessment for SR-76/SW Kanner Hwy. Jeremy assisted with the Preliminary Safety Assessment of SR-76/SW Kanner Highway (Section 89060000) from approximately 164' southwest of SW Bridge Road (MP 20.864) to a point 0.2 miles northeast (MP 21.114). The purpose of this Task Work Order (TWO) was to evaluate feasible improvements that can improve safety performance for this section of roadway. Crash data were obtained from FDOT's Crash Analysis Reporting (CAR) System and Signal Four Analytics (S4A) and were reviewed, analyzed, and summarized for the study segment. *Location: Stuart, FL. Dates: 2/2021–4/2021. FM No.: 230094-6-32-01. Reference: Ravi Wijesundera, (954) 535-5153, Ravi.Wijesundera@kimley-horn.com.*

Traffic Signal Design and

Rami is a traffic engineer and project manager with specialized experience in traffic operations, safety studies, and Intelligent Transportation Systems (ITS). He has delivered traffic signal design, system coordination, pedestrian safety improvements, and corridor safety studies for agencies, including Ohio Department of Transportation (ODOT), North Carolina Department of Transportation (NCDOT), California Department of Transportation (CDOT), and the Illinois Tollway. His portfolio includes leading Ohio's inaugural Pedestrian Safety Improvement Program, statewide traffic safety task orders, and transit signal priority integration projects in Chicago. Skilled in Synchro, SimTraffic, Sidra Intersection, HCS, Civil 3D, and MicroStation, Rami brings strong technical expertise in traffic modeling, work zone safety, and innovative intersection design. He has helped clients secure Highway Safety Improvement Program (HSIP) funds, advancing safety-focused improvements from planning through implementation.

***Ohio Department of Transportation (ODOT) Office of Planning, Statewide Signal Timing Analysis Task Order.** Rami performed traffic engineering tasks, including detailed analysis and report preparation. He provided statewide signal system timing improvements on a task order basis. Corridors were selected, based on a rating system with ODOT, and then evaluated for potential improvements. Each system included traffic data collection, speed/delay corridor runs, evaluation of signal equipment and signal timing, and coordination plans for each intersection. This contract involved a specific process for completing the analysis on each corridor that included initial traffic data collection, modeling of the corridor in Synchro/SimTraffic software, input of the revised timing, and then field check/modification of the system parameters to optimize the overall performance and coordination of the system. *Location: OH. Dates: 12/2018-4/2021.*

***Ohio Department of Transportation (ODOT) Office of Planning, Statewide Pedestrian Safety Improvement Program.** Rami supported ODOT's Pedestrian Safety Improvement Program (PSIP) by reviewing applications, conducting desktop and field reviews, estimating construction costs, and guiding cities on selecting pedestrian crash countermeasures. He led the design phase, managing a team of 10+ professionals and coordinating with subconsultants. As ODOT's Statewide Safety Design consultant, his team developed Ohio's inaugural PSIP, implementing improvements across 8 cities at 528 locations. Countermeasures included curb bump outs, curb ramps, RRFBs, PHBs, Signing and Pavement Marking (S&PM), and lighting. Many non-standard sites required innovative, problem-solving approaches. *Location: OH. Dates: 05/2020-1/2021.*

Awards & Recognitions
2024 Outstanding Achievement Award - Intelligent Transportation Society of Florida (ITSF)

Daniel is an expert in Intelligent Transportation System (ITS) infrastructure, with extensive engineering experience in signalization, wrong-way driving countermeasures, vehicle electrification, Smart Work Zones (SWZs), roadway lighting, and National Electric Code (NEC) compliance. He has worked extensively with tolling agencies, serving as a General Engineering Consultant (GEC) for Florida's Turnpike Enterprise (FTE) and as the ITS Engineer of Record (EOR) for a major FTE Design-Build Project (FPID No. 434968-2). Daniel also has a strong background in overseeing and optimizing compliance operations within state and federal frameworks, developing, reviewing, and implementing compliance policies, and conducting comprehensive reviews of program procedures and federal compliance records to ensure adherence to established guidelines. Daniel has also led workshops and training sessions to enhance the team members' understanding of compliance policies. His expertise also includes arterial operations and traffic signal controller programming.

Florida's Turnpike Enterprise (FTE), Southern Turnpike CCTV Upgrades System Wide. Project Manager and ITS Engineer of Record for managing the system-wide design and implementation of additional Closed-Circuit Television (CCTV) camera installations across SR-91/Florida's Turnpike Mainline, SR-821/HEFT, and multiple service plazas, including Snapper Creek, Pompano Beach, West Palm Beach, Fort Pierce, and Fort Drum. Daniel is directing the development of ITS plans and specifications to enhance operational awareness during recurring congestion and emergency events, while enabling future data collection capabilities; overseeing all aspects of the ITS design process, including site selection, infrastructure coordination, and compliance with FDOT standards and Rule 940 systems engineering requirements. *Location: Miami-Dade, Broward, Palm Beach, St. Lucie, and Okeechobee Counties, FL. Dates: 2024-Ongoing. Contract No.: 452086-1-32-01. Reference: Yang Zhao, PhD, PE, (407) 415-9002, Yang.Zhao@dot.state.fl.us.*

Florida's Turnpike Enterprise (FTE), Wrong-Way Vehicle Detection System (WWVDS) Implementation Design-Build Project. Project Manager and Engineer of Record (EOR) for the design of 41 Wrong-Way Vehicle Detection Systems (WWVDSs) covering 48 exit ramps along SR-821/HEFT, SR-91 Florida's Turnpike Mainline, and SR-869/Sawgrass Expressway. The proposed WWVDSs used a combination of thermal, radar, and video detection technologies to detect vehicles traveling the wrong way along the exit ramps and provide automated alerts to FTE's traffic operations staff. *Locations: Miami-Dade, Broward, and Palm Beach Counties, FL. Dates: 2021-2024. FM No.: 434968-2-52-01. Reference: Jasmi Alemany, PE, (407) 334-8035, jasmi.alemany@dot.state.fl.us.*

Juan J. Flores, Jr., PhD, AICP

Planning and Community Development

24 Years of Experience

Dr. Flores has over 20 years of intermodal and QA/QC project management experience spanning state and local governments as well as private industry. He is a proven quality assurance manager with expertise in improving customer satisfaction, preventing critical quality issues, and optimizing team performance. While working for the Qatar Free Zone (Doha), he identified and implemented new QC guidelines, reducing inspection times by 27% and realigning the Zone's Health, Safety, and Environment standards as their Project Lead. He has managed and organized QA plans and performed quality control testing for over 50 cases and projects annually. In the Middle East, Dr. Flores leveraged his quality control inspection background on mid- to large-sized mega projects (highway corridors, warehousing, water/sewer systems, and infrastructure) to ensure product quality and compliance. Additionally, he brings expertise in Project Development and Environment (PD&E) studies, transportation planning, and multimodal systems, including transit systems, further enhancing his capability to manage complex and interdisciplinary projects.

***Miami-Dade County Parks, Recreation and Open Spaces (MDC-PROS) Planning, Design and Construction Division, Greynolds Park and East Greynolds Park Sea-Level Rise and Mitigation Study.** Program Manager evaluating the current and future flood risk of Greynolds Park and East Greynolds Park to inform mitigation measures and adaptation strategies to reduce future flood impacts and maintain park operations for the enjoyment of the community. *Location: North Miami Beach. Dates: 2020-Ongoing.*

***Broward Metropolitan Planning Organization (MPO) Public Engagement Services.** Technical Advisor for the Broward MPO identifying a compelling need to expand its public engagement activities through specialized outreach efforts to increase public understanding of the logistics industry while facilitating meaningful exchanges of information sharing and collaboration. This engagement program, known as "Speak Up Broward", includes communications and public engagement activities, transportation and public opinion research, financial analyses, scenario planning, and the development of evaluation metrics. *Location: Broward County, FL. Dates: 2017-2018.*

***Florida Department of Transportation (FDOT) District 6, Port Miami Tunnel Mobility Evaluation Study.** Professional Services Consultant for implementing a program to monitor and assess the transportation performance of the PortMiami Tunnel. The program aimed to preserve the investment in the facility, safeguard its economic value for South Florida's freight and logistics community, and provide insights for its optimal utilization from a transportation asset management perspective. The project involved developing and implementing a comprehensive program to evaluate the tunnel's transportation performance, ensuring it remained a valuable asset for freight and logistics operations. *Location: Miami, FL. Dates: 2019-2024.*

Expertise
Water resources engineering, wastewater systems, utility design, hydraulic modeling, site development, stormwater infrastructure, construction inspection, fire suppression systems.

***Prior to HBC**

Adelbert Shaffer is an experienced civil engineer and project manager specializing in water, wastewater, and site development projects. With a strong background in master planning, hydraulic modeling, utility design, and construction document preparation, he has successfully contributed to water and sewer system expansions, pump stations, dredging projects, and large-scale site developments across various municipalities and private developments.

Miami-Dade County Water and Sewer Department (MDC-WASD), Q16 A&D Small Diameter Water Main Replacement Program (SDWMRP). Water Resource Manager responsible for overseeing the planning, design, and delivery of over 60,000 Linear Feet (LF) of new water transmission mains, including 48,080 LF of 8", 8,072 LF of 12", and 4,282 LF of 16" diameter lines, as well as associated Consumer Line Relocations (CLRs). Responsibilities included managing the route feasibility study to determine optimal alignments, coordinating topographic and boundary surveys, directing Subsurface Utility Engineering (SUE) exploration and geotechnical investigations, and ensuring seamless integration with Miami-Dade County Water and Sewer Department (MDC-WASD) infrastructure. *Location: Miami-Dade, FL. Dates: 2025-Ongoing. Reference: Rudy Ibarra, PE, Rudy.Ibarra@miamidade.gov. Contract No. 23HBCE002/TA No 001.*

Puerto Rico Aqueduct and Sewer Authority (PRASA), Improvement to Sanitary Trunk Sewer Van Scoy. Water Resource Design Manager for leading the design and coordination of a 2.3 km sewer force main intended to redirect flows from the Toa Alta Heights Pump Station away from the existing Van Scoy Sewer Trunkline. Adelbert is overseeing all technical aspects of the alignment, which begins near the intersection of Calle 33 and PR-199 and terminates at a proposed manhole near PR-199 and PR-5. The design involves detailed hydraulic evaluation, utility conflict mitigation, and constructability planning for approximately 1 km of open trench installation and 1.3 km of Horizontal Directional Drilling (HDD) construction to minimize surface disruption and ensure compliance with permitting and agency standards. *Location: Bayamón, Puerto Rico. Dates: 04/2024-Ongoing. Reference: Ramon Ortiz, (787) 781-9050, Ramon.Ortiz-Morgado@jacobs.com.*

Puerto Rico Aqueduct and Sewer Authority (PRASA), Preliminary Engineering Report (PER) for the Elimination of the Ciales, Morovis, and Unibón Wastewater Treatment Plants. Water Resource Design Manager responsible for evaluating the feasibility of consolidating aging Wastewater Treatment Plants (WWTPs) by redirecting flows to a new regional WWTP with planned capacity and process upgrades. Adelbert is directing the technical analysis of existing infrastructure, assessing hydraulic capacity, and developing conceptual layouts for new pump stations required to support the redirected flows. Responsibilities also include managing multidisciplinary coordination, reviewing system modeling outputs, and ensuring that proposed solutions align with regulatory requirements, long-term serviceability, and cost-effective implementation strategies. *Location: Rio Grande, Puerto Rico. Dates: Ongoing. Reference: Jose A. Rodriguez, PE, (787) 641-6800, jarodriguez@csagroup.com.*

City of Riviera Beach, W 15th St from Ave R to Ave L Design-Build Project. This progressive Design-Build project involves the construction of a new raw water treatment plant and the expansion of the existing raw water network in the City of Riviera Beach. This project includes the installation of new wells and new raw water transmission mains to connect proposed wells to the treatment plant. Joseph serves as Engineering Technician for roadway and pipeline design. Joseph also created 3D CADD design drawings of existing utilities. *Location: Riviera Beach FL. Dates: 11/2023–Ongoing. HBC Fee: $2M.*

Palm Beach County, Boca Rio Rd from Palmetto Park Rd to Glades Rd Design-Build Project. This Design-Build project involves the widening of Boca Rio Road and design improvements for Boca Rio Road from Palmetto Park Road to Glades Road. Joseph assisted in the intersection designs of Palmetto Park Road, Boca Lago Road, Via Ancho Road, and Glades Road. These designs included proposed pedestrian detectors, video loop systems, and replacement of span-wire poles with mast arms. *Location: Boca Raton, FL. Dates: 11/2023-Ongoing. HBC Fee: $660k. Reference: Holly B. Knight, (561) 684-4150.*

***Prior to HBC**

Yissell is a motivated, responsible, and goal-oriented Engineer Intern (EI) with a background in Environmental and Geophysical Engineering. She is focused on the design of water and wastewater treatment plants and the overall improvement of water supply systems. Her areas of expertise include water resources, water quality analysis, and analytical and quality control design, with a focus on the provision of cost-effective innovative solutions. She has experience in fundamental geophysical testing, geological areas, earth structures, hydrology, mineralogy, rock classification, and geological/ seismic evaluations.

Miami-Dade County Water and Sewer Department (MDC-WASD), Q16 A&D Small Diameter Water Main Replacement Program (SDWMRP). Project Engineer responsible for supporting the planning, design, and construction coordination of over 60,000 linear feet of new water mains for MDC-WASD. Her responsibilities include performing route feasibility studies to assess alignment alternatives, coordinating survey and Subsurface Utility Engineering (SUE), and overseeing geotechnical investigations to inform the design efforts. Her role involved preparing phased construction documents for 8", 12", and 16" diameter water mains and associated Consumer Line Relocations (CLRs), facilitating permit submittals and responses, and supporting the procurement process. She is also tasked with providing continuous engineering support throughout construction to ensure compliance with MDC-WASD standards, optimize constructability, and maintain schedule coordination. *Location: Miami, FL. Dates: 2025-Ongoing. Reference: Rudy Ibarra, PE, Rudy.Ibarra@miamidade.gov. Contract No. 23HBCE002/TA No 001.*

Puerto Rico Aqueduct and Sewer Authority (PRASA), El Yunque (Las Picúas) Wastewater Treatment Plant (WWTP) Elimination. Project Engineer responsible for the design of two (2) new sanitary pump stations and force mains. This project also involves the decommissioning of the existing WWTP and the integration of new infrastructure, including stormwater management and utility assessments. HBC performed detailed demolition plans, site grading, and capacity analysis of the existing systems to ensure a smooth transition and compliance. *Location: Rio Grande, Puerto Rico, FL. Dates: Ongoing. Reference: Adamaris J. Quiñones, PE, Program Manager.*

Puerto Rico Aqueduct and Sewer Authority (PRASA), Improvement to Sanitary Trunk Sewer Van Scoy. Project Engineer responsible for the survey, topography, and Subsurface Utility Engineering (SUE) services for the Improvement to Sanitary Trunk Sewer Van Scoy project. The scope includes conflict detection, soft digs, and flow measurement studies to address capacity limitations in the Bayamon Municipality. HBC prepared design reports, drawings, and cost estimates, and managed permits to ensure compliance with local regulations. *Location: Puerto Rico, FL. Dates: 04/2024-Ongoing. Reference: Ramon Ortiz, (787) 781-9050, Ramon.Ortiz-Morgado@jacobs.com*

Sonny Abia, PhD, PE

Building Inspections, Plans Review and Permitting | Utility Coordinator

35 Years of Experience

Dr. Abia is a seasoned civil engineer specializing in utility coordination across complex infrastructure projects in Florida. His role has involved coordinating with Utility Agent Owners (UAOs) and agencies, managing utility tickets, conducting conflict resolution meetings, organizing field reviews, and ensuring compliance through the preparation of Final Utility Certification packages. His extensive work with the Florida Department of Transportation (FDOT) and various municipalities highlights his adeptness in navigating utility regulations and securing necessary certifications. Dr. Abia's expertise in utility coordination is complemented by his background in quality assurance/quality control (QA/QC), project management, and coordination of large-scale construction initiatives.

Florida Department of Transportation (FDOT) District 4, SR-817/ University Dr Roadway Improvements from SW 24th Street/Nova Dr to EB SR-84. Utility Coordinator and Quality Assurance/Quality Control (QA/QC) reviewer for the design of roadway improvements along SR-817/ University Drive, from SW 24th Street/Nova Drive to Eastbound SR-84. The project involves pavement widening to accommodate a proposed auxiliary lane from NW 23rd Street, connecting to the westbound I-595 ramp, and the relocation of existing drainage structures, overhead signs, a mast arm, and utility poles. Additionally, the project includes the reconfiguration of the bus stop bay at the northeast corner of SW 24th Street/Nova Drive and University Drive, as well as the reconfiguration of right-turn lanes for the Royal Grand community, PNC Bank, and SW 24th Street/Nova Drive. Dr. Abia's responsibilities include Utility Coordination and QA/QC reviews to ensure all design aspects meet required standards. *Location: Broward County, FL. Dates:2022-Ongoing. Contract Amount: $1.7M.*

Florida Department of Transportation (FDOT) District 4, SR-7/US-441 Transit Corridor Improvements. QA/QC Reviewer and Utility Coordinator for the SR-7/US-441 Transit Corridor Improvements Project, developed under two separate tasks to enhance pedestrian safety, multimodal connectivity, and corridor infrastructure. Responsibilities included design computation reviews, utility conflict resolution, and coordination with agency stakeholders to ensure compliance and constructability.

- **Task 1:** Involved intersection lighting retrofits, ADA-compliant sidewalk upgrades, and pedestrian safety enhancements from the Broward/ Miami-Dade County Line to north of Sample Road. Work included improvements at intersections such as Pembroke Road, Davie Boulevard, and NW 24th to NW 44th Streets, as well as bike lane upgrades from Southgate Boulevard to Cypress Creek Canal Bridge. *Location: Broward County, FL. Dates: 2018–2021. Reference: Robert Lopes, PE, (954) 777-4425, robert.lopes@dot.state.fl.us.*

Expertise
Electrical inspections, electrical plans review, code compliance, permitting coordination, inspection management, contractor liaison, field troubleshooting and installation, and building systems maintenance and automation.

***Prior to HBC**

Roberto has extensive experience as an Electrical Inspector specializing in performing municipal inspections and electrical plans review for commercial and residential projects to ensure compliance with the Florida Building Code (FBC) and the National Electrical Code (NEC). He has served with the Cities of Fort Lauderdale, Doral, Opa-locka, and Miami. He has previously managed building department operations at Universal Engineering Sciences, drawing on experience as a licensed electrical contractor, and in facilities engineering with Baptist Health South Florida. Roberto is proficient in Alternative Plans Review and Inspections as a Private Provider, pursuant to Florida Statute 553.791. He also has significant experience coordinating with building officials to expedite reviews and site inspections. His licenses and certifications include EC 0000838, BN 7675, PX 4248, BU 2314, and Federal Emergency Management Agency (FEMA) Independent Study (IS) 100, 200, 700, and 800. Roberto is committed to ensuring safe, code-compliant installations and efficient project deliveries.

***Town of Melbourne Beach, Building Official.** Building Official for administering and enforcing compliance with state, county, and municipal construction codes across residential, commercial, and public infrastructure projects. Responsibilities included reviewing architectural, structural, electrical, mechanical, and plumbing plans for adherence to the Florida Building Code, overseeing permit issuance and inspection activities, and ensuring code enforcement procedures were applied consistently throughout all stages of construction. The role encompassed coordinating with engineers, contractors, and developers to interpret complex building standards, issue Certificates of Occupancy, and verify compliance with life safety, accessibility, and energy efficiency requirements. The Building Official also maintained official records, supervised plan review and inspection personnel, and provided technical guidance to ensure public safety, regulatory consistency, and efficient service delivery within the jurisdiction. *Location: Melbourne Beach, FL. Dates: 05/2025-10/2025.*

***City of Miami (Consultant).** Electrical Inspector responsible for performing daily field inspections and electrical plan reviews for the City of Miami as a consultant with PMM Engineering Consulting, verifying compliance with the Florida Building Code (FBC), the National Electrical Code (NEC), and City of Miami ordinances across commercial, residential, and tenant improvement permits. The scope of Roberto's work included rough-in, servicing equipment, feeders, grounding and bonding, emergency and standby power systems, lighting controls and energy compliance, low voltage communications, and site electrical infrastructure. His responsibilities included issuing correction notices, documenting deficiencies, and confirming permit scope. *Location: Miami, FL. Dates: 10/2024-05/2025.*

Eugene “Gene” Hunter, IMSA I

Construction Administrator

35 Years of Experience

Gene is an experienced Project Administrator specializing in Construction Engineering and Inspection (CEI) for Florida Department of Transportation (FDOT) and Florida municipalities, with expertise in roadway and bridge construction, MOT, stormwater drainage, earthwork, Milling and Resurfacing (M&R), Signing and Pavement Marking (S&PM), signalization, and lighting. He ensures contract compliance, documentation management, and regulatory adherence, overseeing daily reports, change orders, field inspections, pay item tracking, and contractor negotiations. Gene has managed Local Agency Program (LAP) projects, coordinated Maintenance of Traffic (MOT) setups, SWPPP monitoring, and RFIs, and facilitated subcontractor coordination, project submittals, and bi-weekly meetings. His strong organizational and leadership skills make him a valuable asset in delivering high-quality infrastructure projects on time and within budget.

***Florida Department of Transportation (FDOT) District 4, Project Administration Video Monitoring Systems for FDOT Intelligent Transportation System (ITS) Traffic Operations at I-75/I-595.** Assistant Project Administratorwith all aspects of construction on this $14.45 million project. His responsibilities included field, contract, and client support, ensuring project documentation was properly maintained and compliant with FDOT standards. *Location: Fort Lauderdale, FL. Dates: 2007-2008. Contract Amount: $14.45M. Reference: Roy Schofield, (954) 914-5647.*

***Florida Department of Transportation (FDOT) District 4, Glades Rd/El Rio Canal Project.** Project Administrator for all phases of construction and administration, including bridge demolition and widening, curb and gutter, concrete sidewalk resurfacing, earthwork, signalization, canal restoration, and landscaping. *Location: West Palm Beach, FL. Dates: 2004-2006. Contract Amount: $11M. Reference: William Francis PE, (561) 578-9346.*

***Florida Department of Transportation (FDOT) District 4, I-95 and Atlantic Blvd Ramp Improvements.** Assistant Project Administrator/ Senior Inspector for overseeing construction activities and reporting. His duties included managing ramp reconstruction, drainage, resurfacing, signalization, lighting, and landscaping. Gene ensured that all project documentation was accurate and up to date, maintained compliance with contract specifications, and coordinated between contractors and stakeholders *Location: Pompano Beach, FL. Reference: Roy Schofield, (954) 914-5647.*

Claudia Rodriguez, PE, IMSA I

Construction Administration

9 Years of Experience

Claudia is a seasoned Construction Project Manager with deep expertise in Construction Engineering and Inspection (CEI) and compliance monitoring on state and federally funded roadway and Intelligent Transportation System (ITS) projects. She has extensive experience in roadway project activities, such as milling and resurfacing, utility relocations, and sidewalk, drainage, signalization, lighting, and landscaping improvements. Claudia is experienced in overseeing all phases from preconstruction, plans review, construction, installation, and testing to final acceptance. Claudia ensures strict adherence to NEC Codes, CPAM, MUTCD, and FDOT standards, and any applicable local standards and specifications. She also manages daily reports, reviews scope changes, resolves Requests for Information (RFIs), assists the drafting of Requests for Proposals (RFPs), and oversees change orders, schedule updates, and payment applications, enhancing her capacity to produce accurate engineering estimates and maintain project compliance. With a strong track record overseeing ITS installations, including Closed-Circuit Television (CCTV) cameras and Dynamic Message Signs (DMS) across Florida's major highways, Claudia is highly skilled in contract negotiations, monthly estimates, and compliance reviews, ensuring each project meets technical and regulatory standards.

Palm Beach County (PBC), Cherry Rd from Military Trail to Quail Dr - Roadway, Sidewalk, & Pedestrian Lighting Improvements LAP Project. This LAP project involves the construction of an 8' sidewalk along the north side of Cherry Road, stretching from N. Military Trail to a point 120 feet west of Quail Drive. Additionally, a 6' sidewalk will be constructed on the south side of Cherry Road, covering the same stretch from N. Military Trail to Quail Road, with the exception of the segment that crosses Bridge No. 934229. The scope of the project also includes milling and resurfacing, widening, and the installation of appropriate signing and pavement markings to better accommodate current traffic volumes and improve overall traffic flow. Pedestrian-scale lighting and landscaping will be installed along the sidewalks and in key areas of the roadway. *Location: Palm Beach County, FL. Dates: 03/2025-Ongoing. Contract No.:* 2021025. *Construction Fees: $1.2M. Reference: Dave West, (561) 684-4180, DWest1@pbc.gov.*

Florida's Turnpike Enterprise (FTE), System-Wide Queue Warning on SR-91 and SR-429. Claudia is serving the role of CSS/Assistant Project Administrator/Senior ITS Inspector for this project, which involves performing CEI services, including ITS inspections and ensuring the project is constructed in accordance with FDOT's guidelines, plans, and specifications. *Locations: Broward, Palm Beach, Sumter, Orange, and Osceola Counties, FL. Dates: 2023-Ongoing. FM Nos.: 449253-3-52-01 & 449253-3-52-02. Contract No.: E8U32. Construction Cost: $10.6M. Reference: Adam Massimo, (484) 883-1315, adam.massimo@dot.state.fl.us.*

ITS Facility Management System - Deliverable Testing Training

Rodolfo is a highly skilled Construction Engineering and Inspection (CEI) Project Administrator with a strong Contract Support Specialist background, ensuring compliance with contract specifications and facilitating effective coordination between contractors, project personnel, and agencies. He specializes in tracking and negotiating pay items, processing monthly progress reports, and leading construction progress meetings to maintain project efficiency. His technical expertise spans Intelligent Transportation Systems (ITS), roadway design, and infrastructure improvements, backed by a civil engineering foundation. Rodolfo has successfully managed high-profile CEI projects for FDOT, Florida's Turnpike Enterprise (FTE), and Miami-Dade County Department of Transportation and Public Works (MDC-DTPW), demonstrating his ability to streamline project execution, enforce regulatory compliance, and deliver quality infrastructure solutions on time and within budget.

Broward County, Continuing Professional Services for Construction Engineering and Inspection (CEI) and Design Services for Roadway and Traffic Projects. This project includes CEI services for miscellaneous maintenance projects, such as bridge rehabilitation, roadway improvements, ADA improvements, stormwater drainage, cleaning, tree removal, and signing and pavement marking improvements. *Location: Broward County, FL. Dates: 2023-Ongoing. Reference: Adriana Toro, (954) 826-9127, atoro@broward.org*

Florida Department of Transportation (FDOT) District 4, CEI Contract for Various Locations along Boynton Beach Boulevard. CSS/ Assistant Project Administrator for this contract. He manages all project documentation, including photo documentation, quantity reviews, PrC, and MAC. The scope of work under this contract includes multiple improvements such as Maintenance of Traffic (MOT) using standard, special, and traffic control officers; erosion control measures like sediment barriers and inlet protection; concrete removal and installation of gravity walls, curbs, gutters, sidewalks, and driveways; asphalt work including milling, base installation, Superpave, and friction course application; lighting upgrades involving luminaires; pavement markings for detectable surfaces, painted surfaces, and bike lanes; signalization involving signal cables, aluminum poles, signal auxiliaries, vehicular and pedestrian signal detection, loop detectors, and loop assemblies; signing work including single-post, raised, painted, and thermoplastic markings, along with "sharrow" and bike lane markings; traffic monitoring involving sensors, loops, and cabinets; and utility adjustments for manholes, valve meter boxes, conduit, and pull/splice boxes. *Location: Boynton Beach, FL. ***Prior to HBC**

John Snyder brings extensive experience in all phases of both large and small construction projects, from the initial pursuit to final acceptance. His expertise lies in strategic project planning, understanding Florida Department of Transportation (FDOT) processes, and managing contractor processes. He excels in problem-solving, conflict resolution, and time management, particularly when dealing with utility conflicts and plan errors. John holds certifications in all aspects of construction in the State of Florida, including asphalt, earthwork, bridges, concrete, Maintenance of Traffic (MOT), Intelligent Transportation System (ITS), signalization, landscaping, Quality Control (QC) Manager, Project Manager, and Occupational Safety and Health Administration (OSHA).

***Project Administrator (PA)/Radiation Safety Officer (RSO).** Project Administrator and a key contributor to the pursuit team that won the above mentioned FDOT projects for Colliers. John played a pivotal role in building the newly established team in FDOT District 5. He set up the internal procedures, managed project scope, set quality and performance standards, and assessed risk. He also established an inventory list of essential materials, devices, testing equipment and vehicles, and set up accounts with vendors. He co-developed a job site safety plan and became the Site Safety Leader. He also served as the Resident Safety Officer in charge of the Nuclear Radiation Safety program.

- FDOT D5 Brevard County T5800 Intersection Milling & Resurfacing Drainage approx. *$3M*
- FDOT D5 Brevard County T5797 Milling & Resurfacing Drainage Improvements approx. $*5M*
- FDOT D5 Brevard County E50F5 Milling & Resurfacing Drainage Improvements approx. $*4M*
- FDOT D5 Brevard County T5805 Milling & Resurfacing approx. $*7M*
- He oversaw the risk management throughout the project, identifying, evaluating, and mitigating risks that could delay and have a costly impact on the project's outcome.
- He worked with local agencies to identify and address utility conflicts and proposed solutions for powerline violations of the OSHA buffer space.
- During his plan review, John identified a major error in the TTCP phasing for a newly installed Midblock crossing, resulting in additional compensation for the contractor, maintaining the original contract schedule and improved safety for the public.
- He maintained regular contact with the stakeholders, providing day-to-day updates on project status and changes. He also attended monthly District 5 Issues meeting, where he was able to contribute by addressing a major plan error involving an undocumented driveway in direct conflict with FDOT's access management plans.

Scott is a seasoned Construction Engineering and Inspection (CEI) Senior Bridge Inspector with extensive experience working with the Florida Department of Transportation (FDOT). His expertise spans the inspection of design-build roadway construction, milling and resurfacing, drainage improvements, signalization, utility conflicts and relocations, vertical construction, and Maintenance of Traffic (MOT). Scott has served as the Senior Inspector in primary control of CC2 construction projects, where he supervised multiple inspectors and was directly responsible for all inspection requirements related to construction operations.

Florida Department of Transportation (FDOT) District 4, Blue Heron Boulevard Bridge Rehabilitation. The improvements under this contract consist of, but are not limited to, MOT, floating turbidity barrier, bridge superstructure (partial deck replacement, spall restoration, crack injection, reinforcing steel, expansion joint, concrete removal), bridge substructure (bearing replacement), reef establishment, milling and resurfacing, concrete (traffic separator, median barrier), and pavement markings (removable tape, permanent tape, painted, thermoplastic, raised) along State Road A1A (Blue Heron Boulevard) at Bridge No. 930269 over the lntracoastal Waterway for 0.374 miles in the City of Riviera Beach, Palm Beach County. *Location: Riviera Beach, FL. Dates: 03/2023–11/2023. FM No. 445769-1-52-01. Reference: Bodler Barthelemy, PE, (561) 370-1127.*

***Florida Department of Transportation (FDOT) District 4, Sheridan Street Bascule Bridge Rehabilitation.** The project improvements included the rehabilitation of the Sheridan Street Bascule Bridge's major mechanical and electrical components, most notably, replacing hydraulic power units, refurbishing existing hydraulic cylinders, and replacing submarine conduit system. *Location: Broward County, FL. Dates: 5/2021–3/2023. FM No.: 441652-1-52-01. Construction Cost: $3/2018-1/2022. Reference: Tyler Furrey, EI, (954) 892-2362.*

***Florida Department of Transportation (FDOT) District 4, CEI Construction Services for Southern Boulevard Bridge Replacement.** This project includes replacing the existing bascule (draw) bridge and tide relief bridge over the lntracoastal Waterway (ICWW) and Lake Worth Lagoon between the Town of Palm Beach and the City of West Palm Beach. A temporary bridge was built north of the existing bridge to maintain traffic, while the replacement bascule bridge was under construction. New decorative lighting, pedestrian features, traffic signals, signage, and drainage were also included. Scott was responsible for verification, inspection, testing, and sampling of MSE walls, drilled shafts, pile driving, earthwork, concrete deck, traffic railing, and MOT. *Location: Palm Beach County, FL. FM No.: 419013-1-52-01. Reference: Geoffrey Parker, PE, (954) 325-6880.*

This experience has allowed him the ability to handle diverse construction operations, including asphalt coring, soil testing, and sampling. Luis also has a deep understanding of milling & resurfacing, road rehabilitation, and maintenance techniques. His proficiency also extends to a range of other construction activities, including preparing daily work reports utilizing PrC; compiling VT Asphalt Reports; analyzing IV Cores data for quality control purposes; concrete coring, testing, and sampling; earthwork; verifying contractor-installed quantities; and Maintenance of Traffic (MOT). He is also well-versed in the oversight of multiple facets of construction projects, such as ITS components, directional drilling, and electrical infrastructure. Luis is intimately familiar with handling project closeout documentation, including comprehensive punch lists, which underscores his organizational skills and meticulous approach.

Palm Beach County (PBC), PBC LAP Project # 2021025 - Cherry Road Military Trail to Quail Drive - Roadway, Sidewalk, & Pedestrian Lighting Improvements Project. The project involves the construction of an 8-foot-wide sidewalk along the north side of Cherry Road, stretching from N. Military Trail to a point 120 feet west of Quail Road. Additionally, a 6-foot-wide sidewalk will be constructed on the south side of Cherry Road, covering the same stretch from N. Military Trail to Quail Road, with the exception of the segment that crosses the bridge identified as structure #934229. The scope of the project also includes milling & resurfacing, widening, and the installation of appropriate signing and pavement markings to better accommodate current traffic volumes and improve overall traffic flow. *Location: Palm Beach County, FL. Dates: 03/2025 - Ongoing. Contract No.:* 2021025. *Construction Fees: $1.2M. Reference: Dave West, (561) 684-4180, DWest1@pbc.gov.*

Palm Beach County (PBC), Construction Engineering and Inspection (CEI) Annual Services Contract, Task Work Order 5: Donald Ross Rd Bascule Bridge Project. Senior Inspector for inspection, and materials sampling and testing for the replacement of hydraulic, electrical, and mechanical equipment for the existing Donald Ross bascule bridge structure. He is performing all the services necessary to properly coordinate the activities of all parties involved in completing the project, which includes maintaining complete and accurate records of all activities and events relating to the Project. *Location: Palm Beach County, FL. Dates: 12/2023–07/2024. PBC Project No.: 2018510. Contract No. 2021052. Task Work Order No. 5. Reference: Bruno Torres, MBA, CGC, (954)-294-8582, btorres@mehtaeng.com.*

***Prior to HBC**

Francisco is a highly experienced Construction Engineering and Inspection (CEI) Inspector with a background as a Construction Superintendent. Since 2014, he has worked on many Florida Department of Transportation (FDOT), Broward County, and Palm Beach County projects. He has demonstrated extensive experience providing verification of completed roadway work in accordance with contract documents, plans, and applicable national standards, including the Manual on Uniform Traffic Control Devices (MUTCD)and National Fire Protection Association (NFPA) 70 and 780, as well as FDOT and Broward County standard plans and specifications. He was responsible for more than 400 drilled shaft operations, installation of building structures, underground infrastructure, electrical infrastructure, Closed-Circuit Television (CCTV) camera pole installation, and overhead structures installation. He specializes in Intelligent Transportation System (ITS) infrastructure and the installation of toll gantries on both the mainlines and the ramps. He also has a vast understanding of low voltage and high voltage electricity, all safety requirements, and civil engineering to oversee the complexities of any project.

***Broward County, CEI Services for Intelligent Transportation Systems (ITS) Annual Services Contract - Wiles Rd between SR-7 and I-95.** Francisco was the Construction Engineering and Inspection (CEI) Senior Inspector on the Wiles Road between SR-7 and I-95 project under this ITS contract, and played a crucial role in ensuring the successful completion of this project. His responsibilities included overseeing and inspecting all construction activities to ensure compliance with project plans, specifications, and regulations. Francisco was tasked with conducting regular site visits, reviewing quality control procedures, monitoring the progress of construction work, and producing daily reports with photo documentation. Additionally, Francisco was responsible for coordinating with contractors, engineers, and other project stakeholders to address any issues that arose during the construction process.

***Broward County, CEI Services for Intelligent Transportation Systems (ITS) Annual Services Contract – Coconut Creek Pkwy between SR-7 and I-95.** Francisco was the Construction Engineering and Inspection (CEI) Senior Inspector on this Coconut Creek Parkway between SR-7 and I-95 project, and played a crucial role in ensuring the successful completion of this project. His responsibilities included overseeing and inspecting all construction activities, such as milling and resurfacing, ITS components, ADA compliance, sidewalks, traffic signal, pedestrian improvements, and Maintenance of Traffic (MOT), to ensure compliance with project plans, specifications, and regulations. Additionally, Francisco was tasked with conducting regular site visits, reviewing quality control procedures, monitoring the progress of construction work, and producing daily reports with photo documentation.

Omar has made strides with significant experience working in the Construction Engineering and Inspection (CEI) Industry as a CEI Inspector. Omar has provided VT in the field of asphalt, where he aided in performing asphalt coring, soil testing, sampling, and has gained experience with milling & resurfacing, road rehabilitation and maintenance techniques. His proficiency also extends to a range of other construction activities, including concrete (coring, testing, and sampling), earthwork, Maintenance of Traffic (MOT), clearing and grubbing, sediment barrier installation, drainage systems implementation, regular excavation, guardrail installation, lighting, signalization, and the application of signing and pavement markings. Omar's premiere experience was on the FDOT District 4 Boynton Beach Project where the project was completed with a 6 month acceleration and won a Best in Construction MOT Award. During his time in the role, Omar gained experience maintaining logbooks, testing, and sampling concrete. His professionalism and dedication have enabled him to rapidly grasp essential programs, such as PrC & MAC, and gain an intimate understanding of FDOT Standards and Specifications and Maintenance of Traffic (MOT).

Florida Department of Transportation (FDOT) District 4, CEI Services for Complete Streets Improvements along Boynton Beach Blvd between NW 3rd St and US-1/Federal Hwy. Omar served the role of CEI Inspector Aide on this FDOT D4 Boynton Beach Boulevard project, overseeing the improvements under this contract. Omar's responsibilities included daily inspections, photo documentation, participating in weekly progress meetings, checking MOT and SWPPP compliance, utilization of PRC, MAC, PSSP, and miscellaneous project RFI, CO, and SA information retrieval. *Location: Boynton Beach, FL. Woudeline Lucdor

Data Collection

Woudeline specializes in traffic data collection, transportation engineering, and environmental engineering, supporting projects that enhance mobility and infrastructure planning. She has contributed to data collection efforts for Florida Department of Transportation (FDOT) District 4 and Miami-Dade County (MDC), conducting traffic counts, turning movement studies, speed studies, and geometric data analysis for corridor and intersection evaluations. With a background in civil engineering, she has experience in structural analysis, geotechnical engineering, and wastewater treatment engineering. She holds a Certificate of Specialization in Water Resources and Environmental Engineering and is actively pursuing her Engineer Intern (EI) certification. Passionate about leveraging data-driven insights, Woudeline is dedicated to advancing innovative and sustainable transportation solutions.

Ethan Behre

Data Collection

7 Years of Experience

Ethan specializes in traffic data collection, utility coordination, and 3D visualization for transportation and infrastructure projects. His expertise includes Turning Movement Counts (TMCs), vehicle speed studies, Origin-Destination (O-D) data, and queue length assessments, as well as field reviews for sidewalks, landscaping, and pole-mounted signage. He has experience overseeing soft digging, boring, and utility marking to support fiber line installations and infrastructure improvements. Ethan is also skilled in 3D modeling, rendering, and graphical design, creating high-quality visuals for project presentations. He has contributed to key projects, such as the NW 17th Avenue Bridge PD&E Study, SR-112 Airport Expressway Master Plan, and multiple FDOT and Miami-Dade County initiatives. Certified in Advanced Maintenance of Traffic (MOT), Hazmat Safety, Concrete Field Testing, and as an FAA Part 107 UAS Drone Pilot, Ethan integrates technical expertise and visualization skills to enhance transportation planning, project documentation, and infrastructure development.

Miami-Dade County (MDC), Northeast Corridor Federal Transit Administration (FTA) Categorical Exclusion Data Collection. Ethan assisted with data collection tasks for this project, which involved evaluating the impacts of implementing 13.5 miles of new commuter rail service utilizing the existing Florida East Coast (FEC) Railway corridor. He performed tasks necessary for preparing traffic data collection and performing safety analysis over an initial 4-month period, with supplemental intersections added later, for 76 study intersections, including Turning Movement Counts (TMCs), 292 72-hour approach volume counts, traffic signal pre-emption, geometric data, field review of existing conditions, queuing data, spot speed studies at 36 locations, and safety analysis for 52 state road intersections. *Location: Miami-Dade County, FL. Expertise
GIS analysis, environmental engineering, water and wastewater infrastructure, permitting, drainage systems, transportation infrastructure, sediment control, utility coordination, site assessment, stormwater management, and infrastructure planning.

***Prior to HBC**

Julia has extensive experience in Geographic Information System (GIS), Python programming, and permitting for infrastructure projects, with a focus on treatment plants and pump stations. At HBC, she leads sediment loss modeling for the Carraízo Sediment Control Project, and has contributed to the design and permitting of the Camuy-Hatillo Wastewater Treatment Plant (WWTP), mapping force mains and protecting habitats. She has also supported the City of Riviera Beach Water Treatment Plant through site assessments and technical memorandums. Additionally, Julia's work with Miami-Dade County Water and Sewer Department (MDC-WASD) and Puerto Rico Aqueduct and Sewer Authority (PRASA) involved GIS-based capacity assessments and planning for future growth in water systems. Her expertise extends to drainage, transportation, and wastewater collection systems, as well as utility coordination. Currently, Julia is developing a GIS model for soil loss in the Lake Loiza watershed of Puerto Rico, further solidifying her key role in infrastructure development.

Miami-Dade County Water and Sewer Department (MDC-WASD), In-House GIS Specialist. In-House GIS Specialist responsible for managing and maintaining spatial data in support of over 200 active Capital Improvement Plan (CIP) projects at MDC-WASD. Embedded within MDC-WASD's Planning, Regulatory Compliance, and Capital Improvements Division, her responsibilities include digitizing and querying project data, integrating infrastructure information with political and jurisdictional boundaries, and producing monthly district-specific work plans and data-rich maps to support Commission-level decisions and public transparency.

- MDC-WASD- Embedded GIS Specialist for CIP Planning: Provides full-time, on-site support within MDC-WASD's Planning, Regulatory Compliance, and Capital Improvements Division, managing GIS integration for over 200 active CIP projects; develops monthly Commission District work plans, project maps, and decision-support visuals to guide capital planning and transparency.
- MDC-WASD- Interagency Coordination and Conflict Resolution: Identifies and maps conflicts between MDC-WASD capital projects and external agency work (FDOT, DTPW, municipalities); supports development of Joint Participation Agreements (JPAs) and facilitates project sequencing strategies to reduce costs and scheduling risks.
- MDC-WASD- Connect2Protect Septic-to-Sewer Initiative: Supports planning by visualizing municipal boundaries, locating underserved parcels, and contributing geospatial inputs to advance sewer service expansion. MDC-WASD- Enterprise Integration and Modeling Support: Translates Civil 3D data into GIS products, aligns as-built and utility data with enterprise systems, and supports infrastructure modeling inputs and validation tasks.

Leandro Vazquez

Utility Coordination

4 Years of Experience

Years with HBC
4 years

Education
B.A. in English, Florida International University (06/1987)

Expertise
Proposla writing, QA/QC, compliance reviews, utility coordination

After earning his bachelor's degree in English from Florida International University, Leandro pursued entrepreneurship by opening and managing two retail clothing stores and an e-commerce platform, which he successfully operated for 30 years. In 2018, he transitioned into the engineering industry, drafting, editing, and submitting technical proposals for multiple agencies, including FDOT, FTE, GMX, STOF, PRASA, and others. After joining HBC Engineering Company (HBC) in 2021, he served as Marketing Coordinator and Technical Writer, managing proposal documentation, subconsultant coordination, and quality control of submittals. From 2021 to 2024, he led the preparation of technical proposals for major public agencies and utilities, and in 2025, he advanced into the role of Utility Coordinator while continuing to serve as HBC's Technical Writer.

Florida Department of Transportation (FDOT) District 4, SR-817/ University Dr from Nova Dr to SR-84. Utility Coordinator providing proactive communication and coordination with Utility/Agency Owners (UAOs) and overseeing utility relocations and conflict resolutions for roadway widening and infrastructure improvements project along SR-817/ University Drive from Nova Drive to SR-84. Leandro coordinated with UAOs, design teams, and contractors to facilitate the relocation of drainage structures, overhead signs, a mast arm, and utility poles, while minimizing service disruptions. He managed utility adjustments to accommodate the addition of an auxiliary lane from NW 23rd Street to the WB I-595 on-ramp and the reconfiguration of the bus stop bay at Nova Drive and SR-817/ University Drive. He also ensured compliance with regulatory requirements and right-of-way constraints, while addressing utility conflicts related to the reconfiguration of right-turn lanes serving the Royal Grand community, PNC Bank, and Nova Drive. Leandro assisted in construction phasing and permitting to align utility work with the project schedule and FDOT standards. *Location: Plantation, FL. Dates: 01/2025-Ongoing. Construction Cost: $7M. Reference Adham Naiem, PE, (954) 777-4440. Contract No.: 445624-1-52-01.*

Florida Department of Trasnportation (FDOT) District 4, SR-708/Blue Heron Blvd from West of SR-9/I-95 to West of Garden Rd. Utility Coordinator responsible for managing utility coordination activities on this SR-708/Blue Heron Boulevard Lighting Improvement Project, supporting lighting enhancements at the SR-9/I-95 interchange and along SR-708/Blue Heeron Boulevard from east of SR-9/I-95 and west of Garden Road. Responsibilities included identifying and coordinating with Utility/Agency Owners (UAOs) throughout the corridor to ensure timely utility clearance and compliance with FDOT standards. Duties encompassed pre-meeting preparation, conducting field reviews with the Engineer of Record (EOR) and UAOs, documenting meeting minutes, and collecting and reviewing marked utility plans, as-builts, and record drawings. The role also involved processing utility documentation, including No Conflict Letters, Utility Work Schedules (UWSs), and agreements, assessing potential utility impacts against Maintenance of Traffic (MOT) and construction phasing, and finalizing executed documents for utility certification. Successfully compiled and submitted the complete Utility Certification package to FDOT, ensuring all utility coordination milestones were met. *Location: Palm Beach County, FL. Dates: 01/2025-Ongoing. Reference: Ronald Wallace, PE, (954) 777-4428, Ronald.Wallace@dot.state.fl.us. Contract No.: CAQ79*

Joseph Williams

Cost Estimates/Schedule and Project Control

Joseph specializes in cost estimating, scheduling, and project controls for major public and private sector capital improvement projects. Joseph brings extensive expertise in program management, change order negotiation, design review, and budget oversight. He has successfully supported construction programs for aviation, transportation, municipal, education, and federal sectors, ranging from local upgrades to multi-billion-dollar developments. He has played critical roles on high-profile initiatives, such as the Miami International Airport (MIA) Capital Improvement Program (CIP), PortMiami, City of Miami CIP, and Broward County and Miami-Dade County Public School facilities. His scope of services includes managing all project phases from design through construction and close-out, ensuring cost accuracy and schedule alignment. Joseph is proficient in Primavera, E-Builder, Procore, Timberline, On-Screen Takeoff, and FEMA's Grants Manager, among other platforms. He also offers vast experience in value engineering, scope development, bid preparation, and oversight of both civil and vertical infrastructure.

Joseph also provided comments and an overview review of the CIP Operating and Control Environment reporting system. *Location: Miami, FL. Dates: 1/2024 - 9/2024. Contract Fee: $4M.*

Melannie Gomez

Public Information Officer

3 Years of Experience

Passionate about fostering meaningful connections between communities and infrastructure development, Melannie specializes in public involvement, community engagement, and strategic communications for engineering and infrastructure projects. She has supported municipalities, such as the City of Hollywood and Miami-Dade County Department of Transportation and Public Works (MDC-DTPW), facilitating public outreach initiatives and stakeholder coordination. Her expertise includes media relations, event planning, and multilingual communication, ensuring seamless dissemination of project information. She is proficient in QuickBooks, Microsoft Office Suite, and social media management tools.

City of Belle Glade, Basin H1 – Stormwater Improvements Project. Public Information Specialist supporting public engagement and stakeholder communication throughout the planning and implementation of stormwater improvements within Basin H1, a 48-acre area bounded by Dr. Martin Luther King, Jr Boulevard West, SW 4th Street, South Florida Conservancy District (SFCD) Canal 1 (SW Avenue G), and South Main Street. Responsibilities include supporting and creating a public-facing presentation to communicate project benefits and timelines. *Location: Belle Glade, FL. Dates: 8/5/2024–Ongoing. HBC Fee: $12.6M. Reference: Al Caruso, 954-782-8222, acaruso@craigasmith.com*

City of Fort Lauderdale, Riverwalk North Seawall Replacement Project. Public Information Officer playing a key role in public outreach and communication efforts for this project, which involves replacing the existing seawall, installing new docks, relocating utilities, and ensuring compliance with engineering and environmental standards. Melannie is facilitating stakeholder engagement, preparing public notices, and managing project-related communications to keep the community informed. *Location: Fort Lauderdale, FL. Dates: 2023-Ongoing. Reference: Ana Ziegler, EE/PM II, (954) 828-5817, aziegler@fortlauderdale.gov*

City of Hollywood, Johnson St Complete Streets Feasibility Study. This project involves performing a feasibility study to create Complete Streets alternatives for Johnson Street from North 30th Road to North Dixie Highway. Melannie is responsible for coordinating public involvement meetings for the City of Hollywood, regarding potential alternatives designed for the Johnson Street corridor. Melannie is also responsible for setting up login sheets, creating fact sheets, collecting data, and interacting with current local residents and business owners, concerning their input and opinions of the development of a safe Complete Streets corridor. *Location: Hollywood, FL. 47 Years of Experience

Years with HBC
7 years

Education
PhD in Civil Engineering/ Environmental, University of Texas at Austin (5/18/1991)

M.S. in Civil Engineering/ Environmental, University of Texas at Austin (5/18/1985)

M.S. in Environmental and Sanitation Engineering, IHE Delft, Holland (9-11-1982)

Industrial Environmental Engineering, Fundçãao Armando Alvarez Penteado, Brazil (1980)

B.S. in Civil Engineering, Universidade de São Paulo, Brazil (11/9/1979)

Licenses & Certifications
Engineer Intern (TX) (01/02/1991)

Executive Leadership, Michigan University (2001)

Expertise
Water and wastewater infrastructure, civil engineering, environmental engineering, project management, quality assurance/quality control (QA/QC), feasibility studies,

Dr. Craveiro has extensive experience in civil engineering, client service management, constructability review, area management, and business development. He has worked on large infrastructure projects involving various disciplines, such as transportation, traffic, water, wastewater, coastal, ports, and marine. His typical client interface is with agencies, including Miami-Dade County (MDC) Water and Sewer Department (WASD) and South Florida Water Management District (SFWMD), as well as companies like Vale and Petrobras. From a technical standpoint, he has been involved in a wide variety of complex and high-profile infrastructure projects. He has performed various technical roles successfully, including those dealing with planning, conceptual design, and evaluation of existing systems.

Puerto Rico Aqueduct and Sewer Authority (PRASA), Preliminary Engineering Reports (PERs) for the Elimination of the Corozal, Camuy-Hatillo, and Islote Wastewater Treatment Plants. Quality Assurance/ Quality Control (QA/QC) Reviewer for the information contained within the 3 Preliminary Engineering Reports (PERs). *Location: Puerto Rico. Dates: 2022. HBC Fee: $225K. Reference: Hans Figueroa, PE, (787) 641-6800.*

Broward County, Septic Tank Elimination Program (STEP). Quality Assurance/Quality Control (QA/QC) Reviewer for this project, which included the evaluation and selection of 3 alternative sewer systems to serve the business properties located within a marina in Broward County. . *Location: Broward County, FL. Dates: 2019–2021. Reference: Alicia Dunne, PE, (954) 831-0793, adunne@broward.org. Project No.: 104247.*

Miami-Dade County Water and Sewer Department (MDC-WASD), CD 2.27: Central District Wastewater Treatment Plant (CDWWTP) New Oxygen Plant Design-Build Project. Quality Assurance/Quality Control (QA/QC) Reviewer for this project, which involved the construction of an oxygen production system (2-VPSA) at the CDWWTP to provide full redundancy, as the existing units were near the end of their useful service life and prone to failure. *Location: Virginia Key, FL. Dates: 2016–2020. HBC Fee: $150K. Construction Cost: $58M. Reference: Paul F. Adams, (786) 863-9425, paul.adams@miamidade.gov.*

***Miami-Dade County Water and Sewer Department (MDC-WASD), South District Wastewater Treatment Plant (SDWWTP) Renewal and Replacement Project.** Client Service Manager responsible for quality control and allocation of appropriate technical resources. He also served as Senior Technical Consultant on several issues, including large sewage pumps, screening and grit removal and disposal system, primary clarification and scum handling, sludge thickening, co-generation, pure oxygen biological secondary system, high-level disinfection, effluent filtration, wastewater reuse, deep well injection, and operator training. *Location: Cutler Bay, FL. Dates: 7/2007-11/2009. HBC Fee: $8M. Reference: Humberto Codispoti, (305) 790-0235, HCP@miamidade.gov.*

DIAZ-MURPHY & ASSOCIATES

PROFESSIONAL EXPERIENCE

Alejandro Diaz has over 15 years of experience in the South Florida construction industry. Mr. Diaz has successfully acted as Laboratory Manager and Project manager for multiple projects for private a public clients. His extensive knowledge of laboratory accreditation requirements have allowed him to achieve and maintain certifications with multiple agencies such as ASTM Cement and Concrete Reference Laboratory (CCRL), American Association of State Highway and Transportation Officials (AASHTO) Accreditation Program (AAP), AASHTO Materials Reference Library (AMRL), United States Army Corps of Engineers (USACE), and the FDOT Inspection-In-Depth (IID) program.

PREVIOUS PROJECTS

FDOT Districts 4 and 6 Materials Lab Material Testing and Construction Support - Districtwide

Project Manager/Laboratory Manager. Supported FDOT in materials testing and inspection services for Districts 4 and 6 projects on a continuing contract basis. Contract provides support and assistance with coordinating and providing verification services on construction materials such as asphalt, earthwork, and concrete in accordance with Contract Documents and FDOT Standards. Contracts valued at $1.5 million and/or duration of 5 years (whichever is met first).

MDX Multiple Projects - Miami, FL

Project Manager/Laboratory Manager. Provided Quality Assurance services as part of the GEC-B team for MDX. Projects range in complexity and location across MDX highways. Some projects involved in as part of this contract include: SR 836 Interchange Modifications at 87th Avenue, SR 874 Ramp Connector to SW 128 Street, SR 836 Modernization from NW 57th Avenue to NW 17th Avenue, Dolphin Station Park and Ride Transit Facility, etc.

I-95 Express Lanes Phase 3A-2 Design/Build Project - Broward County, FL

Project Manager/QC Manager. Project improvements included extending the existing express lanes north from just north of Commercial Boulevard to just south of SW 10th Street in Broward County. One lane was added and the High Occupancy Vehicle (HOV) lane was converted to create two express lanes in each direction. This project included ramp signalization from Cypress Creek Road to Sample Road. Other work included: installing Intelligent Transportation System (ITS) and tolling equipment; widening bridges; and installing noise barrier walls at locations along I-95 Northbound between Atlantic Boulevard and Sample Road, and along I-95 Southbound north of Sample Road.

ESTHER MONZON-AGUIRRE

Planning and Community Development | Public Involvement | Grant writing and Support

RELEVANT EXPERIENCE HIGHLIGHTS

Esther Monzon-Aguirre has over 30 years' experience advising and representing clients throughout the corporate community, regarding their public, regulatory and marketplace challenges. Esther is widely regarded as one of the premier community outreach professionals and legislative advocates, with a reputation built upon keen attention to detail, advocacy expertise with a broad spectrum of real-world challenges solutions and relentless commitment to customer service.

She has assisted clients build a strong strategic foundation by designing and managing creative, collaborative strategic planning processes. The result is clarity of business purpose, well-understood values, and a compelling vision for the future, coupled with goals. Building on that foundation, she assists clients in defining business objectives, actions and timetables, tied to financial projections and budgets. She works closely with the chief executive and the executive team during this process. Often, she is called upon to facilitate decisions by boards of directors, senior managers, employees, and other groups. The result is a business plan that the client owns and is ready to implement.

RELEVANT PROJECT EXPERIENCE

Design-Build Services Terminal F, Port Miami

Carnival Corporation and Miami-Dade County have entered into an agreement to renovate Cruise Terminal F to accommodate CCL's XL 7,000 passenger vessel. The terminal is 471,000 square feet and will become Carnival's third terminal at PortMiami. Terminal F will feature a clean and open design, providing Carnival's newest class of ships with top-tier efficiency and flexibility, and maximizing the use of technology to smooth the guest embarkation process and provide a seamless boarding experience.

Esther is responsible for providing strategic communications support to the Design/Build Team including stakeholder outreach to PortMiami tenants. Longshoreman's Association and elected officials. Esther is also responsible for providing outreach support to the Design/Build Team for Small Business Enterprise outreach and coordination.

Esther's Scope of Work includes:

- Development of a Community Awareness Plan involving the notification of key stakeholders, resolving controversial issues and establishing a process for achieving effective awareness and public involvement of the project
- Prior to the start of construction, elected officials would be identified and briefed on the project per the County requests including County Commissioner and City of Miami officials
- Determine which stakeholders will be temporarily impacted during construction and proactively work and coordinate with them
- Construction Advisories and Informational materials throughout the project, as needed
- Manage relations with the Media in coordination with the Prime Contractor and PortMiami

Frank Paruas, PSM
Surveying & Mapping

Professional Profile

Frank has 27 years of experience within the South Florida region. His services have been sought by public works departments, diverse municipalities, and the Florida Department of Transportation (FDOT). Frank efficiently manages and supports a fully equipped geomatics and remote sensing group, which encompasses multiple field crews based in GPI Geospatial's Miami, Florida office. He showcases proficiency in the preparation of 3D survey files, combining terrestrial mobile and static scanning techniques with aerial lidar and imagery. Additionally, Frank is well-versed in subsurface utility engineering (SUE).

Project Experience

SR 820 Hollywood Boulevard from City Hall to Federal Highway, Broward County, FL. Survey Project Manager. GPI Geospatial completed a design survey for the entire corridor. Horizontal and vertical control, a completed topographic survey, DTM, utility, and drainage for this 1-mile corridor were also provided. The scope included establishing the baseline of survey and right-of-way lines along the corridor. **Client: Florida Department of Transportation - District 4**

SR 7/US 441 from Broward/Palm Beach County Line to SR 808 Glades Road, Broward County, FL. Survey Project Manager. GPI Geospatial completed a design survey for the entire corridor. Horizontal and vertical control and topographic surveys, as well as a DTM for the off-pavement and soft areas, were provided. A complete utility and drainage survey was performed for this 2.5-mile corridor. The scope included establishing the baseline of survey and right-of-way lines along the corridor. **Client: Florida Department of Transportation - District 4**

Seminole Tribe of Florida Pedestrian Bridge Over SR 7, Broward County, FL. Survey Manager. GPI Geospatial was tasked to provide a 3D topographic survey to support engineering design of a pedestrian bridge across State Road 7 (US 441), south of the Osceola Drive intersection, on the Seminole Indian Reservation land. Our field crews utilized conventional survey methods and terrestrial lidar scanning to collect all above ground features, underground drainage, and topographic survey data for this intersection. This data was all merged into a single survey data file to create the final 3D topographic survey product, which was created at a 1"=40' mapping scale. Our team delivered AutoCAD Civil 3D .xml and .dwg files that included topographic and planimetric survey data. All final data was reviewed, signed, and sealed by a Florida-licensed Professional Surveyor and Mapper. **Client: HBC Engineering Company**

Topographic Survey for SR 838 (Sunrise Blvd.) from Turnpike to I-95 Overpass, Broward County, FL. Project Manager. GPI Geospatial was tasked to provide 3D topographic surveying for a 4.38 mile corridor of State Route 838 (Sunrise Boulevard) from the Florida Turnpike to Interstate 95 Overpass. Our survey team established primary and secondary project control points, created the roadway alignment, and surveyed the existing right-of-way for this corridor route. We then mobilized a fixed-wing manned aircraft equipped with a lidar sensor and camera system from Orlando, FL to simultaneously collect lidar and imagery for this site. The aerial data was processed and used to extract topographic mapping features which were merged with the field survey data into Bentley OpenRoads Designer and accompanied with a signed and sealed project report. **Client: CORE Engineering Group**

PROFESSIONAL AFFILIATIONS:
Florida Surveying and Mapping Society (FSMS), Member

National Society of Professional Surveyors (NSPS), Member

Professional Profile

Saul has 24 years of experience in surveying and mapping. His expertise includes a diverse range of Florida Department of Transportation survey projects. He has played a key role in various capacities, including performing static laser scanning, traditional ground surveys, construction staking/layout, geodetic control surveys, right-of-way surveys, and boundary and topographic surveys. Saul is proficient in CADD, particularly in Open Roads Designer (ORD), MicroStation, for 3D design surveys. He employs tools such as Riegl, Leica Infinity, Leica Cyclone, and TopoDOT. He has modeled over 150 bridges across SR 826, I-95, and I-75 within Florida.

Project Experience

SR 5 from NW 17th Way at SR 838/Sunrise Boulevard to NW 33rd Court, Broward County, FL. Technical Lead. GPI Geospatial performed a complete 3D survey for this 2.5 miles urban corridor. The scope includes control survey, 3D survey, drainage survey, as well as determination of right-of-way lines and baseline of survey. The 3D survey was collected using terrestrial mobile lidar (TML). This project included the investigation of more than 100 drainage structures. Saul was the technical lead for this project and his responsibilities included internal coordination with the field and TML crews, as well as the calibration and extraction process. Saul was also responsible for supervising the establishment of the primary horizontal and vertical control as per FDOT standards. Additionally, Saw oversaw the recovery of the historical baseline of survey. **Client: Florida Department of Transportation - District 4**

3D Design Survey for SMA Replacement at 10 Intersections, Broward County, FL. SUR Survey/SUE/GIS/Analyst 3. GPI Geospatial provided primary and secondary control for the 3D survey of these intersections. We used static scanning to collect the topographic portion of the scope, calibrated the point cloud to secondary control, and used it to extract the 3D features for the intersections. We designated all the underground utilities by using ground-penetrating radar (GPR) and other electromagnetic methods. We recovered the historical baseline of survey and right-of-way lines. **Client: Florida Department of Transportation - District 4**

SR 93/I-75 Alligator Alley from Toll Plaza to Broward/Collier County Line. Broward County, FL. Senior Survey Technician. GPI Geospatial is provided ground control for this ±26 miles corridor. We set primary and secondary (aerial targets) control points along the entire corridor and performed static GPS observations to ±70 primary control points. In addition, we prepared a project network control sheet and updated the right-of-way file for the entire project. Saul was responsible for all the QA/QC of the project and provided support on the determination of right-of-way lines**. Client: Florida Department of Transportation-District 4**

Continuing Services for Survey Mapping and SUE, Broward, Palm Beach, Martin, Indian River, and St. Lucie Counties, FL. SUR Survey/SUE/GIS/Analyst 3. GPI Geospatial provided miscellaneous surveying and mapping services under a multi-task, multi-year contract. This required right-of-way mapping, right-of-way control survey, parcel stakeout, control surveys, recovery of historical baseline of survey, right-of-way lines, subsurface utility engineering (SUE), aerial survey, drainage survey, and 3D surveys using traditional survey methods and any form of lidar to collect topographic features. **Client: Florida Department of Transportation - District 4**

Professional Profile

Iarelis has experience in surveying and mapping, working in both public and private sectors. She has served organizations such as the Florida Department of Transportation, Miami-Dade Public Works, engineering clients, Miami-Dade County Aviation Department, Miami-Dade Information Technology Department, Florida Department of Environmental Protection, and South Florida Water Management District. Iarelis has experience in various survey operations, specializing in transportation, public works, water management, private development, and airport projects. Her expertise includes boundary surveys, topographic surveys, GPS surveys, rights-of-way surveys, route surveys, design surveys, geodetic control surveys, photogrammetric surveys, remote sensing surveys, ground control surveys, orthophotography, and utility surveying. Iarelis is skilled in field-to-office surveying solutions and has a deep understanding of field and office procedures, as well as advanced technologies.

Project Experience

South Florida Hi-Resolution Imagery, Broward County, FL. Project Manager. As a part of a multi-year contract to support statewide topographic production, FDOT's Central Office contracted GPI Geospatial to collect high-resolution imagery for the study of approximately 29 square miles to support state studies on seawater rise. A horizontal control network was established using local broadcasting GPS stations to support the aerial triangulation for future mapping and 3D modeling efforts. Deliverables included the raw and processed high-resolution digital imagery, the ground control network, aerial triangulation, and a detailed surveyor's report. **Client: Florida Department of Transportation - Central Office**

Broward Mobility Projects, NE Broward (Pompano Beach/Deerfield Beach), Broward County, FL. Project Manager. This 6.3 corridor mile project required a hybrid approach of mobile lidar and conventional survey to provide a 3D and 2D design survey. The topographic survey data will be utilized to support the design mobility improvements of bike lanes, ADA ramps, and sidewalks along the project corridors. We were also responsible for target placement and merging the field survey data and our lidar data set for the final deliverable to the District. **Client: Florida Department of Transportation - District 4**

I-95 at Boynton Beach Boulevard Intersection Project, Palm Beach County, FL. Project Manager. GPI Geospatial provided color imagery and black and white mapping for this 3.2-mile project of the intersection from low-altitude helicopter photography. We were also responsible for merging the field survey data to the photogrammetric dataset. All deliverables, including mapping and imagery, were delivered to the District on time and within budget. **Client: Florida Department of Transportation - District 4**

Shared-Use Non-Motorized (SUN) Trail, St. Lucie County, FL. Project Manager. GPI Geospatial provided a 3D design survey utilizing a combination of aerial lidar and photogrammetry. The topographic survey data was used to support the efforts for the development of a statewide system of paved non-motorized trails as a component of the Florida Greenways and Trails System, which is planned by the Florida Department of Environmental Protection. We secured the aerial lidar utilizing our fixed-wing aircraft equipped with a Riegl LMS-Q680i scanner and our Vexcel Eagle 100 digital camera for the imagery. Deliverables included a calibrated lidar point cloud tiled in LAS format, topographic survey files in Microstation SS4 format, and digital georeferenced color imagery. **Client: Florida Department of Transportation - District 4**

JULIO SANCHEZ, RA * JSA GROUP INC.

Architecture | MEP | Building Inspections, Plans Review and Permitting

RESUME

Responsibilities:
Mr. Sanchez is the President of JSA Group Inc. Architect*Interior Designer. He is responsible for the design and coordination of all projects for the firm. JSA Group Inc. He specializes in Commercial, Hospitality, Health Care Facilities and Educational projects for Architecture and Interior Design. Mr. Sanchez also coordinates his projects with sub-consultants such as, Civil, Land-Use Planner, Landscape Architecture, Structural, Mechanical, Electrical Fire and Plumbing.

Experience/Qualifications:
Mr. Sanchez has experience preparing, programming, designing, construction drawing documents and construction administration, his skills also include AutoCAD, Revit, Sketch Up, Microsoft Software, Adobe, Photoshop, and Means Cost amongst his experience.

Julio Sanchez is an ADA Title II Consultant and specializes in ADA Barrier Removal.

He has been practicing Architecture and Interior Design for the past 23 years for various Companies and 25 years for JSA Group Inc. which he is a sole proprietor. He is fluent in English and Spanish. Below are the projects in which Mr. Sanchez has contributed his services and expertise that are relevant to this project:

Professional Credentials:
Bachelor of Architecture from the University of Miami, 1977
State of Florida, Registered Architect, AR0015751
State of Florida, Interior Designer 0002171
State of Florida, Sunbiz Certificate of Status P01000050069
SBE Small Business Enterprise
Miami-Dade County Equitable Distribution (EDP) Certified
Miami-Dade County Technical Certifications:
14.00 Architecture, 14.00A Interior Design, 18.00 Architectural Construction Management and 22.00 ADA Title II Consultant.

PREVIOUS EXPERIENCE:
Our interest is in providing Institutional Facilities such as Schools from Pre-k thru High School at Miami Dade County Public Schools, with Architectural Services and with our consultants' engineers Civil, Structural, Landscape, Mechanical (Certified LEED), Electrical, Plumbing & Fire Protection. At JSA Group Inc. we have worked with Pembroke Pines Charter Schools from Pre-K thru High School in Broward County, Health Care Facilities on Miami Dade County, City of Pembroke Pines Public Works Facilities, Miami Dade County Transit projects, Miami Dade County (GSA), Miami Dade County Parks and Recreation, Health Facilities and several public and private organizations that have a similar scope to the proposed project.

TODD MOHLER, Landscape Architecture

Senior Landscape Architect

Mr. Mohler is a Registered Landscape Architect (RLA) with a depth of knowledge developed over three decades of professional experience. His project portfolio ranges broadly between public agencies and private developments. He has specific project experience in parks, streetscapes, hospitality, PUDs, and commercial development. Professional services on projects frequently include initial data collection and observation, site analysis, concept and design development, and complete site, landscape, and irrigation design, including construction oversight and inspection services. For several years, Mr. Mohler designed, tested, inspected, and managed central control irrigation systems. His thorough understanding of water, soils, and plants within the built environment afforded him decades of successful consulting career in the private sector, including irrigation water management through advanced technologies like soil moisture sensing, weather stations, and computerized central control systems.

PROJECT EXPERIENCE

City of Dania Beach, Corridor Landscape Master Plan - Dania Beach, FL. Senior Landscape Architect. The Dania Beach Corridor Landscape Master Plan, developed by KCI for the City of Dania Beach, focuses on improving the identity, safety, and resilience of major thoroughfares, including US-1, Griffin Road, and Dania Beach Boulevard. The plan involved analyzing existing street trees and corridor conditions for visibility, maintenance, and hurricane resilience. It emphasizes community character and aesthetic goals, providing guidance on tree species, planting arrangements, and landscape strategies to enhance traffic calming and pedestrian comfort. The final plan serves as a phased roadmap for sustainable landscape improvements across key corridors.

Florida Department of Transportation, SR 818/Griffin Rd Medians from SW 42nd Avenue, Dania Beach, FL. Senior Landscape Architect. KCI conducted site visits to document existing conditions, developed a tree inventory, and created landscape plans and construction documents for the landscape enhancement design. This design also included a major City median Gateway near the I-95 Interchange, utilizing plant materials that match the City's logo colors. KCI also developed presentation graphics for presentation to the City of Dania Beach Commissioners.

City of Coconut Creek, Lyons Road Medians/Atlantic Boulevard - Coconut Creek, FL. Senior Landscape Architect. KCI developed the Master Plan for this seven-mile Corridor Enhancement Project. This project included developing a unified landscape and hardscape treatment, gateway enhancements accenting major intersections, and realigning sidewalks. KCI also developed design and construction drawings for all five phases of this project, which included median landscape, hardscape, and irrigation improvements. This project, from Atlantic Blvd to Coconut Creek Parkway, was the final section of the master plan. It involved landscaping, hardscaping, irrigation, and obtaining permits through Broward County.

Miami-Dade County, 5th Street Metromover Station - Miami-Dade County, FL. Senior Landscape Architect. KCI prepared design development drawings and is working on the construction documents related to implementing improvements to this park site in a dense urban area. KCI performed site analysis and inventory, created concept designs and budgeting, and worked with Miami Dade County Parks, Recreation and Open Spaces to realize their vision. The programmed elements include a nature-based playground (age range 2-5 and 5-12), hardscape improvements, site lighting, park site amenities (benches, trash cans, dog waste stations), walkway through the site, landscape improvements, irrigation system, entrance improvements, and fencing.

City of North Miami Beach, Washington Park - North Miami Beach, FL. Senior Landscape Architect. KCI is providing professional landscape architectural, civil, and survey services to the City of North Miami Beach in support of the complete replacement of Washington Park. The park is located in the City's historic neighborhood of the same name. The park will include a community center, pool and splashpad, playground, covered basketball courts, restrooms, parking, multi-purpose field, landscape, and irrigation.

Loxahatchee River Environmental Control District, Loxahatchee Environmental Engagement Campus - Jupiter, FL. Senior Project Manager. KCI provided master site planning services to the Loxahatchee River Environmental Control District (LRECD) for this 20-acre site. KCI performed site analysis and inventory, created concept designs and budgeting, and worked with LRECD to realize a master plan capturing their vision. The master plan for the Environmental Engagement Campus showcases the function of the LRECD within the unique local environment, including the Loxahatchee River, and the stewardship of which is the focus of LRECD's mission.

KIRK HOOSAC, RLA

Civil Engineering | Landscape Architecture

Mr. Hoosac has served as Project Manager on more than twelve continuing service contracts for municipalities and public agencies throughout Florida, providing him with deep experience in task order management, project coordination, and responsive client service. Serving as Contract and Project Manager, he oversees scope development, scheduling, interdisciplinary coordination, permitting, and construction-phase support to facilitate continuous project delivery. His expertise spans landscape architecture, site design, and municipal infrastructure, with a strong focus on integrated coordination among civil, structural, and architectural disciplines. He is skilled in concept generation, cost estimating, master planning, landscape and irrigation design, and QA/QC, verifying that all design components align seamlessly. Mr. Hoosac's proactive, detail-oriented, and collaborative approach fosters clear communication between disciplines, resulting in efficient project delivery, budget control, and outcomes that fully align with client objectives. With a strong record of delivering transportation, civic, and beautification projects, he emphasizes constructability, maintainability, and long-term sustainability, supporting the City of Dania Beach's commitment to resilient, safe, and attractive public spaces.

PROJECT EXPERIENCE

City of Dania Beach, Corridor Landscape Master Plan - Dania Beach, FL. Project Manager. The Dania Beach Corridor Landscape Master Plan, developed by KCI for the City of Dania Beach, focuses on improving the identity, safety, and resilience of major thoroughfares, including US-1, Griffin Road, and Dania Beach Boulevard. The plan involved analyzing existing street trees and corridor conditions for visibility, maintenance, and hurricane resilience. It emphasizes community character and aesthetic goals, providing guidance on tree species, planting arrangements, and landscape strategies to enhance traffic calming and pedestrian comfort. The final plan serves as a phased roadmap for sustainable landscape improvements across key corridors.

Florida Department of Transportation, SR 818/Griffin Rd Medians from SW 42nd Avenue, Dania Beach, FL. Project Manager. KCI conducted site visits to document existing conditions, developed a tree inventory, and created landscape plans and construction documents for the landscape enhancement design. This design also included a major City median Gateway near the I-95 Interchange, utilizing plant materials that match the City's logo colors. KCI also developed presentation graphics for presentation to the City of Dania Beach Commissioners.

City of North Miami Community Redevelopment Agency, North Miami Chinatown Masterplan - North Miami, FL. Project Manager. KCI's landscape architecture division provided streetscape/complete street design, creating wayfinding signage and gateway entry features, pedestrian promenades, pocket parks, site furnishings, and stormwater management. They also collaborated with the urban planning division on public involvement workshops and design charrettes. The team focused on creating designs that are sustainable, manageable, culturally and contextually sensitive, inviting, and safe for all users.

City of Doral, Doral Boulevard Landscape, Lighting, and Irrigation Improvements (HEFT to NW 97 Avenue) - Doral, FL. Project Manager. KCI provided site analysis, tree relocation plans, landscape and irrigation plans, and specifications for the beautification of a commercial corridor. FDOT standards were applied to a county facility. Mr. Hoosac oversaw the landscape quality control, construction documents, and tree relocation/tree disposition plans for the proposed median landscape and irrigation design, with post-design services and landscape CEI.

City of Boca Raton, Hillsboro El Rio Park - Boca Raton, FL. Project Manager. After input from surrounding neighbors and recommendations by the Parks and Recreation Board, a new site plan was created, offering a park that will be open from dawn to dusk and will include a walking and jogging path with a fitness station, a playground, one basketball court, four pickleball courts, one sand volleyball court, two tennis courts, picnic pavilions, a soft launch area for canoes and kayaks into the El Rio canal, and parking and restroom facilities. KCI provided professional landscape architecture, engineering, survey, and environmental services to the City of Boca Raton for the design and site plan approval of a 17-acre park.

City of Coconut Creek, Lyons Road Medians/Atlantic Boulevard - Coconut Creek, FL. Project Manager. KCI developed the Master Plan for this seven-mile Corridor Enhancement Project. This project included developing a unified landscape and hardscape treatment, gateway enhancements accenting major intersections, and realigning sidewalks. KCI also developed design and construction drawings for all five phases of this project, which included median landscape, hardscape, and irrigation improvements. This project, from Atlantic Blvd to Coconut Creek Parkway, was the final section of the master plan. It involved landscaping, hardscaping, irrigation, and obtaining permits through Broward County.

Mr. Sowers is a Professional Surveyor & Mapper with 37 years of experience throughout the state of Florida. He leads and coordinates field operations, establishes rigorous standards for consulting teams, and oversees comprehensive quality assurance and quality control of all deliverables prior to client submission. He is an expert in the latest surveying technology and skilled at creating and applying clear, effective management strategies. Mr. Sowers spent eight years at the Florida Department of Transportation, District IV, including four years as District Surveyor where he led improvements in statewide surveying processes. He chaired FDOT's Survey Technical Advisory Committee and helped develop and implement both the staff-hour estimating form and the project network control sheet, essential tools for project planning and execution.

Project Experience

FDOT District 4, Districtwide Continuing Services for Survey, Mapping, and SUE (C-AG53)
Task driven contract performing miscellaneous Survey and Mapping services in Broward, Indian River, Martin, Palm Beach, and St. Lucie Counties, and all municipalities within the district. Services include, but are not limited to: Field Surveys, Historical Baseline and Existing Right of Way Determination, Global Positioning System (GPS) Surveys, Monumentation Surveys, Bathymetric Surveys (which includes single beam, multi beam and side scanner sonar capabilities), Utility Designation and Excavation (including Underwater Utilities), Tree Surveys (trees identified by an Arborist or Landscape Architect), Right of Way Control Survey Maps, Right of Way Maps, Maintenance Maps, Right of Way Monumentation Maps, Boundary Surveys, Quality Assurance Reviews, Expert Witness Testimony, Title Search Plotting Maps, Title Document Review and Analysis, Sketches, Parcel Staking, and Legal Descriptions. *FDOT District 4 | Jeffery Smith (954) 777-4560, jeffery.smith@dot.state.fl.us | 02/2017 thru 02/2022 | Contract Amount: $5 Million*

Pembroke Rd. (US 27-SW 160 Ave) Miramar- Mobile LiDAR
MGV conducted a Mobile LiDAR service for Pembroke Rd. (US 27-SW 160 Ave) in Miramar. The deliverables for this project include Mobile LiDAR control target specifications and location requirements, calibrated LiDAR point clouds in State Plane Coordinates (. PTS format), undistorted and georeferenced digital photography for the project corridor (JPG format), a tiling scheme to be provided (shapefile, MicroStation, or AutoCAD), and the Cyclone file. Craven *Thompson | Richard D. Pryce, PLS/PSM rpryce@craventhompson.com (954) 739-6400 | 02/01/2022 thru 03/25/2022 | Contract Amount: $20,000*

I-95 from South of 45th Street to North of 45th Street and 45th St. from West of Northpoint Blvd. to East of North Congress Ave.
This project involves modifying the existing Diamond Interchange at I-95 and 45th Street to a Diverging Diamond Interchange (DDI) configuration. Widen and reconstruct interchange entrance/exit ramps and provide an additional SB Off-ramp left-turn lane and NB Off-ramp right-turn lane. Widen, Mill & Resurface, and provide bike lanes from Northpoint Blvd. to N. Congress Ave. Add an additional EB left-turn lane on CR-702/45th Street at N. Congress Ave. and NB N. Congress Ave. at CR-702/45th Street. Widen the existing concrete bridge over C-17 canal to accommodate the bike lanes. Provide signal mast arms for all DDI interchange movements and replace existing signals span wire to mast arms at Northpoint Blvd. and N. Congress Ave. Provide overhead span sign structures on SR-9/I-95 NB and SB off-ramps. Provide overhead cantilever sign structures within the DDI interchange. Remove existing sheet pile weir structure at C-17 canal. Other improvements include Signing & Pavement Markings, Signal Interconnection, Pedestrian Signals, Lighting, ITS Travel Information System, existing Tree Relocation and Irrigation System. MGV is responsible for Design Survey, Subsurface Utility Engineering, Right-of-Way Mapping, and Parcel Acquisitions. *Transystems | Ian Biava, PE (954) 653-4700, ibiava@transystems.com | 10/2020 thru On-Going | Subcontract Amount: $119,969.76*

Carlos Alonso, PSM, EI

Surveying & Mapping

Mr. Carlos Alonso is one of our licensed Surveyor & Mappers on staff. Mr. Alonso has over 27 years of experience in the surveying field. He is proficient with CAICE, GEOPAK, Microstation, AutoCAD, Trimble, GPSurvey, and Trimble Geomatics Office, Hector, EFBP, Terramodel as well as numerous other survey and office software. In addition, he has field experience with several instruments and data collectors including Trimble GPS units, TSC1, TSCE, ACU, Robotic Total Stations, and levels, Ashtech GPS units and a variety of other total stations, levels, and instruments. Mr. Alonso is up to date with the current technology and is well trained with the latest technology, Laser Scanning. He is very familiar with the preparation of: Design Surveys, Right-of-Way Control Surveys, Right-of-Way Mapping, Construction Layouts, As-built Surveys, Drainage Surveys, and many more.

Wesley C. Foster P.E, S.I, M.B.A

Environmental Engineering | Geotechnical Engineering

With over a decade of experience in geotechnical engineering, Mr. Foster brings extensive expertise to the Florida Private Provider sector, specializing in subsurface exploration, soil testing, and geotechnical evaluations. His portfolio spans both public and private projects, with a particular emphasis on Florida's diverse and challenging construction environment. His responsibilities include overseeing code compliance, managing subsurface investigations, conducting laboratory assessments, coordinating geotechnical engineering services, and preparing comprehensive geotechnical reports, alongside construction material testing and inspection.

Mr. Foster's background is extensive in geotechnical engineering, including private provider plan reviews and inspections, threshold building inspections, construction material testing, and engineering management. He has successfully led operations for companies focusing on geotechnical services, construction materials testing, and inspections. Additionally, Mr. Foster has managed Building Department contracts both as a primary and secondary consultant and holds credentials as a licensed Professional Engineer and Special Inspector in Florida.

His skill set includes coordinating geotechnical investigations, managing a wide range of private provider plan reviews and inspections, and overseeing material testing and construction inspection services. He leads teams in performing critical geotechnical tests, such as deep foundation assessments, soil analyses, concrete and asphalt pavement evaluations, structural steel inspections, and fireproofing and waterproofing assessments. Mr. Foster's project management expertise extends to ensuring compliance with geotechnical standards for soils, concrete, asphalt, and reinforcing steel across a variety of industries.

Experience

Palm Beach County Geotechnical and Materials Testing Contract
Palm Beach County, Florida
Principal Engineer
Palm Beach County Geotechnical and Materials Testing Contract involved providing geotechnical consulting and engineering, threshold inspections, and construction materials testing for a wide range of infrastructure and facility projects throughout Palm Beach County. Services included soil and geologic evaluations, stability analysis, field and laboratory testing of soils, concrete, asphalt, and masonry, as well as field inspections to ensure compliance with construction standards. Mr. Foster served as Project Administrator responsible for managing personnel, coordinating geotechnical evaluations, and overseeing inspection and testing services for various roadway, facility, and utility projects, including Hood Road, Clint Moore Road, PGA Boulevard, Seminole Pratt Whitney Road, the Palm Beach County Convention Center Parking Garage, and numerous others.

FAU Schmidt Family Complex, Boca Raton - Palm Beach County
Principal Engineer
The Schmidt Family Complex for Academic & Athletic Excellence at Florida Atlantic University (FAU) will be a state-of-the-art education and athletic facility which will include 121,000-sq.-ft. of new construction (offices, classrooms for the MBA Sport Management program, weight and training room, etc.), 20,000-sq.-ft. of locker room and support space to be renovated within the existing stadium, as well as construction of two new outdoor football practice fields. Mr. Foster served as the Private Provider, Threshold Inspector and Project Administration responsible for providing Geotechnical Engineering recommendations, Construction Material Testing, Vibration Monitoring, Floor Flatness/Levelness Testing, Threshold Inspections and Private Provider Plan Review and Inspections.

PBC Vista Center Expansion
Principal Engineer
The Palm Beach County Vista Center Expansion project involved the addition and renovation of office and public service facilities at the county's primary governmental complex. The project included sitework, structural enhancements, utility upgrades, and new construction to support increased operational capacity. Mr. Foster served as Project Administrator responsible for overseeing geotechnical services, construction materials testing, and threshold inspections, including evaluation of soil conditions, field and laboratory testing of construction materials, and ensuring compliance with county and FDOT standards throughout the expansion process.

Legent Health Delray Beach, Palm Beach County, FL
Principal Engineer
Mr. Foster served as the Principal Engineer overseeing geotechnical engineering services for this construction. The project involved the ground-up development of a 34,000 sq ft specialty surgical hospital, with a total construction cost of about $21 million. Mr. Foster managed the geotechnical scope, which included conducting subsurface investigations, performing laboratory analysis, and delivering foundation design recommendations to support the surgical suites, imaging facilities, recovery areas, and infrastructure systems.

Nadia G. Locke, PE, LEED AP

Environmental Engineering

Ms. Locke has been providing professional environmental and engineering consulting services for over 30 years. During her career, she has worked in many facets of environmental consulting including Project Development and Environment (PD&E) Studies, environmental audits, site assessment and remediation, stormwater design, sanitary sewer planning, environmental permitting, climate change impact evaluation, grant assistance, wetland mitigation design, endangered species relocations, Brownfields, community involvement, and training. Ms. Locke has provided litigation support for the Florida Department of Transportation (FDOT), Miami-Dade Aviation Department, Barry University, and private entities.

SELECT WORK EXPERIENCE

Professional Engineering and Architectural Services Contract, City of Doral, Miami-Dade County, Florida

RES has provided a variety of consulting services to the City of Doral through their Professional Engineering and Architectural Services Contract. Services have included grant writing, a city-wide tree inventory conducted in three phases, a city-wide planting plan, educational programing and materials related to tree care and an environmental sampling project conducted to investigate odor complaints. Ms. Locke provides technical review and oversight for the project correspondence and reports.

Districtwide Mitigation, Wildlife and Environmental Services Contract, FDOT District Four, Florida

RES maintains a contract to provide mitigation and other environmental consulting services to the Planning and Environmental Management Office. Under this contract, RES assists FDOT in identifying and developing mitigation projects to offset future unavoidable wetland impacts. Specifically, RES manages the District Four mitigation ledger, provides agency coordination, conducts wetland and wildlife studies and prepares NEPA documentation. Work also includes reviewing new roadway and bridge projects for compliance with NEPA. Ms. Locke provides quality assurance reviews of project documents.

General Environmental Engineering Services, City of Fort Lauderdale, Broward County, Florida

Ms. Locke is the contract manager and has provided QA/QC for our contract for general environmental engineering consulting services for the City of Fort Lauderdale. Services conducted include emergency response; Phase I and Phase II ESAs; wetland surveys/monitoring, endangered species surveys and relocation permitting; benthic (seagrass) surveys; IAQ / asbestos surveys, NEPA assessments for federal funding, contamination assessment and remediation planning. Some services have been provided to assist in ensuring environmental compliance for LAP projects.

Atlantic Housing Partners, Various Sites throughout Florida

Since 2005, RES has been providing environmental consulting services for Atlantic Housing Partners. Services regularly include Phase I ESA portfolios once or twice each year. When Recognized Environmental Conditions are identified, Atlantic Housing Partners engages us to conduct Phase II ESAs. On a few occasions, they have purchased contaminated properties and we have conducted full assessment and remediation. Notable projects include Lakewood Pointe Brownfield Site and Rolling Green.

General Environmental Engineering Services, City of Miami Beach, Miami-Dade County, Florida

Ms. Locke is the contract manager for an ongoing contract to conduct miscellaneous environmental services. Tasks conducted to date include preparation of spill prevention control and countermeasure plans for 12 facilities including pump stations, fire stations, public works yard, Miami Beach Golf Club and the Convention Center and contamination assessment of the green waste facility. RES is supporting the City in seeking conditional closure for contamination issues at a former solid waste facility and golf course. We recently completed a hydrogeological and mapping study for the City to use in considering sea level rise in future infrastructure development.

Junnio Freixa

Environmental Engineering

Junnio Freixa is a scientist and project manager providing support in field investigations, environmental site sampling, and Phase I and Phase II Environmental Site Assessments (ESA), regulatory reporting, and GIS applications. He is experienced in Florida Department of Environmental Protection (FDEP) Standard Operating Procedures (SOPs) and has conducted field sampling efforts including air, soil and groundwater sampling. Mr. Freixa supports the environmental team in preparing regulatory reports, drafting GIS figures, data validation and evaluation and field activities.

SELECT WORK EXPERIENCE

General Environmental Engineering Consulting Services, City of Fort Lauderdale, Broward County, Florida

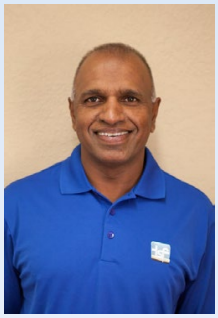
RES holds a consulting contract to conduct miscellaneous environmental services for the City. Services conducted include emergency response to contamination identification during construction of a fire station; environmental reviews to comply with HUD Community Development Block Grant requirements; Phase I and Phase II ESAs; Opinion of post landfill closure costs; contamination assessment and remediation design; asbestos and indoor air quality surveys; development of construction documents for working in contaminated areas; endangered species surveys, permitting and relocation; benthic surveys, NPDES (stormwater permit) support; and grant support. Under this contract Mr. Freixa is currently managing a soil assessment of the One Las Olas property.

Pompano Beach Sports Complex/Sabal Golf Course Brownfield, City of Pompano Beach, Broward County, Florida

This former golf course was assessed by others under a Treasure Coast Regional Planning Council Brownfields grant. Following completion of the grant-funded activities, the City of Pompano Beach engaged RES to conduct the cleanup activities. Using the historic assessment information, RES conducted additional assessments and assisted the City with hiring a contractor to implement the remediation. RES provided consulting and oversight throughout the remedial activities along with the follow-up regulatory coordination and reporting. This $1M cleanup was completed within two months. Mr. Freixa conducted groundwater and soil sampling activities and drafted all project figures. The project has been approved for conditional closure based on the completion of the remedial scope proposed by RES and impact delineation data compiled by RES.

Hollywood Beach Park Mooring Fields, Broward County, Florida

RES performed sediment sampling activities to assist Broward County Parks and Recreation Division with sediment analysis of approximately 12,000 cubic yards of material to be dredged from the Hollywood North Beach Park Mooring Field area. The County engaged RES to evaluate if the material is contaminated, non-contaminated, or hazardous waste and its potential for re-use. Mr. Freixa coordinated and performed the sediment sampling using an AMS Soggy Bottom sediment core sampler. He also drafted the Sediment Characterization and Disposition Evaluation Letter Report for this project. RES was also engaged to conduct benthic resource and mangrove delineation survey for this project. Mr. Freixa also assisted with the GIS mapping components for this project.



PortMiami Environmental Permit Compliance Support Services, Miami-Dade County, Florida

RES was engaged by Fincantieri Infrastructure Florida, Inc. to provide permit compliance support for the proposed improvements to cruise ship berths 8 and 9 at PortMiami in Miami, Florida. RES conducts turbidity monitoring and endangered species monitoring in general accordance with the permits issued for the project. Mr. Freixa conducted sheet pilling inspections for turbidity leaks using an Underwater Remotely Operated Vehicle (ROV) and an aerial drone (DJI Mavic Pro 2).

RAJ KRISHNASAMY, P.E.

Geotechnical Engineering

38 Years of Professional Experience

Education

MS in Geotechnical Engineering, University of Memphis, 1995

BS in Civil Engineering, Christian Brothers University, 1987

Diploma Electronic Engineering, Malaysian Air Force Institute, 1984

Professional Organization and Registration

Professional Engineer: Florida, 53567

Water Well Contractor, Florida, 11346

Certified OSHA Supervisor

Certified Environmental Consultant

Professional Experience

Mr. Raj Krishnasamy, P.E., President and Principal Engineer of TSFGeo, is a Florida Registered Geotechnical Engineer with more than 38 years of experience. Mr. Krishnasamy oversees the geotechnical engineering, construction materials testing, and inspection services operations. His experience consists of successfully completing over 7,500 public and private projects. He serves as Project Manager for continuing contracts with over 20 Florida public agencies. He has a history of repeatedly retaining those contracts through successful, cost-effective, and prompt execution of each task order. Mr. Krishnasamy's daily involvement with the in-house and field operations of the construction and geotechnical services departments provides him with "hands-on" experience and knowledge of current construction codes and construction practices throughout the State of Florida. Mr. Krishnasamy and his highly experienced team focus on providing the client with a consistently accurate, cost-effective quality product that is delivered on time and within budget.

Relevant Project Experience

Seneca Town Center, Pembroke Park, Florida. Mr. Krishnasamy was the Principal-in-Charge of the Construction Materials Testing and Inspection Services for the development at Seneca Town Center. Development consisted of Restaurant/Retail Stores, a Grocery Store, Learning Center, 2-Story Parking Garage, Asphalt Parking Lots, Sidewalks, and Curbs. Services included concrete sampling, building inspections and reporting. TSFGeo technicians performed field density tests, concrete compressive strength tests, and sample pickups. Provided Building Inspectors to observe reinforcing.

3300 Hallandale Beach Boulevard Office Building, Pembroke Park, Florida. Mr. Krishnasamy was the Principal-in-Charge of the Geotechnical Engineering Study for the construction of a one-story office building at 3300 Hallandale Beach Boulevard. Provided a geotechnical engineering report which included evaluations and recommendations regarding foundations, ground floor slabs, utilities, construction excavation and dewatering, site preparation procedures and engineering inspections.

Chaves Lake Park and Sunrise Park, Hallandale, Florida. Mr. Krishnasamy was the Principal-in-Charge of the Geotechnical Engineering Study for the development of Chaves Lake Park and Sunrise Park. The development at Chaves Lake Park consisted of security lighting, picnic shelters, pedestrian walking/exercise trail, Boat Canoe Rental Building with office, restrooms, storage and concession and onsite parking. The development at Sunrise Park consisted of a restroom building, walking trail, security lighting, playground with rubberized surface and shade cover, Canoe Rental picnic shelter and Basketball or Mini Soccer Fields. Provided a geotechnical engineering report which included evaluations and recommendations regarding foundations, ground floor slabs, utilities, construction excavation and dewatering, soil parameters, site preparation procedures, pavement and engineering inspections.

KUMAR VEDULA, P.E.

Geotechnical Engineering

29 Years of Professional Experience

Education

MS in Geotechnical Engineering, University of Memphis, 1995

BE in Civil Engineering, Andhra University, 1992

Professional Organization and Registration

Professional Engineer 54873

American Society of Civil Engineers, Past President (Broward Branch)

Professional Experience

Mr. Kumar Vedula, P.E., Principal Engineer of TSFGeo, is a Florida Registered Professional Engineer, has over 29 years of experience providing engineering services for a wide variety of geotechnical projects involving foundation design, slope stability analysis, WEAP analysis and interpreting PDA reports, excavation support, and construction inspection. Mr. Vedula's extensive experience includes foundation inspections (shallow and deep foundations), soil modification (dynamic compaction, stone columns), preloading, excavations, backfilling, and post-construction monitoring. He has served as a principal inspector on numerous surcharging and settlement evaluations of organic laden soils assignments. His project experience includes 300+ geotechnical engineering studies for various project types including parks, piers, shoreline stabilization, dredging, bridges, roadways, utilities, high-rise buildings, schools, and government facilities. Mr. Vedula has authored, and co-authored papers published in national and international publications.

Relevant Project Experience

3300 Hallandale Beach Boulevard Office Building, Pembroke Park, Florida. Mr. Vedula was the Principal Engineer for the Geotechnical Engineering Study for the construction of a one-story office building at 3300 Hallandale Beach Boulevard. Provided a geotechnical engineering report which included evaluations and recommendations regarding foundations, ground floor slabs, utilities, construction excavation and dewatering, site preparation procedures and engineering inspections.

Flanigan's and Big Daddy, Hallandale Beach, Florida. Mr. Vedula was the Principal Engineer for the Geotechnical Engineering Services for the development of Flanigan's and Big Daddy's buildings, future Bank, and parking areas. Provided a geotechnical engineering report which included evaluations and recommendations regarding site preparation, foundations, floor slabs, utilities, pavement and construction considerations regarding excavations and dewatering.

Chaves Lake Park and Sunrise Park, Hallandale, Florida. Mr. Vedula was the Principal Engineer for the Geotechnical Engineering Study for the development of Chaves Lake Park and Sunrise Park. The development at Chaves Lake Park consisted of security lighting, picnic shelters, pedestrian walking/exercise trail, Boat Canoe Rental Building with office, restrooms, storage and concession and onsite parking. The development at Sunrise Park consisted of a restroom building, walking trail, security lighting, playground with rubberized surface and shade cover, Canoe Rental picnic shelter and Basketball or Mini Soccer Fields. Provided a geotechnical engineering report which included evaluations and recommendations regarding foundations, ground floor slabs, utilities, construction excavation and dewatering, soil parameters, site preparation procedures, pavement and engineering inspections.

JOSE A. VIDAL, AIA, LEED AP

Architecture | MEP

Mr. Jose A. Vidal is the President of V3 Architectural Group, Inc., an award-winning, full-service architecture and interior design firm based in Miami, Florida. With an unwavering dedication to design excellence and client satisfaction, Mr. Vidal is personally committed to every project, ensuring continuous involvement from the initial programming stages to the project's completion.

A Cum Laude graduate with a Bachelor of Architecture from the University of Miami, Mr. Vidal brings over 32 years of experience in architecture, planning, and interiors across both public and private sectors. His extensive portfolio includes work in residential, commercial, retail, corporate, industrial, hospitality, education, planning, government projects, and historic preservation. In the design-build arena, Mr. Vidal has successfully managed numerous fast-tracked projects that remained operational during construction.

Mr. Vidal is actively engaged in all phases of design and construction, overseeing projects from planning and programming to construction supervision and final turnover. His deep knowledge of various project delivery methods, including conventional, construction management-at-risk, and design-build, adds significant value to any project. From the outset of each project, Mr. Vidal places a strong emphasis on architectural scale, proportion, function, and durability. He approaches every design as a unique challenge, free from predetermined styles, ensuring that each project responds to the client's specific aesthetic guidelines and needs. By immersing himself in a detailed analysis of the client's lifestyle, tastes, and operational needs, Mr. Vidal crafts projects that possess a distinct architectural identity.

Mr. Vidal's dedication to design excellence, quality, integrity, and client satisfaction is the cornerstone of V3 Architectural Group's success.

PROJECT EXPERIENCE

Golden Glades Multimodal Transportation Facility, Miami, FL. This is a transportation hub serving as an effective center of activity for MDTPW's vision of desired modal connectivity. Integrates a 2,450 car multi-story parking garage; pedestrian **bridge**; landscaping, hardscaping. Gateway features, 14 bus bays and 860 FT. total length of layover area; bus driver's break lounge; transit hub building, Intercity Bus Terminal, and Bus hub. **Contract Amount:** $ 57 million; **Role:** Project Architect/Interior Designer; **Client:** Florida Department of Transportation; **Reference:** Fernando Sanchez**,** (305) 615-3272; **fsanchez@lead-ec.com**; Delivery Method: Design/Build; **Start/End Dates**: 2018 to 2021.

Dolphin Station Park-and-Ride Transit Terminal Facility, Miami-Dade County, FL. 552,366 SF Park-and-Ride with 819 parking spaces. Project includes transit hub, trucker's lounge, bus bays, and pedestrian canopies. **Contract Amount:** $16.9 million; **Role:** Project Architect; **Client:** MDX; **Reference:** Ariel Millan, (305) 302-2789, amillan@bcceng.com; **Start/End Dates:** 06/2016 to 06/2018.

Doral Meadow Park Renovations Doral, FL. The project consists of the design, engineering, and construction efforts to enclose the existing covered outdoor patio space to provide 800 square feet of multi-purpose indoor recreation space. The men's and women's restrooms are to be completely renovated and brought to the latest applicable codes; including new stall partitions, ADA bathroom fixtures, mirrors, and handlebars as needed. **Key Features:** Building Remodeling; New Construction; Architectural Design; Renovation; Multi-Purpose Space; Recreation Space; Conference Room; Restroom Modernization; ADA Accessibility. **Contract Amount:** $1.2 million; **Role:** Project Architect/Interior Designer; **Client**: APCT Engineers; **Reference:** Antonio Acosta, (305) 592.7283, AGAcosta@APCTE.com; **Start/End Dates:** 2020/2020

Doral Government Center Improvements, Doral, FL. The project consists of miscellaneous Tenant Improvements to the Doral City Hall building located at 8401 NW 53rd Terrace in Doral, Florida. The project scope includes space planning, a new recording studio, security glazing, A/C and IT rooms remodeling. **Key Features:** Building Remodeling and/or New Construction; Interior Design; Space Planning; ADA Accessibility Architectural Design; Remodeling. **Role:** Project Architect/Interior Designer; **Client**: City of Doral/APCT Engineers; **Reference:** Carlos M. Gil-Mera, (305) 592.7283, cmgil@apcte.com**; Start/End Dates:** 2020/2020.

ARCHITECTURAL GROUP

RELEVANT PROJECT / REFERENCE

Golden Glades Multi-Modal Transportation Facility, Miami-Dade County, FL

V3 Architectural Group provided Architectural and Interior Design services for the Golden Glades Multimodal Transportation Facility in Miami-Dade County. The Florida Department of Transportation in conjunction with Miami-Dade County is upgrading and enhancing the mobility at the existing Golden Glades Multimodal Transportation Facility. To maintain project safely, there was periodic pedestrian detours and the relocation of bus stops within the Golden Glades Multimodal Transportation Facility. The construction was phased over an estimated three and a half years to minimize impacts to the public, during special events, and peak periods of traffic. Construction began December 17, 2018 and was completed in 2021. **Relevant Features include:** Entrance Monument, Upgraded And New Bicycle Paths, Sidewalks, Walkways, Platforms, Bicycle Parking And Lockers And New Multi-Bay Bus Terminals.

Role: Project Architect
Cost: $57 M
Client: FDOT/Lead Engineering Contractors

RELEVANT PROJECT / REFERENCE

Dolphin Station Park-And-Ride Transit Terminal Facility Miami-Dade County, FL

V3 Architectural Group provided Architectural and Interior Design services for the Dolphin Station Park-and-Ride Facility. The project was a collaboration between MDX, Miami-Dade County Department of Transportation and Public Works and the Florida Department of Transportation District Six. The transit facility will support Miami-Dade County's SR 836/Dolphin Expressway Express Bus Service, provide a terminus or stop for several local bus routes serving the Dolphin Mall and the cities of Sweetwater and Doral, as well as serving a potential future east-west commuter rail service on the CSX line. The planning, design and construction of the Dolphin Station, at the request of Miami-Dade County was fast-tracked. The Dolphin Station Park-and-Ride Transit Terminal Facility sits on 12.68 Acres and is consist of 552,366 SF of Park-and-Ride space. This project includes a transit hub, trucker's lounge, bus bays, pedestrian canopies, and 819 parking spaces.

The total estimated cost is $16.9 million. The plan was completed in 2018. Technical duties performed on this project by V3 Architectural Group included: Planning, Programming, Design, ADA Consulting, Land-use planning, preparation of Construction Documents, Permitting, Construction Supervision, and Construction Administration services for the project. V3 also provided coordination of the inspections with Ownership and the General Contractor. Comprehensive management systems were put in place for pre-construction activities, budgeting/cost estimates, project scheduling, furniture and site accessory deliveries coordination with furniture vendor, Client, and General Contractor. V3 performed post-construction activities to identify HVAC test and balance, adjustment to lighting, and modifications to site drainage. In addition, V3 also performed shop drawing review and approval, responses to RFI, Site Visits, preparation and submittal of punch lists, as-built plans, record drawings, and close-out documents. ADA Consulting Services included the coordination of public/private accessibility, elevators, ramps, guardrails, hardware selection, and audible/visual components. Land-use planning for 12.68 Acres of public property. V3 worked in conjunction with Design-Criteria Consultant to ensure the proposed Land-use met all code criteria. **Relevant Features include:** collaboration between multiple agencies, pedestrian canopies, public use, lighting, site drainage modifications, land-use, and ADA compliance.

Role: Project Architect
Cost: $16.9 M

ARCHITECTURAL GROUP

RELEVANT PROJECT / REFERENCE

Doral Meadow Park Renovations Doral, FL

V3 Architectural Group and A&P Consulting Transportation Engineers were selected as Design-Build Team for the Doral Meadow Park Renovations and supporting infrastructure including utilities project located at 11555 NW 58th Street, Doral, Florida. The project consists of the design, engineering, and construction efforts to enclose the existing covered outdoor patio space to provide 800 square feet of multi-purpose indoor recreation space. The existing covered area is to be enclosed with storefront windows and glass double doors. A manually operated roller shade shall be provided on all multipurpose indoor space openings to keep the room cool, block the sun's glare as needed, and help the air conditioner system work more efficiently. The existing building north wall will be modified, the existing roll-up door removed, and a door provided to connect this new recreation space to the adjacent kitchenette area which is to be reduced to about 60 square feet. The existing conference room space is to become a high-tech conference room by adding speakers, and a tv screen. The men's and women's restrooms are to be completely renovated and brought to the latest applicable codes; including new stall partitions, ADA bathroom fixtures, mirrors, and handlebars as needed. The existing office space is to be modified and the existing IT equipment will be taken out of the office and placed in a new separate room next to the office. A fresh coat of paint shall be applied to the building exterior. Other façade treatments include two (2) decorative artificial green walls on the west side of the building. A new hardscaped area of approximately 700 square feet will be constructed off the northwest building quadrant, this area is to be used as a plaza with a new shade system and site furniture. The project will include the latest building code, life-safety, fire protection, electrical, plumbing, mechanical, HVAC, communication infrastructure, landscaping, ADA (American with Disabilities Act), and energy efficiency codes. Additionally, it will comply with all requirements established by Miami-Dade Water and Sewer, and other agencies having jurisdiction over the project. **Relevant Features include:** renovation, public use, multi-purpose indoor/outdoor space, recreation space, ADA accessibility, pedestrian shade system and site furniture,and communication infrastructure.

Design Build Services for the Reconstruction of NE 2nd Ave from NE 20th Street to NE 36th Street

Miami-Dade County Department of Transportation and Public Works

HBC is providing comprehensive design-build services for the reconstruction of NE 2nd Avenue from NE 20th Street to NE 36th Street. This project includes roadway reconstruction, stormwater system upgrades, pedestrian and traffic enhancements, and utility improvements to enhance mobility, drainage, and infrastructure resilience.

HBC's role includes engineering design, construction documentation, permitting, and project coordination to ensure seamless execution. The project involves:

- **Roadway & Pedestrian Improvements** – Full roadway reconstruction, new sidewalks, curb and gutter installation, pavement markings, signage, and decorative lighting.
- **Stormwater & Drainage Upgrades** – Design of a new stormwater management system to improve drainage and mitigate flooding.
- **Utility & Water Main Installation** – Design of 4,600 linear feet of 16-inch ductile iron pipe (DIP) water main and 1,500 linear feet of 12-inch DIP water main, including all appurtenances.
- **Traffic & Signalization Enhancements** – New traffic signals, pavement markings, and traffic signage for improved safety and flow.

Location
Miami, FL

Dates

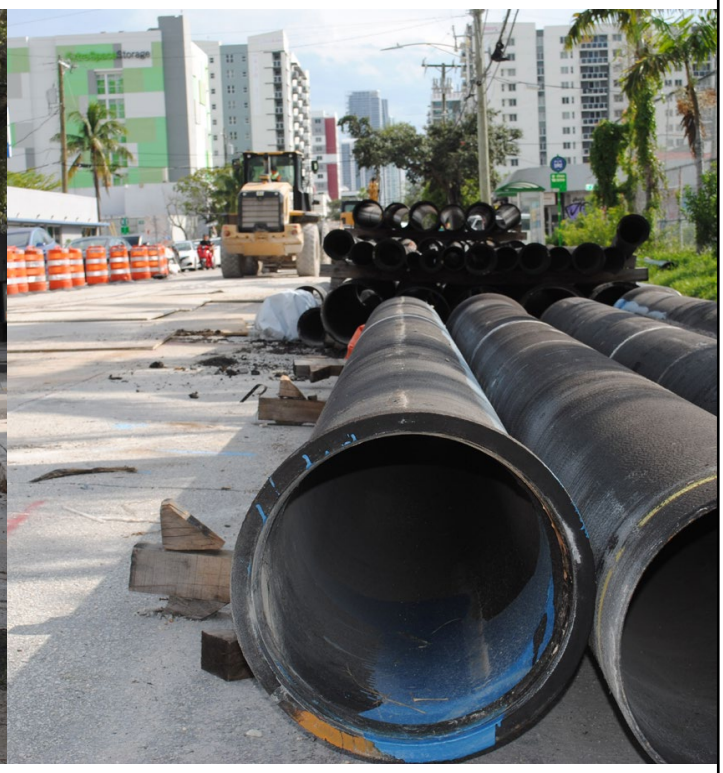
Key Components
Roadway reconstruction, stormwater system, sidewalks, curbs, pavement markings, signage, signalization, lighting, landscaping, utility installation, traffic control, permitting, public involvement, project coordination.



- **Traffic Control & Public Involvement** – Development of Maintenance of Traffic (MOT) plans to manage detours, public engagement strategies, and project coordination in accordance with contract requirements. Project Impact

This project will modernize NE 2nd Avenue, improving roadway safety, drainage capacity, pedestrian access, and utility infrastructure. Through efficient design, permitting, and coordination, HBC is ensuring timely and effective project delivery to meet the needs of the community and stakeholders.

Relevance to the Scope

1. Roadway and Pedestrian Reconstruction
2. Stormwater and Drainage Improvements
3. Utility and Water Main Infrastructure
4. Traffic Signalization and Safety Enhancements
5. Construction Coordination and Public Involvement

Design Build Services for the Reconstruction of NE 2nd Avenue - Segment D

Miami-Dade County Department of Transportation and Public Works

HBC led the comprehensive design and coordination for the NE 2nd Avenue Reconstruction Project, spanning approximately 1.9 miles from NE 69th Street to NE 91st Street. Funded by The People's Transportation Plan and delivered as a design-build initiative, the project aimed to modernize infrastructure, improve safety, and enhance multimodal accessibility along this critical urban corridor.

Roadway and Multimodal Improvements
The corridor was fully reconstructed and widened to improve horizontal and vertical geometry, including the redesign of a four-lane roadway. Enhancements included bike lanes, reconstructed sidewalks, on-street parking, and pedestrian facilities to support multimodal transportation. New pavement sections and upgraded intersection controls were implemented to enhance traffic safety and efficiency.

Drainage and Environmental Compliance
HBC designed an improved stormwater management system, featuring 2,162 linear feet of French Drain and over 125 interconnected structures. ICPR modeling was used to support drainage design and secure Class II DERM permits. The team also identified and addressed four previously undocumented contaminated sites, ensuring full environmental compliance and securing emergency outfall modifications as required by DERM.

Location

alejandro.sauleda@miamidade.gov

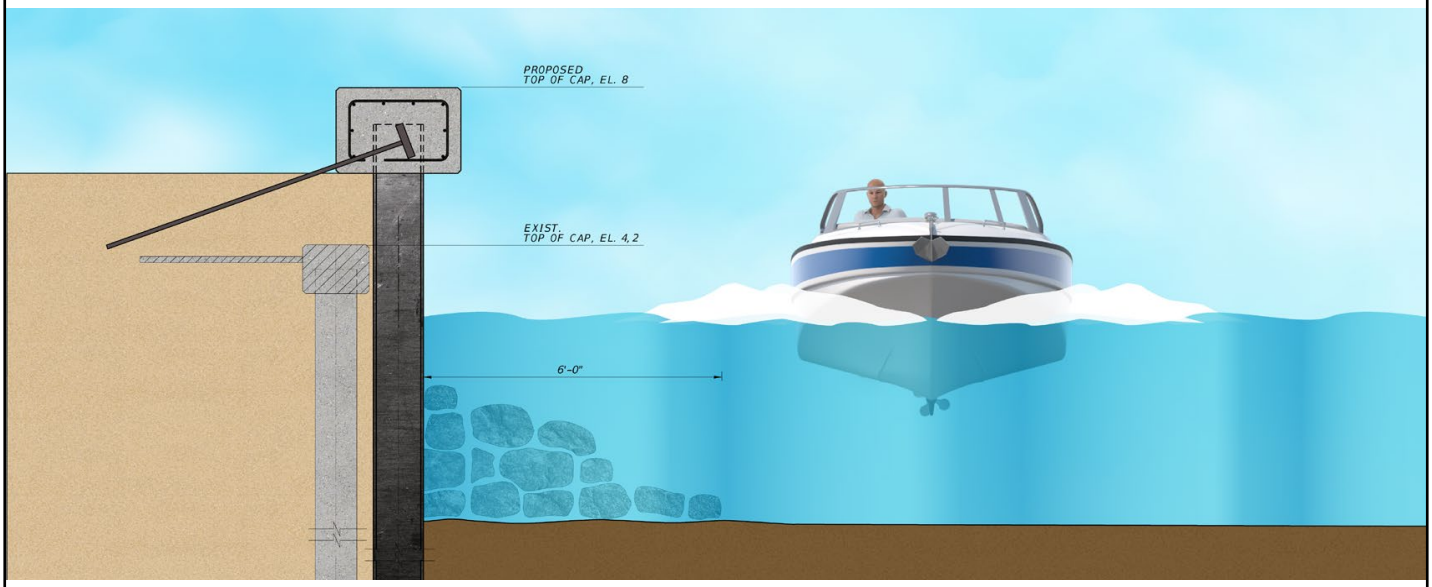
Key Components
Roadway, drainage, utilities, signals, lighting, markings, traffic control, permitting, coordination.

Funded by
Local Agency Program (LAP)

Lighting, Signalization, and Aesthetic Enhancements
The project included new traffic signals at key intersections, upgraded signing and pavement markings (SPM), and corridor-wide decorative lighting to enhance visibility and urban character. A Temporary Traffic Control Plan (TTCP) was developed to maintain access and safety during construction, with particular attention to railroad crossing design and flagging operations near the active FEC Railway.

Stakeholder Coordination and Utility Adjustments
Extensive coordination was required with multiple agencies, utility providers, and the railroad authority. HBC managed stakeholder engagement, permitting, and public involvement, ensuring seamless integration of all project components within a complex urban environment.

The NE 2nd Avenue Reconstruction Project significantly enhanced mobility, resilience, and safety in the City of Miami. HBC's integrated approach across drainage, traffic, environmental, and structural disciplines delivered a high-performance corridor aligned with long-term transportation and sustainability goals.



Relevance to the Scope

1. Comprehensive Corridor Reconstruction and Multimodal Design
2. Advanced Drainage System and Environmental Compliance
3. Traffic Signalization, Lighting, and Safety Enhancements
4. Complex Utility Coordination and Railroad Interface Management
5. Integrated Stakeholder Engagement and Permitting Leadership

Riverwalk North Seawall Replacement Project

City of Fort Lauderdale

HBC is providing design services for the replacement of the Riverwalk North Seawall, starting from the Andrews Avenue Bridge and going five hundred feet west toward the FXE train tracks.

This project includes, but is not limited to, the following:

- The design of a new seawall in the form of sheet piling in front of the existing concrete seawall on the side facing the river
- The demolition of the existing concrete catwalk located in front of the existing seawall on the side facing the river
- The installation of fixed docks attached to the new seawall
- The installation and attachment of new floating docks and amenities
- The relocation of utilities attached to the concrete catwalk, as well as the replacement of utility stations located on the existing concrete catwalk
- The replacement of various electrical shore tie pedestals
- The on-site inspections of deteriorated structure elements and the preparation of designs and specifications for appropriate repairs and replacements
- Data collection and review of existing conditions

Location
Fort Lauderdale, FL

Dates
2024 - Ongoing

Budget
HBC Fee: $386K
Construction Cost: $N/A

Scope of Services
Seawall design, catwalk demolition, fixed docks, floating docks, utility relocation, utility station replacement, electrical pedestal replacement, structural inspections, condition assessment, and post-design services.

- Various post-design services, such as attending, recording, and preparing of minutes for the pre-construction meeting, and the review of all shop drawings, product data, cut sheets, and submittals to determine compliance.

Relevance to the Scope

1. Seawall Replacement and Structural Reinforcement Design
2. Demolition and Reconstruction of Catwalk and Dock Facilities
3. Installation of Fixed and Floating Docks with Utility Relocations
4. Electrical and Shore Power Infrastructure Upgrades
5. Post-Design Support Including Inspections and Submittal Reviews

Corridor Landscape Master Plan

CONTACT PERSON WITH THE ENTITY

City of Dania Beach	100 W Dania Beach Blvd. Dania Beach, FL 33004
Fernando Rodriguez	954.924.6808	frodriguez@daniabeachfl.gov

The Dania Beach Corridor Landscape Master Plan, developed by KCI for the City of Dania Beach, focuses on improving the identity, safety, and resilience of major thoroughfares, including US-1, Griffin Road, and Dania Beach Boulevard. The plan involved analyzing existing street trees and corridor conditions for visibility, maintenance, and hurricane resilience. It emphasizes community character and aesthetic goals, providing guidance on tree species, planting arrangements, and landscape strategies to enhance traffic calming and pedestrian comfort. The final plan serves as a phased roadmap for sustainable landscape improvements across key corridors.

Districtwide Traffic Operations Data Collection Contract

Florida Department of Transportation (FDOT) District 4 (D4)

HBC is supporting the Florida Department of Transportation (FDOT) District 4 (D4) under this Districtwide Traffic Operations Data Collection contract featuring FDOT Work Group 6.1 Traffic Engineering Studies to perform comprehensive data collection services across five counties. This on-call contract enhances FDOT's ability to collect high-quality multimodal data to support traffic operations studies and decision-making processes.

Under this contract, HBC provides a broad range of professional and technical services, including vehicle, pedestrian, and bicycle counts, turning movement counts, spot speed studies, queue analysis, travel time and delay assessments, intersection delay evaluations, and sight distance reviews. All services are delivered under defined Task Work Orders (TWOs), with work conducted in accordance with FDOT's Manual on Uniform Traffic Studies (MUTS), FDOT Design Manual (FDM), and other applicable guidelines.

- Full intersection and approach counts (24-hour machine counts and 8-hour manual counts)
- Turning movement counts (2-hour and 8-hour)
- Bicycle and pedestrian counts
- Pedestrian group size and vehicle gap size studies
- Travel time, delay, and intersection delay studies
- Queue analysis, spot speed studies, and safe curve speed analysis

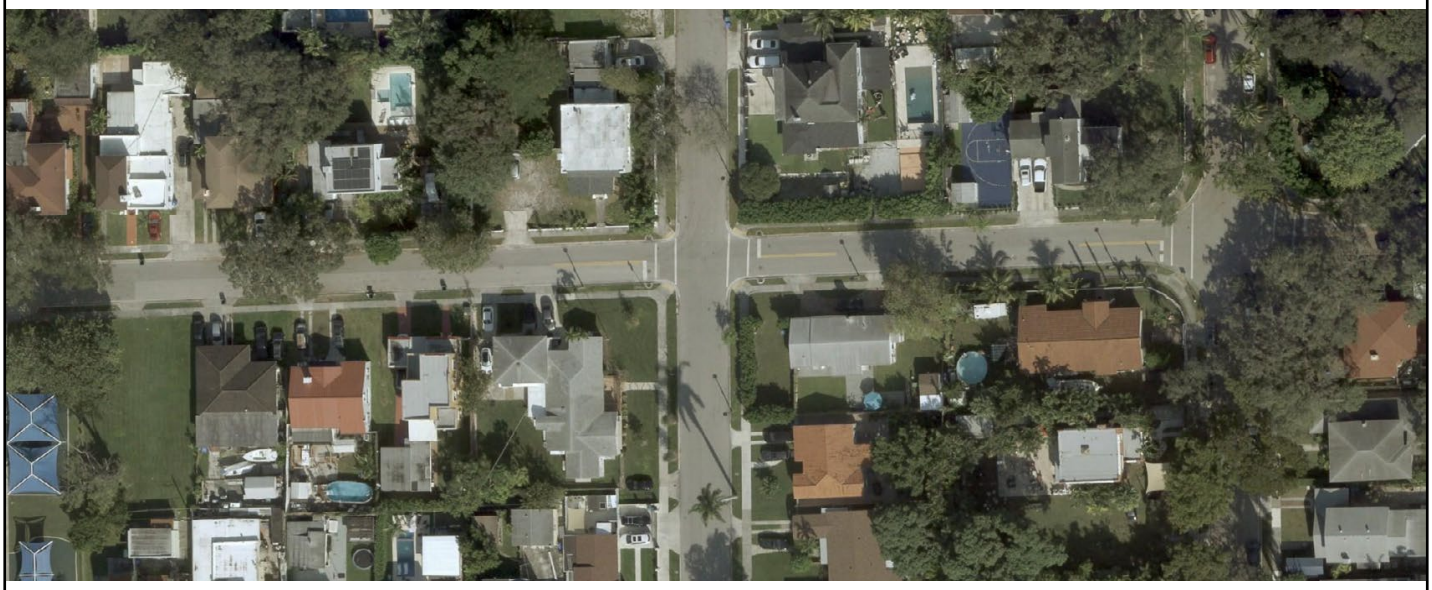
Key Components
Vehicle counts, pedestrian counts, bicycle counts, turning movement counts, speed studies, travel time studies, delay studies, queue analysis, sight distance evaluations, gap studies, no-passing zone studies, safe curve speed

- Sight distance studies and no-passing zone evaluations

All services are coordinated under a dedicated Project Manager who ensures Quality Assurance (QA), schedule compliance, and alignment with FDOT requirements. Deliverables are submitted in FDOT-compatible formats, with rigorous Quality Assurance/Quality Control (QA/QC) processes in place, including site inspections, equipment testing, and error resolution protocols.

This contract supports FDOT's efforts to maintain safe and efficient traffic operations through accurate, timely, and reliable data collection across D4's transportation network.

studies, data analysis, and reporting.



Relevance to the Scope

1. Districtwide Traffic Operations and Data Collection Support
2. Comprehensive Multimodal Traffic Studies and Analysis
3. FDOT Standards Compliance and QA/QC Assurance
4. Task Work Order-Based Delivery and Schedule Management
5. Enhanced Data Accuracy Supporting Safety and Operations Decisions

Raised Intersection at NW 8 Terrace and NW 15 Ave

City of Miami, FL

HBC is providing design and engineering services for the construction of a raised intersection at NW 8th Terrace and NW 15th Avenue, a traffic calming improvement intended to enhance pedestrian safety, reduce vehicle speeds, and improve multimodal connectivity. The project includes the preparation of complete construction contract documents, including roadway, drainage, signing, and pavement marking plans, supported by topographic survey and geotechnical investigations. The scope encompasses roadway reconstruction within the raised intersection limits and concrete transition approaches, milling and resurfacing approximately 75 feet beyond the approach areas, and installation of concrete interlocking paver crosswalks per the City of Miami Department of Resilience and Public Works (DRPW) standards. Drainage improvements involve adjustment of existing systems, design of new structures, and permitting to accommodate modified flow patterns. Signing and pavement marking plans will restore all intersection markings and pedestrian crosswalks in compliance with FDOT and MUTCD standards.

Location
Miami, FL

- Utility coordination and permitting expertise.

George Bush Boulevard Bridge over the ICWW Bridge Replacement

Palm Beach County

This project involved Traffic Engineering Services for the George Bush Boulevard over ICWW Bridge Replacement PD&E Project in Palm Beach County, where the existing bascule bridge was fully replaced, necessitating a traffic detour to the East Atlantic Avenue Bridge. The project scope included turning movement counts, origin-destination data collection, travel time and speed data between 14 study intersections and both bridges, and the creation of a 16x16 Origin-Destination (O-D) matrix. Additionally, the existing conditions were reviewed, including signal timing and bridge operations.

The traffic operations analysis for this project included the development of Synchro and VISSIM microsimulation models for existing conditions, followed by the calibration and validation of those models. Future traffic demand forecasting was performed using outputs from the Southeast Regional Planning Model (SERPM). Both the no-build and build alternatives were simulated to assess traffic impacts.

For the build alternative, dynamic traffic assignment was performed using the detour routes via the East Atlantic Avenue Bridge, informed by the O-D matrix data and VISUM software, in combination with the VISSIM build model. The analysis also included signal timing optimization and coordination recommendations across the project network, as well as a safety analysis with recommendations for key study roadways such as US-1, SR A1A, George Bush Boulevard, and East Atlantic Avenue.

5 | Environmental Engineering Services

Atlantic Housing Partners Overview of Services

Atlantic Housing Partners, LLLP | Various Locations, Florida

RES has been providing advisory services to Atlantic Housing for 20 years. Work has included due diligence level surveys for contamination, wetlands and listed species as well as site development assistance through contamination assessments, remediation, Brownfields consulting, environmental permitting and on-site monitoring. Projects performed include the following:

Lakewood Pointe Affordable Housing Brownfield Redevelopment (2008 – 2021)

RES completed a Phase I ESA for the Site in May 2008 on behalf of Lakewood Pointe, Ltd. (LPL). The purpose of this Phase I ESA was to support purchase of the property for redevelopment as an affordable housing rental community in Hillsborough County, Florida. During completion of this Phase I ESA, historical aerial photographs were reviewed to obtain information concerning historical land use.

Evaluation of these aerial photographs indicated site disturbance activities in the 1970s. Phase II ESA activities revealed a 2.5-acre area where roadway debris had been used as fill material. LPL pursued the completion of the Site Assessment in order to receive funding through their lending institution. Contaminants of concern identified within this debris area include arsenic, chromium, and petroleum. The 144-unit affordable housing community consists of 1-, 2-, 3- and 4-bedroom units with a full benefit of amenities and services to accommodate the lifestyle of all residents. This high-quality development includes two nature preserve areas, and a community pool and clubhouse, along with a toddler play area.

Deep-dynamic compaction (DDC) was implemented for building foundation stabilization purposes. Once the DDC was completed, the Site Assessment Report (SAR) was prepared and submitted to FDEP Southwest District for approval. The SAR was approved in July 2009, and the RAP was approved in December 2009. Engineering Controls and Institutional Controls are used within the debris area to ensure the safety of the residents of Lakewood Pointe. These controls were implemented and are maintained in accordance with current FDEP policies and procedures. The Brownfield Site Rehabilitation Agreement (BSRA) was signed in December 2009.

AT A GLANCE.

Time and Budgetary Performance: RES integrated cost-savings measures into the assessment and remedial planning throughout the project. For example, the selected remedial alternative of soil and landfill gas management combined with Engineering/Institutional Controls has saved LPL millions of dollars over conventional remedial methods.

Amelia Court at Creative Village – Phase I and Phase II Environmental Site Assessments, Site Assessment, and Brownfield Consulting (2016 – 2020)

A Phase I Environmental Site Assessment (ESA) was conducted on a proposed multi-family residential property, located within the City of Orlando's Creative Village Brownfield Area in Downtown Orlando. The Phase I ESA report identified recognized environmental conditions in connection with the property related to potential on and off-site petroleum storage tanks and identified pesticides impacts to soils in the area. Direct push sampling conducted during the Phase II assessment identified petroleum impacts to the groundwater and Dieldrin impacts to the soil and groundwater. A Site Assessment, including additional soil sampling, well installation and groundwater sampling was conducted to delineate the nature and extent of these impacts. The petroleum impacts were determined to have originated from on off-site source, thus the Orange County Environmental Protection Division has been notified and requested initiate assessment activities at this off-site facility. Dieldrin impacts have been delineated and an interim remedial action, consisting of a soil excavation and disposal is planned. Delineation of the Dieldrin impacts to the groundwater is currently under negotiation with the Florida Department of Environmental Protection (FDEP)

Because the Site is located within a Brownfield area owned by the City of Orlando, negotiations are ongoing as to the cost, risk and incentive sharing between our client and the City of Orlando. In addition, any additional assessment and eventual

site remedial activities required by the FDEP will likely be split between our client and the City based on the tract boundaries relative to edges of contaminant plumes.

Rolling Green ESA (2010 – 2014)

A Phase I ESA was conducted on a proposed multi-family residential property, Rolling Green, in Sarasota Florida. The Phase I ESA report identified an adjoining golf course with stormwater from this course appearing to run across the site. Therefore, a Phase II ESA consisting of soil and groundwater sampling was implemented at the Site. Arsenic in concentrations in excess of the Soil and Groundwater Clean-up Target Levels (SCTLs and GCTLs) was identified in the soil and groundwater.

Rolling Green Project Site

The arsenic impacts to the soil were delineated after several iterations of sample collection. Groundwater samples were collected to further evaluate the arsenic concentration identified in samples collected from a temporary monitoring wells during the Phase II ESA. Groundwater impacts were identified in concentrations in excess of the GCTL of 10 ug/L in two areas of the Site.

RES completed a Site Assessment Report (SAR), Interim Source Removal (ISR) and Natural Attenuation Monitoring (NAM) Plans for the Site as documented in our report dated August 30, 2012. Conditional approval of this report was received from the FDEP in a letter dated September 13, 2012. The ISR of the arsenic impacted soil was implemented and documented in our ISR Report submitted to the FDEP on October 11, 2012. FDEP approved the ISR report in a letter dated October 16, 2012

The SAR Approval was conditional upon horizontal delineation of the arsenic impacted groundwater in the shallow aquifer once development of the Site was completed. Following Site development, wells were reinstalled, and groundwater analytical results indicated that arsenic concentrations had been delineated to the east, west, and south with Rolling Green Golf Course located to the north. Therefore, RES initially recommended implementation of the NAM Plan. After several months of NAM, FDEP agreed that the arsenic in the groundwater on the Site was related to the adjacent golf course and issued a letter indicating that no additional monitoring would be required at the Rolling Green site.

Moss Park Phase I ESA (2011 – 2012)

RES was engaged by Atlantic Housing Partners LLLP to perform a Phase I Environmental Site Assessment at the site. The purpose of RES' services was to perform a characterization of environmental conditions based on reasonably ascertainable and practically reviewable public records and site observations, and to identify Recognized Environmental Conditions, if present, to support our client's ability to qualify for landowner liability protection to Comprehensive Environmental Response, Compensation and Liability Act.

River Ridge Phase I ESA Update (2011 – 2012)

Our approach to performing a Phase I ESA Update includes updates to our previous review of the public record, interviews with appropriate local agencies, and site reconnaissance; and preparation of a written report containing findings, opinions and conclusions.

In this proposal, we address the scope of services and schedule for conducting this Phase I ESA Update. Four primary tasks are involved in a Phase I ESA Update:

- review of the public record;
- a site reconnaissance;
- interviews; and
- preparation of a written report.

Proposed Towne Park Apartments – Former Railroad Phase II Environmental Site Assessment (2009 – 2010)

RES performed Phase II Environmental Site Assessment (ESA) activities for Towne Park, Ltd. for a proposed multi-family development southeast of the intersection of S.R. 434 and Tuskawilla Road in Winter Springs, Seminole County, Florida. As part of the proposed development, the client was acquiring approximately 775-feet of former railroad right-of-way property north of the Cross Seminole Trail, a Rails-to-Trails project.

RES had previously identified the former railroad right-of-way as a potential recognized environmental condition (REC) in a Phase I ESA conducted for the proposed project. Accordingly, RES performed the Phase II ESA which included soil and groundwater sampling within the former railway. Constituents of concern (COCs) screened within the former railway for both soil and groundwater included arsenic, cadmium, chromium, and lead by EPA Method 6020, polynuclear aromatic hydrocarbons (PAHs) by EPA Method 8270, and chlorinated herbicides by EPA Method 8151. Soil samples were collected at shallow depths just beneath the gravel bed of the railway at depths between 2 and 4 feet below grade. Groundwater samples were collected from a temporary monitoring well to assess the surficial aquifer beneath the railway.

Results of RES Phase II ESA indicated that only the COC arsenic was identified at concentrations above the state residential soil cleanup target level of 2.1 milligrams per kilogram from a sample collected at 2-feet below existing railway grade. RES provided the client with several cost options to address the soil impact including engineering controls, excavation and removal with follow-up confirmatory testing, and possible tax credit benefits since the project was situated within the Winter Springs Town Center Brownfield designated area.

Towne Park Apartments Project Location Map

Coral Keys Phase I ESA (2008)

RES provided a Phase I environmental site assessment for a multi-housing property site named Coral Keys located in Miami-Dade County, Florida.

RES performed a review of reasonably ascertainable and practically reviewable public records for the site and the immediate vicinity to characterize environmental features of the site and to identify past and present land use activities, on or in the vicinity of the site, which would indicate a potential for recognized environmental conditions, as defined in ASTM EI527-05. The review of the public records included the following.

- Examination of public records made available to us by regulatory personnel regarding past, present, and pending enforcement actions and investigations at the site and within the immediate vicinity.
- Examination of one of more of the following resources: aerial photographs, fire insurance maps, street directories and topographic maps of the site and vicinity for evidence suggesting past uses that might have involved hazardous substances or petroleum products.
- A site reconnaissance was performed by the RES Team to identify visual signs of past or existing contamination on or adjacent to the site, and to evaluate evidence found in the review of public records. The site reconnaissance included the following activities.
- A visual reconnaissance of the site and adjacent properties will be performed to observe signs of spills, stressed vegetation, buried waste, underground or above ground storage tanks, subsidence, transformers, or unusual soil discoloration which may indicate the possible presence of contaminants on the properties.
- The periphery of the property was viewed and a walk-through of accessible areas of the site interior, including any on-site structures, was conducted.
- Areas of the site were photographed to document the current use(s) of the property as well as significant conditions such as unusually discolored soil, stressed vegetation, or other significant features associated with the property.

RES' staff conducted interviews with appropriate local officials to consider any local knowledge of hazardous substances or petroleum products on the subject property or on adjacent properties. In addition, a representative of the current property was interviewed regarding their knowledge of the site.

Districtwide Mitigation, Wildlife and Environmental Services

FDOT District Four | Broward, Palm Beach, Martin, St. Lucie and Indian River Counties, Florida

RES provides ongoing mitigation, wildlife, and environmental services to the Florida Department of Transportation (FDOT) District Four. The scope of the contract is broad and has provided us with a wide range of opportunities to support the FDOT. The following summarizes the services provided under the contract and some of the projects completed:

Mitigation Ledger Maintenance Support: RES is responsible for addressing wetland mitigation needs and mitigation efforts as required for listed species and critical habitat, Essential Fish Habitat (EFH), and other mitigation actions required by permit or by environmental regulations. This includes analysis of wetland impacts by habitat type and impact amount, hydrology analysis, functional assessments, analysis of avoidance and minimization alternatives, assessment of suitable alternative wetland mitigation sites, permitting, and coordination with regulatory agencies. This also includes investigation of mitigation banks, local and regional restoration opportunities, and government programs which have appropriate credits available, as well as the preparation of reports detailing mitigation alternatives including potential alternative mitigation sites and recommended actions. RES attends meetings and field reviews with construction personnel and permitting agencies, as well as public meetings on behalf of FDOT District Four.

AT A GLANCE.

Client Contact
Mr. Fernando Ascanio
Environmental Specialist

Contract Value
$5,000,000

Contract Period
October 2018 – Present

Project Type
Advisory Services

Project Highlights
- Mitigation Ledger Maintenance Support
- Wetland Delineation and Impact Assessment
- Wetland Mitigation Site Development
- Endangered Species Coordination
- Natural Resource Evaluations
- EFH Analysis And Benthic Biological Surveys
- Gopher Tortoise Surveys and Relocations
- Florida Bonneted Bat Surveys

Key Staff
- Mark Clark
- Andrew Calhoun
- Emily Powell
- James Stroz
- Gayle Stone

RES maintains the District Four wetland mitigation credit ledger that includes credits developed through wetland mitigation creation, privately held wetland mitigation bank credits, and other unused credits within District Four. Permit modifications to amend the mitigation ledgers include coordination with FDOT District Four on mitigation needs and ledger withdrawals, and communication with wetland mitigation banks, United States Army Corps of Engineers (USACE), Regional In-Lieu Fee and Bank Information Tracking System, Florida Department of Environmental Protection (FDEP), and Water Management Districts as necessary to track wetland mitigation bank ledgers.

Wetland DELINEATION AND Impact Assessment: RES is responsible for identifying, delineating (in accordance with the USACE Wetland Delineation Manual and Chapter 62-340, Florida Administrative Code), and analyzing wetlands and surface waters based on functional assessment methodologies (Wetland Rapid Assessment Procedure, FDEP Uniform Mitigation Assessment Method, etc.). This responsibility also includes meeting and acquiring written verification of jurisdictional lines from the appropriate regulatory agencies and preparing wetland assessments and environmental documents in accordance

with the Project Development and Environment (PD&E) Manual and Efficient Transportation Decision Making process. RES is also responsible for the development of wetland mitigation restoration plans to compensate for wetland impacts.

Wetland Mitigation Site Development: RES develops innovative wetland mitigation site concepts and plans, including appropriate site elevations, hydrology, location, and diverse native plant species. This includes conducting hydrological studies to determine the effectiveness or suitability of mitigation site concepts in relation to site elevations, hydrological exchange, and connectivity. RES ensures all required federal, state, and local permits (including WMDs, Environmental Resource, right-of-way, Submerged Lands, and USACE) are acquired and that associated conditions and commitments are met. RES prepares permit applications, collects data, and addresses any comments raised by regulatory agencies including the U.S. Fish and Wildlife Service and the National Marine Fisheries Service. RES is developing three mitigation sites for FDOT:

- Tree Tops Park: freshwater wetland mitigation site in Broward County
- Wabasso Causeway: seagrass and living shorelines project in Indian River County
- US 1 Pond/Coastal Oaks: water quality and wetland mitigation site in Indian River County

Endangered Species Coordination: RES performs wildlife field assessments as required by the regulatory agencies including surveys for bats, burrowing owls, indigo snakes, sea turtles, scrub jays, gopher tortoises, bald eagles, crested caracaras, wood storks, snail kites, listed plants and lichen species, and listed marine species. Additional responsibilities include preparation of Natural Resource Evaluation (NRE) reports (in accordance with the FDOT Project Development and Environment Manual), coordinating with regulatory agencies (U.S. Fish and Wildlife Service and the National Marine Fisheries Service), and identifying suitable solutions for conflicts with wildlife during construction (such as identification of species relocation sites, relocation of Endangered or Threatened species to suitable sites, and species monitoring activities as stipulated by regulatory agencies).

EFH Analysis and Benthic Biological Surveys: RES is responsible for assessing projects for potential impacts to EFH (in accordance with the FDOT PD&E Manual). This includes seagrass/benthic surveys for bridges, structures, and drainage areas as needed. Work includes reviews of the existing information available about the project area (including soil borings to delineate an area of potential indirect effects and sedimentation), research of best management practices (including turbidity controls and construction practices), and coordination with permitting agencies (regarding limits of the secondary or indirect effects to wetlands). RES performs underwater benthic analysis for proposed projects and records benthic resources within the project's area of direct effects. Benthic resource data collected includes species, size, locations, and depth of benthic resources (e.g., seagrass, oysters, coral) which could be negatively impacted by the proposed project. RES is also responsible for the preparation of benthic survey reports (including impact tables, mitigation plans, and maps showing benthic resources and other site-specific details) and NREs as well as assistance with regulatory agency coordination (USACE, Florida's Water Management Districts or FDEP, and the National Marine Fisheries Service).

Gopher tortoise surveys and relocations: RES is responsible for conducting gopher tortoise surveys, obtaining Florida Fish and Wildlife Conservation Commission (FWC) gopher tortoise permits (for projects that have conflict with gopher tortoises), excavation of gopher tortoise burrows, and capture and relocation of gopher tortoises. To fulfill these responsibilities RES has staff with who are FWC Authorized Gopher Tortoise Agents. RES' agents are authorized to conduct gopher tortoise surveys, shovel excavation of burrows, bucket trapping of tortoises, supervision of mechanical excavation of gopher tortoise burrows by backhoe and tagging and transporting tortoises to recipient sites. This responsibility includes coordination with the FDOT, gopher tortoise recipient sites, the FWC, utility companies, and construction contractors.

Florida bonneted bat surveys: RES is responsible for assessing projects located in the USFWS consultation area for the Florida bonneted bat for potential impacts to this federally endangered species. Projects that are evaluated are those with proposed bridge work or tree removal or relocation. RES will review design plans for these types of projects potential suitable roosting habitat for the Florida bonneted bat (trees at least 34-feet tall with a diameter at breast height of at least 7.4 inches or bridges and culverts at least 15 feet tall). If potential suitable roosting habitat is found RES will determine the appropriate field survey based on the USFWS *Florida Bonneted Bat Consultation Guidelines* (2024 Revision). RES is also responsible for preparing a report to document the methods and findings of the survey and assisting FDOT with consultation with the USFWS (if required).

Continuing Contract for General Environmental Engineering

City of Fort Lauderdale | City of Fort Lauderdale, Broward County, Florida

RES was awarded a contract with the City of Fort Lauderdale (City) to provide ongoing environmental engineering support during three separate consultant selection processes. The scope of the contract is broad and provided us with a wide range of opportunities to support the City. The following summarizes some of the projects completed:

Himmarshee Canal Assessment: Relevant aspects of this project focused on planning and design for canal dredging of a surface water, restoration of a river, construction administration, environmental permitting support, sediment assessment, biological monitoring/submerged aquatic vegetation survey and mapping, development of an effective water quality monitoring plan, environmental monitoring and assessment of surface water, laboratory analysis of water and sediment, public engagement support, project management and quality assurance/control.

The City identified a sewer force main break that caused 13 million gallons of wastewater from the force main to flow into the Himmarshee Canal. The City entered into an Amended Consent Order with the Florida Department of Environmental Protection (FDEP) that obligated the City to complete an "environmental analysis" of the Himmarshee Canal to assess potential impacts caused by the unauthorized discharge. In response, RES prepared a Water Quality Assessment Plan that was approved by FDEP without comment. RES evaluated potential sediment impacts to approximately 1,600 linear feet of the Himmarshee Canal using a variety of methods including consideration of natural, cultural, and physical environmental resources; review of ambient water quality data; characterization of sediment layers; performing laboratory analysis on sediment samples; and conducting a benthic survey. The assessment goals were to identify if sediment, solids, or other indicators of wastewater had accumulated on the canal bottom from solids settling out of the wastewater discharge, identify if residual impacts from the discharge was present, and identify the extent of the impacted area. RES used vibracore technology to collect sediment cores for visual characterization and laboratory analysis. RES worked with the laboratory to develop methods to analyze the sediment for parameters that could be indicative of wastewater, persist in the environment and are not naturally occurring. Sediment samples were analyzed for human waste indicators and bacteria to define the area of impact. Water quality evaluation included nutrients, dissolved oxygen, and enterococci bacteria. A benthic survey using a "go-pro" camera was used to document the river bottom and to evaluate the presence of submerged aquatic vegetation. A hydrographic survey was conducted and the information used to estimate the dredge material volumes for the purposes of obtaining contractor bids. RES collaborated with the US Army Corps of Engineers (USACE), FDEP and Broward County to identify ways to streamline the agency permitting and authorization procedures in support of the development of a sediment removal plan. Weekly updates were provided to the City to be disseminated to the public to keep the residents informed of the project's progress.

The City is electing to remove sediment within the Himmarshee Canal as a surface water quality enhancement project. RES assisted the City with bidding documents, restoration contractor selection, and construction compliance via turbidity monitoring during sediment removal.

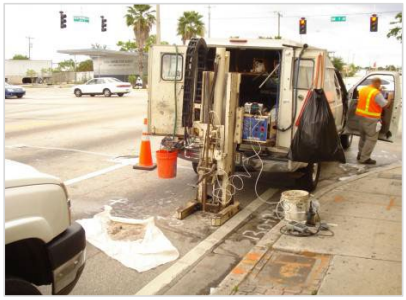
- Jen Savaro, MS
- Gayle Stone, MS

Tarpon River Restoration: A 54" sanitary sewer force main pipe broke in the Rio Vista neighborhood, adjacent to the Tarpon River. Two breaks caused discharges from the force main to flow into the Tarpon River. The discharges included raw wastewater and sediment laden water from dewatering activities related to the repair of the force main. The Tarpon River is a Class III water, meaning the designated uses include fish consumption, recreation, and propagation and maintenance of a healthy, well-balanced population of fish and wildlife. The City engaged RES to identify the impact area and develop a restoration plan for the affected portion of the Tarpon River. RES used vibracore technology to collect sediment cores for visual characterization and sample collection. Sediment samples were analyzed for human waste indicators and bacteria to define the area of impact. A benthic survey using a "go-pro" camera was used to document the river bottom and to evaluate the presence of submerged aquatic vegetation. A hydrographic survey was conducted and the information used to estimate the dredge material volumes for the purposes of obtaining contractor bids. RES collaborated with the USACE, FDEP and Broward County to identify ways to streamline the agency permitting and authorization procedures and in support of the development of a sediment removal plan. Weekly updates were provided to the City to be disseminated to the public to keep the residents informed of the progress of the project. RES assisted the City with bidding documents and restoration contractor selection. We conducted compliance inspections during restoration. The restoration has been completed.

Bonnet House Greenway Access: RES was engaged by the City to conduct an environmental evaluation for a proposed greenway between Birch State Park through the Bonnet House Museum and Gardens property (Bonnet House) to North Birch Road to the South. The project objectives were to provide connectivity from Sunrise Boulevard and Birch State Park to the island community located south of the Bonnet House property; immersing the user in the mangrove forest; maintaining a distance between the user and the Bonnet House activities and not interfering with the Bonnet House parking or landscaping. This evaluation was conducted to support a grant application for assistance under the National Park Service Rivers, Trails, and Conservation Assistance Program. RES was requested to seek ways to minimize impacts to environmental resources that could be incorporated into the design of the greenway. RES proposed an alternative greenway layout that would reduce mangrove impacts by shifting the greenway into disturbed upland areas towards the south end of the greenway. This alternative layout would also result in decreased impacts to landscape trees and preserve parking areas for the users of the Bonnet House property. Design measures, including an elevated boardwalk and permeable pavement, could be implemented to further reduce impacts to natural resources.

Isle of Palms Seawall 15 Replacement and Climate Change Adaptation: RES provided support to the City in anticipation of replacement of 900 feet of seawall along the west side of Isle of Palms Drive. Sea level rise has caused surface waters to overtop this seawall and flood adjacent land and roads. The purpose of the project was to raise the height of the seawall and protect the shoreline from the effects of climate change. The City engaged RES to conduct a benthic survey to support the design and permitting. Seagrasses were identified and data regarding seagrass bed size, density, incidental species observed, and substrate conditions were recorded and documented. RES collaborated with the design engineers to assist them in obtaining the regulatory agency permits and with the City to inform the construction procurement process. The report was delivered one week before the contract schedule and under budget. Following construction, RES performed a post construction survey to close out the environmental permits.



Fort Lauderdale Executive Airport Endangered Species Surveys, Permitting and Relocation: RES has conducted multiple endangered species surveys, migratory bird and gopher tortoise relocation permitting and relocation for proposed construction projects at Fort Lauderdale Executive Airport. Endangered species encountered, permitted or relocated include burrowing owls and gopher tortoises.

Former Transfer Station: RES was engaged under the City to provide environmental support for the regulatory closure of the former trash transfer station related to the documented soil and groundwater contamination at this property. RES compiled historical assessment information and regulatory requirements to define the areas to be subject to engineering controls (ECs). RES' teams drafted the design drawings depicting the affected areas and technical specifications. The design documents included soil handling provisions, environmental considerations and approximated quantities. The design documents were prepared for the City to distribute as the proposed scope of work for the bidding package.

Las Olas Circle Site Assessment: An underground storage tank (UST) containing fuel was discovered during installation of a water main at a city-owned project site undergoing redevelopment. A crack developed on the side of the tank and approximately 10 gallons of fuel spilled. RES mobilized to the Site shortly after the tank was discovered and advised the Community Redevelopment Agency (CRA) on measures to secure the tank. The tank was discovered at approximately 3:00 PM and the site was cleaned and secured by approximately 4:30 PM. Removal of the tank, conducted by others, revealed the presence of contaminants above the regulatory standards in the soil and groundwater. The City engaged RES to conduct additional site assessment as required by Broward County Environmental Protection and Growth Management Department (EPGMD). RES conducted soil and groundwater sampling activities to delineate the contaminants detected above the regulatory standards and prepared a Site Assessment Report. Based on evaluation of the analytical data, the contaminants appeared to not be related to the former tank and RES proposed the implementation of alternative cleanup target levels (CTLs) to pursue regulatory closure of the contamination.

National Pollutant Discharge Elimination System (NPDES) Permitting Support: RES has worked with the City to prepare their Total Maximum Daily Load (TMDL) Prioritization Plan and Assessment Program as required to be submitted within Year 1 of the City's NPDES Municipal Separate Storm Sewer System (MS4) permit. During Year 2 of the permit, RES began preparing pollutant load analysis and reviewing monitoring data collected by the County to help the City understand the effects of their stormwater system improvements on neighboring waterbodies, as well as to comply with the permit. In addition, RES prepared the City's Bacteria Pollution Control Plan (BPCP), working with multiple stakeholders in the area for effective reporting and cost savings, which was submtited with the City's Year 3 annual report and approved by FDEP. RES continues to provide ongoing NPDES support as needed to the City including review of the annual report and Standard Operating Procedures (SOPs) to ensure compliance with permit requirements.

Sistrunk Boulevard: RES was hired by the City to conduct soil and groundwater testing along Sistrunk Boulevard from I-95 to Andrews Avenue. The project was conducted in order to support the CRA with implementing a streetscape, drainage and roadway enhancement project. RES conducted soil and groundwater testing at 36 locations to evaluate potential impacts to construction that may arise due to known contaminated sites historically located along the corridor. Potential sites of concern included historical dry cleaners, gasoline stations, junk yards and an incinerator ash landfill.

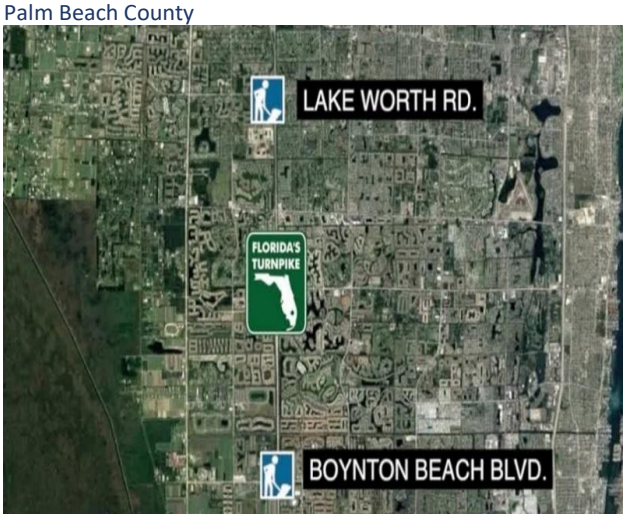
Prior to implementation, RES worked with the FDOT (who provided funding) to determine a scope of analytical services. RES reconciled the proposed subsurface structure locations (drainage structures, light fixtures, etc.) identified on construction plan sheets with the existing corridor conditions and proximity to potentially contaminated areas. Due to the high number of utilities anticipated to be located in close proximity to the drilling locations, RES engaged a private utility location contractor to locate underground utilities using ground penetrating radar and electromagnetic radiation surveys, in addition to review of City plans and coordination with Sunshine One Call. A Maintenance of Traffic (MOT) plan was prepared and submitted to the City prior to field activities.

In addition to an assessment report, RES provided general notes and bidding specifications language outlining requirements for managing contaminated soils and groundwater to be incorporated into the bidding and contract documents for this project. During construction, we assisted the City in working with the contractor to minimize impacts to construction and keep the project moving. This "stimulus" project meant deadlines were critical and the work needed to be expedited. We developed a scope of work, met with FDOT to negotiate the scope, conducted private utility location, developed an MOT plan, and initiated the sample collection within 13 days of the first phone call. Our draft report was provided to the CRA within an additional 12 working days. This project was completed to the satisfaction of the CRA and FDOT and we delivered the project under budget by more than $12,000.

PACIFICA SIGNATURE PROJECTS

City of Boca Fire Support Building

Palm Beach County



Pacifica Engineering Services provided geotechnical engineering services as a subconsultant for the development of the City of Boca Fire Support Building, which included the construction of a new Fire Department support facility (Building #12) and associated directional utility drilling. The scope of work consisted of performing one (1) Standard Penetration Test (SPT) boring to a depth of 40 feet for the building foundation and two (2) SPT borings to a depth of 10 feet for utility installation. Pacifica delivered a geotechnical report with shallow foundation recommendations, settlement forecasts, groundwater management strategies, and site preparation guidelines to support design and construction.

Dates: Oct 2023- Feb 2024

Client: KEITH
Client Contact: Mr. Jorge Valle-Pellot, P.E

E8Q79 Turnpike Mainline Widening

Palm Beach County

As a subconsultant, PACIFICA aided in the improvements of the widening of approximately 7.6 miles of Turnpike mainline from 4 and 6 lanes to 8 lanes from north of SR 804 (Boynton Beach Boulevard) (milepost 87.1) to north of SR 802 (Lake Worth Road) (milepost 94.7). The typical section consists of one express lane and 3 general tolled lanes in each direction. This project proposes to realign the mainline centerline to the west to prevent the proposed improvements from encroaching into the Florida Gas Transmission (FGT) facility specified width and mitigate the risk of possible triggering events. This project also includes the construction of the mainline AET toll facilities and partial reconstruction of the existing Lantana Toll Plaza to accommodate six through lanes, with the remainder of ticket lanes (4 in each direction) to remain in operation. The project cost approximately $168 million.

Dates: Jan 2021 – Nov 2024

@dot.state.fl.us

Contract No.
FPID 429576-2-52-01

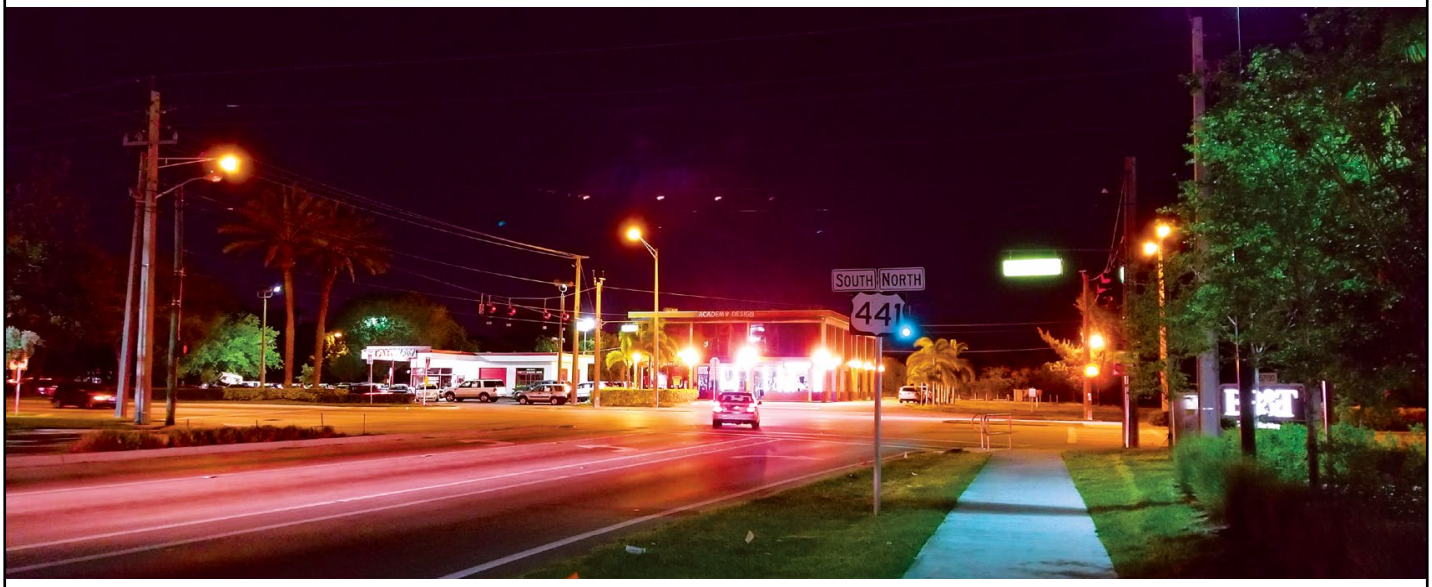
Key Components
Roadway Design, Sidewalk and Bike Lane Improvements, Lighting Retrofit

Relevance to the Scope

1. Multimodal corridor planning
2. Transit-supportive infrastructure
3. Complete Streets implementation
4. ADA & safety upgrades
5. Bicycle & pedestrian design

HBC provided professional engineering services for the design and preparation of construction documents associated with the SR 7/US 441 Multimodal Corridor Improvements project, a major transit-focused initiative sponsored by FDOT District 4 in partnership with the Broward Metropolitan Planning Organization (MPO). The primary objective of the project was to enhance the corridor's safety, multimodal mobility, and user experience, particularly for transit passengers, bicyclists, and pedestrians, through a series of targeted infrastructure enhancements along SR 7/US 441 and SR 858/Hallandale Beach Boulevard.

The corridor, spanning approximately 16 miles from the Broward/Miami-Dade County Line to north of Sample Road, includes SR 858 from Edmund Road to SW 58 Avenue. SR 7 has the highest transit ridership in Broward County, with over 20,000 transit riders per day, and has long been the focus of land use planning, economic development, and multimodal investment strategies. The project aimed to resolve operational deficiencies, support transit-oriented development, and address inconsistent land use implementation.



HBC's design responsibilities encompassed:

- Development of comprehensive construction documents in accordance with FDOT design criteria, standards, bulletins, and field conditions.
- Roadway and drainage reviews, signing and pavement marking, lighting and pedestrian signal upgrades, sidewalk and bike lane enhancements, utility conflict resolution, and permit coordination.
- Landscape and streetscape improvements to enhance corridor aesthetics and support placemaking.

Funded by
Local Agency Program (LAP)

South Corridor Transit Oriented Development (TOD) Master Plan

Miami-Dade County Department of Transportation and Public Works

The South Corridor Transit Oriented Development (TOD) Master Plan was initiated to enhance multimodal connectivity and accessibility along a 20-mile corridor in Miami-Dade County. The project aimed to support transit-oriented growth by assessing and improving bicycle and pedestrian facilities at key station locations. Given the corridor's role in regional mobility, the plan sought to identify priority routes, address infrastructure gaps, and enhance safety to better integrate non-motorized transportation with transit services.

HBC provided critical expertise in mobility, connectivity, and safety analysis. The project entailed:

- Infrastructure Assessment – Evaluating pedestrian and bicycle facilities within a 1-mile walk shed and bike shed of each proposed station.
- Field and Desktop Reviews – Conducting in-person site assessments and leveraging GIS-based analysis to examine existing conditions.
- Connectivity & Gap Analysis – Identifying missing links in pedestrian and bicycle networks to inform future infrastructure improvements.
- Safety Improvements – Reviewing crash data trends to recommend measures for improving pedestrian and cyclist safety.
- Stakeholder Coordination – Engaging with Miami-Dade County TPO and municipalities to align recommendations with ongoing and planned transit projects.

Location
Miami-Dade County, FL

Dates
11/2022 - 07/2024

Budget
HBC Fee: $110K

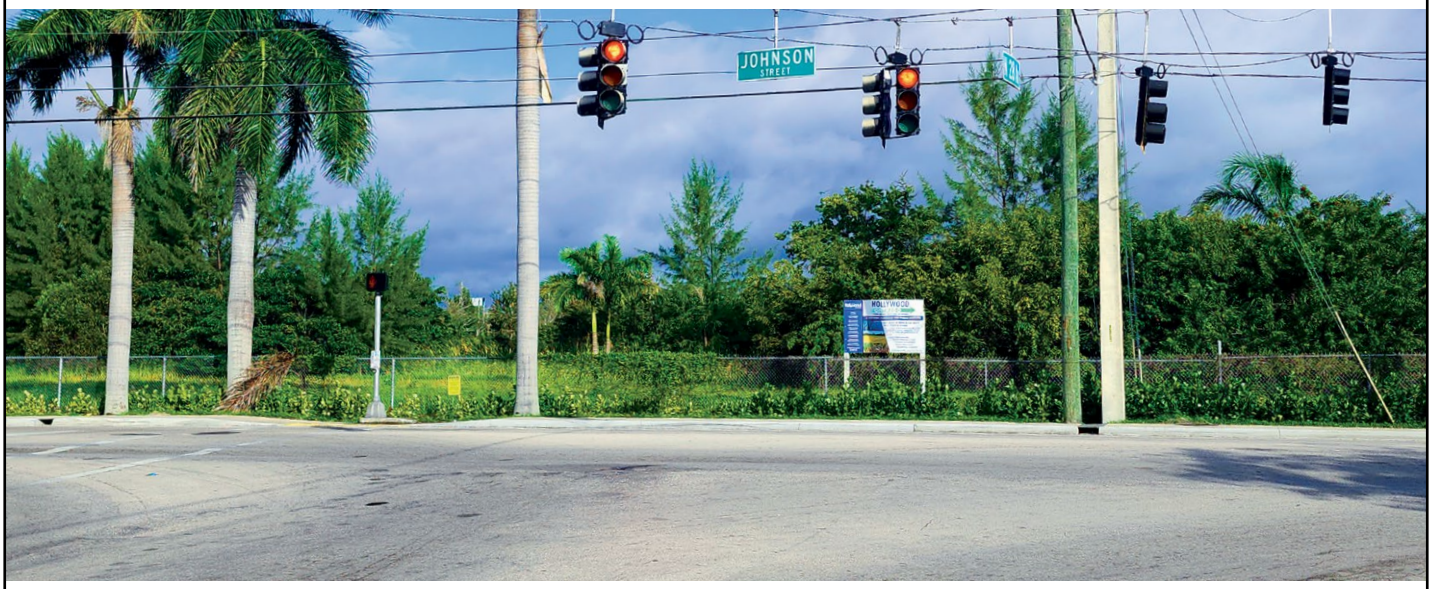
Elia.Nunez@aecom.com

Key Components
Infrastructure assessment, field and desktop reviews, connectivity and gap analysis, safety improvements, stakeholder coordination, GIS-based planning.

Relevance to the Scope
1. Comprehensive Transit-Oriented Development and Corridor Planning

HBC utilized ArcGIS mapping tools to visualize and prioritize infrastructure needs, ensuring a data-driven approach to mobility planning.

The plan provides a strategic framework for advancing transit-oriented development and improving first/last-mile connectivity by facilitating safer, more efficient connections to transit stations for pedestrians and cyclists, addressing high-risk areas with targeted infrastructure enhancements, and supporting multimodal transportation options that reduce dependence on automobiles.



Through this effort, HBC Engineering contributed to a comprehensive, future-ready transit plan that aligns with Miami-Dade County's broader transportation vision.

1. Pedestrian and Bicycle Infrastructure Assessment and Gap Analysis
2. Data-Driven Safety and Mobility Enhancements Using GIS Tools
3. Stakeholder Coordination with Miami-Dade TPO and Municipalities
4. Strategic Framework for First/Last-Mile Connectivity and Multimodal Access

Bike/Pedestrian Feasibility Study at Johnson St from North 30th Rd to North Dixie Hwy

City of Hollywood

This project included a strong emphasis on public involvement, a comprehensive planning process, and ongoing community coordination. Funded by Broward County's "Penny for Transportation" initiative, this Project Development and Environment (PD&E) study is focused on transforming Johnson Street into a safer, more efficient corridor. As a Complete Streets project, it prioritizes multimodal accessibility and equity, aiming to enhance infrastructure for pedestrians, cyclists, and motorists, while improving safety, mobility, and connectivity throughout the area.

A key element of this project was the establishment of a strong community outreach channel to support direct communication between the public and the project team. Extensive engagement, through stakeholder meetings, public workshops, and interactive feedback sessions, ensures the project reflects the community needs and priorities. These efforts reinforce transparency and collaboration, helping shape an inclusive corridor that serves pedestrians, cyclists, transit users, and motorists alike.

The project scope included the construction of new sidewalks, dedicated bicycle lanes, and traffic-calming measures to enhance pedestrian and cyclist safety. Additional upgrades, such as enhanced crosswalks, new street lighting, and traffic signal improvements, will bring the corridor into compliance with state and federal safety standards. Drainage improvements are also included to mitigate flooding and improve stormwater management, alongside landscaping and aesthetic enhancements to beautify the street and surrounding areas.

HOLL-038

Key Components
PD&E studies, data collection, Complete Streets, development of conceptual

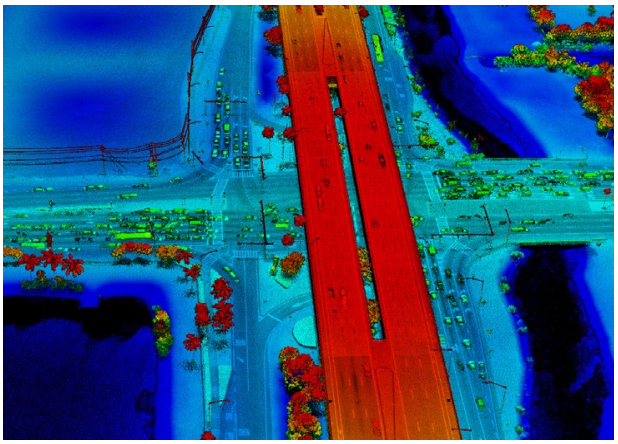
Funded by
Local Agency Program (LAP)

As part of the PD&E study, HBC was responsible for evaluating selected alternatives to optimize Johnson Street's design. This included the reconstruction of a 2-lane, 2-way roadway with a center turn lane, installation of new transit bus stops, and development of a comprehensive drainage system within the existing Right of Way (ROW). HBC's role also encompassed conducting a Limited Topographic Survey, extensive data collection, and the development of conceptual design alternatives. A critical part of this PD&E study involved the traffic analysis of each alternative and coordination of public involvement to ensure alignment with community expectations.

This Johnson Street project will have a lasting impact by fostering safer, more equitable, and more efficient use of public roadways, supporting Broward County's broader Complete Streets objectives. These multimodal improvements are designed to reduce vehicle dependency, promote environmental sustainability, and enhance the overall quality of life for residents, business owners, and commuters alike.

design alternatives, traffic analysis of the alternatives, public involvement, and community coordination.

Relevance to the Scope



1. Complete Streets and Multimodal Corridor Planning
2. Extensive Public Involvement and Community Coordination
3. Pedestrian, Bicycle, and Transit Infrastructure Enhancements
4. Drainage, Safety, and Aesthetic Corridor Improvements

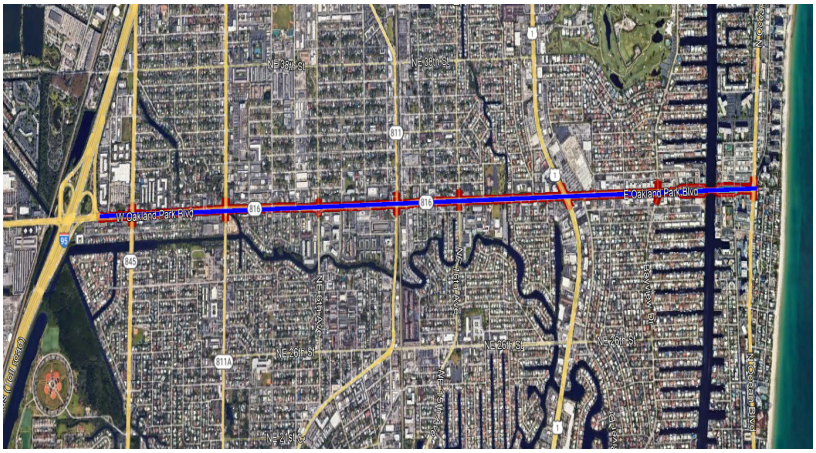
PROJECT DESCRIPTION



GPI Geospatial was tasked to provide 3D topographic surveying for a 4.38 mile corridor of State Route 838 (Sunrise Boulevard) from the Florida Turnpike to Interstate 95 Overpass in Broward County, FL.

GPI Geospatial was responsible for establishing horizontal and vertical project control per FDOT standards, as well as establishing the roadway alignment and existing right-of-way lines. Our survey team also set 54 secondary control points to be used for aerial lidar collection and calibration. Once the field work was completed, our flight team mobilized from Orlando, FL with a fixed-wing manned aircraft equipped with a lidar sensor and mapping camera, which simultaneously collected aerial lidar and imagery to support the topographic mapping.

Our team utilized the aerial lidar point cloud and aerial imagery to extract topographic features that were included in the final 3D survey drawing, and merged field-collected survey data with the aerial mapping data. All final survey drawings were reviewed, signed, and sealed by a Florida licensed Professional Surveyor and Mapper.

3D Design Survey for Oakland Park Blvd. from I-95 to A1A

Broward County, FL

SERVICES PROVIDED

3D Topographic Survey, Mobile Lidar

PROJECT COST

$372,478.00

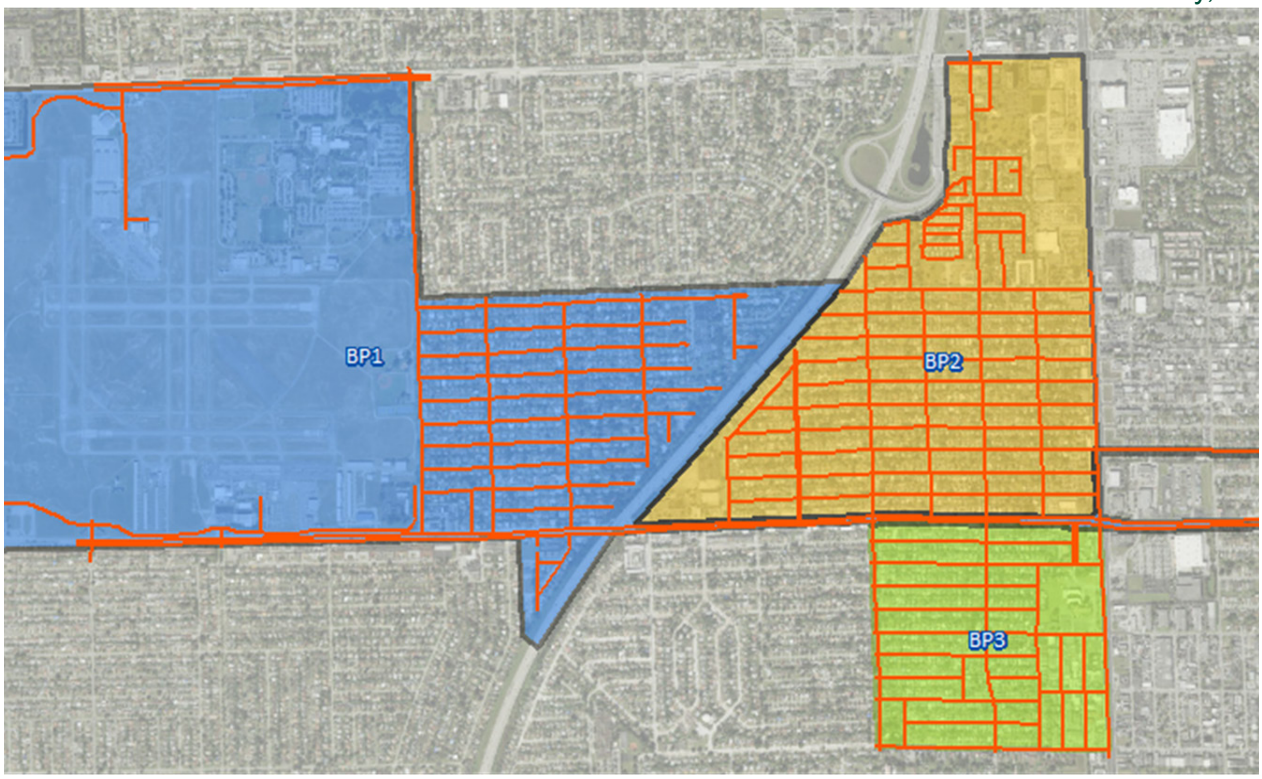
TIME PERIOD

9/2022 - Present

KEY PERSONNEL AND ROLE ON PROJECT:

Michael Zoltek, LS, CP, CfedS, GISP, PMP - Principal in Charge
Frank Paruas, PSM - Survey Project Manager
Saul Brand, PSM - Project Surveyor
Darin Larson - Mobile Lidar Specialist
Rob Rublee - Senior Mobile Lidar Specialist



PROJECT DESCRIPTION

GPI Geospatial, Inc. performed a complete 3D survey for this corridor in Broward County. The scope included primary and secondary control survey. The project also included a completed 3D survey from right-of-way to right-of-way that was completed by combining traditional survey with terrestrial lidar for the hard surfaces. Additionally, a drainage survey was completed. We also recovered the historical baseline of survey and right-of-way lines for the entire corridor.

Final deliverables included a SURVRD file containing the 3D files, the baseline of survey, and the right-of-way lines. Additionally, we submitted all the data files required to support the survey information as required by the Florida Department of Transportation and District 4 survey group. This project was completed on time and within budget.

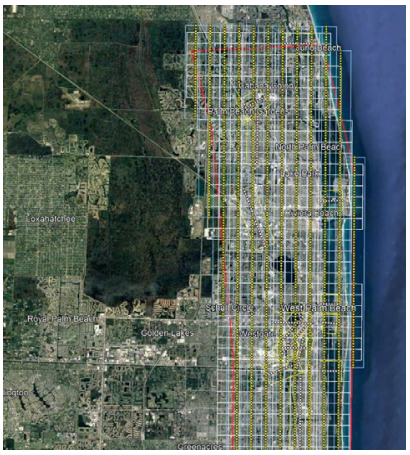
TIME PERIOD

6/18/2020 - 10/23/2020

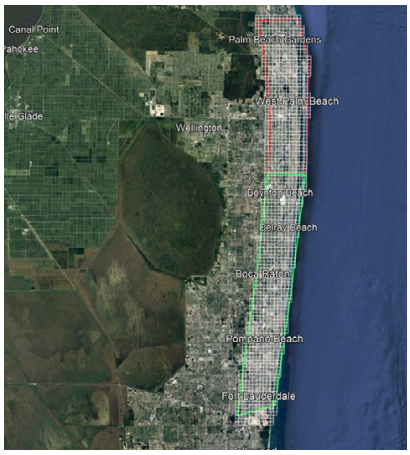
PROJECT DESCRIPTION

The purpose of this project for the client was to use mobile lidar data for the creation of a topographic survey to facilitate the design and construction of water lines and sewer replacements.



The project area is in the southern portion of Broward County, FL. The project area is approximately 35 roadway miles and includes multiple streets in and around the neighborhoods just to the east of North Perry Airport. The roads are a mixture of 2-lane residential roads (majority of the project), as well as more urban 4-lane roads, requiring multiple scan passes.

GPI Geospatial acquired mobile lidar and corresponding imagery and video. GPI Geospatial processed, calibrated and classified the point cloud data for the client. The intent was to have a lidar based point cloud that captured laser hits on the ground surface and topographic features, including pavement, buildings, trees, power poles, roadway features, and typical neighborhood features, etc. The lidar was calibrated to the project control, as set by the consultant client.



Deliverables included the calibrated (colorized) point cloud for the roadway corridor along with collected video and imagery co-registered to the mobile lidar collection trajectory.

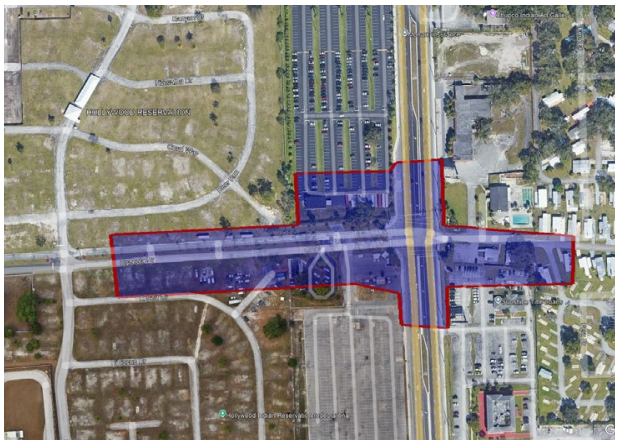
TIME PERIOD

01/2021 - 01/2022

PROJECT DESCRIPTION

The purpose of this project was to produce topographic surveying and mapping products using aerial orthoimagery in support of transportation planning and other FDOT activities. The project AOI was a corridor approximately five miles wide and approximately 55 miles long located along the eastern coastline of Florida and covered an area of approximately 285 square miles. The project started from the south at the north side of Fort Lauderdale/Hollywood International Airport in Broward County, proceeding north with the eastern edge of the corridor along the coastal waterline to Donald Ross Road in Palm County Beach.



GPI Geospatial collected aerial imagery using a Vexcel UltraCam Eagle 4-band aerial sensor. A surface model consisting of a 0.50 foot gridded DEM was derived from existing bare-earth Lidar. Field surveyed ground control was completed to support a project-wide analytical triangulation solution. All orthoimagery products were produced with a 3” GSD and segmented into 2,500-foot x 2,500-foot tiles. A digital tile index in ESRI Shapefile® format was provided by FDOT.

Deliverables included the DEM used for ortho-rectification, the 3” 4-band orthophotos in GeoTIFF format, accuracy analysis of the orthos according to FGDC requirements, a digital copy of the GCPs, shapefile of the tiles, project limits and image seamline feature class, the flight plan, a signed PDF digital copy of the Ground Control Survey Report and FGDC compliant metadata.

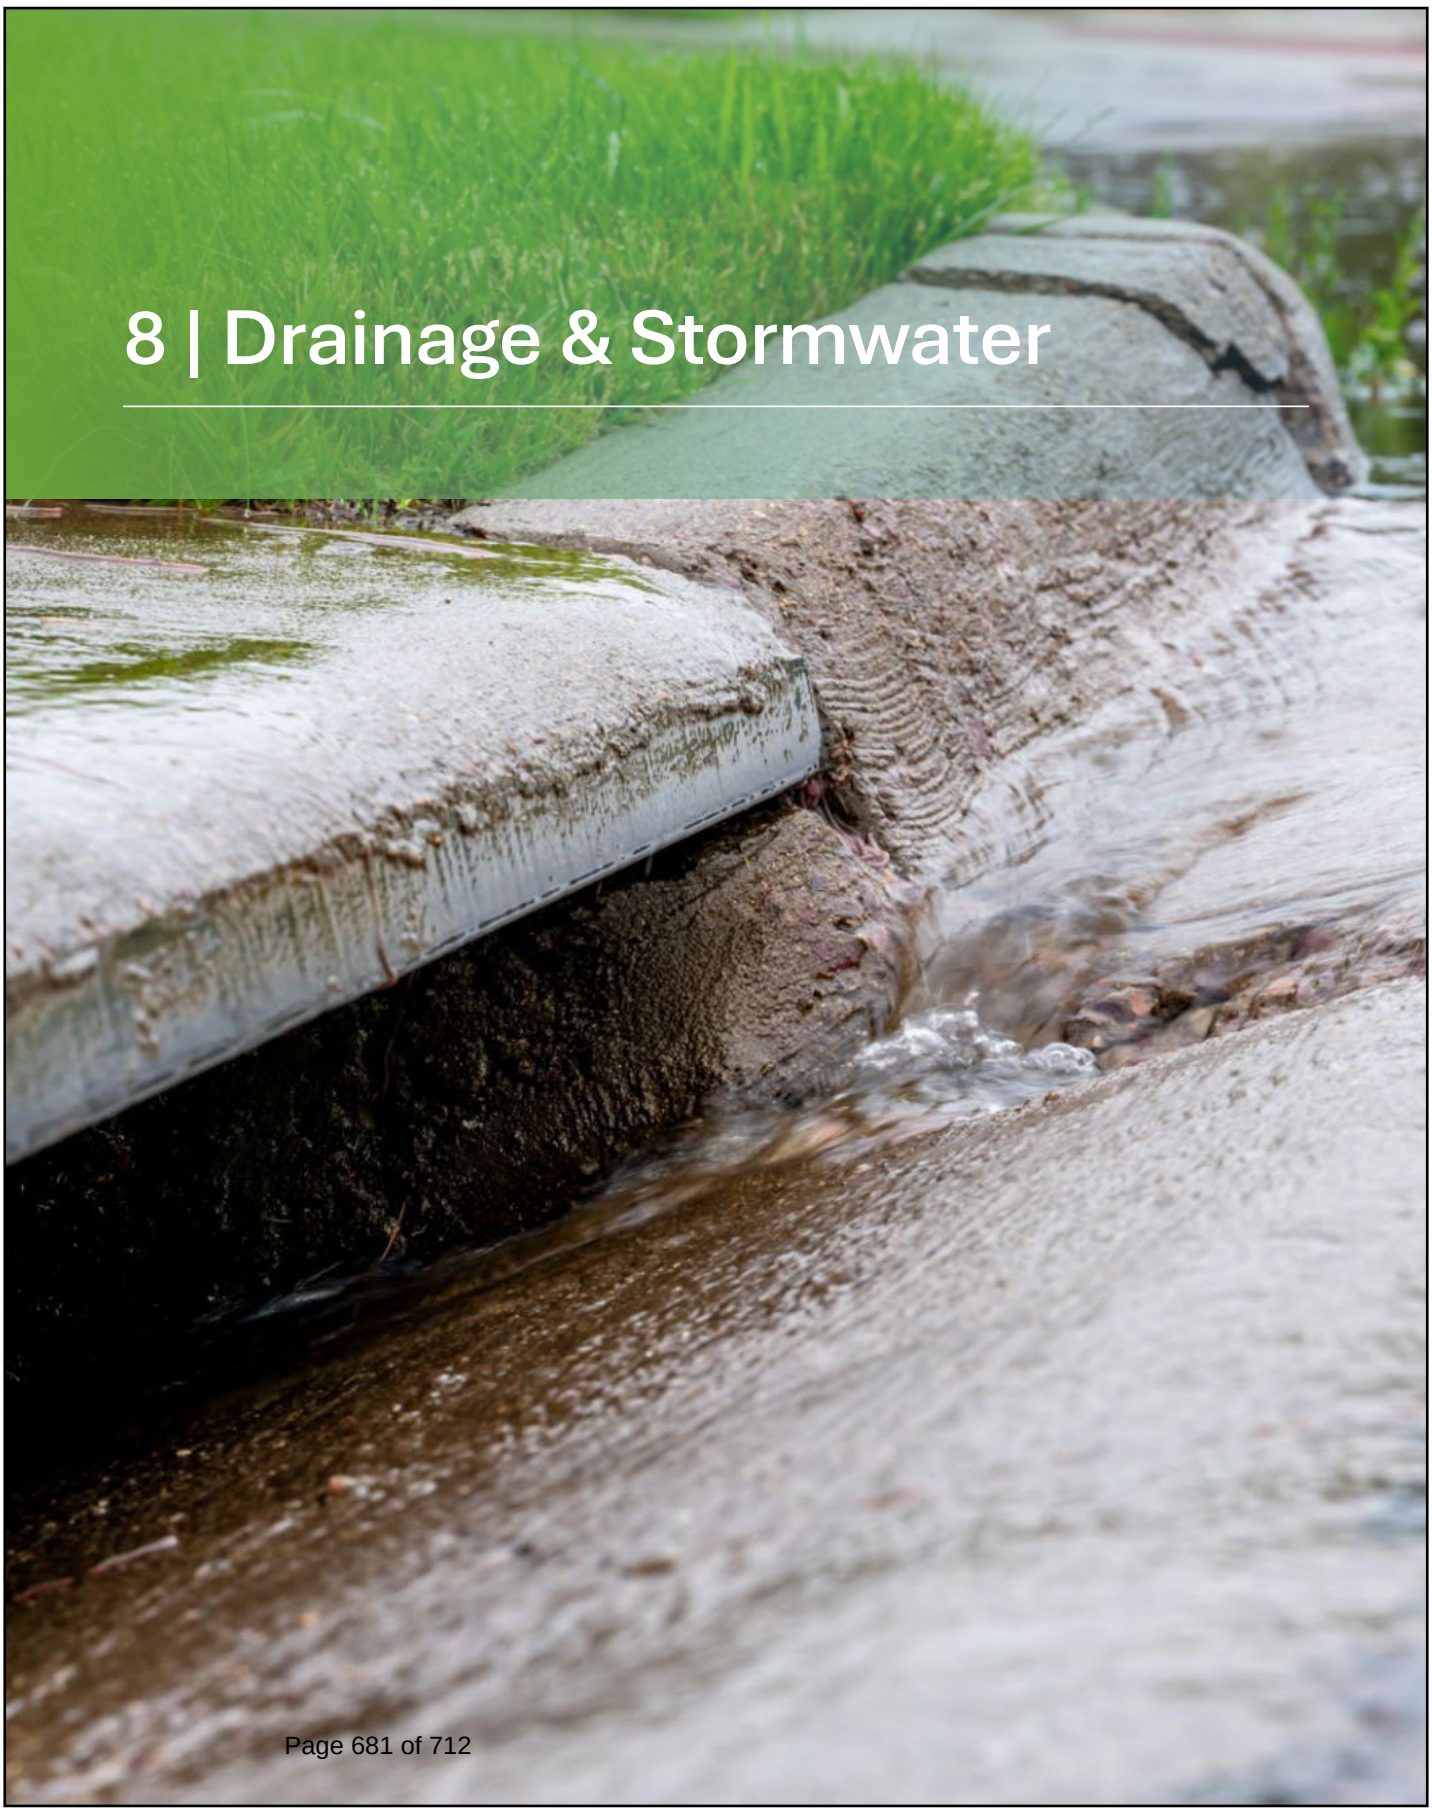
KEY PERSONNEL AND ROLE ON CONTRACT

Frank Paruas - Project Manager
Saul Brand - Project Surveyor
Mike Zoltek - Project Director
Chris Bray - CADD Manager
Iarelis Hall - QA/QC Manager



PROJECT DESCRIPTION

GPI Geospatial was tasked to provide a 3D topographic survey to support engineering design of a pedestrian bridge across State Road 7 (US 441), south of the Osceola Drive intersection, on the Seminole Indian Reservation land in Broward County, FL.

GPI Geospatial field crews established a horizontal and vertical project control network to allow for effective surveying of this intersection. Using conventional survey methods and static lidar technology, our field crews surveyed this project area to include all above ground physical improvements, topographic spot elevations, trees with a 6" minimum diameter at breast height, buildings, above ground utilities, and underground storm water drainage features. Our field crews also recovered right of way lines and alignment data for State Road 7 (US 441).

This data was all merged into a single survey data file to create the final 3D topographic survey product, which was created at a 1"=40' mapping scale. Our team delivered AutoCAD Civil 3D .xml and .dwg files that included topographic and planimetric survey data. All final data was reviewed, signed, and sealed by a Florida-licensed Professional Surveyor and Mapper.

8 | Drainage & Stormwater

Riviera Beach Water Treatment Plant (WTP) Design-Build Project Phase 1

City of Riviera Beach

HBC Engineering Company was a key contributor to the progressive design-build effort for the City of Riviera Beach's Advanced Water Treatment Plant at the Avenue L parcel. The Phase 1 scope focused on comprehensive design and engineering services, supporting the development of a 12.0 Million Gallons per Day (MGD) advanced water treatment facility expandable to 16.0 MGD, along with associated infrastructure upgrades.

The key project components included:

- Water Treatment and Storage Facilities: Design of an advanced treatment facility, a new ground storage reservoir, and a finished water pump station to enhance capacity and efficiency.
- Groundwater Supply Wells and Transmission Improvements: Engineering new wells for the Floridan and Surficial Aquifer Systems and designing 18,000 linear feet of raw water transmission mains, including hydraulic modeling and transient surge analysis.
- Site and Utility Development: Stormwater management systems, paving and grading, and raw water yard piping for the Avenue L and Avenue U parcels.
- Supporting Infrastructure: Planning and layout for administrative buildings, maintenance shops, and utility operations facilities.

Location
Riviera Beach, FL

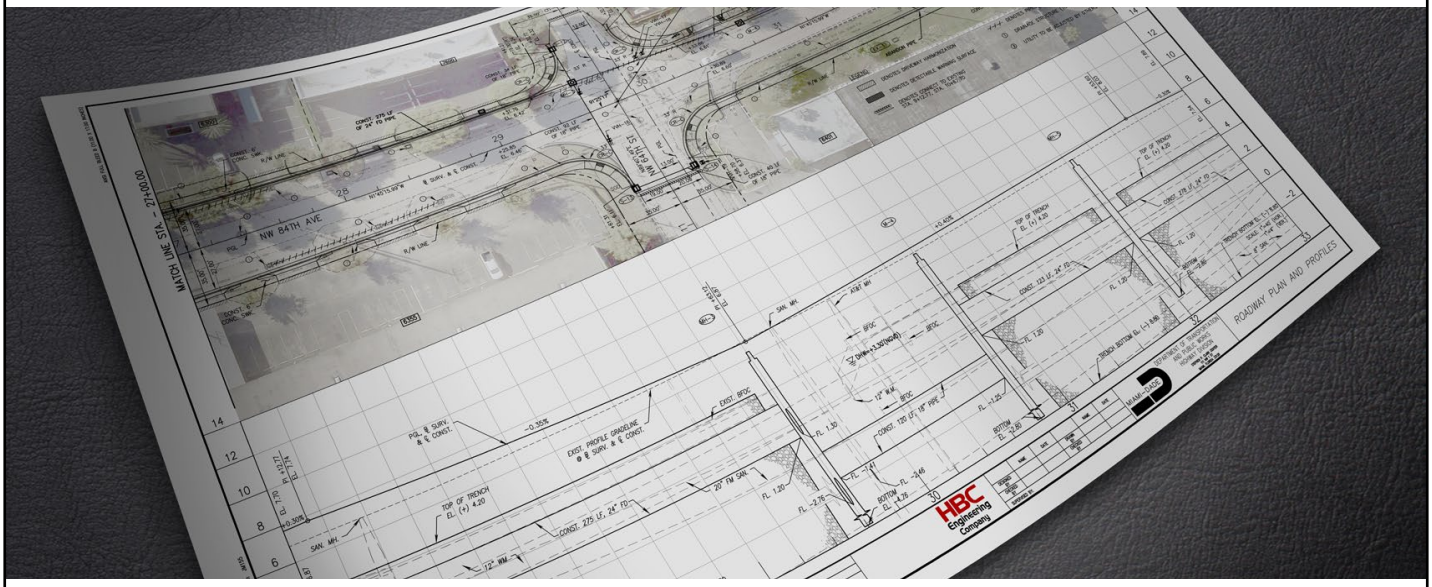
Key Components
Water treatment esign services, Wastewater pump station and underground pipeline design services

Relevance to the Scope
1. Advanced Water Treatment and Storage Facility Design

- Permitting and Regulatory Compliance: Secured necessary permits, reviewed environmental site assessments, and ensured compliance with local and state regulations.



HBC provided significant expertise in site/civil design, permitting, and project management, ensuring adherence to project schedules, budgets, and regulatory requirements.

1. Groundwater Supply Wells and Transmission Main Engineering
2. Comprehensive Site and Utility Infrastructure Development
3. Permitting, Environmental, and Regulatory Compliance Leadership
4. Progressive Design-Build Delivery Supporting Capacity Expansion

Design-Build Services for the Reconstruction of NW 84th Ave

Miami-Dade County Department of Transportation and Public Works

HBC is the Engineer of Record for a comprehensive project to expand a 1-mile segment of an existing 2-lane roadway into a 4-lane roadway with a Two-Way Left-Turn Lane (TWLTL). The project includes developing roadway typical sections, refining horizontal and vertical geometry, and implementing a new closed drainage conveyance system. Key improvements involve connecting to existing outfalls and stormwater retention facilities, replacing CMP culverts with RCP culverts, and designing new stormwater management facilities to mitigate the increase in impervious surfaces.

The scope of work includes roadway reconstruction, milling and resurfacing, driveway harmonization, and stormwater system upgrades. Additional enhancements feature the installation of 6-foot-wide continuous sidewalks, curb and gutter systems, updated pavement markings and signage, pedestrian and traffic signalization, utility relocations, and tree removal or relocation within the right-of-way.

Critical project components include securing permits from multiple agencies, coordinating utility adjustments, and developing comprehensive signing and pavement marking plans. A thorough geotechnical investigation was also conducted. The primary objective is to enhance roadway infrastructure while ensuring regulatory compliance and minimizing impacts on the surrounding community and environment.

2. Closed Drainage and Stormwater Management Design
3. Multimodal and Pedestrian Infrastructure Enhancements
4. Utility Relocation and Agency Permitting Coordination
5. Comprehensive Infrastructure Upgrade for Safety and Capacity

Sweetwater Elementary School Parking Lot & Drainage System Improvements

Miami-Dade County Public Schools

This project involved the preparation of a comprehensive set of construction contract plans and technical specifications for the paving and drainage improvements associated with the replacement of the parking lot and drainage system at Sweetwater Elementary School. HBC Engineering Company provided full civil-site design services to support the proposed improvements while ensuring compliance with all applicable standards and regulations.

The scope of work included the development of a new parking lot layout accommodating approximately 148 parking spaces and addressing approximately 105,700 square feet of existing parking lot and landscaped areas. The design scope encompassed detailed grading and site dimension control to ensure proper elevations, drainage flow, and ADA compliance throughout the site. A thorough on-site drainage analysis was conducted, followed by the design of a new stormwater management system to improve runoff conveyance and mitigate potential flooding concerns.

In addition, HBC prepared signing and pavement marking plans to enhance vehicular and pedestrian safety and circulation within the site. Lighting design was also included to ensure appropriate illumination levels throughout the parking lot for improved visibility and security during nighttime hours. The project design was coordinated with school officials and local permitting agencies to facilitate a seamless review and approval process.

West Hillsboro Blvd Roundabout Project From Parkside Drive to SR-7/US-441

Broward County

The Hillsboro Boulevard Improvements project, extending from east of Parkside Drive to SR-7/US-441, includes a comprehensive set of multimodal and safety upgrades. The scope features new on-street bicycle lanes, upgraded street lighting, and ADA-compliant sidewalks to improve mobility, visibility, and accessibility for all users. A modern roundabout at NW 64th Terrace/NW 74th Place will enhance traffic flow and safety through geometric, drainage, and landscaping improvements. Additional work includes milling and resurfacing to restore pavement life, curb and gutter adjustments, and refreshed pavement markings to ensure a smooth and durable roadway surface.

The project also addresses drainage, utilities, and traffic operations, with new control devices, signage, and pedestrian crossings supporting multimodal efficiency. Landscaping, hardscaping, and street furniture will improve corridor aesthetics and environmental quality. Construction will be phased to minimize disruptions, with strong public communication and environmental best practices guiding implementation. Funded by the Transportation Surtax (MAP Broward), the project emphasizes accessibility, sustainability, and coordination with local and regulatory partners to deliver a safer, more connected corridor.

SR-858/Hallandale Beach Blvd from SR-7/US-441 to Lakeshore Dr RRR Project

Florida Department of Transportation (FDOT) District 4 (D4)

HBC was selected by the Florida Department of Transportation (FDOT) to provide professional engineering design services for this Resurfacing, Restoration, and Rehabilitation (RRR) project along SR-858/Hallandale Beach Boulevard from east of SR-7/US-441 (MP 0.233) to west of Lakeshore Drive (MP 2.176) for a total project length of approximately 1.943 miles or 10,259 feet. Within this project corridor, SR-858 is a divided four-lane urban roadway consisting of two 12' wide travel lanes in each direction, a raised median, 6' wide shoulders with 5' paved and 1' unpaved, and 5' wide sidewalks on both sides.

As the prime consultant, HBC was responsible for the development of the master plan, design criteria package, and preparation of construction documents in accordance with FDOT standards, current design bulletins, and field conditions. The scope of work included pavement Milling and Resurfacing (M&R), ADA-compliant sidewalk and ramp upgrades, widening of the existing shoulder to accommodate a 5' wide paved bicycle lane with a 1' wide unpaved shoulder, and restoration of grass swales in locations that had been overlaid with asphalt and exhibited drainage issues. HBC also performed the drainage evaluation and design to address known ponding and improve stormwater conveyance.

Additional elements of the scope included roadway geometry review, typical section development, utility coordination, and the preparation of Signing and Pavement Marking (S&PM) plans. This project also

required signalization design and replacement at designated intersections to enhance operational efficiency and safety. All work was coordinated closely with FDOT D4 staff to ensure compliance with project requirements, permitting needs, and constructability standards.

1. Pavement Rehabilitation, ADA, and Bicycle Lane Enhancements
2. Drainage Evaluation and Stormwater Conveyance Improvements
3. Signalization, Signing, and Pavement Marking Design

9 | Building Inspections, Plans Review & Permitting

Buildings Report for Capital Repair Plans

Miami-Dade County Water and Sewer Department (MDC-WASD)

This MDC-WASD Buildings Report for Capital Repair Plans Project involved the inspection of MDC-WASD-owned buildings and water treatment structures at the Alexander Orr and Hialeah Water Treatment Plants. These inspections were performed on the Raw Sludge Holding Tanks, Chlorine Contact Basins, Flocculator/Settling Tanks, Clarifiers, Aeration Basins, Filtration System Areas, Sodium Silicate/Lime Unloading Stations, Sludge Pump Rooms, High Service Pump Rooms, Ammonia Storage and Feed Areas, Fuel Tanks, and Warehouses. Ancillary structures included one-story reinforced concrete and masonry buildings used to house equipment, as well as metal and reinforced concrete staircases and platforms providing access to all areas, metal ladders, and safety handrails.

HBC developed a standardized inspection template and led a team of engineer inspectors in performing structural evaluations. HBC was responsible for completing detailed structural inspection reports and reviewing reports prepared by others to ensure accuracy of content and consistency in formatting. These reports included photographic documentation highlighting both structural deficiencies and well-maintained features, along with recommendations for repairs and associated quantity calculations.

HBC was responsible for overseeing the inspection of multiple buildings on behalf of MDC-WASD. This included visually assessing general structural and electrical system conditions; performing field inspections;

Building inspections, water treatment structures, structural assessments, electrical evaluations, inspection reporting, photo documentation, repair recommendations, quantity estimates, cost estimating, coordination with operators.

reviewing and evaluating as-built drawings and maintenance records; and preparing Building Inspection Reports summarizing findings, along with cost estimates for necessary repairs or remediation. HBC managed advanced inspection services, coordinated project schedules, and worked closely with operators across multiple MDC WASD treatment plants, pump stations, and facilities to ensure safe and timely access to inspection sites.

The inspections addressed both structural and electrical conditions, identifying deficiencies that required remediation or repairs to determine major capital repairs and replacements anticipated over the next five (5) years. HBC also developed a field inspection notes template used to document findings in a standardized format that complied with the requirements of BCC Resolution No. 229-22. This project was successfully completed on time, resulting in the production of a total of 82 comprehensive Building Inspection Reports.

Relevance to the Scope

1. Comprehensive Structural and Electrical Inspections for MDC-WASD Facilities
2. Standardized Inspection Templates and Reporting Framework Development
3. Evaluation of Major Water Treatment Plant Structures and Ancillary Buildings
4. Deficiency Identification with Repair Recommendations and Cost Estimates
5. Production of 82 Building Inspection Reports in Compliance with BCC Resolution 229-22

Multiple Parks - 40 Years Recertifications

Miami Dade County Parks

HBC conducted a walk-through visual inspection for various Buildings located at multiple parks, including AB Barnes Park, Country Club of Miami, and Crandon Park to prepare an assessment report listing the findings and recommendations for the structural and electrical components.

The report included the building description, observations noted during the site visit, a written evaluation of the project building including recommendations for repairs, photographs of conditions, and the information requested in the structural and electrical forms in the format required by Miami-Dade County.

HBC provided a prioritized list of damages and deficiencies required to be addressed and repaired prior to submitting and obtaining the (40th-year) Recertification. Reports were sent to Miami-Dade Parks, Recreation & Open Spaces Department (PROS) for review prior to submit to RER signed and sealed documents.

After repairs, HBC provided the Structural and Electrical (40th-year) Recertification Reports in compliance with the Miami-Dade County Recertification Section guidelines, based exclusively on a visual inspection and provided in the format required by the Miami-Dade County.

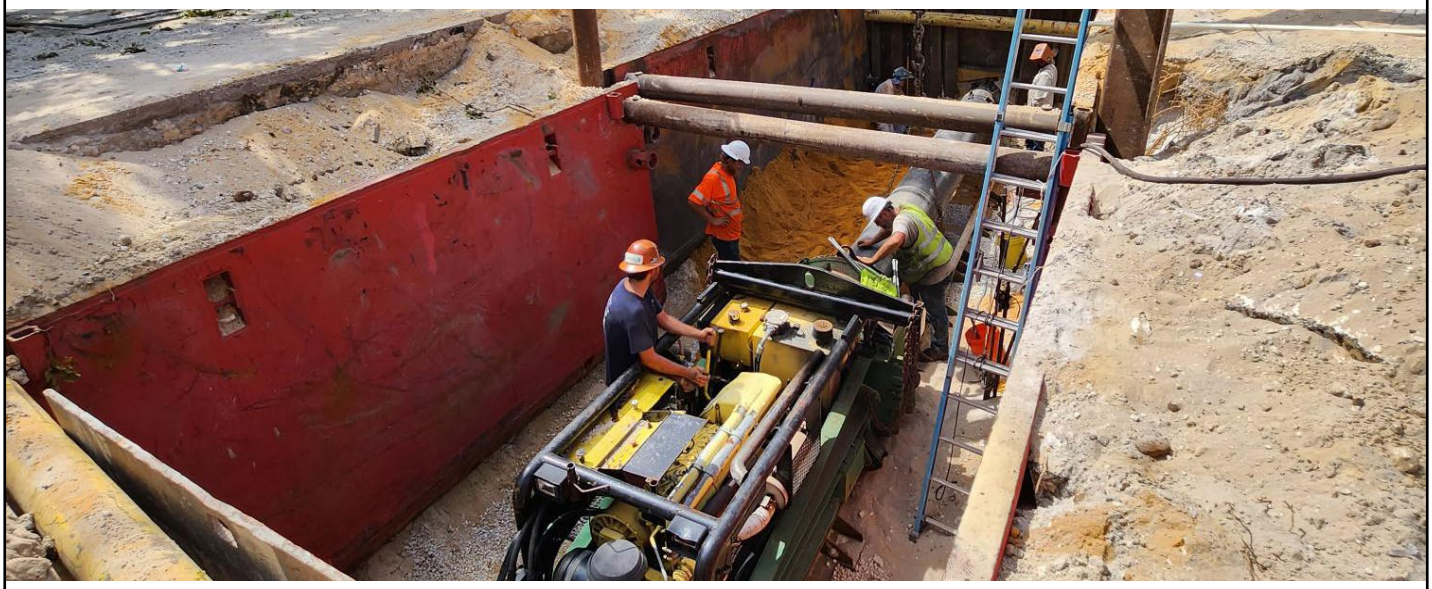
PCTS 20080

Key Components
Construction engineering inspection (CEI), sanitary sewer force mains, daily construction oversight, safety standards

Relevance to the Scope



1. Utility inspection expertise
2. Safety compliance management
3. Multidisciplinary coordination

HBC provided Construction Engineering and Inspection (CEI) services for the installation of over 11,000 linear feet (LF) of sanitary sewer force mains along West, North, and East Country Club Drive, from William Lehman Causeway to Yacht Club Way. The mains primarily measure 16” in diameter, with additional sections of 20”, 12”, 8”, 6”, and 4” diameters.

The HBC team is managing the inspection staff and overseeing daily construction activities to ensure the contractor adheres to MDC-WASD safety standards, specifications, and guidelines. Their duties include reviewing and processing shop drawings, RFIs, and pay applications; conducting bi-weekly meetings, necessary onsite meetings, and conflict resolution meetings; maintaining well-kept records of all daily activities, MOT, SWPPP, and weather reports; and coordinating with the contractor, EOR, and client for design modifications. This includes creating a redundant backup system for the City of Aventura instead of abandoning the existing system.

CEI Services for FDEP Grant Funded 12” Reclaimed Water Main 2-Mile Expansion for Area 10

City of Delray Beach

HBC provided full Construction Engineering and Inspection (CEI) services for this complex, multiphased utility infrastructure project located within the City of Delray Beach and funded by a Florida Department of Environmental Protection (FDEP) Grant. Spanning two distinct phases and covering various urban locations, this project included the installation of over 7,500 linear feet of 12” and 6” diameter High-Density Polyethylene (HDPE) water main using both Horizontal Directional Drilling (HDD) and open cut methods. The scope also included the reconstruction of sidewalks, driveway connections, pavement restoration, and coordination with existing utilities throughout the corridor. A particularly critical component of this project involved proactive coordination with the Florida East Coast (FEC) Railway for the water main installation beneath the active railway tracks. HBC’s CEI team, led by Christopher Soto, ensured the precise documentation of daily construction activities, coordinated utility adjustments, and managed contractor compliance with specifications and permitting requirements. The team also conducted biweekly progress meetings with the City and stakeholders to provide updates, resolve issues proactively, and maintain quality control. Despite facing multiple schedule setbacks, due to utility conflicts and unforeseen conditions, the team maintained budget discipline, keeping the project under budget by minimizing and negotiating change orders, avoiding cost overruns, and maintaining alignment with the client’s objectives.

Citywide Pedestrian, Drainage, and Roadway Improvements Project

City of Doral

HBC provided Construction Engineering and Inspection (CEI) services for this federally funded improvements project. The areas for improvements included the following:

- NW 27th Street from NW 107th Avenue to NW 109th Avenue
- NW 102nd Avenue from NW 15th Terrace to NW 25th Street
- NW 87th Court/NW 26th Street from NW 27th Street to NW 89th Court
- NW 89th Court from NW 27th Street to NW 25th Street
- NW 84th Avenue from the FEC Railway to NW 13th Street

This project included sidewalk and driveway construction, curb and gutter formation, storm sewer manhole installations, French drain setups, restoration of sub-base and base, pavement restoration, pavement markings, tree removal, tree relocation, and sod restoration.

HBC assisted in preparing state-funding packages for reimbursement. Our responsibilities also included obtaining permits from local governing bodies, coordinating daily inspections, and ensuring comprehensive documentation for project closeout. This included generating a detailed punch list to ensure the project surpassed its original conditions.

CEI Services for the Wabasso Dr over the LWDD L-2 Canal Bridge Replacement LAP Project

Palm Beach County

HBC Engineering Company (HBC) was contracted to provide Construction Engineering and Inspection (CEI) services for this project, which involved the replacement of the existing bridge along Wabasso Drive over the Lake Worth Drainage District (LWDD) L-2 Canal from Aspen Road on the south end to the intersection at Oswego Avenue on the north end. This project included:

- **Bridge Replacement:** The removal of the existing bridge and replacement with an 8' X 12' box culvert.
- **Roadway Reconstruction:** The full reconstruction of Wabasso Drive from Aspen Road to Oswego Avenue, which included two 10' travel lanes, a 4' sidewalk, and 10' grass swales on both sides of the road.
- **Drainage Improvements:** The enhancements to the drainage system improved water management and prevented flooding.
- **Funding and Compliance:** This project was federally funded by the Federal Highway Administration (FHWA) via the United States Department of Housing and Urban Development Community Development Block Grant Program (HUD CDBG). All required information was provided to the Palm Beach County Department of Housing and Economic Development (PBC HED) to ensure compliance with all Federal Community Development Block Grant (FCDBG) requirements.

CEI Services for Roadway, Sidewalk, & Pedestrian Lighting Improvements Project (LAP) at Cherry Road from Military Trail to Quail Drive

Palm Beach County

HBC is providing Construction Engineering & Inspection (CEI) services for the complete streets improvements along Cherry Road in Palm Beach County (PBC). The HBC CEI Team handles all project management as well as inspections under this specific project under a blanket task work order contract with PBC.

The project involves the construction of an 8-foot-wide sidewalk along the north side of Cherry Road, stretching from N. Military Trail to a point 120 feet west of Quail Road. Additionally, a 6-foot-wide sidewalk will be constructed on the south side of Cherry Road, covering the same stretch from N. Military Trail to Quail Road, with the exception of the segment that crosses the bridge identified as structure #934229. The scope of the project also includes milling & resurfacing, widening, and the installation of appropriate signing and pavement markings to better accommodate current traffic volumes and improve overall traffic flow. Pedestrian-scale lighting and landscaping will be installed along the sidewalks and in key areas of the roadway.

HBC's CEI Team is responsible for conducting bi-weekly progress meetings, maintaining accurate daily reports, verifying quantities and work compliance, documenting changes in field conditions, supporting the interpretation of plans and specifications, and providing input on potential resolutions for construction issues, managing invoices, assisting Palm Beach County with state funding

packages for reimbursement, facilitating daily inspections, and handling all documentation for project closeout, including a comprehensive punch list as well as inputting accurate data entry into GAP and organizing all project documentation for timely reimbursement submissions of the allocated federal funds.

Key Components

Milling & Resurfacing, Variable Width Sidewalk, Pedestrian Lighting, ADA Improvements.

Relevance to the Scope

1. Comprehensive CEI Services for Complete Streets Improvements
2. Sidewalk, Roadway, and Pedestrian Lighting Enhancements
3. Milling, Resurfacing, and Traffic Flow Upgrades
4. Funding Documentation and Reimbursement Coordination with PBC
5. Field Inspection, QA/QC, and Project Closeout Management

Rickenbacker Causeway Lane Reduction Feasibility Study

Miami-Dade County Department of Transportation and Public Works

The Rickenbacker Causeway is a vital link between the Miami Metropolitan Area and the Village of Key Biscayne, functioning as a regional arterial facility that supports a wide range of users. Beyond serving as a major commuter route, the causeway plays a critical role as a recreational corridor and an essential hurricane evacuation route for the area. Given its significance, any modifications to its lane configuration must be carefully assessed to ensure that the transportation needs of all users are met efficiently and safely.

HBC led a traffic study to evaluate the feasibility of reducing the number of lanes along the Rickenbacker Causeway from three to two lanes while maintaining safe and effective traffic flow.

The study incorporated multiple key elements, including:

- Data Collection to gather accurate traffic volumes, travel patterns, and user behaviors.
- Traffic Forecasting, Analysis, and Simulation to assess current and future traffic operations
- Evaluation of Special Events and Hurricane Evacuation Routes to ensure the feasibility of lane reduction under varying conditions
- Public Involvement Coordination and Project Management to engage stakeholders and ensure transparent decision-making.

Design Build Services for the Central District Wastewater Treatment Plant (CDWWTP) Oxygen Production Facility

Miami-Dade Water & Sewer Department

As part of Miami-Dade County's infrastructure modernization efforts, HBC played a key role in the design-build project for the new Oxygen Production Facility at the Central District Wastewater Treatment Plant (CDWWTP). This facility was designed to replace aging oxygen production systems with state-of-the-art Vacuum Pressure Swing Adsorption (VPSA) technology, ensuring reliable and continuous oxygen production to support wastewater treatment operations. The project enhanced environmental compliance and supported sustainable growth for the region while meeting stringent EPA Consent Decree requirements.

HBC was responsible for the civil engineering design, construction management, project control, scheduling, and coordination across multiple disciplines, ensuring seamless project execution.

Key elements included:

- Site Development & Civil Engineering – Designed and executed site layout, clearing and grubbing, pavement design, and civil/site dimension control.
- Drainage & Stormwater Management – Developed a swale and exfiltration trench system to mitigate stormwater runoff and ensure compliance with water quality and quantity regulations.

Key Components
Site development, drainage and stormwater management, structural coordination, electrical and mechanical coordination, construction engineering, project scheduling and compliance.

- Structural, Electrical, and Mechanical Coordination – Ensured the adequacy of designs across multiple disciplines, including structural, process mechanical, electrical, instrumentation, plumbing, HVAC, and fire protection.
- Construction Engineering & Documentation – Oversaw contractor payment validation, processed Requests for Information (RFIs), managed submittals, and ensured regulatory compliance.
- Project Scheduling & Compliance – Closely monitored the construction schedule to meet EPA deadlines, leveraging HBC's expertise in Proliance Project Management Software to track progress and ensure timely completion.

This project significantly improved operational efficiency at the CDWWTP, replacing outdated oxygen production units with a modern, sustainable system. By ensuring redundant oxygen production, the facility now operates with increased reliability while reducing energy consumption. HBC's expertise in multi-disciplinary project coordination and environmental compliance was instrumental in delivering this essential infrastructure upgrade on schedule and within budget.

Relevance to the Scope

1. Design-Build Support for Advanced Oxygen Production Facility at CDWWTP
2. Civil, Drainage, and Site Development Engineering Design
3. Multidisciplinary Coordination Across Structural, Mechanical, and Electrical Systems
4. Construction Management, Documentation, and Regulatory Compliance
5. EPA Consent Decree Compliance through Schedule and Quality Control Leadership

Agenda Item Report

Subject:	Consideration and approval for the purchase of police vehicles from Cocoa Ford Inc. - Sponsored by Chief DeCoursey RESOLUTION NO: 2026-023 A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, AUTHORIZING THE PURCHASE OF NEW POLICE VEHICLES FROM COCOA FORD INC. THROUGH A COOPERATIVE PURCHASING AGREEMENT; AUTHORIZING THE TOWN MANAGER OR DESIGNEE TO EXECUTE ALL NECESSARY DOCUMENTS; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.
Meeting Date:	Special Commission Meeting - March 13, 2026
Prepared For:	Town Commission
Staff Contact:	Daniel DeCoursey, Police Chief
Dept/Group:	Police Department
Recommendation for Counsel to consider:	
Background Information:	The Police Department requests approval to purchase new patrol vehicles from Cocoa Ford Inc. to replace aging units that have exceeded their service life. The acquisition will support operational readiness, reduce maintenance costs, and ensure officer safety. Pricing was obtained through an approved cooperative purchasing contract, ensuring compliance with procurement requirements and competitive pricing.
Staff Recommendations:	Approve the purchase of police vehicles from Cocoa Ford Inc. in an amount not to exceed $325,000 and authorize the Town Manager (or designee) to execute all necessary documents.

RESOLUTION NO. 2026-023

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, AUTHORIZING THE PURCHASE OF NEW POLICE VEHICLES FROM COCOA FORD INC. THROUGH A COOPERATIVE PURCHASING AGREEMENT; AUTHORIZING THE TOWN MANAGER OR DESIGNEE TO EXECUTE ALL NECESSARY DOCUMENTS; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the Town of Pembroke Park Police Department has identified the need to acquire new police vehicles to support current and future operational demands; and

WHEREAS, the Town of Pembroke Park is eligible to utilize cooperative purchasing agreements that provide competitively bid pricing and ensure compliance with the Town's procurement requirements; and

WHEREAS, Cocoa Ford Inc. is an authorized vendor offering vehicles that meet the Town's required police specifications; and

WHEREAS, the use of a cooperative purchasing agreement allows the Town to obtain favorable pricing, streamline procurement, and ensure timely acquisition of the needed vehicles; and

WHEREAS, funds for this purchase, in an amount not to exceed $325,000, are available in the appropriate Police Department budget for the current fiscal year.

NOW, THEREFORE, BE IT RESOLVED BY THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA:

Section 1: That the foregoing "WHEREAS" clauses are ratified and confirmed as being true and correct and are made a specific part of this Resolution. All exhibits attached hereto are incorporated herein and expressly made a part of this Resolution.

Section 2: The Town Manager, or designee, is authorized to execute all necessary documents, purchase orders, and related agreements required to complete the acquisition.

Section 3: The Town Commission hereby approves the purchase of new police vehicles from Cocoa Ford Inc., utilizing a Cooperative Purchasing Contract in an amount not to exceed $325,000.

Section 4: All Resolutions or parts of Resolutions in conflict herewith, be and the same are repealed to the extent of such conflict.

Section 5: If any section, sentence, clause or phrase of this Resolution is held to be invalid or unconstitutional by any court of competent jurisdiction, then said holding shall in no way affect the validity of the remaining portions of this Resolution.

Section 6: This Resolution shall become effective immediately upon its passage and adoption.

PASSED AND ADOPTED this 11th day of March, 2026.

1.3. Timeline

Release Project Date:	December 2, 2024
Pre-Proposal Meeting (Non-Mandatory):	December 11, 2024, 10:00am ESF Brevard Public Schools, Facilities Conference Room 804B, 2700 Judge Fran Jamieson Way, Viera, Florida 32940
Question Submission Deadline:	December 18, 2024, 3:00pm
Proposal Submission Deadline:	January 21, 2025, 2:00pm

2. Brevard County Public Entity Purchasing Cooperative

2.1. Background

This solicitation represents a cooperative procurement for the Brevard County Public Entity Purchasing Cooperative.

Local Governmental entities within the Brevard County area, currently consisting of 13-members, have entered into an Interlocal Agreement to create a Cooperative Purchasing group within our geographical area. The Brevard County Public Purchasing Cooperative was formed in an effort to develop cooperative relationships among its participants for the purpose of seeking responses to solicitations which may result in lower costs to group participants on commonly used commodities, better quality of products and lower administrative costs.

2.2. Cooperative Participants

Brevard County Board of County Commissioners
Brevard County School Board
Canaveral Port Authority
City of Cape Canaveral
City of Cocoa
City of Cocoa Beach
City of Indian Harbour Beach
City of Melbourne
City of Melbourne Beach
City of Palm Bay
City of Rockledge
City of Satellite Beach
City of Titusville

2.3. Cooperative Procurement Operational Procedures

A. All questions concerning this procurement should be addressed to the issuing agency, hereinafter referred to as the "Lead Entity". All responses are to be returned in accordance with the instructions contained within the project portal.

B. The solicitation specifications, terms and conditions shall be the controlling document. Each participating governmental entity will be responsible for awarding the contract, issuing its own purchase orders, and for order placement. Each entity will require separate billings, be responsible for payment to the Contractor(s) awarded this contract and issue its own tax exemption certificates as required by the Contractor.

C. Invoicing instructions and delivery locations will be in accordance with the respective entity requirements.

D. Any reference in the documents to a single entity or location will, in fact, be understood as referring to all participating entities referenced in the documents and cover letter unless specifically noted otherwise.

E. The Contractor(s) shall furnish the Lead Entity a detailed Summary of Sales semi-annually during the contract period. Sales Summary shall include Agency name, contract number(s), contractor's name, the total of each commodity sold during the reporting period and the total dollar amount of purchases by commodity.

F. Municipalities and other governmental entities which are not members of the Brevard County Public Entity Purchasing Cooperative may utilize any contract awarded by the Brevard County Public Entity Purchasing Cooperative. Public Entity Purchasing Cooperative members may participate in their contract for new usage, during the contract term, or in any contract extension term, if approved by the lead entity.

G. None of the participating governmental entities shall be deemed or construed to be a party to any contract executed by and between any other governmental entity and the Contractor(s) as a result of this procurement action.

3. Scope of Work

3.1. PURPOSE

The purpose of this Invitation to Bid (ITB) is to solicit competitive sealed Bids to furnish (CO-OP) Motor Vehicle Discount Bid to be used as noted by The School Board of Brevard County, Florida.

3.2. SCOPE OF GOODS AND/OR SERVICES

This Specification establishes the minimum requirements for this solicitation, listed and described in the body of these specifications, to be used as noted, by The School Board of Brevard County.

The intent of this bid is to secure firm fixed discounts and select multiple Bidders to provide New Motor Vehicles from the Bidders available inventory, including units in-transit from the manufacturer and factory orders, to be purchased on an as needed basis. Awarded Bidders (Contractor) shall provide Motor Vehicles and applicable options in accordance with the scope contained herein. The performance of Awarded Bidders shall be in accordance with the terms of the specifications and at the quality standards of service set forth herein.

The Motor Vehicles offered under the Contract shall be classified under the following Groups and Sub-Groups:

Group 1: Sedans and Hatchbacks
- Sub-Group A: Sedans
- Sub-Group B: Hatchbacks

Group 2: Minivans and Vans
- Sub-Group A: Minivans
- Sub-Group B: Vans
- Sub-Group C: Cutaways/Chassis Cabs

Group 3: Sport Utility Vehicles
- Sub-Group A: Crossover Sport Utility Vehicles
- Sub-Group B: Traditional Sport Utility Vehicles

Group 4: Light Duty Trucks
- Sub-Group A: Mid-Size Pickup Trucks
- Sub-Group B: Full-Size Pickup Trucks

Group 5: Medium Duty Trucks
- Sub-Group A: Pickup Trucks
- Sub-Group B: Chassis Cabs

Group 6: Law Enforcement Vehicles
- Sub-Group A: Police Pursuit Vehicles
- Sub-Group B: Special Service Vehicles
- Sub-Group C: Transport Vans
- Sub-Group D: Non-Specialized Vehicles for Law Enforcement
- Sub-Group E: Motorcycles

This ITB is intended to include all Vehicle Model Trim Levels, Engine Types, Transmissions, Van Capacities, Truck Cab types, Wheel Base, Special Packages, Vehicle Specifications and Equipment Groups for the Makes and Models listed in Attachment “C”, Bid Sheet. The Cost Plus Percentage will be applied for all Models within Make/Model line.

3.3. Minimum Specifications and Standards

The Contractor shall ensure all Motor Vehicles and Options offered under this Contract comply with the following:

1. Designed, constructed, equipped, assembled, and installed to be fully suitable for the intended use, purpose, and service pursuant to this Scope of Work;

2. New and unused (except as specified in the Transportation and Delivery section of this Scope of Work), for the Manufacturer's latest Model year available, of current or recent production, and of the latest available design and construction;

3. Include all features, equipment, and components installed by Manufacturer or Dealer according to the Manufacturer's current procedures and requirements for the applicable Manufacturer's Motor Vehicles;

4. Free of damage, defect, and rust which may affect appearance, operability, functionality, or serviceability;

5. Motor Vehicles and Options ordered by the Customer are fully compatible with each other;

6. Comply with current legal, customary, reasonable, and professional standards of the Motor Vehicle and transportation equipment manufacturing industry;

7. Comply with current mandatory and applicable federal and State of Florida Motor Vehicles standards and requirements including, but not limited to, all legal, safety, and environmental standards and requirements.

8. Comply with current Florida Statue 1006.22 Acceptable and Prohibited Vehicles for the Transportation of Students when applicable. (Attachment "A") To be determined at the time of order at the sole discretion of the School Board or Customer.

3.4. Advertising and Marketing

No Dealer's advertising and identification (name, logos, etc.) is permitted on any Commodity offered under this Contract. The Manufacturer's advertising and identification (brand, name, model, logos, etc.) is permitted on any Commodity provided under this Contract if such advertising and identification is a Manufacturer's practice. The School Board reserves the right to, in their sole discretion, determine what advertising and identification is considered unacceptable under this Contract.

3.5. Luxury, Performance, or Sport Motor Vehicles or Options

Unless otherwise indicated in Attachment C, Bid Sheet (Group 1 – 6), no luxury, performance, or sport Motor Vehicles or Options shall be permitted under this Contract. The School Board and the Contract Manager shall determine what is considered luxury, performance, or sport which includes, but is not limited to:

A. Coupes (unless specified in Group 1), two-seaters, supercars, cabriolets, convertibles (soft top or hardtop), roadsters, grand-tourers, and signature or specialty editions.

B. Leather upholstery (seats or interior), sunroofs, moon roofs, and non-standard navigation systems.

C. Luxury Makes, i.e., Cadillac, BMW, Mercedes, etc.

3.6. Installation

When installation is required, the Contractor shall be responsible for ensuring the installation of the Options in the required locations at no additional charge, as specified in the Charges and Fees section. Options shall be assembled and installed by the Manufacturer, Dealer, or approved installer. All materials used in the installation shall be new and unused and shall be free of defects that would diminish the appearance or render it structurally or operationally unsound. Installation includes the furnishing of any materials required to install or replace the parts in the proper location. The Contractor shall protect the installation site from damage and shall repair any damages caused during installation. If any alteration, dismantling, excavation, etc., is required to achieve installation, the Contractor shall promptly restore the structure or site to its original condition. The Contractor shall perform installation work so as to cause the least inconvenience and interference with Customers and with proper consideration of others on the installation site. Upon completion of the installation, the location and surrounding area of work shall be left clean and in a neat and unobstructed condition, with everything in satisfactory repair and order.

A. **Body Transfer and 3rd Party Body Installations**

In the event the Customer chooses to purchase or special order a cab and chassis, or cutaway van separately, the Contractor must comply with section 319.21, Florida Statutes, perform Manufacturer required pre-delivery inspection, and ensure all proper tag and title documents are present during the inspection and delivery pursuant to Florida license requirements. The Contractor shall inform the Customer, upon receipt of the order, of any additional charges for installation of aftermarket Options only. The School Board reserves the right to reject an installation charge if, within the School Board's sole discretion, the proposed installation charge does not align with market prices. The Manufacturer must certify that it conforms to all Federal Motor Vehicle Safety Standards (FMVSS). The facilitation of a body transfer or 3rd party body installations must be included in the Motor Vehicle's price; however, an additional cost may occur for installation by the Contractor or body upfitter. The installation cost may vary due to the body configuration; however, the installation price shall be included on the Price Quote Form (PQF) from the Contractor.

3.7. Warranty Repairs and Adjustments

All warranty repairs and adjustments are covered throughout the Contract term at no additional cost to the School Board. The Manufacturer shall be responsible for warranty and recall services performed, regardless of whether the Contractor actually performed the service. Nothing in this section requires or allows the Contractor to require the Customer to return the Motor Vehicle to the Contractor for warranty repairs and adjustments. The Customer shall be able to return the Motor Vehicle to any location authorized by the Manufacturer to perform warranty repairs and adjustments at no additional cost to the Customer.

a. **Extended Warranty**

This Contract does not include "extended warranty" service agreements. However, the Contractor may offer Customers "extended warranty" service agreements for the maintenance and repair of

Commodities after the initial warranty expires, but not as a term of this Contract. The School Board, in its sole discretion will accept or decline this additional service agreement. If accepted, the "extended warranty" shall be listed as a separate line item on the invoice.

3.8. Federal and State Standards

All requirements herein are in full and complete compliance with all federal and State of Florida laws, standards, and regulations applicable to the type and class of Commodities and contractual services being provided. This includes but is not limited to: Federal Motor Vehicle Safety Standards ("FMVSS"), Occupational Safety and Health Administration ("OSHA"), Environmental Protection Agency ("EPA") Standards, and State of Florida laws, requirements, and regulations that apply to the type and class of Commodities and contractual services being provided. It is the intent of the School Board that the Contractor(s) comply with all applicable federal and State of Florida regulations regarding the Commodities and contractual services' safety and environmental requirements, including any legislation or regulations which become effective during the term of the Contract and shall become a part of the Contract. The Contractor(s) shall meet or exceed any such requirements of the laws and regulations applicable to the type and class of Commodities and contractual services provided. If a conflict exists, the Contractor, regardless of whether it is the Manufacturer or Dealer, shall contact the School Boards' Contract Manager in writing no later than 24 hours after identification of the conflict.

3.9. Warranty

The Manufacturer's warranty shall cover all Commodities and contractual services offered under the Contract. The Manufacturer's warranty is required to provide coverage against defective material, workmanship, and failure to perform. The Manufacturer's warranty coverage shall be identical to or exceed those normally provided for the Commodities and contractual services specified herein that are sold to any Federal, state, or local governments. The Manufacturer's warranty shall be in effect for a minimum term of three (3) years from the Customer's acceptance, as specified in the "Inspection and Acceptance" section. Should the Manufacturer's warranty conflict with any requirements, terms, or conditions of the Contract, the Contract requirements, terms, and conditions shall prevail. Customers shall contact the Dealer or Manufacturer regarding the Manufacturer warranty terms and conditions.

3.10. Recalls

In the event there is a recall of any of the Motor Vehicle or Options, the Contractor shall provide reasonable assistance to the School Board in developing a recall strategy and shall cooperate with the School Board and the Customers in monitoring the recall operation and in preparing such reports as may be required. Each Contractor shall immediately notify and provide copies to the School Board of any communications, whether relating to recalls or otherwise, with any Customer. The Contractor shall ensure that defective Motor Vehicle and Options are rectified, replaced, and destroyed in compliance with all applicable laws, rules or regulations and the School Board's reasonable instructions. All Contractor efforts related to recalls shall be at Contractor's own expense.

3.11. Manufacturer's Last Order Date and Production Schedule Changes

The Contractor shall provide notification of a Manufacturer's Last Order Date by email to the School Board's Contract Manager no later than 30 calendar days prior to the effective date of the Manufacturer's Last Order Date. When available, the Contractor shall immediately provide copies of the Manufacturer's notice of the Manufacturer's Last Order Date to the School Board's Contract Manager.

The Contractor shall notify the School Board's Contract Manager in writing of any production schedule changes associated with the Customer's order within one Business Day of receiving the order.

3.12. Model Additions, Replacements, and Deletions

A new Model may be added to Attachment C, Bid Sheet (Group 1 – 6) at the request of the Contractor if all of the following conditions are met:

- The Model did not exist at the time of the original procurement;
- The Model is produced under a Brand for which the Contractor was awarded;
- The Model meets or exceeds the Contract requirements, specifications, terms and conditions;
- The Model falls under a Sub-Group (or Group, for Groups that do not include Sub-Groups) for which the Contractor was awarded; and

The Motor Vehicle, OEM Options, and Non-OEM Options Cost Plus Percentage offered by the Contractor is less than or equal to the highest Motor Vehicle, OEM Options, and Non-OEM Options Cost Plus Percentage offered for all Models in the same Sub-Group (or Group, for Groups that do not include Sub-Groups) for which the Contractor was awarded.

An existing Model may be replaced by a newer Model in Attachment C, Bid Sheet (Group 1 – 6) at the request of the Contractor if all of the following conditions are met:

- The new Model did not exist at the time of the original procurement;
- The new Model is produced under the same Brand as the existing Model;
- The Model meets or exceeds the Contract requirements, specifications, terms and conditions;
- The Manufacturer's intent is to replace the existing Model with the new Model; and
- The Motor Vehicle, OEM Options, and Non-OEM Options Cost Plus Percentage offered by the Contractor for the new Model is less than or equal to the Motor Vehicle, OEM Options, and Non-OEM Options Cost Plus Percentage for the existing Model being replaced.

An existing Model may be deleted from Attachment C, Bid Sheet (Group 1 – 6) at the request of the Contractor if the Manufacturer discontinues production of the Model.

The School Board reserves the right to delete Models, from this Contract by removing them from Attachment C, Bid Sheet (Group 1 – 6). Models may be removed at the sole discretion of the School Board.

The School Board reserves the exclusive right to approve or deny any addition, deletion, replacement, or other request under this section and to establish its effective date. Requests will be reviewed separately and accepted or rejected on an individual basis.

3.13. Price Quote Form (PQF)

1. Customers shall submit a PQF to all Contractors awarded for a specific Model. If the Model is available or in-transit, the Contractor shall provide Customers a completed PQF for Motor Vehicles and Options purchased under this Contract and all charges, including labor and installation, shall be itemized separately. The maximum pricing permitted shall not exceed the sum of the Cost and applied Cost Plus Percentage for the awarded Model and Options. Customers may opt to Factory Order specific vehicles when it is in the best interest of the Customer to do so. The Customer and Contractor may negotiate a lower price.

2. Upon Customer request, the completed PQF shall be provided by the Contractor and returned to the Customer within two (2) Business Days for in stock or in transit vehicles or within five (5) days for any factory ordered vehicle. The Contractor will provide the price available at the time of the PQF and consider Options or other additions to meet the Model and Options requested. The Contractor is responsible for communicating any rebates and factory incentives and removing all non-eligible and unacceptable charges and fees under the Contract from the PQF.

3. At the time of quote, the PQF must be accompanied by documentation showing Cost and the added Cost Plus Percentage for the Customer. Upon delivery, the Contractor must provide documentation showing Cost and the added Cost Plus Percentage for the Customer. At a minimum, the Contractor shall provide documentation reflecting the actual price the Contractor paid (Factory Invoice) for the Model and applicable Options from the Manufacturer including any delivery fees. Any price changes that occur must be approved by the Customer.

4. Any manufacturer incentives available at the time of delivery will be applied to reduce the vehicle price or payment due. Bidder shall list the incentive(s) and the expiration date of the current incentive program(s) on the PQF for each vehicle bid during the term of the contracted purchase.

5. The Factory Order number(s) shall be provided to the Customer contact listed on the PQF within 5 days of receiving the Customer order for all Factory Ordered Vehicles. Failure by the Contractor to provide the Customer the Factory Order number(s) within five Business Days from the date the Contractor received the Customer's order will be considered acceptance of the order by default, which, if necessary, shall require the provision of the Motor Vehicle(s) and Options which meets the requirements, terms, and conditions herein and shall not be higher than the Cost Plus Percentage provided in Attachment C, Bid Sheet (Group 1 – 6).

6. If the awarded Motor Vehicle(s) and Options are not available or cannot be delivered within the contractually required timeframe, the Contractor must provide a comparable Motor Vehicle(s) and Options of equal or better value which meets or exceeds the requirements, terms, and conditions herein. The Contractor's proposed substitution is subject to prior approval by the Customer and the School Board.

3.14. Acceptance of Order

The Contractor shall deliver the awarded Motor Vehicle(s) and Options listed on the Customer's order in accordance with the prices, Cost Plus Percentages, requirements, terms, and conditions of the Contract and the Customer's order.

3.15. Transportation and Delivery

The final price to the Customer shall include all charges for packing, handling, freight, distribution, and delivery. Transportation and Delivery of Motor Vehicles and Options shall be Free on Board (FOB) Destination to any location within Brevard County, Florida as follows:

A. Motor Vehicles and Options not in bidders' stock that are a special Factory Order from the Manufacturer at the time of order must be delivered within 120 calendar days, and only based on industry delays, not to exceed 180 calendar days, after receipt of Customer's order, unless otherwise agreed to by the Customer. For any delivery not made within the 180 calendar day timeframe, due to industry delays, the School Board's Contract Manager must be notified immediately by the Contractor and given a copy of the Customer's order. The Contractor must provide the School Board's Contract Manager any requested information and a timeframe for completion of the order.

B. Motor Vehicles and Options in stock must be delivered within 10 calendar days after receipt of the Customer's order unless an Option requires a post Manufacturer or Dealer installation. These Options shall be delivered within 30 calendar days after receipt of the order.

C. Motor Vehicles and Options that are in transit must be delivered within 30 calendar days after receipt of the Customer's order unless an Option requires a post Manufacturer or Dealer installation. These Options shall be delivered within 60 calendar days after receipt of the order.

The preferred vehicle delivery location will be the School Board's Transportation Services Central Bus compound at 2091 West. King St., Building 4, Cocoa, FL 32926.

Delivery of Motor Vehicles and Options is defined as the receipt by the Customer and delivered to the Customer's place of business or designated location, or if the Customer chooses, at the Contractor's place of business. The Contractor shall provide Customers a minimum of 24 hours' written notice prior to delivery. Deliveries will be received only between 8:00 a.m. and 3:00 p.m. on Business Days and on the Customer's local time unless previously arranged and approved by the Customer in writing.

Deliveries of Motor Vehicles and Options can be made by either private or common carrier transport; or where delivery may be accomplished by driving the self-propelled vehicle with less than 250 odometer miles at delivery, the self-propelled vehicle may, with the Customer's prior approval, be driven to the delivery location. The Contractor must make every effort to minimize the number of odometer miles at delivery. At the Customer's option, vehicles with more than 250 odometer miles at delivery may be rejected, or $0.60 per mile in excess of 250 odometer miles may be deducted from the invoice and payment owed to Contractor.

The Contractor must comply with the Manufacturer's break-in requirements and all applicable traffic and safety laws. All Motor Vehicles delivered by the Contractor to the Customer shall contain no less than a quarter (¼) tank of fuel as indicated by the fuel gauge at the time of delivery and receipt by the Customer.

The Contractor will perform a Manufacturer's Pre-Delivery Inspection (PDI) and is responsible for delivering Motor Vehicles and Options that are properly serviced, clean, and in first class operating condition. Pre-Delivery service, at a minimum, shall include the following:

A. Complete lubrication of operating chassis, engine, and mechanisms with Manufacturer's recommended grades of lubricants;
B. Check and fill all fluid levels to ensure proper fill;
C. Adjust engine(s), motor(s), and drive(s) to proper operating condition;
D. Inflate tires (including any spares) to proper pressures;
E. Check to ensure proper operation of all gauges, lights, and mechanical and hydraulic features;
F. Clean equipment, if necessary, and remove all unnecessary tags, stickers, papers, etc.; and
G. Ensure that the Motor Vehicle is completely assembled, unless otherwise noted by the Customer, and thoroughly tested and ready for operation upon Delivery.

All Motor Vehicles shall be delivered with the following documents:

1. Manufacturer's Window Sticker shall be in the Glove Box.
2. Owner's Manual & Warranty Manual shall be in the Glove Box.
3. Manufacturer's PDI Form shall be in the Glove Box.

Prior to Delivery & Payment the following documents shall be emailed or overnighted to the End User Customer for review, signatures and payment request processing:

A. A copy of the Customer's purchase order, with included allowable charges;
B. Contractor's Attachment C, Bid Sheet (Group 1 – 6) and Completed PQF signed by end user.
C. Contractor's Bill of Sale (Buyers Order) detailing allowable charges;
D. Manufacturer's invoice(s) for each delivered Commodity, including individual Motor Vehicle, and Options, in the shipment;
E. Sales Tax Exemption Form, if applicable;
F. Temporary tag and 20-day extension tag, if applicable; and
G. DHSMV 82040, Application for Certificate of Title and Vehicle Registration, if applicable.
H. HSMV82993, Odometer Disclosure Statement and Acknowledgement.

Upon full payment, Contractor shall provide the End User Customer the MCO(s) if the Customer is processing the Tag & Title within 5-7 business days or the vehicle title via certified mail within 21 days of delivery.

As part of this legal contract, all forms must be completed and provided to the End User Customer. Deliveries that do not include all the applicable forms and publications, or that contain altered forms, or are not properly completed, may be refused unless the issues are properly addressed. Repeated failures by the Contractor to submit properly completed documentation, or the submission of altered forms, may result in default proceedings and contract termination, including termination of the contract.

3.16. Inspection and Acceptance

The Customer will inspect the Motor Vehicle and Options for any physical damage. The Contractor is obligated to correct any Customer identified errors or damage at no cost to the Customer.

Inspection and acceptance shall occur at the location of the Customer's place of business or designated location, or if the Customer chooses, at the Contractor's place of business.

Title and risk of loss or damage to all Motor Vehicles and Options shall be the responsibility of the Contractor until inspection and acceptance by the Customer. If a Motor Vehicle or Option requires service or adjustments, as required by the Customer, the Contractor shall either correct the issue or be responsible for reimbursing the Manufacturer's local service Dealer or others selected by the Customer to remedy the defect. The Contractor shall initiate such required service or adjustments within two (2) business days following notification by the Customer. The Commodity shall not be accepted until all service or adjustments are satisfactory, and the Commodity is re-delivered in acceptable condition. All costs of transportation and delivery incurred for initial delivery and any re-deliveries due to non-Customer error or damage are the responsibility of the Contractor.

The Customer shall notify the School Board of any Contract deviation that it cannot resolve with the Contractor. The School Board shall develop a corrective action plan related to the Contract deviation, which may include the Customer's permanent refusal to accept the Motor Vehicle or Option, in which case the Commodity shall remain the property of the Contractor, and the School Board shall not be liable for payment for any portion thereof.

3.17. Commodities Title and Registration

The Contractor shall title and register Motor Vehicles delivered under the Contract for the Customer in accordance with Florida Law, including Chapters 319 and 320, F.S. The Contractor shall provide any necessary form(s) that must be signed by the Customer at the time of delivery, and the Contractor shall obtain any necessary signature(s) and complete the titling and registration process for the Customer within the timeframe agreed to by the Customer and the Contractor.

In the event the Customer is permitted by law to obtain title and registration for the Motor Vehicle independent of the Contractor and chooses to obtain title and registration independent of the Contractor, the Customer shall notify the Contractor in writing of this decision no later than three 3 business days following award and acknowledgment of the PQF. However, the School Board shall then be obligated to title and register the Motor Vehicle, and the Contractor shall provide the Customer any documents necessary for the Customer to do so at the time of delivery.

The Contractor shall obtain special "County" plates from the county tax offices when registering Motor Vehicles for The School Board of Brevard, County, Florida. (See attached Exhibit "B" Sample Image) City agencies will require Florida "City" plates.

Customers may elect to transfer an existing license plate, or may choose to obtain a new license plate, for which additional fees may apply.

- The Contractor is not required to obtain new license plates for the Customer unless there is a notation on the PQF, and a new license plate fee is included on the Customer's order.

The Customer's order notation for a new license plate shall include the request for a new license plate, what type of license plate is required, and a Customer point of contact including the person's name, title, and telephone number should there be any questions.

Required registration and titling details are listed below. See the Sample DHSMV Form 82040 (Exhibit "A"). (attachments)

- Owner Name: School Board of Brevard County, FL
- Owner's Mailing Address (for School Board to receive the title): 2091 W. King Street, Cocoa, FL 32926.
- Owner's Residential Street Address: 2700 Judge Fran Jamieson Way, Viera, FL 32940.
- Owner DMV Customer Number: 96261454
- Consumer's Certificate of (Tax) Exemption Number: 85-80126217 45C-3

3.18. Charges and Fees

All pricing under this Contract shall include Base Vehicle Cost plus Bidder's Cost Plus Percentage* (not to exceed 4%) **and** the following fees at zero (0%) markup:

A. Administrative/Dealer Fee; (not to exceed $500.00)
B. *Registration, Tag, and Title; (if Dealer uses a tag service, list service fee as a separate charge)
C. *Tire and Battery Fee; (this is currently collected with the tag fees in the State of Florida)
D. *Delivery to any point within Brevard County, Florida;
E. Warranty; Factory Warranty shall be Free of Charge;
F. Extended Warranty only if requested by Customer;
G. Any other charges or fees necessary to deliver the Motor Vehicle or Options according to the requirements, specifications, terms, and conditions of this ITB, and
H. Installation of additional options if applicable. (except as specified in the Body Transfer and 3rd Party Body Installations section of the SOW)

***Base Vehicle Cost plus Bidder's Cost Plus Percentage shall in no case exceed the vehicle MSRP.**

***Customers have the right to process their own Registration, Tag, Title and License Plate Transfer. If this occurs, the Contractor shall credit the Customer for any applicable tag/title fees.**

***Customers have the right to pick up the Commodity at the Contractor's location. If this occurs, the Contractor shall credit the Customer for any applicable delivery/freight fees.**

The School Board of Brevard County, Florida is exempt from Federal and State Sales and Use Tax for Tangible Personal Property. Florida State Exemption Certificate No. 85-8012621745C-3.

A copy of the District's Tax Exempt Certificate is available upon request and on the District's website at www.Brevardschools.org.

Charges and fees in excess of those that existed on the date the Contract was entered into may be extended to Customers only if the amount of the increase is attributable to changes in market conditions. The amount of the charge or fee extended to Customers shall not exceed the difference between the amount of the charge or fee at the time of the request for School Board approval and the amount of the charge or fee that existed at the inception of the Contract. Prior to extending any such charge or fee to Customers, the Contractor must request the School Board's approval by submitting to the Contract Manager documentation and justification for extending the amount of the charge or fee to Customers; the Contractor must explain the changes in market conditions that resulted in the charge or fee, identify the entity that determines and will receive the charge or fee (e.g. Manufacturer), and provide the methodology used to determine the amount of the charge or fee extended to Customers.

The School Board reserves the exclusive right to approve or deny the increase of any charge or fee request. Any charge or fee request will be reviewed separately and accepted or rejected on an individual basis. After obtaining written approval from the School Board to extend a charge or fee to Customers, the approved amount of the charge or fee must be listed separately on the PQF; the Contractor shall provide documentation of the School Board approval with each PQF that includes the charge or fee.

The awarded Contractor's Cost Plus Percentages shall remain fixed for the initial three (3) year term and any subsequent renewal of this Contract.

3.19. Additional Definitions

Definitions contained in section 287.012, Florida Statutes (F.S.); Rule 60A-1.001, Florida Administrative Code (F.A.C.); Section 7, Definitions, as listed in this ITB 25-0217-B-HD; and the additional Definitions listed herein, are incorporated by reference. In the event of a conflict, the definitions listed in this section supersede the incorporated definitions for the purposes of this Scope of Work. All definitions apply in both their singular and plural sense.

Awarded Bidder - Contractor. A Vendor that enters into a Contract with the Department as a result of receiving an award from ITB No. 25-0217-B-HD. An Awarded Bidder can be a Manufacturer or Dealer.

Brand – A particular name under which a Motor Vehicle or Option is sold by a Manufacturer. Examples include, but are not limited to: Ford, GMC, Chevrolet, Nissan, Toyota, etc.

Business Day – Monday through Friday, from 8:00 AM to 3:00 PM, excluding holidays listed in the District Calendar.

Commodity – As defined in section 287.012, Florida Statutes.

Commodity Code – The numeric code for classifying Commodities and contractual services which meet specific requirements, specifications, terms, and conditions herein. The School Board has adopted the National Institute of Government Standard Products and Services Code (NIGP) for classifying Commodities and services.

Confidential Information – Information that is trade secret or otherwise confidential or exempt from disclosure under Florida or federal law.

Contract – The agreement between the School Board and the Contractor resulting from ITB No. 25-0217-B-HD

Contract Manager – The School Board's Director of Procurement & Distribution Services or designee shall serve as Contract Manager. The Contract Manager shall be responsible for addressing any concerns within the scope of the contract. Any changes to the resulting contract shall be done in writing and authorized by the School Board Chair or authorized designee.

Contractor – A Vendor that enters into a Contract with the School Board as a result of receiving an award from ITB No. 25-0217-B-HD. A Contractor can be a Manufacturer or Dealer.

Cost – The actual price the Contractor paid for the Model and applicable Options from the Manufacturer including any delivery fees. Any price changes that occur during the manufacturing, ordering, or delivery process must be approved by the School Board.

Cost Plus Percentage – The percentage the Contractor is allowed to charge above the Cost of the Model and applicable Options.

Customer – The School Board of Brevard County, Florida, its schools, departments and agencies. The term "Customer" used herein refers to any school, department, committee, authority, or another unit in the School Board using supplies or procuring contractual services as provided for by the Procurement Department of the School Board.

Dealer – A Manufacturer's certified dealer who has been authorized by the Manufacturer to market, sell, provide, and service the Models or Options from the Manufacturer. Dealers may be Contractor-owned and -controlled, (in whole or in part) or independently owned and controlled.

Free on Board (FOB) Destination – A shipping method as defined in section 672.319(1)(b), Florida Statutes.

Group – A series of Models with applicable Commodity Codes, which are described in this Scope of Work and Attachment C, Bid Sheet (Group 1 – 6). A Group may or may not include Sub-Groups.

Manufacturer – The original producer of a Motor Vehicle or Option, which may be sold under a Brand name. Examples include, but are not limited to: Ford Motor Company, General Motors (GM), Nissan Motor Corporation, Toyota Motor Corporation, etc.

Manufacturer's Suggested Retail Price (MSRP) – The Manufacturer's recommended retail selling price, list price, published price, or other usual and customary price that would be paid by a purchaser for specific Commodities or services without the benefit of the Contract.

Model – A particular name used to identify a collection of Motor Vehicles that are sold under the same Brand name and are similar in style and appearance. Examples include, but are not limited to, Ford F-150, GMC Sierra, Chevrolet Suburban, Nissan Titan, Toyota Corolla, etc.

Motor Vehicle – A specific vehicle that meets the definition of "Motor vehicle" contained in section 320.01(1), Florida Statutes. The term includes all Options that are attached to or provided with the

vehicle when it is manufactured. The Cost Plus Percentage shown in Attachment C, Cost Sheet (Group 1 – 6), shall apply to the Cost for the Motor Vehicle, regardless of whether any Options were specifically requested by the Customer or are considered “standard” or “optional” for the trim level ordered by the Customer.

Options – Options which meet the requirements, terms, and conditions herein, and may be installed to, uninstalled from, or provided with or separately from the Motor Vehicle by the Manufacturer or Dealer, as specified, ordered, legal, customary, reasonable, and prudent in the industry. Options include the following types:

- Non-Original Equipment Manufacturer (OEM) Option – A new and unused Option intended for the Motor Vehicle that is produced by a party other than the OEM. May also be referred to as an aftermarket Option.
- OEM Option - A new and unused Option intended for the Motor Vehicle that is produced by the OEM.

Sub-Group – A specific series of Models within a Group, which are described in this Scope of Work and Attachment C, Cost Sheet (Group 1 – 6). A Group may or may not include Sub-Groups.

4. General Terms and Conditions

4.1. GENERAL INFORMATION ABOUT THE DISTRICT

The District and its governing board were created pursuant to Section 4, Article IX of the Constitution of the State of Florida. The District is an independent taxing and reporting entity controlled and operated by District school officials in accordance with Chapter 1001, Florida Statutes. The Board consists of five elected officials responsible for the adoption of policies which govern the District’s schools and departments. The Superintendent of Schools is responsible for the administration and management of the schools and departments within the applicable parameters of state law, State Board of Education Rules, and School Board policies. The Superintendent is also specifically delegated the responsibility of maintaining a uniform system of records and accounts in the District per Florida Statutes as prescribed by the State Board of Education.

4.2. DISTRICT DEMOGRAPHICS

The District is coterminous with School Board. The District currently operates 85 traditional schools including 57 Elementary Schools, 12 Middle Schools, 5 Jr/Sr. High Schools and 11 High Schools, as well as 14 public charter schools and 11 alternative sites/special centers. The total full-time K-12 enrollment of public school students as of October 13, 2023 was 74,117. In 2019, according to the National Center of Education Statistics, the District was reported as the 11th largest school district in the State of Florida and the 50th largest school district in the United States, as ranked by student population. The District is the largest employer in Brevard County with approximately 8,000 employees.

4.3. POSTING OF SOLICITATION CONDITIONS/SPECIFICATIONS

This solicitation will be posted for review by interested parties on OpenGov web site Procurement Portal (opengov.com) and will remain posted up to and including the Due Date of this solicitation. In accordance with Section 120.57(3), Florida Statutes, with respect to a protest of the terms, conditions, and specifications contained in a solicitation, including any provisions governing the methods for ranking bids, proposals, or replies, awarding contracts, reserving rights of further negotiation, or modifying or amending any contract, the notice of protest shall be filed in writing within 72 hours after the posting of the solicitation. Failure to file a specification protest within the time prescribed in Section 120.57(3), Florida Statutes, will constitute a waiver of proceeding under Chapter 120, Florida Statutes.

4.4. CONE OF SILENCE

In accordance with Board Policy 6320, titled “Procurement and Contracting”, A “cone of silence” is hereby established for all competitive selection processes including Invitations to Bid (ITB), Request for Proposal (RFP), Invitations to Negotiate (ITN), and Request for Qualifications (RFQ) for the provision of commodities and contractual services. The cone of silence is designed to protect the integrity of the procurement process by shielding it from undue influences prior to the recommendation of contract award. This cone of silence shall be imposed on these procurements after advertisement of same. The cone of silence prohibits any communication regarding a competitive solicitation between: a potential vendor, service provider, bidder, lobbyist, or consultant and the staff of the District, including school principals and department directors; and a potential vendor, service provider, bidder, lobbyist, or consultant and any one (1) or more of the Board members or member-elects. The cone of silence commences after the competitive solicitation is publicly issued and terminates at the time the Board or Superintendent or designee acts on a written recommendation from the District’s Procurement and Distribution Services department regarding contract award. A potential vendor, service provider, bidder, lobbyist, or consultant shall direct any inquiries, suggestions or requests to the procurement representative listed within the solicitation. Violation of this policy by a particular bidder, proposer, respondent, and/or representative may, at the discretion of the District, result in rejection of said bidder, proposer, respondent, and/or representative's bid, proposal, or offer and may render any contract award to said bidder, proposer, or respondent voidable.

4.5. CLARIFICATION AND ADDENDA

A. It is incumbent upon each respondent to carefully examine all specifications, terms, and conditions contained herein. Any inquiries, suggestions, or requests concerning interpretation, clarification, or additional information shall be made in writing to the designated procurement representative listed within the solicitation named herein. The School Board will not be responsible for any oral representation(s) given by any employee, representative, or others. The issuance

of a written addendum is the only official method by which interpretation, clarification, or additional information can be given.

B. If it becomes necessary to revise or amend any part of this solicitation, notice may be obtained by accessing our web site. Respondents in their proposal shall acknowledge receipts of amendments. Each respondent shall ensure that they have received all addenda and amendments to this solicitation before submitting their proposal. Please check the web site at Procurement Portal (opengov.com) for any addenda. The District will not mail/fax/email addenda to prospective respondents.

4.6. PUBLIC OPENING

The solicitation proposals shall be opened at the date, time and place listed herein, or as amended in the form of an addenda. Only the names of the respondents submitting a proposal will be read aloud at the public opening. A list of the respondents submitting proposals will be posted to Procurement Portal (opengov.com) within 1-3 business days. In accordance with Section 119.071(1)(b), Florida Statutes, sealed bids, proposals, or replies received by an agency pursuant to a competitive solicitation are exempt from Section 119.07(1), Florida Statutes, and Section 24(a), Art. I of the State Constitution until such time as the agency provides notice of an intended decision or until thirty (30) days after opening the bids, proposals, or final replies, whichever is earlier. If an agency rejects all bids, proposals, or replies submitted in response to a competitive solicitation and the agency concurrently provides notice of its intent to reissue the competitive solicitation, the rejected bids, proposals, or replies remain exempt from Section 119.07(1), Florida Statutes, and Section 24(a), Art. I of the State Constitution until such time as the agency provides notice of an intended decision concerning the reissued competitive solicitation or until the agency withdraws the reissued competitive solicitation. A bid, proposal, or reply is not exempt for longer than twelve (12) months after the initial agency notice rejecting all bids, proposals, or replies.

4.7. EXECUTION OF SOLICITATION

The proposal shall contain a manual or digital signature in the space(s) provided of a representative authorized to legally bind the respondent to the provisions therein. All spaces requesting information from the respondent shall be completed. Proposals shall be typed or printed in ink. Use of erasable ink or pencil is not permitted. Any correction made by the respondent to any entry must be initialed.

4.8. DISCLOSURE OF SOLICITATION CONTENT

A. All material submitted becomes the property of the District and may be returned only at the District's option. The District has the right to use any or all ideas presented in any reply to this solicitation. Selection or rejection of any proposal does not affect this right.

B. The District is governed by the Public Record Law, Chapter 119, Florida Statutes (F.S.). Only trade secrets as defined in Section 812.081(1)(c), F.S. or financial statements required by the School Board for road or public works projects as defined in 119.071(1)(c), F.S. (hereinafter "Confidential Materials"), may be exempt from disclosure. If a respondent submits Confidential Materials, the information must be segregated, accompanied by an executed Non-Disclosure Agreement for Confidential Materials and each pertinent page must be clearly labeled "confidential" or "trade secret." The District will not disclose such Confidential Materials, subject to the conditions detailed within the agreement, which is attached to this solicitation. When such segregated and labeled materials are received with an executed agreement, the District shall execute the Agreement and send the respondent a "Receipt for Trade Secret Information." RETURN THE NON-DISCLOSURE AGREEMENT ONLY IF CONFIDENTIAL MATERIALS ARE BEING INCLUDED IN THE SOLICITATION. PLEASE READ THE SECTION IN THE SOLICITATION DOCUMENT TO DETERMINE IF THIS APPLIES. THE CONFIDENTIAL MATERIALS WILL ONLY BE HANDED OUT TO THE SELECTION COMMITTEE ON THE DAY OF THE EVALUATION, THEREFORE, THE EVALUATION OF THIS MATERIAL WILL BE LIMITED TO THAT TIME ONLY.

4.9. INCURRED EXPENSES

This solicitation does not commit the School Board to award a contract nor shall the District be responsible for any cost or expense which may be incurred by any respondent in preparing and submitting a proposal, or any cost or expense incurred by any respondent prior to the execution of a purchase order or contract agreement.

4.10. PRICING

Unless otherwise specified, prices offered shall remain firm for a period of at least sixty (60) days; all pricing of goods shall include FOB DESTINATION, all packing, handling, shipping charges and delivery to any point(s) within the District to a secure area or inside delivery; all prices of services shall include all expenses necessary to provide the service at the location specified.

4.11. MEETS SPECIFICATIONS

The respondent represents that their proposal to this solicitation shall meet or exceed the minimum requirements specified.

4.12. BRAND NAME OR EQUAL

If items requested by this solicitation have been identified in the specifications by a Brand Name "OR EQUAL" description, such identification is intended to be descriptive and not restrictive and is to indicate the quality and characteristics of products that will be

acceptable. Proposals offering “equal” products will be considered for award if such products are clearly identified in the offer and are determined by the District to meet fully the salient characteristic requirements listed in the specifications. Unless the respondent clearly indicates in its proposal that it is proposing an “equal” product, the proposal shall be considered as offering the same brand name product referenced in the specifications. If the respondent proposes to furnish an “equal” product, the brand name of the product to be furnished shall be clearly identified. The evaluation of proposals and the determination as to equality of the product offered shall be the responsibility of the District and will be based on information furnished by the respondent. Procurement & Distribution Services is not responsible for locating or securing any information which is not identified in the proposal and reasonably available to Procurement & Distribution Services. To insure that sufficient information is available the respondent shall furnish as part of the proposal all descriptive material necessary for Procurement & Distribution Services to determine whether the product offered meets the salient characteristics required by the specifications and establish exactly what the respondent proposes to furnish and what the District would be binding itself to purchase by making an award.

4.13. SAMPLES

When required, samples of products shall be furnished with proposal to the District at no charge. Samples may be tested and will not be returned to the respondent. The result of any and all testing shall be made available upon written request.

4.14. SILENCE OF SPECIFICATIONS

The apparent silence of these specifications or any supplemental specifications as to details or the omission from same of any detailed description concerning any point, shall be regarded as meaning that only the best commercial practices are to prevail and that only materials of first quality and correct type, size, and design are to be used. All workmanship shall be first quality. All interpretations of specifications shall be made upon the basis of this statement.

4.15. LITERATURE

Upon request, the respondent shall furnish literature reasonably related to the products or services offered, for example, user manuals, price schedules, catalogs, descriptive brochures, etc.

4.16. TRAINING

Unless otherwise specified respondent may be required at the convenience of and at no expense to the District to provide training to District personnel in the operation and maintenance of any item purchased as a result of this solicitation.

4.17. SAFETY WARRANTY

Any successful respondent, including dealers, distributors, and/or manufacturers, shall be responsible for having complied with all Federal, State, and local standards, regulations, and laws concerning the product or service specified, and the use thereof,

applicable and effective on the date of manufacture or use or date in service including safety and environmental standards as apply to both private industry and governmental agencies.

4.18. WARRANTY

The respondent agrees that, unless otherwise specified, the product and/or service furnished as a result of this solicitation and award thereof shall be covered by the most favorable commercial warranty the respondent gives to any customer for comparable quantities of such products and/or services and that the right and remedies provided herein are in addition to and do not limit any rights afforded to the School Board by any other provision of the solicitation. Respondent warrants the services furnished under an awarded contract shall be free of defective material and workmanship, and shall otherwise perform in accordance with required performance criteria, for a period of one (1) year from the date of acceptance. Equipment provided must include the manufacturer's warranty, the successful respondent shall fully guarantee all items furnished hereunder against defect in material and workmanship for the manufacturer's normal period of time from date of acceptance by the District. Should any defect in material or workmanship appear, excepting ordinary wear and tear, during the warranty period, the successful respondent shall repair or replace same at no cost to the District immediately upon written notice from the District. All warranty paperwork shall be included with Deliverables prior to acceptance by the District.

4.19. ACCEPTANCE

Products purchased as a result of this solicitation may be tested for compliance with specifications. Items delivered not conforming to specifications may be rejected and returned at respondent's expense. Those items and items not delivered by the delivery date specified in an accepted proposal and/or via a purchase order may be purchased on the open market. Any increase in cost may be charged against the respondent.

4.20. OTHER AGENCIES

A. All respondents awarded contracts from this solicitation may, upon mutual agreement with the successful respondent(s), permit any school board, community college, state university, municipality or other governmental entity, to include public charter schools to participate in the contract under the same prices, terms, and conditions.

B. Further, it is understood that each entity will issue its own purchase order to the successful respondent(s).

4.21. COLLUSION

The School Board of Brevard County, Florida reserves the right to disqualify proposals upon evidence of collusion with intent to defraud, or other illegal practices to include circumventing or manipulating the process in a manner that conflicts with applicable law,

upon the part of the respondent(s), respondent's employees or agents, the District's Professional Consultant(s), or Consultant's agents, or any District employee(s) who may, or may not, be involved in the development of specifications and/or firm schedules. Multiple proposals from an individual, partnership, corporation, association (formal or informal) or respondent under the same or different names shall not be considered. Reasonable grounds for believing that a respondent has interest in multiple proposals for the same work shall be cause for rejection of all proposals in which such respondent is believed to have an interest. Any and/or all proposals shall be rejected if there is any reason to believe that collusion exists among one or more of the respondents, the District's Professional Consultant(s), or District employees. Respondents involved in developing a specification or respondents with knowledge of specifications prior to an advertisement shall be disqualified from participating in the solicitation process.

4.22. MINIMUM SPECIFICATIONS

The specifications listed in the Scope of Services are the minimum required performance specifications for this solicitation. They are not intended to limit competition nor specify any particular respondent, but to ensure that the District receives quality services.

4.23. FORCE MAJEURE

The District and the respondent will exercise every reasonable effort to meet their respective obligations as outlined in this solicitation and the ensuing contract, but shall not be liable for delays resulting from force majeure or other causes beyond their reasonable control, including, but not limited to, compliance with any government law or regulation, acts of God, acts or omissions of the other party, government acts or omissions, fires, strikes, national disasters, wars, riots, transportation problems and/or any other cause whatsoever beyond the reasonable control of the parties. Any such cause will extend the performance of the delayed obligation to the extent of the delay so incurred. Force Majeure will include epidemics and quarantine restrictions as acts of God and governmental law and regulation.

4.24. RESPONDENT'S PERSONNEL

The respondent shall be responsible for ensuring that its employees, agents, and subcontractors comply with all applicable laws and regulations and meet all federal, state, and local requirements related to their employment and position.

The respondent certifies that it does not and will not during the performance of the contract employ illegal alien workers or otherwise violate the provisions of the federal Immigration Reform and Control Act of 1986, as amended.

During the performance of the contract, the respondent agrees to the following:

The respondent shall not discriminate against any employee or applicant for employment because of race, religion, color, sex, age, handicap, or national origin, except when such condition is a bona fide occupational qualification reasonably necessary for the normal operations of the respondent. The respondent agrees to post in conspicuous places,

visible to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

The respondent, in all solicitations or advertisements for employees placed by or on behalf of the respondent, shall state that such respondent is an Equal Opportunity Employer.

Notices, advertisements, and solicitations placed in accordance with federal law, rule, or regulation shall be deemed sufficient for the purpose of meeting the requirements of this section.

The respondent shall include the provisions of the foregoing paragraphs above in every subcontract or purchase order so that the provisions will be binding upon each respondent.

The respondent and any subcontractor shall pay all employees working on this contract not less than minimum wage specified in the Fair Labor Standards Act (29 CFR 510-794) as amended.

Any information concerning the District, its products, services, personnel, policies or any other aspect of its business learned by the respondent or personnel furnished by the respondent in the course of providing services pursuant to an agreement, shall be held in confidence and shall not be disclosed by the respondent or any employee or agents of the respondent or personnel furnished by the respondent, without the prior written consent of the District.

4.25. KEY PERSONNEL

Respondent's Key Personnel (if any) shall be identified in the proposal, and may include employees, agents, subcontractors, or other personnel of the respondent. The respondent agrees that in the event it becomes necessary for the respondent to change Key Personnel while performing Services under an awarded contract, substitution of Key Personnel shall take place only upon the District's prior written consent. Failure to notify the District prior to the change of Key Personnel, or a substantial change in Key Personnel as determined by the District, may be sufficient cause for Termination.

4.26. TERMS & CONDITIONS

The terms and conditions contained in this solicitation shall apply to all Purchase Orders issued under this solicitation unless the District specifically details other terms on the Purchase Order. The District and the respondent should take care to ensure that project specific changes to these terms are as explicit as possible. All inconsistencies will be resolved in the best interests of the District.

4.27. ADVERTISING

The successful respondent shall not publicly disseminate any information concerning the resulting contract without prior written approval from the District, including, but not limited to mentioning the contract in a press release or other promotional material, identifying the

District, Individual Departments, District Personnel, as a reference, or otherwise linking the District's name and either a description of the contract or the name of the District, its departments, or employees, in any material published, either in print or electronically, to any entity that is not a party to the contract, except potential or actual authorized subcontractors, distributors, dealers, resellers, or service representatives.

4.28. SECURITY AND CONFIDENTIALITY

The successful respondent shall comply fully with all security procedures of the District in performance of the contract. The successful respondent or its agents, distributors, resellers, subcontractors, officers or employees in the course of performing contract work, including, but not limited to, security procedures, business operations information, or commercial proprietary information in the possession of the District. The successful respondent shall not be required to keep confidential information or material that is publicly available through no fault of the successful respondent, material that the successful respondent developed independently without relying on the District's confidential information or material that is otherwise obtainable under Florida law as a public record. To insure confidentiality, the successful respondent shall take appropriate steps as to its personnel, agents, and subcontractors. The warranties of this paragraph shall survive the contract.

4.29. TOBACCO

The School Board prohibits the use of tobacco products on school grounds, in school buildings and facilities, on school property, or at school-related or school-sponsored events. Refer to Board Policy 3215 - Tobacco Use.

4.30. SCHOOL SECURITY

Respondent acknowledges and understands that the goods or services contemplated under this solicitation that are delivered to or performed on school grounds, which may at various times be occupied by students, teachers, parents, and school administrators. Accordingly, in order to secure the schools, protect students and staff, and otherwise comply with applicable law, the respondent (successful respondent) agrees to the following provisions and agrees that the failure of the respondent to comply with any of these provisions may result in the termination of a resulting contract by the District:

A. **Unauthorized Aliens.** The District considers the employment of unauthorized aliens by the successful respondent, or any of successful respondent's sub-contractors, a violation of the Immigration and Naturalization Act. The successful respondent shall certify that no unauthorized aliens are working on the project site at any time. If it is determined that an unauthorized alien is performing services, the successful respondent shall immediately take all steps necessary to remove such unauthorized alien from the property and the project.

B. **Possession of Firearms.** Possession of firearms is not permitted on District property. No person who has a firearm in his/her vehicle may park his/her vehicle

on District property. If any employee/independent contractor of the successful respondent, or any of its sub-contractors, is found to have brought a firearm(s) on to District property, said employee/independent contractor shall be immediately removed and terminated from the project by the successful respondent. If a sub-contractor fails to terminate said employee/independent respondent, the successful respondent shall terminate its agreement with the sub-contractor. If the successful respondent fails to terminate said employee/independent contractor or fails to terminate the agreement with a sub-contractor who fails to terminate said employee/independent contractor, the District may terminate any awarded contract. “Firearm” means any weapon (including a starter gun or antique firearm) which will, is designed to, or may readily be converted to expel a projectile by the action of an explosive; the frame or receiver of any such weapon; any destructive devise, or any machine gun. Powder actuated construction nailers and fasteners are excluded from this definition.

C. **Criminal Acts.** Employment on the project by the successful respondent, or any of its sub-contractors, of any employee, or independent contractor, with any prior convictions of any crimes against children, crimes of violence, or crimes of moral turpitude will not be tolerated. If it is determined that any person with such criminal history is on the project site, the successful respondent agrees to take all steps necessary to remove such person from the project. The District shall have the right to terminate an awarded contract if the successful respondent does not comply with this provision.

D. **Possession/Use/Under the Influence of Mind Altering Substances.** Possession/use and/or being under the influence of any illegal mind altering substances, such as, but not limited to alcohol and/or substances delineated in Chapter 893, Florida Statutes, by the successful respondent’s employee/independent contractor or its sub- contractor’s employees/independent contractors, will not be tolerated on District property. If any employee/independent contractor is found to have brought and/or used or is under the influence of any illegal mind altering substances as described above on District property, said employee/independent contractor shall be removed and terminated from the project by the successful respondent. If a sub-contractor fails to terminate said employee/independent contractor, the agreement with the sub-contractor for the project shall be terminated by the successful respondent. If the successful respondent fails to terminate said employee/independent contractor of fails to terminate the agreement with the sub-contractor or fails to terminate the agreement with the sub- contractor who fails to terminate said employee/independent contractor, the District may terminate an awarded contract.

E. **Compliance with the Jessica Lunsford Act.** Florida Statutes require that all persons or entities entering into contracts with the School Boards/School Districts/Charter Schools who may have personnel who will be on school grounds when students may be present, or who will have contact with students shall comply with the Level 2 screening requirements of the Florida Statutes and School Board policies. The required Level 2 screening includes fingerprinting that must be conducted by the District. Any individual who fails to meet the screening requirements shall not be allowed on school grounds. Failure to comply with the screening requirements will be considered a material default of an awarded contract. The cost of this Level 2 screening shall be borne by the successful respondent.

4.31. FERPA

To the extent services provided hereunder pertain to the access to student information, Respondent shall adhere to all standards included in the Family Educational Rights and Privacy Act (FERPA) and Sections 1001.41 and 1002.22, Florida Statutes (the Protection of Pupil Privacy Acts), and other applicable laws and regulations as they relate to the release of student information.

4.32. PAYMENT TERMS

A. The District will remit full payment on all undisputed invoices within forty-five (45) days from receipt by the appropriate person(s) (to be designated at time of contract) of the invoice(s) or receipt of all products or services ordered.

B. Pursuant to Chapter 218, Florida Statutes, the District will pay interest not to exceed one percent (1%) per month on all undisputed invoices not paid within forty-five (45) days after receipt of the entire order of the commodity or service, and a properly completed invoice, whichever is later.

C. The District has the capabilities of Electronic Fund Transfer (EFT). List discounts, if any, for payments through Electronic Funds Transfer (EFT).

D. By submitting a proposal to the District, the respondent expressly agrees that if awarded a contract, the District may withhold from any payment, monies owed by the respondent to the District for any legal obligation between the respondent and the District.

E. The District shall pay such invoices pursuant to the provisions of the Local Government Prompt Payment Act (Sections 218.70 – 218.80, Florida Statutes.)

4.33. CONFLICT OF INTEREST FORM

All respondents shall complete the attached disclosure form of any potential conflict of interest that the respondent may have due to ownership, other clients, contracts, or interest associated with this project.

4.34. LICENSES AND CERTIFICATES

A. The District reserves the right to require proof that the respondent is an established business and is abiding by the ordinances, regulation, and the laws the State of Florida, such as but not limited to: Business Tax Receipts, business licenses, Florida sales tax registration, Federal Employers Identification Number, AND;

B. Each respondent and personnel who will be performing services on behalf of the respondent for the District are to be properly licensed to do business in its area of expertise in the State of Florida. Each respondent shall submit, with its proposal a copy of, and maintain the appropriate licenses and certificates during the term of the contract and any extensions. Failure to maintain these requirements shall be cause for immediate termination of an awarded contract.

4.35. TAXES

The School Board of Brevard County, Florida is exempt from Federal and State Sales and Use Tax for Tangible Personal Property. Florida State Exemption Certificate No. 85-8012621745C-3. A copy of the District's Tax Exempt Certificate is available upon request and on the District's website at www.Brevardschools.org. Respondents doing business with the District shall not be exempted from paying sales tax to their suppliers for materials to fulfill contractual obligations with the District, nor shall any respondent be authorized to use the District's Tax Exemption Number in securing such materials.

4.36. AMERICANS WITH DISABILITIES ACT OF 1990

Individuals covered by the Americans with Disabilities Act of 1990 in need of accommodations to attend public openings or meetings sponsored by the School Board of Brevard County, shall contact Procurement & Distribution Services at 321-633-1000, at least five (5) days prior to the scheduled opening or meeting.

4.37. PATENTS, COPYRIGHT, AND ROYALTIES

The respondent, without exception, shall indemnify and save harmless the School Board, its officers, agents and employees from liability of any nature or kind, including cost and expenses for or on account of any copyrighted, registered, patented, or unpatented invention, process, or article manufactured or used in the provision of goods and/or services, including use by the District. If the respondent uses any design, device, or materials covered by letters, patent, copyright, or registration, it is mutually agreed and understood without exception that the quoted price shall include all royalties or costs arising from the use of such design, device, or materials in any way involved. The District reserves a royalty-free, nonexclusive, and irrevocable license to reproduce, publish or

otherwise use, and to authorize other to use, for District purposes: (a) The copyright in any work developed under a grant, subgrant, or contract under a grant or subgrant; and (b) Any rights of copyright to which a grantee, sub grantee or contractor purchases ownership with grant support. 7 CFR 3016.36(i) (9) The District reserves a royalty- free, nonexclusive, and irrevocable license to reproduce, publish or otherwise use, and to authorize other to use, for District purposes patent rights with respect to any discovery or invention which arises or is developed in the course of or under such contract. 7 CFR 3016.36(i) (8).

4.38. PROHIBITION AGAINST CONTRACTING WITH SCRUTINIZED COMPANIES

In accordance with Section 287.135, Florida Statutes, "A company that, at the time of submitting a proposal for a new contract or renewal of an existing contract, is on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, created pursuant to s. 215.473, is ineligible for, and may not bid on, submit a proposal for, or enter into or renew a contract with an agency or local governmental entity for goods or services of $1 million or more." Section 215.473, Florida Statutes, defines a company to include "all wholly owned subsidiaries, majority-owned subsidiaries, parent companies, or affiliates of such entities or business associations that exists for the purpose of making profit." By submitting a proposal to this solicitation, a respondent certifies that it and those related entities of respondent as defined above by Florida law are not on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, created pursuant to Section 215.473, Florida Statutes. Any respondent awarded a contract as a result of this solicitation shall be required to recertify at each renewal of the contract that that it and its related entities are not on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. The District may terminate any contract resulting from this solicitation if respondent or a related entity as defined above is found to have submitted a false certification or been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Notwithstanding the preceding, the District reserves the right and may, in its sole discretion, on a case by case basis, permit a company on such lists to be eligible for, propose on, submit a proposal for, or enter into or renew a contract, should the District determine that the conditions set forth in Section 287.135(4), Florida Statutes, are met.

4.39. FLORIDA DEPARTMENT OF STATE, DIVISION OF CORPORATIONS REGISTRATION REQUIREMENTS

Respondents who are required to be registered with the Florida Department of State, Division of Corporations or who are incorporated within the State of Florida must furnish their Florida document number, and a screen shot of their "active" status. All registered respondents must have an active status in order to be eligible to do business with the District. Respondents doing business under a fictitious name, on page 1, must submit

their offer using the company's complete registered legal name; example: ABC, Inc. d/b/a XYZ Company. To register with the State of Florida, visit: www.Sunbiz.org.

4.40. PUBLIC RECORD

The District is governed by the Public Records Law, Chapter 119, Florida Statutes. Pursuant to Chapter 119, Florida Statutes, only trade secrets as defined in Section 812.081, Florida Statutes, and Section 119.071(1)(c), Florida Statutes, shall be exempt from disclosure. The Florida Legislature enacted Section 119.0701, Florida Statutes, which requires that all contractors comply with Florida's public record laws with respect to services performed on behalf of the District. Specifically, the statute requires that contractors:

A. Keep and maintain public records that ordinarily and necessarily would be required by the public agency in order to perform the service.

B. Provide the public with access to public records on the same terms and conditions that a public agency would provide the records and at a cost that does not exceed the cost provided by Chapter 119, Florida Statutes, or as otherwise provided by law.

C. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.

D. Meet all requirements for retaining public records and transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the District in a format that is compatible with the information technology systems of the District.

E. The failure of the successful Respondent to comply with the provisions set forth in this Article, if applicable, shall constitute a default and material breach of the resulting contract, which may result in immediate termination, with no penalty to the District.

F. IF THE RESPONDENT HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE RESPONDENT'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT 321-633-1000 ext. 11453. RECORDSREQUEST@BREVARDSCHOOLS.ORG. THE SCHOOL BOARD OF BREVARD COUNTY, FLORIDA, 2700 JUDGE FRAN JAMIESON WAY, VIERA, FL 32940.

4.41. GOVERNING LAWS AND VENUE

All legal proceedings brought in connection with an awarded contract shall only be brought in a state or federal court located in the State of Florida. Venue in state court shall be in Brevard County, Florida. Venue in federal court shall be in the United States District Court, Middle District of Florida, Orlando Division. Each respondent agrees to submit to the personal jurisdiction of these courts for any lawsuits filed there against such party arising under or in connection with an awarded contract. In the event that a legal proceeding is brought for the enforcement of any term of the contract, or any right arising there from, the parties expressly waive their respective rights to have such action tried by jury trial and hereby consent to the use of non-jury trial for the adjudication of such suit. All questions concerning the validity, operation, interpretation, construction, and enforcement of any terms, covenants, or conditions of an awarded contract shall in all respects be governed by and determined in accordance with the laws of the State of Florida without giving effect to the choice of law principles thereof and unless otherwise preempted by federal law.

4.42. COMPLIANCE WITH LAWS AND REGULATIONS

Respondent shall be responsible to know and to apply all applicable federal and state laws, all local laws, ordinances, rules, regulations, and all orders and decrees of bodies or tribunals having jurisdiction or authority which in any manner affect the work, or which in any way affect the conduct of the work. Respondent shall always observe and comply with all such laws, ordinances, rules, regulations, orders, and decrees. Respondent shall protect and indemnify the School Board and all its officers, agents, servants, or employees against any claim or liability arising from or based on the violation of any such law, ordinance, rule, regulation, order, or decree caused or committed by respondent, its representatives, subcontractors, subconsultants, professional associates, agents, servants, or employees. Additionally, respondent shall obtain and maintain at its own expense all licenses and permits to conduct business pursuant to an awarded contract from the Federal Government, State of Florida, Brevard County, or municipalities when legally required and maintain same in full force and effect during the term of the contract.

4.43. INDEMNIFICATION OF SCHOOL BOARD

To the fullest extent permitted by law, CONTRACTOR shall indemnify and hold harmless SCHOOL BOARD, and its employees (“Indemnitees”) from and against all claims, liabilities, damages, losses, and costs including, but not limited to, reasonable costs, and attorneys’ fees at the pre-trial, trial, and appellate levels, arising out of, resulting from, or incidental to CONTRACTOR’s performance under this Agreement or to the extent caused by negligence, recklessness, or intentional wrongful conduct of CONTRACTOR or other persons employed or utilized by CONTRACTOR in the performance of this Agreement. The remedy provided to the Indemnitees by this indemnification is in addition to and not in lieu of any other remedy available under this Agreement or otherwise. CONTRACTOR’s available insurance under this Agreement, or otherwise, will not diminish or limit this indemnification obligation in any way. The remedy provided to the

Indemnitees by this indemnification survives this Agreement. The provisions of this Section specifically survive the termination of this Agreement. The provisions of this Section are intended to require the CONTRACTOR to furnish the greatest amount of indemnification allowed under Florida law. If any indemnification requirement in this Agreement violates any law, the Parties agree the provision requires the greatest level of indemnification by the CONTRACTOR to the Indemnitees allowable under Florida law. CONTRACTOR acknowledges that indemnification by the SCHOOL BOARD may be unenforceable under Florida law and that the SCHOOL BOARD does not waive any legal defense based on the unenforceability of such indemnification position. This indemnification shall not apply to any claims, suits, actions, damages, losses, expenses, and/or a cause of action, arising from BPS's sole gross negligence or intentional misconduct. The agreement to indemnify, as outlined in this section, includes an obligation for Contractor to indemnify BPS for liability for any negligence on the part of BPS until/unless both Contractor and BPS agree that BPS was solely negligent. If the question of "solely negligent" should arise, a court agreeable to both Parties may be engaged to settle this dispute.

Nothing in this Agreement shall be deemed to affect the rights, privileges, or be deemed a waiver of, or limitation of, BPS's sovereign immunity protection and limitations of liability pursuant to Section 768.28, F.S. Any indemnity or assumption of liability by BPS hereunder shall be subject to BPS's rights to sovereign immunity and any other limitations of liability provided BPS pursuant to Florida law.

4.44. WAIVER OF TRIAL BY JURY

Respondent and the District hereby expressly waive any rights either may have to a trial by jury of any civil litigation related to an awarded contract for any litigation related to or arising from this solicitation and resulting contract.

4.45. PREVAILING GUIDELINES

For purposes of this solicitation and evaluation of proposals hereto the following shall apply: unit prices shall prevail over extended prices; written matter shall prevail over typed matter; numbers spelled in word form shall prevail over Arabic numerals ("one" over "1"). When not inconsistent with context words used in the present tense include the future, words in the plural number include the singular number, and words in the singular number include the plural number. The word "shall" is always mandatory and not merely directory.

4.46. CLARIFICATION/CORRECTION OF ENTRY

The District reserves the right to allow for the clarification of questionable entries and the correction of OBVIOUS MISTAKES.

4.47. MINOR IRREGULARITIES

The District reserves the right to waive minor irregularities in proposals, providing such action is in the best interest of the District. Minor irregularities are defined as those that have no adverse effect on the District's best interests, and will not affect the outcome of

the selection process by giving the respondent an advantage or benefit not enjoyed by other respondents.

4.48. ADDITIONAL TERMS & CONDITIONS

The District reserves the right to reject proposals containing terms or conditions contradictory to those requested in the solicitation specifications.

4.49. DISCOUNTS

All discounts except those for prompt payment shall be considered in determining the lowest net cost for evaluation purposes.

4.50. DEVIATIONS

All proposals must clearly and with specific detail, note all deviations to the exact requirements imposed upon the respondent by the specifications. Such deviations must be stated upon the Proposal Form, otherwise the District will consider the subject proposals as being made in strict compliance with said specifications to respondents; the respondent being held therefore accountable and responsible. Respondents are hereby advised that the District will only consider proposals that meet the exact requirements imposed by the specifications; except, however, said proposals may not be subject to such rejection where, at the sole discretion of the District, the stated deviation is considered to be equal or better than the imposed requirement and where said deviation does not destroy the competitive character of the solicitation process by affecting the amount of the proposal such that an advantage or benefit is gained to the detriment of the other respondents.

4.51. AWARD

The District reserves the right to award the contract to the respondent(s) that the District deems to offer the best overall proposal(s). The District is therefore not bound to accept a proposal on the basis of lowest price. In addition, the District, at its sole discretion, reserves the right to cancel this solicitation, to reject any and all proposals, to waive any and all informalities and/or irregularities, or to re-advertise with either the identical or revised specifications, if it is deemed to be in the best interest of the District to do so. The School Board also reserves the right to make multiple awards, based on experience and qualifications if it is deemed to be in the District's best interest. The District reserves the right to further negotiate any proposal, including price, with the highest rated respondent. If an agreement cannot be reached with the highest rated respondent, the District reserves the right to negotiate and recommend award to the next highest respondent or subsequent respondents until an agreement is reached.

4.52. PROTESTS

Solicitation or contract award protests shall be resolved under procedures set forth in this policy and in conformity with the requirements of F.S. 120.57(3) and the Uniform Rules at F.A.C. Chapters 28-106 and -110, and Board Policy 6320, Section Titled "Protests Arising from Solicitation or Contract Award Process".

4.53. WARRANTY OF AUTHORITY / SERVICE AGREEMENT

Each person signing the contract warrants that he or she is duly authorized to do so and to bind the respective party to the contract.

4.54. CONTENT OF INVITATION/RESPONSE

The contents of this solicitation, all terms, conditions, specifications, and requirements included herein and the accepted and awarded proposal thereto may be incorporated into an agreement to purchase and become legally binding. Any terms, conditions, specifications, and/or requirements specific to the item or service requested herein shall supersede the requirements of the “GENERAL TERMS AND CONDITIONS.”

4.55. UNIFORM COMMERCIAL CODE

The Uniform Commercial Code (Chapter 672, Florida Statutes) shall prevail as the basis for contractual obligations between the successful respondent and the School Board of Brevard County for any terms and conditions not specifically stated in this solicitation.

4.56. CONTRACT/RESPONDENT RELATIONSHIP

A. The District reserves the right to award one or more contracts to provide the required services as deemed to be in the best interest of the District.

B. Any successful respondent shall provide the services required herein strictly under a contractual relationship with the District and is not, nor shall be, construed to be an agent or employee of the School Board. As an independent contractor, the successful respondent shall pay any and all applicable taxes required by law; shall comply with all pertinent Federal, State, and local statutes including, but not limited to, the Fair Labor Standards Act, The Americans with Disabilities Act, the Federal Civil Rights Act, and any and all relevant employment laws. The respondent shall be responsible for all income tax, FICA, and any other withholdings from its employees or sub-contractor's wages or salaries. Benefits for same shall be the responsibility of the respondent including, but not limited to, health and life insurance, mandatory social security, retirement, liability/risk coverage, and worker's and unemployment compensation. The respondent shall hire, compensate, supervise, and terminate members of its work force and shall direct and control the manner in which work is performed including conditions under which individuals will be assigned duties, how individuals will report, and the hours individuals will perform.

C. The respondent shall not be provided special space, facilities, or equipment by the District to perform any of the duties required by the contract nor shall the District pay for any business, travel, or training expenses or any other contract performance expenses not specifically set forth in the specifications.

D. The respondent shall not be exclusively bound to the District and may provide professional services to other private and public entities as long as it is not in direct conflict and does not provide a conflict of interest with the services to be performed for the District.

4.57. VIOLATIONS

Any violation of any of the stipulations, terms, and/or conditions listed and/or included herein may result in the respondent being removed from the District's contractor list and the respondent being disqualified from doing business with the District for a period of time to be determined on a case-by-case basis.

4.58. RIGHT TO REQUIRE PERFORMANCE

A. The failure of the District at any time to require performance by the respondent of any provision hereof shall in no way affect the right of the District thereafter to enforce same, nor shall waiver by the District of any breach of any provision hereof be taken or held to be a waiver of any succeeding breach of such provision or as a waiver of any provision itself.

B. In the event of failure of the respondent to deliver services in accordance with the contract terms and conditions, the District, after due written notice, may procure the services from other sources and hold the respondent responsible for any resulting additional purchase and administrative costs. This remedy shall be in addition to any other remedies that the District may have.

4.59. SUSPENSION OF WORK

The District's Authorized Representative may in its sole discretion suspend any or all activities under the contract, at any time, when in the best interest of the District to do so. The District's Authorized Representative shall provide the successful respondent written notice outlining the particulars of suspension, including the length of time the contract shall be suspended (i.e.: 90 days). Examples of the reason for suspension include, but are not limited to; budgetary constraints, declaration of emergency, or other such circumstances. After receiving a suspension notice, the successful respondent shall comply with the notice and shall not accept any purchase orders during the specified time of suspension. Within ninety days, or any longer period agreed to by the successful respondent, the District's Authorized Representative shall either (1) issue a notice authorizing resumption of work, at which time activity shall resume, or (2) terminate the contract. Suspension of work shall not entitle the respondent to any additional compensation.

4.60. MODIFICATIONS DUE TO PUBLIC WELFARE OR CHANGE IN LAW

The District shall have the power to make changes in the awarded contract as the result of changes in law and/or rules of the District to impose new rules and regulations on the respondent under the contract relative to the scope and methods of providing services as

shall from time-to-time be necessary and desirable for the public welfare. The District shall give the respondent notice of any proposed change and an opportunity to be heard concerning those matters. The scope and method of providing services as referenced herein shall also be liberally construed to include, but is not limited to the manner, procedures, operations and obligations, financial or otherwise, of the respondent. In the event any future change in Federal, State or County law or rules of the School Board materially alters the obligations of the respondent, or the benefits to the District, then the contract shall be amended consistent therewith. Should these amendments materially alter the obligations of the respondent, then the respondent or the District shall be entitled to an adjustment in the rates and charges established under the contract. Nothing contained in the contract shall require any party to perform any act or function contrary to law. The District and respondent agree to enter into good faith negotiations regarding modifications to the contract which may be required in order to implement changes in the interest of the public welfare or due to change in law. When such modifications are made to the contract, the District and the respondent shall negotiate in good faith, a reasonable and appropriate adjustment for any changes in services or other obligations required of the respondent directly and demonstrably due to any modification in the contract under this clause.

4.61. CHANGES IN SCOPE OF WORK/SERVICE

A. The District may order changes in the work consisting of additions, deletions, or other revisions within the general scope of the contract. No claims may be made by the respondent that the scope of the project or of the respondent's services has been changed, requiring changes to the amount of compensation to the respondent or other adjustments to the contract, unless such changes or adjustments have been made by written amendment to the contract signed by the District's Representative (the District's Director of Procurement & Distribution Services) and the respondent.

B. If the respondent believes that any particular work is not within the scope of services of the contract, is a material change, or will otherwise require more compensation to the respondent, the respondent must immediately notify the District's Representative in writing of this belief. If the District's Representative believes that the particular work is within the scope of the contract as written, the respondent will be ordered to and shall continue with the work as changed and at the cost stated for the work within the scope. The respondent must assert its right to an adjustment under this clause within thirty (30) days from the date of receipt of the written order.

C. The District reserves the right to negotiate with the successful respondent(s) without completing the competitive solicitation process for materials, products,

and/or services similar in nature to those specified within this solicitation for which requirements were not known when the solicitation was released.

4.62. SCHOOL BOARD RULES, POLICIES AND PROCEDURES

The rules, policies, and procedures of the Superintendent and the School Board are binding on the parties. Specifically, the respondent is bound to understand the limitations on the staff of the District with whom the respondent or its consultants, subcontractors and agents/employees may deal. Personnel of the District are unauthorized to change the scope of work or to authorize any modification to the contract unless there is a specific policy, procedure or rule of the Superintendent or School Board that expressly confer such authority. All procedures, rules and policies concerning change orders are binding upon the respondent and the respondent is presumed to have read and understood all applicable policies, procedures and rules of the Superintendent and School Board.

4.63. UNUSUAL COSTS

The respondent may petition the District at any time for an additional rate adjustment on the basis of extraordinary and unusual changes in the costs of operation that could not reasonably be foreseen by a prudent operator and which, by all reasonable expectations, will continue for at least one year. The respondent's request shall contain substantial proof and justification to support the need for the rate adjustment. The District may request from the respondent, and the respondent shall provide, such further information as may be reasonably necessary in making its determination. The District shall approve or deny the request, in whole or in part, within sixty (60) days of receipt of the request and all other additional information required by the District. Any price redetermination shall be solely based upon the documentation provided and the District reserves the right to rescind any price relief granted should the circumstances change and prices go down.

4.64. ASSIGNMENT

The respondent shall not sell, assign or transfer any of its rights, duties or obligations under the awarded contract, or under any purchase order issued pursuant to the contract, without the prior written consent of the District. In the event of any assignment, the respondent remains secondarily liable for the performance of the contract, unless the District expressly waives such secondary liability. The District may assign the contract with prior written notice to respondent of its intent to do so. For the purpose of the awarded contract, "assignment" means any voluntary, involuntary, direct or indirect assignment, sale, or other transfer by respondent or its owner(s), of any interest in this Agreement, more than ten percent (10%) of the ownership interest in respondent, or one of a series of transfers that in the aggregate constitute the transfer of more than ten percent (10%) of the ownership interest in respondent. The term includes, without limitation: (1) transfer of ownership of capital stock or any partnership interest; (2) merger, consolidation, or issuance of additional securities representing more than ten percent (10%) of the ownership interest in respondent; (3) sale of common stock of respondent pursuant to a private placement or registered public offering, which transfers more than ten percent

(10%) of the ownership interest in respondent; (4) transfer of any interest in respondent in a divorce proceeding or otherwise by operation of law; or (5) transfer of more than ten percent (10%) of the ownership interest in respondent in the event of the death of an owner, by will, declaration of or transfer in trust, or under the laws of intestate succession.

4.65. FUNDING OUT/TERMINATION/CANCELLATION

A. Florida School Laws prohibit school boards from creating obligations on anticipation of budgeted revenues from one fiscal year to another without year-to-year extension provisions in the agreements.

B. It is necessary that fiscal funding out provisions be included in all awarded contracts in which the terms are for periods longer than one (1) year.

C. Therefore, the following funding out provisions is an integral part of this proposal and must be agreed to by all respondents:
The School Board may, during the contract period, terminate or discontinue the services covered in this proposal at the end of the School Board's then current fiscal year upon ninety (90) days' prior written notice to the successful respondent.

Such written notice will state:

1. That the lack of appropriated funds is the reason for termination, and
2. "This written notification will thereafter release the District of all further obligations in anyway related to the services covered herein."
3. The Funding Out statement must be included as part of any agreement. No agreement will be considered that does not include this provision for "funding out".

4.66. AVAILABILITY OF FUNDS

The obligations of the District under this award are subject to the availability of funds lawfully appropriated for its purpose by the State of Florida and the School Board. All purchases are contingent upon available District funding.

4.67. RESPONDENT PERFORMANCE

The District's project personnel shall monitor the respondent's performance. A 'Report of Unsatisfactory Product or Service' form (attached) shall be utilized to document unsatisfactory performance during the term of this contract. The report may become an important part of the respondent's history. The report and process will assist Procurement & Distribution Services to determine whether there is a continuing pattern of problems which may need to be addressed through termination of contract and/or suspension of the respondent from submitting future proposals.

4.68. TERMINATION / CANCELLATION OF CONTRACT

The District reserves the right to cancel the contract without cause with a minimum thirty (30) days' written notice. Termination or cancellation of the contract will not relieve the respondent of any obligations for any deliverables entered into prior to the termination of the contract (i.e., reports, statements of accounts, etc., required and not received). Termination or cancellation of the contract will not relieve the respondent of any obligations or liabilities resulting from any acts committed by the respondent prior to the termination of the contract. The respondent may cancel the resulting contract with one hundred twenty (120) days' written notice to the Director of Procurement & Distribution Services. Failure to provide proper notice to the District may result in the respondent being barred from future business with the District.

4.69. TERMINATION FOR SCHOOL BOARD'S CONVENIENCE

The performance of work under the awarded contract may be terminated in accordance with this clause in whole, or from the time in part, whenever the School Board representative shall determine that such termination is in the best interest of the District. Any such termination shall be effected by the delivery to the respondent of a Notice of Termination specifying the extent to which performance of work under the contract is terminated, and the date upon which such termination becomes effective. Upon such termination for convenience, respondent shall be entitled to payment, in accordance with the payment provisions, for services rendered up to the termination date and the District shall have no other obligations to respondent. Respondent shall be obligated to continue performance of contract services, in accordance with the contract, until the termination date and shall have no further obligation to perform services after the termination date.

4.70. TERMINATION FOR DEFAULT

The District's Contract Administrator shall notify, in writing, the respondent of deficiencies or default in the performance of its duties under the awarded contract. Three separate documented instances of deficiency or failure to perform in accordance with the specifications contained herein shall constitute cause for termination for default, unless specifically specified to the contrary elsewhere within this solicitation. It shall be at the District's discretion whether to exercise the right to terminate. Respondent shall not be found in default for events arising due to acts of God.

4.71. AUTHORITY TO DEBAR OR SUSPEND

In accordance with Board Policy 6320, titled "Procurement and Contracting", the Director of Procurement and Distribution Services shall have the authority to debar a person/corporation, for cause, from consideration or award of further agreements. The debarment shall be for a period commensurate with the seriousness of the cause, generally not to exceed three (3) years. If suspension precedes a debarment, the suspension period shall not be considered in determining the debarment period. When the offense is willful or blatant, a longer term of debarment may be imposed, up to an indefinite period. The term "debar" or "debarment" means to remove a vendor from

consideration of award in a competitive solicitation for District work and may include termination of existing contracts for cause.

4.72. CLAIM NOTICE

The respondent shall immediately report in writing to the District's designated representative or agent any incident that might reasonably be expected to result in any claim under any of the coverage mentioned herein. The respondent agrees to cooperate with the District in promptly releasing reasonable information periodically as to the disposition of any claims, including a resume of claims experience relating to all respondent operations at the District project site.

4.73. WAIVER OF CLAIMS

Once this contract expires, terminated or final payment has been requested and made, the successful respondent shall have no more than thirty (30) calendar days to present or file any claims against the District concerning this contract. After that period, the District will consider the respondent to have waived any right to claims against the District concerning an awarded contract.

4.74. RECORDS & RIGHT TO AUDIT

The respondent shall maintain such financial records and other records as may be prescribed by the District or by applicable federal and state laws, rules, and regulations. The respondent shall retain these records for a period of five (5) years after final payment, or until they are audited by the District, whichever event occurs first. These records shall be made available during the term of the contract and the subsequent three-year period for examination, transcription, and audit by the District, its designees, or other entities authorized by law.

4.75. E-VERIFY

E-Verify. Under Section 448.095, Fla. Stat., Contractor shall use the U.S. Agency of Homeland Security's E-Verify system, https://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired during the term of this Agreement. Contractor shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. Contractor must provide evidence of compliance with 448.095, Fla. Stat.—Evidence may consist of, but is not limited to, providing notice of Contractor's E-Verify number. Failure to comply with this provision is a material breach of the Agreement, and BPS may choose to terminate the Agreement at its sole discretion. Contractor may be liable for all costs associated with BPS securing the same services, inclusive, but not limited to, higher costs for the same services and rebidding costs (if necessary).

4.76. USE OF COERCION FOR LABOR AND SERVICES

Section 787.06(13), Florida Statutes requires all nongovernmental entities executing, renewing, or extending a contract with a governmental entity to provide an affidavit signed by an officer or representative of the nongovernmental entity under penalty of

perjury that the nongovernmental entity does not use coercion for labor or services as defined in that statute. The School Board of Brevard County, Florida is a governmental entity for purposes of this statute.

4.77. FEDERAL TERMS AND CONDITIONS

For any solicitation or agreement that involves, receives, or utilizes Federal funding, the Federal Terms and Conditions shall be considered a part of the solicitation and resulting award, or agreement and the Contractor accepts and acknowledges that it is and will continue to be in compliance with said terms and conditions for the term of the agreement.

4.78. POLITICAL & IDEALOGICAL INTERESTS

Respondents are hereby notified that, pursuant to Section 1010.04(5), Florida Statutes, the School Board of Brevard County will not request or consider documentation of a respondent's social, political, or ideological interests in determining whether the vendor is a responsible vendor.

4.79. NON-ACADEMIC $1MM

Effective July 1, 2016, per SB350, it states "Each bid specification for nonacademic commodities and contractual services must include a statement indicating that the procurement agreements and state term contracts available under s. 287.056 have been reviewed" Buyer shall:

- Check the State website for procurement agreements and determine if they are well suited for our needs and provide an economic advantage:

http://www.dms.myflorida.com/business_operations/state_purchasing/state_contracts_and_agreements

4.80. EQUAL EMPLOYMENT OPPORTUNITY (WHERE APPLICABLE)

Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of "federally assisted construction contract" in 41 CFR Part 60-1.3 must include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 CFR Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

4.81. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT (WHERE APPLICABLE)

All contracts awarded by the non-Federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute

the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

4.82. CLEAN AIR AND WATER POLLUTION ACTS (WHERE APPLICABLE)

Contracts and sub grants of amounts in excess of $150,000 must contain a provision that requires the non-Federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

4.83. BYRD ANTI-LOBBYING AMENDMENT (WHERE APPLICABLE)

Respondents that bid for an award of $100,000 or more must file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the non-Federal award.

4.84. FUNDING AGREEMENT (RIGHTS TO INVENTIONS) (WHERE APPLICABLE)

Rights to Inventions made under a contract or agreement. If the Federal award meets the definition of “funding agreement” under 37 CFR § 401.2 (a) and the recipient or sub recipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that “funding agreement,” the recipient or sub recipient must comply with the requirements of 37 CFR Part 401, “Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements,” and any implementing regulations issued by the awarding agency.

4.85. ENERGY POLICY AND CONSERVATION ACT (WHERE APPLICABLE)

Mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (42 U.S.C. 6201).

4.86. RECOVERED MATERIALS (WHERE APPLICABLE)

A non-Federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

5. Special Terms and Conditions

5.1. Award Term

The School Board's goal is to promote partnership relationships within the policies and procedures of public procurement. Pursuant toward that end, the successful Bidder(s) shall be awarded a contract for an initial three (3) year term with up to one (1) optional two (2) year renewal period.

The award term recommendation will be that which is determined to be in the best interest of the School Board. Any renewal option shall be exercised only if all original contract terms, conditions, and prices remain the same. All renewals will be contingent upon mutual written agreement and, when applicable, approval of School Board.

5.2. Bid Closing Date

Submittals must be received by The School Board of Brevard County, Florida, Office of Procurement & Distribution Services through the District's eProcurement Portal (https://procurement.opengov.com/portal/brevardschools) no later than 2:00 pm**., local time, on Tuesday, January 21, 2025.** Bids received after this time will not be considered.

5.3. PRE-BID CONFERENCE

A pre-bid conference will be held by the Procurement & Distribution Services at the time and location detailed in the #Introduction section. All potential bidders are encouraged to attend and participate.

Individuals covered by the Americans with Disabilities Act of 1990 in need of accommodations to attend public Bid openings or meetings should contact the Procurement Department at 321-633-1000 x11645 at least five (5) days prior to the meeting date.

5.4. PUBLIC BID OPENING

A. The Bids will not be available for public records request until a notice of intended decision is issues or thirty (30) days after bid opening date, whichever is earlier. (Florida Statute 119.071 (1) (b)).

B. The Bidder List will be available #Project Portal at time of Bid opening.

C. Individuals covered by the Americans with Disabilities Act of 1990 in need of accommodations to access the public Bidder List should contact the Procurement Department at 321-633-1000 x11645 after the Bid opening date.

D. Individuals that would like to hear the names of Bidders read aloud during the official Bid opening may access the electronic meeting via Microsoft Teams .at the following web address: Microsoft Teams MeetingMeeting ID: 286 550 834 617Passcode: aT9Gc36e

5.5. QUESTIONS CONCERNING BID

The question and answer module of OpenGov is being utilized for this solicitation. Timely questions concerning this solicitation shall be submitted in accordance with the deadline for questions: Wednesday, December 18, 2024 at 3:00 pm EST.

Consideration for modification or alteration of this solicitation shall be requested during the specified question period, before the applicable deadline. No oral interpretation of the meaning of the plans, specifications, or other documents shall be considered binding. The District shall be bound by information and statements only when such statements are executed by written addendum.

Answers for timely questions will be addressed in the OpenGov question and answer module or as an addenda to this solicitation depending on volume, participants are encouraged to subscribe as a follower and monitor all notifications. Beyond questions and answers, any and all modifications, clarifications, interpretations and supplemental instructions will be in the form of a written addendum which, if issued, will be available for download. All addenda and questions/answers so issued shall become part of the Solicitation Documents and receipt shall be acknowledged prior to respondent submission.

Untimely questions are unable to be submitted in the question and answer module, thereafter respondents raising critical concerns must email dotson.heidi@brevardschools.org. Critical clarifications may be made via addenda, however, untimely questions may not be considered.

5.6. BIDDER'S RESPONSIBILITY

The Bidder, by submitting a Bid represents that:

A. The Bidder has read and understands the Solicitation in its entirety and that the solicitation is made in accordance therewith, and;

B. The Bidder possesses the capabilities, resources, and personnel necessary to provide efficient and successful service to the School Board, and;

C. Before submitting a Bid, each Bidder shall make all investigations and examinations necessary to ascertain site and/or local conditions and requirements affecting the full performance of the contract and to verify any representations made by the School Board, upon which the Bidder will rely. If the Bidder receives an award because of its Bid Submittal, failure to have made such investigations and examinations will in no way relieve the Bidder from its obligations to comply in every detail with all provisions and requirements of the contract, nor will a plea of ignorance of such conditions and requirements be accepted as a basis for any claim by the Bidder for additional compensation or relief.

D. The Bidder will be held responsible for any and all discrepancies, errors, etc., in discounts or rebates which are discovered during the contract term or up to and including five (5) fiscal years following the School Board's annual audit including five (5) years thereafter.

5.7. DISCOUNT ADJUSTMENTS

Unless a change is deemed to be in the best interest of the School Board, there will be no discount adjustments allowed during the contract period. The discounts submitted on the Price Sheet shall remain firm throughout the contract period. Bidders are encouraged to consider this requirement when offering discounts.

5.8. ITEM DISCONTINUANCE

During the term of this contract, as items are discontinued and a replacement offered, the awarded Bidder must notify the Procurement Department with the new equipment specifications. If OPS-Transportation Services/9640 approved the newer/current model, documentation will be placed in the solicitation folder noting the newer/current model as the revised product model for the remainder of the contract term.

5.9. MODEL NUMBER CHANGES

During the term of this contract as items are updated with a newer/current model, the awarded Bidder must notify the Procurement Department with the new equipment specifications. If OPS-Transportation Services/9640 approved the newer/current model, documentation will be placed in the solicitation folder noting the newer/current model as the revised product model for the remainder of the contract term.

5.10. DAMAGED ITEMS

In the event an item or items is received, and it is later determined there is concealed damage when the item or items is unpacked, the item or items must be replaced by the awarded Bidder at no cost to the School Board.

5.11. METHOD OF ORDERING

Items shall be ordered via individual purchase orders or by Visa purchasing card on an "as needed" basis for the term of the contract. Invoices must be submitted against each individual purchase order.

5.12. ORDERS

Schools, departments and centers of the School Board will issue purchase orders or place order by Visa purchasing card directly to the awarded Bidder(s) for the purchase of (CO-OP) Motor Vehicle Discount Bid. The awarded Bidder(s) will be expected to honor these orders according to the discount terms and conditions listed in this solicitation. Each purchase order will be emailed or mailed to the awarded Bidder(s). The order should be reviewed for correct prices, catalog numbers, extensions, etc.

5.13. EXEMPT FROM THIS BID

Purchases shall not include items available at lower prices on other School Board bid awards or on Florida State Contracts. Items shall be ordered via individual purchase orders or Visa purchasing card

on an "as needed" basis for the term of the contract. Invoices must be submitted against each individual purchase order or receipts must be submitted for each purchase on Visa purchasing card.

5.14. SUBSTITUTES

Unapproved substitutes will not be allowed. If items are not available, the school or department noted on the purchase order must be contacted prior to shipment to determine if a substitute is acceptable.

5.15. NO DAMAGES FOR DELAY

Bidder is not entitled to any additional compensation or increase in the contract sum for direct, indirect, impact, or any other damages arising because of any hindrance or delays caused by the owner or any other cause whatsoever. Bidder's only remedy for delay, not caused or exacerbated by the Bidder, shall be an extension of time to complete the Bidder's scope of work. Any extension of time shall be granted at the sole discretion of the School Board, and if granted, shall be in the form of additional days added to the contract.

5.16. DELIVERY TERMS

All items must be delivered by the delivery time specified in the Scope of Work or Pricing section.

DELIVERY CHARGES

Bid price must include all delivery charges.

HOURS OF DELIVERY

Deliveries shall be made between the hours of 8:00 a.m. and 3:00 p.m. except on Saturdays, Sundays, or holidays when all school buildings and Distribution Services are closed.

NOTIFICATION OF DELIVERY

The School Board Representative must be notified at least twenty-four (24) hours in advance of delivery.
OPS-Transportation Services/9640
Telephone (321) 633-1000.

MINIMUM ORDERS

Items shall be ordered as needed. There shall be no minimum amount to be delivered at one time.

F.O.B. TERMS

All deliveries shall be Free on Board (F.O.B.) Destination, Freight Prepaid and Allowed; as defined by the National Institute of Governmental Purchasing, Inc. (https://www.nigp.org/dictionary-of-terms):

Free on Board (F.O.B.) Destination

The point at which a title changes hands from the supplier to the buyer at the destination of the shipment when the buyer signs for the goods. The supplier owns the goods in transit, assumes responsibility for carrier selection, and files any claims for damages incurred during this period. F.O.B. destination does not address the responsibility for the cost of transportation (freight charges), which must be specified with the inclusion of additional language.

Free on Board (F.O.B.) Destination, Freight Prepaid and Allowed

The point at which a title passes is at destination, and the seller pays the freight.

F.O.B. DESTINATION POINT

The F.O.B. destination point for this contract and for all purchases made under it shall be as specified by the using school/department of the School Board. Delivery will not be complete until the using school/department has accepted each item. Delivery to a common carrier shall not constitute delivery to the ordering school/department. All disputes shall be between the seller/Bidder and the carrier.

5.17. DEFINITION OF RESPONSIVE AND RESPONSIBLE FOR THIS BID

A. Each bid submittal shall be evaluated for conformance as responsive and responsible using the following criteria:

B. Proper submittal of ALL documentation as required by this solicitation. (Responsive)

C. The greatest benefits to the School Board as it pertains to: (Responsible)

1. Total Costs and Discounts Offered.

2. Delivery.

3. Past Performance. In order to evaluate past performance, all Bidders are required to submit:

a. A list of references with the bid and;

b. A list of relevant projects completed within the last three (3) years that are the same or similar to the magnitude of this ITB.

D. All technical specifications associated with this solicitation.

E. Demonstrated ability, capacity and/or resources to acquire and maintain required staffing and inventory.

F. Bidders are reminded that award may not necessarily be made to the lowest bid. Rather, award will be made to the lowest responsive, responsible, Bidder whose

bid represents the best overall value to the School Board when considering all evaluation factors.

5.18. CONTRACT

A. The contents of this solicitation and all provisions of the Bidder's Acknowledgement Form shall be considered a contract and become legally binding. A separate contract document, other than the purchase order(s), will not be issued.

B. The Director of Procurement & Distribution Services, Superintendent, and Board Chair are the sole Contracting Officers for the School Board, and only they or their designee are authorized to make changes to any contract.

C. The School Board shall be responsible for only those orders placed by the schools/departments on an authorized signed purchase order or Visa purchasing card. The School Board shall not be responsible for any order, change substitution or any other discrepancy on the purchase order or card charges. If there is any question about the authenticity of a purchase order, card charge or change order, the Bidder should promptly contact the Procurement Department.

D. The School Board hereby notifies interested parties that the purchasing agreements and state term contracts, available under s. 287.056 of the Department of Management Services will be reviewed for the subject of the award recommendation of this solicitation.

5.19. PAYMENT TERMS

A. Payment Terms are identified in the ITB General Terms & Conditions.

B. **INVOICING -** The awarded Bidder will be required to submit invoices and reference purchase order numbers on all requests for payment. All statements must reference valid School Board purchase order numbers. Invoices shall be mailed directly to the "bill to" as listed on the purchase order. A separate invoice must be received for each purchase order number. Payment for partial shipments shall not be made unless specified in the terms of this solicitation or a School Board purchase order. Invoices, which do not reference valid School Board purchase order numbers or which are erroneous (incorrect contract prices, minimum order charges, etc.) shall be returned to the Bidder for resolution of the discrepancies. It is the sole responsibility of the Bidder to reconcile the purchase order and the Bidder's invoice and to notify the Procurement representative of any discrepancies prior to billing. The School Board will only pay the dollar amounts authorized on the purchase order.

C. The Bidder represents and agrees that information submitted in support of its requests for payment is the basis of payment and is true and accurate to the best knowledge of the responsible signatory. A violation of this provision shall subject the violator to the provisions of Section 68.082, Florida Statutes, pertaining to false claims against the State, and/or Section 837.06, Florida Statutes, pertaining to false official statements.

D. **PARTIAL PAYMENT -** Partial payments in the full amount of the value of items received and accepted may be requested by the submission of a properly executed invoice with support documents if required.

E. **PAYMENT DISCOUNTS -** A bid price submitted indicating a discount if an invoice is paid within a certain number of days from the date of the invoice cannot be considered as a basis for the solicitation evaluation. All bid prices must be net and not contingent on terms.

5.20. SAFETY

The Bidder shall take the necessary precautions and bear the sole responsibility for the safety of the methods employed in performing the work. The Bidder shall at all times comply with the regulations set forth by federal, state, and local laws, rules, and regulations concerning "OSHA" and all applicable state labor laws, regulations, and standards. Bidder shall take all necessary precautions to ensure all materials provided do not include Asbestos. The Bidder shall indemnify and hold harmless the School Board from and against all liabilities, suits, damages, costs, and expenses (including attorney's fees and court costs) which may be imposed on the School Board because of the Bidder, sub-contractor, or supplier's failure to comply with the regulations.

5.21. BIDDER'S PERSONNEL

During the performance of the contract, the Bidder agrees to the following:

A. The Bidder shall not discriminate against any employee or applicant for employment because of race, religion, color, sex, age, handicap or national origin, except when such condition is a bona fide occupational qualification reasonably necessary for the normal operations of the Bidder. The Bidder agrees to post in conspicuous places, visible to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

B. The Bidder, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, shall state that such Bidder is an Equal Opportunity Employer.

C. Notices, advertisements, and solicitations placed in accordance with federal law, rule, or regulation shall be deemed sufficient for the purpose of meeting the requirements of this section.

D. The Bidder shall include the provisions of the foregoing paragraphs A, B, and C, above, in every subcontract or purchase order so that the provisions will be binding upon each Bidder.

E. The Bidder and any sub-contractor shall pay all employees working on this contract not less than minimum wage specified in the Fair Labor Standards Act (29 CFR 510-794) as amended.

F. Any information concerning the School Board, its products, services, personnel, policies or any other aspect of its business learned by the Bidder or personnel furnished by the Bidder in the course of providing services pursuant to the Agreement, shall be held in confidence and shall not be disclosed by the Bidder or any employee or agents of the Bidder or personnel furnished by the Bidder, without the prior written consent of the School Board.

G. All employees assigned by the Bidder to the performance of work under this contract shall be physically able to do their assigned work. It shall be the Bidder’s responsibility to ensure that all employees meet the physical standards to perform the work assigned and are free from communicable diseases. This requirement also includes acceptable hygiene habits of Bidder’s employees.

H. The personnel employed by the Bidder shall be capable employees, age 18 years or above, qualified in this type of work.

I. It is the Bidder's responsibility to ensure that all employees are legally allowed to work in the United States in accordance with Immigration Policies.

J. The Bidder's employees shall be required to dress neatly, commensurate with the tasks being performed.

K. All School Board facilities are tobacco free. The School Board prohibits the use of tobacco in school buildings. Such prohibition also applies on school grounds, on school buses, and/or at any school-related event. Refer to Board Policies, 3215 - use of tobacco on school premises.

L. It is the Bidders responsibility to see that every employee on the Bidder's work force is provided and wears an Identification Badge or company shirt/uniform in order to maintain security at the school's facility. It shall be Bidder's responsibility to inform the School Board Representative(s) of all new employees promptly at time of employment. All visitors, including volunteers and Bidders, are to check in and out with the front office using the applicable software and must wear a badge indicating their visitor status. Refer to Board Policies, 9150 – School Visitors.

M. The Bidder shall require employees to be dressed in their appropriate work attire when reporting for duty.

N. The Bidder shall prohibit their employees from disturbing papers on desks, opening desk drawers or cabinets, or using telephone or office equipment provided for official use.

O. The Bidder shall require their employees to comply with the instructions pertaining to conduct and building regulations, issued by duly appointed officials, such as the building managers, guards, inspectors, etc.

P. The School Board's Representative(s) will determine how the Bidder will receive access to the facility.

Q. If keys are provided and lost, the Bidder will be responsible for any and all costs associated with replacement keys and re-keying of the facility.

R. When requested, the Bidder shall cooperate with any ongoing SCHOOL BOARD investigation involving economic loss or damage to SCHOOL BOARD buildings, or SCHOOL BOARD or personal property therein. The SCHOOL BOARD reserves the right to require any employee of the Bidder to submit to a polygraph test if the SCHOOL BOARD has a reasonable suspicion that the employee is or was involved in the incident or activity under investigation. The Bidder shall obtain a waiver from the employee authorizing the release to the SCHOOL BOARD of information acquired by the Bidder from the polygraph test. The SCHOOL BOARD, at its discretion, may require that the Bidder immediately remove the employee under investigation from working within SCHOOL BOARD buildings for the following reasons: 1) The employee's refusal to submit to a polygraph test in the above circumstances, or 2) an employee's refusal to sign the waiver referenced above or 3) an analysis of the polygraph test indicates that the employee is or was involved in the incident under investigation. If the test results show involvement on the part of the Bidder's employee, the Bidder will be obligated to cover the cost of the examination. If the test results indicate that the Bidder's employee was not involved in the incident, the SCHOOL BOARD will pay for the cost of the examination.

S. CONTROLLED SUBSTANCE OR ALCOHOL ABUSE ON SCHOOL BOARD PROPERTY: The Bidder(s) is hereby notified that the unlawful manufacture, distribution, dispensation, possession or use of a controlled substance or alcohol is prohibited on any School Board property, or at any school board activities. Violations may subject the Bidder and/or the Bidder's employee(s) to prosecution, fines, imprisonment and/or cancellation of this or any other contract(s) that this Bidder presently holds. The Bidder(s) are required by this School Board to take appropriate disciplinary action in such cases and/or require that the employee(s) satisfactory participation in a rehabilitation program.

T. Any Bidder's employee convicted of violating a criminal drug statute in the workplace must report the conviction to the employer within five (5) workdays. Bidders (Employers) are required to report such convictions to the School Board within ten (10) workdays of receiving this information.

U. The School Board is committed to the education and safety of its students and employees. To that end, any Bidder awarded a contract will be required to assure that the personnel assigned to the project, do not possess criminal records that would violate the School Board's standards for employment as set forth by the Florida Department of Education. Each Bidder must certify that the company and its employees are or will be in compliance with those standards for the project awarded.

V. The Bidder shall strictly prohibit interaction between their employees and the student(s).

W. Bidder's employees may not solicit, distribute or sell products while on School Board property.

X. Friends, visitors or family members of the Bidder's employees are not permitted in the work area.

Y. The Bidder shall adhere to all of the School Board's security standards.

5.22. BANKRUPTCY/INSOLVENCY

At the time of bid submittal, Bidder shall not be in the process of or engaged in any type of proceedings in insolvency or bankruptcy, either voluntary or involuntary, or receivership proceedings. If the Bidder is awarded a contract for six (6) months or longer, and files for bankruptcy, insolvency or receivership, the School Board may, at its option, terminate and cancel said contract, in which event all rights hereunder shall immediately cease and terminate.

5.23. NEW MATERIAL

Unless otherwise provided for in this specification, the Bidder represents and warrants that the goods, materials, supplies, or components offered to the School Board under this Bid solicitation are new, not used or reconditioned, and are not of such age or so deteriorated as to impair their usefulness or safety and that the goods, materials, supplies, or components offered are current production models of the respective manufacturer. If the Bidder believes that furnishing used or reconditioned goods, materials, supplies, or components will be in the School Board's interest, the Bidder shall so notify the School Board Buyer in writing no later than ten (10) working days prior to the date set for opening of Bids. The notice shall include the reasons for the request and any benefits that may

accrue to the School Board if the Buyer authorizes the bidding of used or reconditioned goods, materials, supplies, or components.

5.24. PREFERENCE TO FLORIDA BUSINESSES

Effective July 1, 2012, when a School Board is required to make purchases of personal property through competitive solicitation and the lowest responsible and responsive bid, proposal or reply is by a Bidder whose principal place of business is in a state or political subdivision which grants a preference by that state or political subdivision, then the School Board shall award an equal preference to the lowest responsible and responsive Bidder having a principal place of business within Florida. In a competitive solicitation in which the lowest bid is submitted by a Bidder whose principal place of business is located outside the state, and that state does not grant a preference in competitive solicitation to Bidders having a principal place of business in that state, the preference to the lowest responsible and responsive Bidder having a principal place of business in the State of Florida shall be 5 percent. F.S. 287.084(1)(a).

A Bidder whose principal place is outside this state must accompany any written bid, proposal or reply documents with a written opinion of an attorney at law licensed to practice law in that foreign state, as to the preferences, if any or none, granted by the law of that state to its own business entities whose principal places of business are in that foreign state in the letting of any or all public contracts. F.S. 287.084(2).

Please complete the form titled “Bidder’s Statement of Principal Place of Business” and include it with your submittal.

6. Federal Terms and Conditions

Contract Provisions for Non-Federal Entity Contracts Under Federal Awards (Appendix II to 2 CFR Part 200)

Any goods or services purchased under this solicitation may utilize, in whole or in part, Federal Grants funding. The following terms and conditions shall be considered a part of the solicitation and resulting award and the respondent accepts and acknowledges that it is and will continue to follow said terms and conditions for the term of the award. Should any conflict arise between the following terms and conditions with any other language included in this solicitation, the following shall take precedence.

6.1. VIOLATION OR BREACH OF CONTRACT TERMS

This section applies to contracts for more than the simplified acquisition threshold, currently set at $250,000. Contractors who violate or breach contract terms may be subject to administrative, contractual, or legal remedies, as well as sanctions and penalties as appropriate, in addition to remedies found in other sections of the contract.

6.2. TERMINATIONS FOR CAUSE AND CONVENIENCE

Terminations for cause and for convenience are addressed under the #General Terms and Conditions section of the project portal.

6.3. EQUAL EMPLOYMENT OPPORTUNITY

Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of “federally assisted construction contract” in 41 CFR Part 60-1.3 must include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, “Equal Employment Opportunity” (30 FR 12319, 12935, 3 CFR Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, “Amending Executive Order 11246 Relating to Equal Employment Opportunity,” and implementing regulations at 41 CFR part 60, “Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor. See C.F.R. Part 200, Appendix II, (C). The provisions may be found in the #Attachments tab of the project portal.

6.4. DAVIS-BACON ACT AND COPELAND "ANTI-KICKBACK ACT"

When required by Federal program legislation, this section applies to any contract in excess of $2,000 which is entered into for the actual construction, alteration and/or repair, including painting and decorating, of a public building or public work, or building or work financed in whole or in part from Federal funds. If applicable, the Contractor agrees to comply with the provisions of 29 CFR, Part 5.5(a) during the performance of this contract. The provisions may be found in the #Attachments tab of the project portal.

6.5. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT

This section applies to any contract in excess of $100,000 that involves the employment of mechanics and laborers and is financed in whole or in part from Federal funds. If applicable, the Contractor agrees to comply with the provisions of 29 CFR, Part 5.5(b) during the performance of this contract. The provisions may be found in the #Attachments tab of the project portal.

6.6. RIGHTS TO INVENTIONS

This section applies if the Federal award meets the definition of a "funding agreement" under 37 CFR, Part 401.2(a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or subrecipient must comply with the requirements of 37 CFR, Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

6.7. CLEAN AIR ACT AND FEDERAL WATER POLUTION CONTROL ACT

This section applies to any contract or subgrant in excess of $150,000 that is financed in whole or in part from Federal funds. Contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Contractor must report violations to the District, the Federal awarding agency, and the Regional Office of the Environmental Protection Agency (EPA).

6.8. DRUG FREE WORKPLACE

Drug Free Workplace certification is required by the regulations implementing Sections 5151-5160 of the Drug-Free Workplace Act of 1988 (Pub. L. 100-690, Title V, Subtitle D; 41 USC 701 et seq.), 7 CFR Part 3017, Subpart F, Section 3017-600, Purpose. The January 31, 1989, regulations were amended and published as Part II of the May 25, 1990 Federal Register (pages 21681-21691).

6.9. DEBARMENT AND SUSPENSION

Debarment and suspension are addressed under the #General Terms and Conditions section of the project portal.

6.10. BYRD ANTI-LOBBYING AMENDMENT

Contractors that apply or solicitation for an award exceeding $100,000 that is financed in whole or in part from Federal funds must file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the non-Federal award. The certification may be found in the #Attachments tab of the project portal.

6.11. PROCUREMENT OF RECOVERED MATERIALS

For contracts using Federal funding, Contractor and subcontractor agree to comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, and the regulatory provisions of 40 CFR, Part 247. In the performance of this contract and to the extent practicable, the Contractor and subcontractors are to procure items containing the highest percentage of recovered materials as designated by the Environmental Protection Agency (EPA) under 40 CFR, Part 247 whenever the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000.

6.12. ENERGY POLICY AND CONSERVATION ACT

Contractor and Subcontractor agree to comply with mandatory standards and policies relating to energy efficiency as contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (45 U.S.C. 6201).

6.13. RECORDS RETENTION

Provisions for records retention are addressed under the #General Terms and Conditions of the District and exceed the requirements under 2 CFR, Part 200.333.

6.14. HOLD HARMLESS AND INDEMNIFICATION

Hold harmless and indemnification are addressed under the #General Terms and Conditions section of the project portal.

7. Insurance

All contractors will carry and maintain policies as described below. All required insurance must be from insurance carriers that have a rating of "A" or better and a financial size category of "VII" or higher according to the A. M. Best Company. Such certificates must contain a provision for notification to the School Board thirty (30) days in advance of any material change in coverage or cancellation. This is applicable to the procurement and delivery of products, goods, or services furnished to the School Board. The Certificate Holder shall be names as below:

The School Board of Brevard County, Florida

2700 Judge Fran Jamieson Way

Viera, FL 32940

7.1. Commercial General Liability Insurance:

All Contractors coming onto property owned or operated by BPS. "The School Board of Brevard County, Florida" shall be named as an additional insured to the insurance policy. If the School Board is not named as an additional insured, then the School Board reserves the right to terminate this Agreement.

Negligence including Bodily Injury and Property Damage	
Per Occurrence	$1,000,000
General Aggregate	$2,000,000

7.2. Product Liability and/or Completed Operations Insurance:

All Contractors whose work for BPS includes products or services that have the potential to cause property damage or bodily injury are required to carry this insurance to the limit listed below. This includes but is not limited to Contractors such as manufacturers of goods and medicines, general contractors, other construction industry tradespeople, caterers, food distributors, and retailers.

Negligence Including Bodily Injury and Property Damage	$1,000,000
Products - Completed Operations Aggregate	$2,000,000

7.3. Automobile Liability:

Any Contractor transporting district employees, delivering or transporting district owned equipment or property, or providing services or equipment where a reasonable person would believe that BPS is responsible for the work of the Contractor from portal to portal is required to carry this insurance to the limit listed below.

Negligence Including Bodily Injury and Property Damage	
Per Claim	$500,000
Combined Single Limit (each accident)	$1,000,000

7.4. Workers' Compensation/Employer's Liability:

All Contractors that have four (4) or more employees or that subcontract any portion of their work to another individual or company are required to have workers' compensation insurance to the limits listed below.

W.C. Limit Requires	Statutory Limits
E.L. Each Accident	$100,000
E.L. Disease - Each Employee	$100,000
E.L. Disease - Policy Limit	$500,000

8. Definitions

As used in this Bid, the following terms shall have the meanings set forth below:

8.1. Bidder:

That person or entity, including employees, servants, partners, principals, agents and assignees of the person or entity that has submitted a bid for the purpose of obtaining business with the School Board to provide the product and/or services set forth herein.

8.2. Contract Administrator:

The School Board's Director of Procurement & Distribution Services or designee shall serve as Contract Administrator. The Contract Administrator shall be responsible for addressing any concerns within the scope of the contract. Any changes to the resulting contract shall be done in writing and authorized by the School Board Chair or authorized designee.

8.3. Contract:

The document resulting from this solicitation between the School Board and the Bidder, including this solicitation, along with any written addenda and other written documents, which are expressly incorporated by reference.

8.4. Bidder's Project Manager:

The Project Manager has responsibility for administering this contract for the awarded Bidder(s) and will be designated prior to the issue of the resulting Price Agreement or Purchase Order.

8.5. Day:

The word “day” means each calendar day or accumulation of calendar days.

8.6. Director:

The Director is the Director of Procurement & Distribution Services for the School Board.

8.7. Exceptions to Bid:

An exception is defined as the Bidder’s inability or unwillingness to meet a term, condition, specification, or requirement in the manner specified in the bid.

8.8. Person to Persons:

An individual, firm, partnership, corporation, association, executor, administrator, trustee, or other legal entity, whether singular or plural, masculine or feminine, as the context may require.

8.9. School Board:

The word School Board refers to the elected officials of the School Board of Brevard County, Florida, its duly authorized representatives, and any school, department, or unit within the School Board.

8.10. School Board's Project Manager(s):

The Project Manager(s) have responsibility for the day-to-day administration of the resulting contract for the School Board and will be designated prior to award of the resulting purchase order.

8.11. Using Agency:

The term “using agency” used herein refers to any school, department, committee, authority, or another unit in the School Board using supplies or procuring contractual services as provided for in the Procurement Department of the School Board.

9.2. OpenGov Technical Support

Technical support for an eProcurement system plays a vital role in ensuring smooth operations. You can call or email technical support using the information below.

- **Phone**: (650) 336-7167
- **Email**: support@support.opengov.com
- **Issue Log**: https://opengov.my.site.com/support/s/contactsupport/incident
- **Live Chat**: Click on the circle blue icon at the bottom right of the screen.

9.3. Electronic Submission and Delivery Instructions

Parties interested in responding are required to submit electronically through the District's eProcurement Portal **prior to** 2:00 pm EST on Tuesday, January 21, 2025. Please upload all required documents as instructed in the section named Vendor Questionnaire electronically before the time and day listed in this solicitation. Responses must be received in the system prior to the deadline.

9.4. Withdrawal of Submission

Any Bidder or Proposer may withdraw their response via the District's ePocurement Portal **prior to** 2:00 pm EST on Tuesday, January 21, 2025.

9.5. Changes to the Solicitation Documents

The District reserves the right to change any part of these Instructions and Specifications any time prior to the solicitation opening. Any changes shall be in the form of addenda and will become a part of the solicitation documents and of the contract. A Respondent's failure to address the requirements of the addenda may result in the response not being considered. If the District determines that a time extension is required for the solicitation, the addenda will give the new submission date.

Addenda shall be acknowledged via the District's ePocurement Portal for the project (CO-OP) Motor Vehicle Discount Bid (24-0217-B-HD). Respondents can view a list of addenda released by the District by clicking on "Addenda & Notices." While drafting a response, there is a section for "Addenda Confirmation" where Respondents must acknowledge each addenda released.

9.6. Deadline for Questions

The deadline to submit questions related to this solicitation is by 3:00 pmWednesday, December 18, 2024.

Questions regarding this solicitation should be submitted directly through the District's eProcurement Portal Q&A function. Do not contact any District employee or official regarding this solicitation except Heidi Dotson, Senior Procurement Agent. Any questions submitted after the date and time specified may not be considered.

9.7. Follow these steps to submit your response electronically:

If you are already registered and need help logging in or retrieving your user information utilize the blue chat bubble visible on the lower right hand corner of the screen.

Click on the hyperlink for the District's ePocurement Portal to create your vendor profile.

Electronic Submission of Response

All Respondents are required to submit electronically via the District's eProcurement Portal. The electronic system will close submission exactly at the date and time set forth in this solicitation or as changed by addenda.

Respondents are responsible for submitting and having their response accepted before the closing time set forth in this solicitation or as changed by addenda. NOTE: It is the Proposer's sole responsibility to ensure their bid and document(s) are uploaded, transmitted, and arrive in time electronically. The District will have no responsibility for responses that do not arrive in a timely manner, no matter what the reason.

Upon closing of the Solicitation, Solicitation Results will be available on the eProcurement Portal.

In the case of a discrepancy between the electronic pricing schedule and any uploaded pricing schedule document, the electronic pricing will prevail.

Steps to Submit Your Electronic Proposal:

To submit an offer to the District, vendor must begin by clicking on the green DRAFT RESPONSE button.

https://procurement.opengov.com/portal/brevardschools/projects/131969

1. Acknowledge all Addenda

2. Answer all required vendor questions.

3. Upload all required document. Respondent may save their work and return.

4. Review your work and submit response when ready.

5. You will receive a confirmation email from OpenGov upon receipt of your submission.

6. Proposer may withdraw their submission at any time **prior to** 2:00 pm EST on Tuesday, January 21, 2025.

Note: If an addenda is issued after a response has been submitted, vendor must return to take steps below. Failure to do both steps may result in the response being deemed non-responsive.

1. Acknowledge the new addenda; and

2. Resubmit your response through the eProcurement Portal.

Do Not upload a Zip File: Unzip Your Files

Note: If your files are [zipped or] in a zip folder, you may need to unzip the files before uploading. The following instructions may be helpful to do so.

A. Open File Explorer, and find the zipped folder.

B. To unzip the entire folder, right-click to select Extract All, and then follow the instructions.

C. To unzip a single file or folder, double-click the zipped folder to open it. Then, drag or copy the item from the zipped folder to a new location.

9.8. Vendor Registration Instructions & Customer Service information

Click here to register onto the District's eProcurement Portal hosted by OpenGov.

If you are already registered and need help logging in or retrieving your user information simply click on the blue chat bubble on the lower right hand corner of your screen or contact OpenGov at procurement-support@opengov.com for help at any time.

Customer Service

For assistance with e-bidding or uploading documents: Contact OpenGov via the blue chat bubble on the lower right hand corner of your screen or email at procurement-support@opengov.com.

Monday through Friday 5am - 5pm PST, except statutory holidays-- response time is typically less than ten minutes.

10. Bid Submission

For upload items, electronic files must be in a common format accessible by software programs the District uses. Those common formats are generally described as Microsoft Word (.doc or .docx), Microsoft Excel (.xls or .xlsx), Microsoft Power Point (.ppt or pptx), or Adobe Portable Document Format (.pdf.). Respondents will not secure, password protect or lock uploaded files; the District must be able to open and view the contents of the file. Respondents will not disable or restrict the ability of the District to print the contents of an uploaded file. Scanned documents or images must be of sufficient quality, no less than 150 dpi, to allow for reading or interpreting the words, drawings, images or sketches.

AGREEMENT
BETWEEN THE TOWN OF PEMBROKE PARK
AND
COCOA FORD INC.

THIS AGREEMENT is entered into on_____, 2026 between the Town of Pembroke Park, a municipal corporation with principal offices located at 3150 SW 52nd Avenue, Pembroke Park, FL ("Town") and Cocoa Ford, Inc., a corporation authorized to do business in the State of Florida, with principal office located at 1360 King Street, Cocoa, FL 32922 ("Contractor"). The parties hereby agree to the following terms and conditions.

1. In return for valuable consideration, Contractor shall comply with the terms and conditions of the Brevard County Public Entity Purchasing Cooperative ("BCPC") Cooperative Purchasing Program: Invitation to Bid # 24-0217-B-HD ("Purchasing Contract") attached hereto as Exhibit A and the Contractor's proposal submitted to the Town (the "Proposal") attached hereto as Exhibit B. All terms and conditions of the contract documents set forth in Exhibit A, Exhibit B are incorporated herein as if set forth in full, except as modified by this Agreement. In the event of a conflict between this Agreement, Exhibit A and Exhibit B, this Agreement shall prevail, followed by Exhibit B.

2. Upon execution of this Agreement, all references made to BCPC, as the lead agency in the Purchasing Contract, shall be interpreted as pertaining to the Town of Pembroke Park, and all terms and conditions of Exhibit A shall be deemed as having been implemented for use within the Town. It is understood that wherever the words "agency name" or "agency board name" appear, they shall be read as "Town of Pembroke Park" and "Town of Pembroke Park Town Commission."

3. Term. The term of this Agreement shall be concurrent with the term set forth in Exhibit A.

4. Contract Sum and Payments:

   The price for the Product is as set forth in Exhibit B. All payments shall be governed by the Local Government Prompt Payment Act, F.S., Part VII, Chapter 218.

5. **Insurance: In addition to the insurance requirements stated in the Purchasing Agreement, Contractor shall obtain at Contractor's expense all necessary insurance in such form and amount as specified in the original bid document or as required by the Town's Risk Manager before beginning work under this Agreement including, but not limited to, Workers' Compensation, Commercial General Liability, and all other insurance as required by the Town. Contractor shall maintain such insurance in full force and effect during the life of this Agreement. Contractor shall provide to the Town's Risk and Safety Manager certificates of all insurances required under this section prior to beginning any work under this Agreement. The Contractor will ensure that all subcontractors comply with the above guidelines and will retain all necessary insurance in force throughout the term of this agreement. The following minimal insurance coverage shall be provided:**

a. Worker's Compensation Insurance: The Contractor shall procure and maintain for the life of this Agreement, Workers' Compensation. Insurance covering all employees with limits meeting all applicable state and federal laws. This coverage shall include Employer's Liability with limits meeting all applicable state and federal laws. This coverage must extend to any sub-Contractor that does not have their own Workers' Compensation and Employer's Liability Insurance. The policy must contain a waiver of subrogation in favor of the Town of Pembroke Park, executed by the insurance company. Sixty-(60) days notice of cancellation is required and must be provided to the Town of Pembroke Park via Certified Mail.

b. Comprehensive General Liability: The Contractor shall procure and maintain, for the life of this Agreement, Comprehensive General Liability Insurance. This coverage shall be on an "Occurrence" basis. Coverage shall include Premises and Operations; Independent Contractors' Products and Completed Operations and Contractual Liability. This policy shall provide coverage for death, personal injury or property damage that could arise directly or indirectly from the performance of this Agreement.

c. Business Automobile Liability: The Contractor shall procure and maintain, for the life of the Agreement, Business Automobile Liability Insurance.

d. The Minimum Limits of Coverage shall be $1,000,000 per occurrence, Combined Single Limit for Bodily Injury Liability and Property Damage Liability.

e. The Town must be named as an additional insured for General Liability coverage unless Owners and Contractors' Protective Coverage is also provided, or required. Sixty (60) days written notice must be provided to the Town via Certified Mail in the event of cancellation.

f. The minimum limits of coverage shall be $1,000,000 per Occurrence, Combined Single Limit for Bodily Injury Liability and Property Damage Liability. This coverage shall be an "Any Auto" type policy. The Town must be listed as an Additional Insured under the Policy. Sixty (60) days written notice must be provided to the Town via Certified Mail in the event of cancellation.

g. In the event that sub-contractors used by the Contractor do not have insurance, or do not meet the insurance limits, Contractor shall indemnify and hold harmless the Town for any claim in excess of the sub-Contractors' insurance coverage, arising out of negligent acts, errors or omissions of the sub-contractors.

h. Contractor shall not commence work under this Agreement until all insurance required as stated herein has been obtained and such insurance has been approved by the Town.

i. Contractor shall indemnify and hold the Town harmless for any damages resulting from failure of the Contractor to take out and maintain such insurance.

Contractor's Liability Insurance policies shall be endorsed to add the Town as an additional insured. Contractor shall be responsible for payment of all deductibles and self-insurance retentions on Contractor's Liability Insurance policies.

6. Indemnification:

   a. The Contractor shall indemnify and hold harmless the Town, its elected and appointed officials, employees, and agents from any and all claims, suits, actions, damages, liability, and expenses (including attorneys' fees) in connection with loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the Town or its elected or appointed officials and employees. The above provisions shall survive the termination of this Agreement and shall pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination hereof.

   b. Upon completion of all services, obligations and duties provided for in this Agreement, or in the event of termination of this Agreement for any reason, the terms and conditions of this Article shall survive indefinitely.

   c. The Contractor shall pay all claims, losses, liens, settlements or judgments of any nature whatsoever in connection with the foregoing indemnifications including, but not limited to, reasonable attorney's fees (including appellate attorney's fees) and costs.

   d. The Town and Contractor recognize that various provisions of this Agreement, including but not limited to this Section, provide for indemnification by the Contractor and requires a specific consideration be given there for. The Parties therefore agree that the sum of Ten Dollars and 00/100 ($10.00), receipt of which is hereby acknowledged, is the specific consideration for such indemnities, and the providing of such indemnities is deemed to be part of the specifications with respect to the services to be provided by Contractor. Furthermore, the Town and Contractor understand and agree that the covenants and representations relating to this indemnification provision shall serve the term of this Agreement and continue in full force and effect as to the Town's and the Contractor's responsibility to indemnify.

   e. Town reserves the right to select its own legal counsel to conduct any defense in any such proceeding and all costs and fees associated therewith shall be the responsibility of Contractor under the indemnification agreement.

   f. Nothing contained herein is intended nor shall it be construed to waive Town's rights and immunities under the common law or Florida Statute 768.28 as amended from time to time.

7. Assignment and Subcontracting:

   Contractor shall not transfer or assign the performance required by this Agreement without the prior consent of the Town. This Agreement, or any portion thereof, shall not be subcontracted without the prior written consent of the Town.

8. Termination:

   a. Termination for Convenience: This Agreement may be terminated by the Town for convenience, upon seven (7) days of written notice by the Town to the Contractor for such termination in which event the Contractor shall be paid its compensation for services performed to termination date, including services reasonably related to termination. In the event that the Contractor abandons this Agreement or causes it to be terminated, Contractor shall indemnify the Town against loss pertaining to this termination.

   b. Default by Contractor: In addition to all other remedies available to the Town, this Agreement shall be subject to cancellation by the Town for cause, should the Contractor neglect or fail to perform or observe any of the terms, provisions, conditions, or requirements herein contained, if such neglect or failure shall continue for a period of thirty (30) days after receipt by Contractor of written notice of such neglect or failure.

9. Public Records

   A. Public Records: CONTRACTOR shall comply with The Florida Public Records Act as follows:

   1. Keep and maintain public records in the CONTRACTOR's possession or control in connection with the CONTRACTOR's performance under this Agreement that ordinarily and necessarily would be required by the Town in order to perform the service.

   2. Upon request by Town's records custodian, provide Town with a copy of requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law.

   3. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of this Agreement.

   4. Upon completion of this Agreement or in the event of termination of this Agreement by either party, any and all public records relating to this Agreement in the possession of CONTRACTOR shall be delivered by CONTRACTOR to Town, at no cost to Town, within seven days. All records stored electronically by CONTRACTOR shall be delivered to TOWN in a format that is compatible with Town's information technology systems. Once the public records have been

delivered to Town upon completion or termination of this Agreement, CONTRACTOR shall destroy any and all duplicate public records that are exempt or confidential and exempt from public record disclosure requirements.

5. CONTRACTOR'S failure or refusal to comply with the provisions of this Section shall result in the immediate termination of this Agreement by the Town.

IF CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT 954-966-4600, TOWNCLERK@TPPFL.GOV OR BY MAIL: TOWN OF PEMBROKE PARK, 3150 SW 52nd AVENUE, PEMBROKE PARK, FL 33023.

10. Agreement Subject to Funding

This agreement shall remain in full force and effect only as long as the expenditures provided for in the Agreement have been appropriated by the Town Commission of the Town of Pembroke Park in the annual budget for each fiscal year of this Agreement, and is subject to termination based on lack of funding.

14. Governing law and venue:

This Agreement shall be governed by the laws of the State of Florida as now and hereafter in force. The venue for actions arising out of this agreement is fixed in Broward County, Florida.

15. Signatory Authority:

The Contractor shall provide the Town with copies of requisite documentation evidencing that the signatory for Contractor has the authority to enter into this Agreement.

16. Severability; Waiver of Provisions

Any provision in this Agreement that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions hereof or affecting the validity or enforceability of such provisions in any other jurisdiction. The non-enforcement of any provision by either party shall not constitute a waiver of that provision nor shall it affect the enforceability of that provision or of the remainder of this Agreement.

17. No Construction Against Drafting Party:

Each party to this Agreement expressly recognizes that this Agreement results from the negotiation process in which each party was represented by counsel and contributed to the drafting of this Agreement. Given this fact, no legal or other presumptions against the party drafting this Agreement concerning its construction, interpretation or otherwise

accrue to the benefit of any party to the Agreement, and each party expressly waives the right to assert such a presumption in any proceedings or disputes connected with, arising out of, or involving this Agreement.

18. Notice:

Any notice, demand, communication, or request required or permitted hereunder shall be in writing and delivered in person; sent by U.S. Certified Mail, U.S. Express Mail, air or ground courier services or by messenger service, addressed to the party for whom it is intended at the following addresses.

CONTRACTOR

Cocoa Ford Inc.
1360 King Street
Cocoa, FL 32922
Telephone No. (321) 471-3809

Scrutinized Companies:

a. CONTRACTOR certifies that it and its subcontractors are not on the Scrutinized Companies that Boycott Israel List. Pursuant to Section 287.135, F.S., the Town may immediately terminate this Agreement at its sole option if the CONTRACTOR or its subcontractors are found to have submitted a false certification; or if the CONTRACTOR, or its subcontractors are placed on the Scrutinized Companies that Boycott Israel List or is engaged in the boycott of Israel during the term of the Agreement.

b. If this Agreement is for more than one million dollars, the CONTRACTOR certifies that it and its subcontractors are also not on the Scrutinized Companies

with Activities in Sudan, Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or engaged with business operations in Cuba or Syria as identified in Section 287.135, F.S. Pursuant to Section 287.135, F.S., the Town may immediately terminate this Agreement at its sole option if the CONTRACTOR , its affiliates, or its subcontractors are found to have submitted a false certification; or if the CONTRACTOR, its affiliates, or its subcontractors are placed on the Scrutinized Companies with Activities in Sudan List, or Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or engaged with business operations in Cuba or Syria during the term of the Agreement.

c. The CONTRACTOR agrees to observe the above requirements for applicable subcontracts entered into for the performance of work under this Agreement.

d. As provided in Subsection 287.135(8), F.S., if federal law ceases to authorize the above-stated contracting prohibitions then they shall become inoperative.

19. E-Verify. CONTRACTOR certifies that it is aware of and complies with the requirements of Section 448.095, Florida Statues, as may be amended from time to time and briefly described herein below.

20.1 Definitions for this Section:

20.1.1 "Contractor" means a person or entity that has entered or is attempting to enter into a contract with a public employer to provide labor, supplies, or services to such employer in exchange for salary, wages, or other remuneration. "Contractor" includes, but is not limited to, CONTRACTOR or consultant.

20.1.2 "Subcontractor" means a person or entity that provides labor, supplies, or services to or for a contractor or another subcontractor in exchange for salary, wages, or other remuneration.

20.1.3"E-Verify system" means an Internet-based system operated by the United States Department of Homeland Security that allows participating employers to electronically verify the employment eligibility of newly hired employees.

20.2 Registration Requirement; Termination:

Pursuant to Section 448.095, Florida Statutes, effective January 1, 2021, Contractors, shall register with and use the E-verify system in order to verify the work authorization status of all newly hired employees. Contractor shall register for and utilize the U.S. Department of Homeland Security's E-Verify System to verify the employment eligibility of:

20.2.1 All persons employed by a Contractor to perform employment duties within Florida during the term of the contract;

20.2.2 All persons (including subconsultants/subcontractors) assigned by Contractor to perform work pursuant to the contract with the Town of Pembroke

Park. The Contractor acknowledges and agrees that registration and use of the U.S. Department of Homeland Security's E-Verify System during the term of the contract is a condition of the contract with the Town of Pembroke Park; and

20.2.3 The Contractor shall comply with the provisions of Section 448.095, Fla. Stat., "Employment Eligibility," as amended from time to time. This includes, but is not limited to registration and utilization of the E-Verify System to verify the work authorization status of all newly hired employees. Contractor shall also require all subcontractors to provide an affidavit attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. The Contractor shall maintain a copy of such affidavit for the duration of the contract. Failure to comply will lead to termination of this Contract, or if a subcontractor knowingly violates the statute, the subcontract must be terminated immediately. Any challenge to termination under this provision must be filed in the Circuit Court no later than twenty (20) calendar days after the date of termination. Termination of this Contract under this Section is not a breach of contract and may not be considered as such. If this contract is terminated for a violation of the statute by the Contractor, the Contractor may not be awarded a public contract for a period of one (1) year after the date of termination.

Municipal Friend-1

RESOLUTION NO. 2026-024

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, APPROVING THE TOWN'S PARTICIPATION AS A PREMIER SPONSOR FOR THE BROWARD LEAGUE OF CITIES ANNUAL GALA; AUTHORIZING THE TOWN MANAGER OR DESIGNEE TO EXECUTE ALL NECESSARY DOCUMENTS; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the Broward League of Cities will host its Annual Gala, an event that brings together municipal leaders, regional partners, and community stakeholders from across Broward County; and

WHEREAS, the Town of Pembroke Park recognizes the value of participating in regional events that promote intergovernmental collaboration, visibility, and community engagement; and

WHEREAS, the Town has been offered the opportunity to participate as a Premier Sponsor of the Broward League of Cities Annual Gala, which provides the highest level of recognition and promotional benefits; and

WHEREAS, the Premier Sponsorship cost is $5,000; and

WHEREAS, the Town Commission finds that participation as a Premier Sponsor serves a valid public purpose and is in the best interest of the Town and its residents.

NOW, THEREFORE, BE IT RESOLVED BY THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA:

Section 1: That the foregoing "WHEREAS" clauses are ratified and confirmed as being true and correct and are made a specific part of this Resolution. All exhibits attached hereto are incorporated herein and expressly made a part of this Resolution.

Section 2: The Town Manager, or designee, is authorized to execute all necessary documents, purchase orders, and related agreements required to complete the acquisition.

Section 3: The Town Commission hereby approves the Town of Pembroke Park's participation as a Premier Sponsor for the Broward League of Cities Annual Gala at a cost of $5,000.

Section 4: All Resolutions or parts of Resolutions in conflict herewith, be and the same are repealed to the extent of such conflict.

Section 5: If any section, sentence, clause or phrase of this Resolution is held to be invalid or unconstitutional by any court of competent jurisdiction, then said holding shall in no way affect the validity of the remaining portions of this Resolution.

Section 6: This Resolution shall become effective immediately upon its passage and adoption.

PASSED AND ADOPTED this 11th day of March, 2026.

Subject:	Consideration of Alcohol License Ordinance Amendment - Sponsored by Town Planner Von der Meulen ORDINANCE NO: 2026-008 AN ORDINANCE OF THE TOWN OF PEMBROKE PARK, FLORIDA, AMENDING CHAPTER 3, ENTITLED "ALCOHOLIC BEVERAGES;" AMENDING ARTICLE I ENTITLED "IN GENERAL;" AMENDING SECTION 3-1 DEFINITIONS; AMENDING SECTION 3-2.5 EXTENDED HOURS LICENSE; AMENDING SECTION 3-4 PROXIMITY TO LICENSED BUSINESS; REPEALING AND REPLACING SECTION 3-5 PROXIMITY TO LICENSED BUSINESSES TO CHURCHES, SCHOOLS; AMENDING SECTION 3-6 NOISE RESTRICTION IN ESTABLISHMENTS; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.
Meeting Date:	Special Commission Meeting - March 13, 2026
Prepared For:	Town Commission
Staff Contact:	Ashira Mohammed, Mayor
Dept/Group:	Administrative
Recommendation for Counsel to consider:	
Background Information:	The proposed ordinance amends Chapter 3 of the Town's Code of Ordinances relating to alcoholic beverages. Key revisions include updated definitions to align with state law, modifications to extended hours licensing procedures, adjustments to proximity requirements for licensed establishments, and clarification of noise restrictions. The amendments aim to ensure consistency with Florida Statutes, provide flexibility for businesses, and maintain standards that protect public health, safety, and welfare. A detailed memorandum is attached for reference.

24-Z-04 Staff Report

Statute 561.20
2026-008 - Alcohol Licensing - Regular Commission Meeting - 03.11.2026

ORDINANCE NO. 2026-008——

AN ORDINANCE OF THE TOWN OF PEMBROKE PARK, FLORIDA, AMENDING CHAPTER 3, ENTITLED "ALCOHOLIC BEVERAGES;" AMENDING ARTICLE I ENTITLED "IN GENERAL;" AMENDING SECTION 3-1 DEFINITIONS; AMENDING SECTION 3-2.5 EXTENDED HOURS LICENSE; AMENDING SECTION 3-4 PROXIMITY TO LICENSED BUSINESS; REPEALING AND REPLACING SECTION 3-5 PROXIMITY TO LICENSED BUSINESSES TO CHURCHES, SCHOOLS; AMENDING SECTION 3-6 NOISE RESTRICTION IN ESTABLISHMENTS; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, Article VIII, Section 2(b), Florida Constitution, Chapter 166 Florida Statutes (Municipal Home Rules Powers Act); grants municipalities the power to conduct municipal government, perform municipal functions, and render municipal services; and

WHEREAS, Title XXXIV, Florida Statutes (Alcoholic Beverages and Tobacco); establishes licensing of operations engaging in the sale of alcoholic beverages in the State,

WHEREAS, the Town has adopted Chapter 3 (Alcoholic Beverages) regulating the sale and on-premises consumption of alcoholic beverages within the Town,

WHEREAS, the Town Commission seeks to amend certain provisions of the Town's alcoholic beverages chapter to conform with state regulations, adopt state definitions, align Chapter provisions with the intention of the MXE district, and further define separation requirements; and

WHEREAS, the amendments included herein clarify the Town's current code and otherwise provide additional flexibility for applicable businesses, and ;

WHEREAS, the general purpose and intent of this ordinance is to provide proper regulations in the best interest of the health, safety, welfare, and aesthetics of the community and the proper administration of its government; and

WHEREAS, the Town Commission has conducted a public hearing in accordance with the requirements of Florida law; and

NOW, THEREFORE, BE IT ORDAINED BY THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, THAT:

Section 1: That each of the above stated recitals is hereby adopted and confirmed. All exhibits attached hereto are incorporated herein and made a part hereof.

Section 2: Chapter 3 entitled "ALCOHOLIC BEVERAGES" of the Code of Ordinances of the Town of Pembroke Park, Florida is hereby amended to read as follows:

Sec. 3-1. Definitions.

The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

Alcoholic beverages means distilled spirits and all beverages containing ~~more than~~ one-half of one (1) percent or more of alcohol by ~~weight~~ volume. The percentage of alcohol by volume shall be determined by measuring the volume of the standard ethyl alcohol in the beverage and comparing it with the volume of the remainder of the ingredients as though said remainder ingredients were distilled water.

Beer ~~means~~ shall have the same meaning as "beer" and "malt beverage" as provided in Section 563.01, F.S., as amended. ~~all malt beverages containing more than one (1) percent of alcohol by weight and not over fourteen (14) percent by weight.~~ ~~alcohol by volume~~.

Condo Bar means any condominium accommodation of which no fewer than 100 condominium units are wholly rentable to transients and which is licensed Chapter 509, Florida Statutes.

Consumption off the premises means selling of beers, wines, or alcoholic beverages of every kind

in the original unbroken containers to be taken by the purchaser off the premises where sold before being consumed.

Consumption on the premises means consumption of beer, wine or alcoholic beverages of any kind upon the premises where purchased, or the right to sell by the drink or bottle such beverages for consumption where purchased.

Convenience store means any place of business that is primarily engaged in the retail sale of groceries, or both groceries and gasoline, that is open for business at any time between the hours of 11 p.m. and 5 a.m., and that is licensed by the Division of Alcoholic Beverages and Tobacco.

Grocery store means any place of business that is primarily engaged in the retail sale of groceries such as vegetables, dairy, bakery, and other non-alcoholic retail products and is in excess of 5,000 square feet of floor space.

Hotel Bar means any hotel, motel, or motor court of not fewer than 100 guest rooms, or historic hotel or motel with fewer than 100 guest rooms, which derives at least 60 percent of its gross revenue from the rental of hotel or motel rooms and the sale of food and non-alcoholic beverages, and which is licensed as a public lodging establishment by the Division of Hotels and Restaurants.

Intoxicating beverages means ~~all liquors, wines and beers~~ only those alcoholic beverages containing more than ~~three and two-tenths (3.2)~~ four and seventh thousandths (4.007) of a percent of alcohol by ~~weight~~ volume.

Liquor means ~~and includes any kind and all distilled or rectified spirits, brandy, whiskey, rum, gin, cordials or similar distilled alcoholic beverages, including all dilutions and mixtures of one (1) or more of the foregoing.~~ that substance known as ethyl alcohol, ethanol, or spirits of wine in any form, including all dilutions and mixtures thereof from whatever source or by whatever

process produced.

Package store means vendors licensed to sell all alcoholic beverages, but in sealed containers only, and for consumption off the premises. The sealed package must not be broken, and the contents must not be consumed in or on the premises~~, under a package store license~~.

Restaurant, means a bona fide food service establishment that has a minimum of 2,000 square feet of service area, is equipped to serve meals to 120 persons at one time, has at least 120 physical seats available for patrons to use during operating hours, holds itself out as a restaurant, and derives at least 51 percent of its gross food and beverage revenue from the sale of food and nonalcoholic beverages during the first 120-day operating period and the first 12-month operating period thereafter. The sale of beers, wines and liquor shall be prohibited except during the time the restaurant is actually engaged in and open to the public for the serving of full course meals.

Vendor means all persons selling or keeping with the intention to sell, or dealing in, the beverages defined in this section. This does not include grocery or drug stores in excess of 5,000 square feet of floor space.

Wine means ~~the product of the normal alcoholic fermentation of the juice of fresh, sound, ripe fruit, with the usual cellar treatment and necessary additions to correct defects due to climatic saccharine and seasonal conditions, including champagne, sparkling and fortified wine of an alcoholic content not to exceed twenty-four (24) percent by volume. No other product shall be called "wine" unless designated by appropriate prefixes descriptive of the fruit or other product from which the same was predominantly produced or as artificial or imitation wine.~~ all beverages made from fresh fruits, berries, or grapes, either by natural fermentation or by natural fermentation with brandy added, in the manner required by the laws and regulations of the

United States, and includes all sparkling wines, champagnes, combination of the aforesaid beverages, sake, vermouths, and like products. Sugar, flavors, and coloring materials may be added to wine to make it conform to the consumer's taste, except that the ultimate flavor or the color of the product may not be altered to imitate a beverage other than wine or to change the character of the wine.

****

Sec. 3-2.5. Extended hours license.

(a) Any vendor of alcoholic beverages operating as a restaurant ~~or restaurant bar~~ in the Town which is duly and regularly licensed by the State to prepare, sell and serve full course meals to the public and such vendor of alcoholic beverages is duly and regularly licensed by the State and the Town to sell and dispense alcoholic beverages, wine, or beer therein, may apply for an extended hours license for the sale of alcoholic beverages, wine, or beer between the hours of midnight and 6:00 a.m. The applicant for extended hours license shall complete an application form prepared by the Town and pay a nonrefundable application fee in the amount of one thousand five hundred dollars ($1,500.00) to defray the Town's cost of processing the application in addition to the license fee. No application shall be accepted by the Town unless the application form is fully completed and accompanied by the application fee.

The application shall be processed by the Town Staff and placed on the Planning and Zoning Board agenda for a public hearing and applicant shall be notified of the date and time of such public hearing. Following the public hearing, the Planning and Zoning Board shall make a recommendation to the Town Commission that they grant the license, deny the license, or grant the license subject to specific conditions. Upon such recommendation by the Planning and

Zoning Board, the application shall be placed on the Town Commission agenda for a public hearing, and the applicant shall be notified of the date and time of the Town Commission public hearing on such application. The Town Commission, after the public hearing may grant the license, deny the license or grant the license subject to specific conditions.

~~(b) For the purposes of this section, a restaurant bar means a bar operated in connection with a restaurant and by the same owner or management, and in a business zone area, which restaurant has all necessary equipment and supplies for and serves full course meals regularly and having accommodations at all times for the service of seventy-five (75) or more patrons and occupying more than two thousand (2,000) square feet of space inside a permanent building. The sale of beers, wines and liquor shall be prohibited except during the time the restaurant is actually engaged in and open to the public for the serving of full course meals.~~

~~For the purposes of this section, a restaurant is defined as any food establishment where the principal business is to prepare, sell, and regularly serve full course meals to the public; where the establishment has adequate and sanitary kitchen and dining room equipment; and where the sale of alcoholic beverages shall be strictly incidental to the serving of food. The sale of any alcoholic beverages shall be prohibited except during the time the restaurant is actually engaged in and open to the public for the serving of full course meals.~~

(c) The specific criteria for the Planning and Zoning Board's evaluation of an application and for the Town Commission's determination in making a decision on the application may include, without being limited to, the following:

(1) The amount of off-street parking in relation to the demands created by the extra hours of operation, especially with regard to the adverse impact on adjacent residential areas of any illegal or hazardous parking.

(2) The amount and degree of law enforcement activities generated by the operation of any restaurant ~~or restaurant bar~~, both outside and inside the particular location, with particular emphasis on vandalism, noise, vehicular use by patrons and illegal activity of any kind of employees, patrons or others associated with the establishments.

(3) The adverse effects, if any, that the extended hours of operation will have on neighboring properties, especially with respect to the effects of noise, parking and glare from headlights or exterior lighting on nearby residential properties.

****

Sec. 3-4. Proximity of licensed business.

No extended hour license ~~shall be issued~~ to sell any alcoholic or intoxicating beverages, except beer and wine, for consumption on or off the premises under provisions of this chapter shall be issued or renewed for ~~in~~ any place of business located within: ~~five hundred (500) feet by following the shortest route by pedestrian travel, measured from main entrance to main entrance of the place of business, in which there is already a retail vendor's license to sell such alcoholic or intoxicating beverages for consumption on or off the premises; nor shall such license be issued during the period in which the existing license is renewable at such location; provided, however, that the owner by vested right of a license to do business within the prohibited area may transfer the license to another location within the same prohibited area.~~

Proximity of Licensed Business	
Existing Use	**Minimum Separation***
Licensed Alcoholic Beverage Establishment	500 feet
Sexually Oriented Business	

Place of Worship	300 feet
School	
Child Care Facility	
*Separation is measured from the main entrance to main entrance of the establishments by the shortest route of ordinary pedestrian travel.	

Whenever a license has been lawfully procured and thereafter a church or school is established within a distance otherwise prohibited by law, the establishment of such church or school shall not be cause for the revocation of the license or prevent the subsequent renewal of same.

~~**Sec. 3-5. Proximity of licensed businesses to churches, schools.**~~

~~No license shall be issued under the provisions of this chapter to any person at any location within three hundred (300) feet from any established church or school, measured by following the shortest distance by pedestrian travel from main entrance to main entrance, except that in case of a school to the nearest point of the school grounds used as part of the school facilities. Whenever a license has been lawfully procured and thereafter a church or school is established within a distance otherwise prohibited by law, the establishment of such church or school shall not be cause for the revocation of the license or prevent the subsequent renewal of same.~~

Sec. 3-5 . Exceptions to Minimum Separation Requirement.

Vendors issued a licensed to sell alcoholic beverages by the Division of Alcoholic Beverages and Tobacco under applicable state law shall not be subject to the minimum separation requirements for after-hours licenses, as set forth in Sec. 3-4 as set forth below:

Exceptions to Minimum Separation Requirements		
Use & Criteria	**Licensed Alcoholic**	**Place of Worship,**

	Beverage Establishment and Sexually Oriented Business	**School, and Child Care Facility**
Vendors exempt by Section 561.20, F.S.	Exempt	Exempt
An establishment limited by its state beverage license for the distribution of alcoholic beverages to vendors and other distributors	Exempt	Exempt
Grocery or convenience store not exceeding 20% of the total display area for alcoholic products	Exempt	Exempt
A bowling alley that contains more than twelve (12) bowling lanes	Exempt	Exempt
A motion picture theater that contains more than 100 seats	Exempt	Exempt
A restaurant as defined by this Article	Exempt	Exempt
A condo bar or hotel bar	Exempt	Exempt
A lodge, benevolent club, or athletic club which limits on-premise consumption of alcoholic beverages to only lodge or club members	Exempt	Exempt
A use located on city owned property	Exempt	Exempt
Any licensed operation within the MXE district	Exempt	Exempt

Sec. 3-6. Noise restriction in establishments.

No person shall allow or permit, between the hours of 11:00 p.m. and 7:00 a.m. the following morning, instrumental music, singing or other forms of entertainment, in any room where beers, wines, liquors or alcoholic beverages are sold or offered for sale, indoors or outdoors, unless such room or rooms are soundproofed in order that the noise therefrom may not disrupt the peace and quiet of the neighborhood. It is intended by this section that in rooms soundproofed, music, singing and other forms of entertainment may be conducted during hours that alcoholic beverages may be sold, as set forth in this chapter, but at no other hours. Vendors within the MXE district are exempt from these noise restrictions, but remain subject to all other sections of

this code.

Section 3: It is the intention of the Town Commission of the Town of Pembroke Park that the provisions of this Ordinance shall become and be made a part of the Code of Ordinances of the Town of Pembroke Park, Florida, and that the Sections of this ordinance may be renumbered, re lettered and the word "Ordinance" may be changed to "Section," "Article" or such other word or phrase in order to accomplish such intention.

Section 4: All Ordinances or parts of Ordinances, Resolutions or parts of Resolutions in conflict herewith be and the same are hereby repealed to the extent of such conflict.

Section 5: If any clause, section, or other part or application of this Ordinance shall be held by any court of competent jurisdiction to be unconstitutional or invalid, such unconstitutional or invalid part or application shall be considered as eliminated and so not affecting the validity of the remaining portions or applications remaining in full force and effect.

Section 6: This Ordinance shall become effective immediately upon its passage and adoption.

PASSED AND ADOPTED BY THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, ON THE FIRST READING, THIS ___ DAY OF _____, 202_.

PASSED ADOPTED BY THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, ON THE SECOND AND FINAL READING, THIS ___ DAY OF _____, 202_.

TO: Town Workshop Meeting

FROM: Michael Vonder Meulen, AICP, Consultant Town Planner, KEITH

MEETING DATE: February 25, 2026

SUBJECT: 25-Z-04 / Alcoholic Beverage Amendment

APPLICANT: Town of Pembroke Park

REQUEST:

Amend various provisions of Chapter 3 titled "Alcoholic Beverages" of the Pembroke Park Code of Ordinances to comply with new State regulation, align Chapter provisions with the intention of the MXE district, and further define separation requirements between certain establishments.

RECOMMENDED ACTION:

The Consultant Town Planner recommends approval of this code amendment.

ITEM TO BE CONSIDERED BY THE TOWN COMMISSION:

- 25-Z-04 / Alcoholic Beverage Amendment

BACKGROUND

The Town Commission adopted Ordinance 1-62-1 on January 3rd, 1962, which established basic alcoholic beverage regulations for operations licensed by the State within the Town. On August 29th, 1962, the Town Commission adopted Ordinance 8-62-1 which contained a large portion of the currently existing provisions in Chapter 3. Subsequent amendments were made to the chapter, including:

- September 14th, 1977 – Ordinance 77-9-2 amended hours of operation and added sale prohibitions
- May 8th, 1996 – Ordinance 96-5-1 tied hours of operation to delivery and on-premises consumption
- April 8th, 1998 – Ordinance 98-4-1 created the extended hours license provision
- June 11th, 2014 – Ordinance 14-06-01 updated fees and administrative/procedure clarifications
- June 10th, 2020 – Ordinance 2020-003 updated fees

STUDY

Planning staff conducted a review of existing licensee locations and other municipal regulations on alcohol operations. The Town currently contains forty-three (43) alcohol operations with a State license, most located along Hallandale Beach Boulevard or within the M-1 zoning district.

Most of Chapter 3 has remained relatively the same when compared to the Ordinance adopted in 1962. The State Legislature, however, has slowly adopted newer definitions, regulations, and exemptions to their Alcohol Licensing laws. Multiple municipalities in the South Florida have already adopted new regulations that either exempt State-preempted uses, businesses that do not solely rely on alcohol sales to operate, or specific districts. Municipalities studied by staff include Pompano Beach, Palm Beach County, and Miami Beach. Furthermore, the recent establishment of the MXE district, which is focused on creating an entertainment-like atmosphere, relies on the attraction, retention, and success of businesses that may need an alcohol license to operate.

Planning staff have determined that it is in the best interest of the Town to update Chapter 3 to better align with State law and maintain compatibility and competitiveness with neighboring municipalities. Staff has also determined that the success of the MXE district, as envisioned by the Town, necessitates an exemption from distance requirements due to the district's small coverage.

TEXT AMENDMENTS AND JUSTIFICATIONS

The proposed text amendments, taking into consideration the issues addressed in the study section, are as follows:

Section	Amendment	Action
Sec. 3-1	Amended existing and added new definitions to align with those of the State	Addition & Modification
Sec. 3-2.5	Moved definitions to Sec. 3-1	Modification
Sec. 3-4	Updated the minimum separation as follows: • 500 feet between an alcohol licensed business and another alcohol licensed business or sexually oriented business • 300 feet between an alcohol licensed business and a place of worship, school, or child care facility • Non-revocation clause	Modification
Sec. 3-5	Removal of existing section, as its regulation was moved to Sec. 3-4. New section list state and town exempted uses from the distance separation of Sec 3-4, including: • Grocery or Convenience Stores • Alcohol distributors • Bowling Alley • Movie theater • Restaurant (49% or less of sales are alcoholic beverages) • Condo Bar (time-share) or Hotel Bar • Lodge, benevolent club, or athletic club • City uses • Licensed operation in MXE	Repeal and Replacement
Sec. 3-6	Exempts MXE vendors from noise reduction regulation	Addition

CONSISTENCY WITH COMPREHENSIVE PLAN

The proposed text amendments are consistent with the goals, objectives, and policies of the comprehensive plan. Specifically, the amendment aligns with the following:

GOAL I
Encourage the private and public sectors to adhere to the patterns of planned development in the Town which shall promote environmental protection, strive to meet the Town's social and economic needs and contribute to the health, welfare, and safety of its residents.

POLICY #1.1.2
The Town shall periodically review its current Land Development Regulations to:
(2) Eliminate duplication and inconsistencies within code by revising the code to current standards, address current needs identified in the Comprehensive Plan and provide a more efficient system of timely completing public facilities and regular maintenance, which, at a minimum:
(b) Regulates the use of land and water by adopting land development regulations consistent with this Comprehensive Plan and ensures the compatibility of adjacent land uses, protecting adjacent residential areas and mobile home parks, providing for open space and placing industrial uses along major arterial highways

POLICY #1.2.1.1
The Town shall periodically review, study, update as deemed necessary, enforce its land development regulations, including building permit and other site improvement reviews, to ensure land use compatibility between all residential and non-residential (commercial / industrial) land uses. This may include mandatory separations of certain land uses, limitations on the hours of operation, limitations on the intensity of operations, and other site specific limitations.

ATTACHMENTS
Exhibit A - Proposed Ordinance

561.20 Limitation upon number of licenses issued.—

(1) No license under s. 565.02(1)(a)-(f), inclusive, shall be issued so that the number of such licenses within the limits of the territory of any county exceeds one such license to each 7,500 residents within such county. Regardless of the number of quota licenses issued prior to October 1, 2000, on and after that date, a new license under s. 565.02(1)(a)-(f), inclusive, shall be issued for each population increase of 7,500 residents above the number of residents who resided in the county according to the April 1, 1999, Florida Estimate of Population as published by the Bureau of Economic and Business Research at the University of Florida, and thereafter, based on the last regular population estimate prepared pursuant to s. 186.901, for such county. Such population estimates shall be the basis for annual license issuance regardless of any local acts to the contrary. However, such limitation shall not prohibit the issuance of at least three licenses in any county that may approve the sale of intoxicating liquors in such county.

(2)(a) The limitation of the number of licenses as provided in this section does not prohibit the issuance of a special license to:

1. Any bona fide hotel, motel, or motor court of not fewer than 80 guest rooms in any county having a population of less than 50,000 residents, and of not fewer than 100 guest rooms in any county having a population of 50,000 residents or greater; or any bona fide hotel or motel located in a historic structure, as defined in s. 561.01(20), with fewer than 100 guest rooms which derives at least 51 percent of its gross revenue from the rental of hotel or motel rooms, which is licensed as a public lodging establishment by the Division of Hotels and Restaurants; provided, however, that a bona fide hotel or motel with no fewer than 10 and no more than 25 guest rooms which is a historic structure, as defined in s. 561.01(20), in a municipality that on the effective date of this act has a population, according to the University of Florida's Bureau of Economic and Business Research Estimates of Population for 1998, of no fewer than 25,000 and no more than 35,000 residents and that is within a constitutionally chartered county may be issued a special license. This special license shall allow the sale and consumption of alcoholic beverages only on the licensed premises of the hotel or motel. In addition, the hotel or motel must derive at least 60 percent of its gross revenue from the rental of hotel or motel rooms and the sale of food and nonalcoholic beverages; provided that this subparagraph shall supersede local laws requiring a greater number of hotel rooms;

2. Any condominium accommodation of which no fewer than 100 condominium units are wholly rentable to transients and which is licensed under chapter 509, except that the license shall be issued only to the person or corporation that operates the hotel or motel operation and not to the association of condominium owners;

3. Any condominium accommodation of which no fewer than 50 condominium units are wholly rentable to transients, which is licensed under chapter 509, and which is located in any county having home rule under s. 10 or s. 11, Art. VIII of the State Constitution of 1885, as amended, and incorporated by reference in s. 6(e), Art. VIII of the State Constitution, except that the license shall be issued only to the person or corporation that operates the hotel or motel operation and not to the association of condominium owners;

4. A bona fide food service establishment that has a minimum of 2,000 square feet of service area, is equipped to serve meals to 120 persons at one time, has at least 120 physical seats available for patrons to use during operating hours, holds itself out as a restaurant, and derives at least 51 percent of its gross food and beverage

revenue from the sale of food and nonalcoholic beverages during the first 120-day operating period and the first 12-month operating period thereafter. Subsequent audit timeframes must be based upon the audit percentage established by the most recent audit and conducted on a staggered scale as follows: level 1, 51 percent to 60 percent, every year; level 2, 61 percent to 75 percent, every 2 years; level 3, 76 percent to 90 percent, every 3 years; and level 4, 91 percent to 100 percent, every 4 years. A licensee under this subparagraph may sell or deliver alcoholic beverages in a sealed container for off-premises consumption if the sale or delivery is accompanied by the sale of food within the same order. Such authorized sale or delivery includes wine-based and liquor-based beverages prepared by the licensee or its employee and packaged in a container sealed by the licensee or its employee. This subparagraph may not be construed to authorize public food service establishments licensed under this subparagraph to sell a bottle of distilled spirits sealed by a manufacturer. Any sale or delivery of malt beverages must comply with the container size, labeling, and filling requirements imposed under s. 563.06. Any delivery of an alcoholic beverage under this subparagraph must comply with s. 561.57. An alcoholic beverage drink prepared by the vendor and sold or delivered for consumption off the premises must be placed in a container securely sealed by the licensee or its employees with an unbroken seal that prevents the beverage from being immediately consumed before removal from the premises. Such alcoholic beverage also must be placed in a bag or other container that is secured in such a manner that it is visibly apparent if the container has been subsequently opened or tampered with, and a dated receipt for the alcoholic beverage and food must be provided by the licensee and attached to the bag or container. If transported in a motor vehicle, an alcoholic beverage that is not in a container sealed by the manufacturer must be placed in a locked compartment, a locked trunk, or the area behind the last upright seat of a motor vehicle. It is a violation of the prohibition in s. 562.11 to allow any person under the age of 21 to deliver alcoholic beverages on behalf of a vendor. The vendor or the agent or employee of the vendor must verify the age of the person making the delivery of the alcoholic beverage before allowing any person to take possession of an alcoholic beverage for the purpose of making a delivery on behalf of a vendor under this section. A food service establishment granted a special license on or after January 1, 1958, pursuant to general or special law may not operate as a package store and may not sell intoxicating beverages under such license after the hours of serving or consumption of food have elapsed. Failure by a licensee to meet the required percentage of food and nonalcoholic beverage gross revenues during the covered operating period shall result in revocation of the license or denial of the pending license application. A licensee whose license is revoked or an applicant whose pending application is denied, or any person required to qualify on the special license application, is ineligible to have any interest in a subsequent application for such a license for a period of 120 days after the date of the final denial or revocation;

5. Any caterer, deriving at least 51 percent of its gross food and beverage revenue from the sale of food and nonalcoholic beverages at each catered event, licensed by the Division of Hotels and Restaurants under chapter 509. This subparagraph does not apply to a culinary education program, as defined in s. 381.0072(2), which is licensed as a public food service establishment by the Division of Hotels and Restaurants and provides catering services. Notwithstanding any law to the contrary, a licensee under this subparagraph shall sell or serve alcoholic beverages only for consumption on the premises of a catered event at which the licensee is also providing prepared food, and shall prominently display its license at any catered event at which the caterer is selling or serving alcoholic beverages. A licensee under this subparagraph shall purchase all alcoholic beverages it sells or serves at a catered event from a vendor licensed under s. 563.02(1), s. 564.02(1), or licensed under s. 565.02(1) subject to the limitation imposed in subsection (1), as appropriate. A licensee under this subparagraph may not store any alcoholic beverages to be sold or served at a catered event. Any alcoholic beverages purchased by a licensee under this subparagraph for a catered event that are not used at that event must remain with the customer; provided that if the vendor accepts unopened alcoholic beverages, the licensee may return such alcoholic beverages to the vendor for a credit or reimbursement. Regardless of the county or counties in which the licensee operates, a licensee under this subparagraph shall pay the annual state license tax set forth in s. 565.02(1)(b). A licensee under this subparagraph must maintain for a period of 3 years all records and receipts for each catered event, including all contracts, customers' names, event locations, event dates, food purchases and sales, alcoholic beverage purchases and sales, nonalcoholic beverage purchases and sales, and any other records required by the department by rule to

demonstrate compliance with the requirements of this subparagraph. Notwithstanding any law to the contrary, any vendor licensed under s. 565.02(1) subject to the limitation imposed in subsection (1), may, without any additional licensure under this subparagraph, serve or sell alcoholic beverages for consumption on the premises of a catered event at which prepared food is provided by a caterer licensed under chapter 509. If a licensee under this subparagraph also possesses any other license under the Beverage Law, the license issued under this subparagraph may not authorize the holder to conduct activities on the premises to which the other license or licenses apply that would otherwise be prohibited by the terms of that license or the Beverage Law. This section does not permit the licensee to conduct activities that are otherwise prohibited by the Beverage Law or local law. The Division of Alcoholic Beverages and Tobacco is hereby authorized to adopt rules to administer the license created in this subparagraph, to include rules governing licensure, recordkeeping, and enforcement. The first $300,000 in fees collected by the division each fiscal year pursuant to this subparagraph shall be deposited in the Department of Children and Families' Operations and Maintenance Trust Fund to be used only for alcohol and drug abuse education, treatment, and prevention programs. The remainder of the fees collected shall be deposited into the Hotel and Restaurant Trust Fund created pursuant to s. 509.072; or

6. A culinary education program as defined in s. 381.0072(2) which is licensed as a public food service establishment by the Division of Hotels and Restaurants.

a. This special license shall allow the sale and consumption of alcoholic beverages on the licensed premises of the culinary education program. The culinary education program shall specify designated areas in the facility where the alcoholic beverages may be consumed at the time of application. Alcoholic beverages sold for consumption on the premises may be consumed only in areas designated under s. 561.01(11) and may not be removed from the designated area. Such license shall be applicable only in and for designated areas used by the culinary education program.

b. If the culinary education program provides catering services, this special license shall also allow the sale and consumption of alcoholic beverages on the premises of a catered event at which the licensee is also providing prepared food. A culinary education program that provides catering services is not required to derive at least 51 percent of its gross revenue from the sale of food and nonalcoholic beverages. Notwithstanding any law to the contrary, a licensee that provides catering services under this sub-subparagraph shall prominently display its beverage license at any catered event at which the caterer is selling or serving alcoholic beverages. Regardless of the county or counties in which the licensee operates, a licensee under this sub-subparagraph shall pay the annual state license tax set forth in s. 565.02(1)(b). A licensee under this sub-subparagraph must maintain for a period of 3 years all records required by the department by rule to demonstrate compliance with the requirements of this sub-subparagraph.

c. If a licensee under this subparagraph also possesses any other license under the Beverage Law, the license issued under this subparagraph does not authorize the holder to conduct activities on the premises to which the other license or licenses apply that would otherwise be prohibited by the terms of that license or the Beverage Law. This subparagraph does not permit the licensee to conduct activities that are otherwise prohibited by the Beverage Law or local law. Any culinary education program that holds a license to sell alcoholic beverages shall comply with the age requirements set forth in ss. 562.11(4), 562.111(2), and 562.13.

d. The Division of Alcoholic Beverages and Tobacco may adopt rules to administer the license created in this subparagraph, to include rules governing licensure, recordkeeping, and enforcement.

e. A license issued pursuant to this subparagraph does not permit the licensee to sell alcoholic beverages by the package for off-premises consumption.

However, any license heretofore issued to any such hotel, motel, motor court, or restaurant or hereafter issued to any such hotel, motel, or motor court, including a condominium accommodation, under the general law may not be moved to a new location, such license being valid only on the premises of such hotel, motel, motor court, or restaurant. Licenses issued to hotels, motels, motor courts, or restaurants under the general law and held by such hotels, motels, motor courts, or restaurants on May 24, 1947, shall be counted in the quota limitation contained in subsection (1). Any license issued for any hotel, motel, or motor court under this law shall be issued only to the

owner of the hotel, motel, or motor court or, in the event the hotel, motel, or motor court is leased, to the lessee of the hotel, motel, or motor court; and the license shall remain in the name of the owner or lessee so long as the license is in existence. Any special license now in existence heretofore issued under this law cannot be renewed except in the name of the owner of the hotel, motel, motor court, or restaurant or, in the event the hotel, motel, motor court, or restaurant is leased, in the name of the lessee of the hotel, motel, motor court, or restaurant in which the license is located and must remain in the name of the owner or lessee so long as the license is in existence. Any license issued under this section shall be marked "Special," and nothing herein provided shall limit, restrict, or prevent the issuance of a special license for any restaurant or motel which shall hereafter meet the requirements of the law existing immediately before the effective date of this act, if construction of such restaurant has commenced before the effective date of this act and is completed within 30 days thereafter, or if an application is on file for such special license at the time this act takes effect; and any such licenses issued under this proviso may be annually renewed as now provided by law. Nothing herein prevents an application for transfer of a license to a bona fide purchaser of any hotel, motel, motor court, or restaurant by the purchaser of such facility or the transfer of such license pursuant to law.

(b) Any county in which special licenses were issued under the provisions of s. 561.20(2)(b) in effect prior to the effective date of this act shall continue to qualify for such licenses pursuant to those provisions in effect prior to the effective date of this act, and shall not be affected by the provisions of paragraph (a), except that in such counties, any restaurant located in a specialty center built on governmentally owned land shall be subject to the provisions of paragraph (a).

1. A specialty center means any development having at least 50,000 square feet of leasable area, containing restaurants, entertainment facilities, and specialty shops, and located adjacent to a navigable water body. Alcoholic beverages sold for consumption on the premises by a vendor in a specialty center may be consumed within the specialty center but may not be removed from such premises.

2. A specialty center also means any enclosed development that has at least 170,000 square feet of leasable area that is under the dominion and physical control of the owner or manager of the enclosed development, containing restaurants, entertainment facilities, specialty shops, and a movie theater with at least 18 operating screens. Alcoholic beverages sold for consumption on the premises by a vendor in a specialty center may be consumed only in areas designated pursuant to s. 561.01(11) and may not be removed from the designated area.

(c) In addition to any special licenses that may be issued under the provisions of paragraph (a), the division is authorized to issue special licenses to qualified applicants who own or lease bowling establishments having 12 or more lanes and all necessary equipment to operate them. Any license issued for any bowling establishment under the provisions of this paragraph shall be issued only to the owner of the bowling establishment or, in the event the bowling establishment is leased, to the lessee of the bowling establishment; and the license shall remain in the name of the owner or lessee so long as the license is in existence. Any such license issued under this paragraph shall not be moved to a new location. No license issued pursuant to this paragraph shall permit the licensee to sell alcoholic beverages by the package for off-the-premises consumption. The provisions of this paragraph do not preclude any bowling establishment from holding a beverage license issued pursuant to any other provision of this section.

(d) Any board of county commissioners may be issued a special license which shall be issued in the name of the county and be applicable only in and for facilities which are owned and operated by the county and in which the sale and consumption of alcoholic beverages are not otherwise prohibited. The license may be transferred from one qualified county facility to another upon written notification to the department.

(e) The owner of a hotel, motel, or motor court may lease his or her restaurant operation to another corporation, individual, or business association that, upon meeting the requirements for a restaurant license set forth in this chapter, may operate independently of the hotel, motel, or motor court and be permitted to provide room service for alcoholic and intoxicating beverages within such hotel, motel, or motor court in which the restaurant is located.

(f) In addition to the exceptions set forth in this subsection, no such limitation of the number of licenses as herein provided shall prohibit the issuance of special airport licenses as defined in s. 561.01(12) to restaurants that

are a part of, or serve, publicly owned or leased airports. The special airport license provided for herein shall allow for consumption within designated areas of the airport terminal as defined in s. 561.01(13). Any holder of such special license located at a publicly owned and operated airport may sell and serve alcoholic beverages for consumption on the premises to the general public under such license in not more than four places or locations in control of the holder of such license. Any license so issued may not be transferred to a new location, except that a vendor operating a place of business under a special license may transfer such license when the publicly owned or leased airport at which the vendor operates a place of business under a special license moves its terminal facilities on the same airport premises, or when the airport is required by law to move its entire operation to a new location. Any license so issued shall entitle the vendor operating a place of business under such license to sell to airlines vinous beverages and distilled spirits in sealed miniature containers and other alcoholic beverages for consumption on the aircraft using the facility, but only for consumption by the passengers of the aircraft when such aircraft is airborne.

(g) In addition to any special licenses issued under the Beverage Law, the division may issue a special license for consumption on the premises only to any public fair or exposition which is organized in accordance with chapter 616. No licensee under this special license shall enter into any exclusive contract for its use. The special license may not be used in connection with any youth agricultural activity or during any regularly scheduled public fair or exposition, and such license may be used only in connection with special events held on the premises of the fairgrounds, which premises are considered to be licensed premises under the dominion and control of the public fair or exposition authority at all times. This special license is not transferable.

(h) In addition to any special licenses issued under the Beverage Law, the division may issue a special license for consumption on the premises only to any civic center authority or sports arena authority which is authorized by state law or by a local government ordinance or which civic center or sports arena is otherwise owned by a political subdivision of this state. The license may be transferred to a qualified applicant authorized by contract with the authority to provide food service for the facility. The license shall at all times remain the exclusive property of the authority, and upon termination by any manner of the contract between the authority and the applicant concerning the furnishing of food service, the license shall revert to the authority by operation of law.

(i) The division shall not charge a fee in excess of $250 for the license authorized by paragraph (g) or paragraph (h).

(j) In addition to any special licenses issued under the Beverage Law, the division may issue a special license for consumption on the premises only to a performing arts center, provided that any consumption of alcoholic beverages under this license, except as part of food and beverage service for banquets or receptions, may occur only in conjunction with an artistic, educational, cultural, promotional, civic, or charitable event occurring on the premises under the authorization of or offered directly by the performing arts center. The license may be transferred to a qualified applicant authorized by contract with the performing arts center to provide food and beverage service for the center. The license shall at all times remain the exclusive property of the performing arts center, and upon termination by any manner of the contract between the performing arts center and the applicant concerning the furnishing of food and beverage service, the license shall revert to the performing arts center by operation of law. The division shall not charge a fee in excess of $400 for the license authorized by this paragraph.

(3) The limitation upon the number of such licenses to be issued as herein provided does not apply to existing licenses or to the renewal or transfer of such licenses; but upon the revocation of any existing license, no renewal thereof or new license therefor shall be issued contrary to the limitation herein prescribed.

(4) The limitations herein prescribed shall not affect or repeal any existing or future local or special act relating to the limitation by population and exceptions or exemptions from such limitation by population of such licenses within any incorporated city or town or county that may be in conflict herewith. Any license issued under a local or special act relating to the limitation by population shall be subject to all requirements and restrictions contained in the Beverage Law that are applicable to licenses issued under subsection (1).

(5) Provisions of subsections (2) and (4) as amended by chapter 57-773, Laws of Florida, shall take effect January 1, 1958, and shall apply only to those places of business licensed to operate after January 1, 1958, and shall in no manner repeal or nullify any license issued under provisions of law which are now operating or will

operate prior to the effective date January 1, 1958; and all such places of business shall be exempt from the provisions of this law so long as they are in continuous operation.

(6) When additional licenses become available by reason of an increase in population or by reason of a county permitting the sale of intoxicating beverages when such sale has been prohibited, the division may issue the number of new licenses that become available by reason of the last regular population estimate; however, in no event shall any person, firm, or corporation licensed as a vendor under subsection (1) have an interest, directly or indirectly, in more than 30 percent of the number of licenses authorized for issuance in such county. Notwithstanding the foregoing limitation, any licensed vendor having an interest, directly or indirectly, in more than 30 percent of the licenses authorized for issuance in any one county on July 1, 1981, may continue to qualify for such licenses.

(7)(a) There shall be no limitation as to the number of licenses issued pursuant to s. 565.02(4). However, any licenses issued under this section shall be limited to:

1. Subordinate lodges or clubs of national fraternal or benevolent associations;
2. Golf clubs, tennis clubs, and beach or cabana clubs which are municipally or privately owned or leased;
3. Nonprofit corporations or clubs devoted to promoting community, municipal, or county development or any phase of community, municipal, or county development;
4. Clubs fostering and promoting the general welfare and prosperity of members of showmen and amusement enterprises;
5. Clubs assisting, promoting, and developing subordinate lodges or clubs of national fraternal or benevolent associations; and
6. Clubs promoting, developing, and maintaining cultural relations of people of the same nationality.

(b) Any corporation, partnership, or individual operating a club owning or leasing and maintaining any bona fide regular, standard golf course consisting of at least nine holes, with clubhouse, locker rooms, and attendant golf facilities and comprising in all at least 35 acres of land owned or leased by such club may be issued a license under s. 565.02(4); but failure of such club to maintain the golf course and golf facilities shall be grounds for revocation of the license.

(c) Any corporation, partnership, or individual operating a club owning or leasing and maintaining any bona fide tennis club or four-wall indoor racquetball club consisting of not fewer than 10 regulation-size tennis courts or 10 regulation-size four-wall indoor racquetball courts, or a combination of such courts totaling in the aggregate not fewer than 10 courts, or a combination of 8 such courts and exercise facilities which in square footage total not fewer than the aggregate square foot equivalent of 10 regulation-size courts with clubhouse facilities, pro shop, locker rooms, and attendant tennis or racquetball facilities, all located on a contiguous tract of land owned or leased by such club, may be issued a license under s. 565.02(4); but failure of such club to maintain such courts and facilities shall be grounds for revocation of any such license so issued. Any racquetball or tennis club which has been constructed and completed on or before July 1, 1980, and which contains the requisite number of courts of proper size and attendant facilities may be granted a license without the necessity of securing additional approval from the incorporated municipality or county in which the racquetball or tennis club facility is located. It is intended that this subsection be an exception to s. 562.45(2) preempting the zoning power of local government to the state only in instances involving tennis and racquetball clubs constructed and completed on or before July 1, 1980. Nothing in this paragraph, however, shall be construed to limit the power of incorporated municipalities or counties to enact ordinances regulating hours of business and prescribing sanitary regulations for such racquetball or tennis club facilities.

(d) Any corporation, partnership, or individual operating a club which owns or leases and which maintains any bona fide beach or cabana club consisting of beach facilities, swimming pool, locker rooms or bathroom facilities for at least 100 persons, and a public food service establishment as defined in s. 509.013(5)(a), comprising in all an area of at least 5,000 square feet located on a contiguous tract of land of in excess of 1 acre may be issued a license under s. 565.02(4). The failure of such club to maintain the facilities shall be a ground for revocation of the license.

(8) In addition to any licenses that may be issued to restaurants under the provisions of this section, the division is authorized to issue special licenses to qualified applicants whose applications have been approved by the Inter-American Center Authority for use within the confines of the Inter-American Cultural and Trade Center; however, any such license issued pursuant to this subsection shall not permit the licensee to sell alcoholic beverages by the package for off-premises consumption.

(9) In addition to any licenses that may be issued under the provisions of this chapter, the division is authorized to issue special licenses to any county which has a population of at least 1 million persons according to the latest federal census and which owns and operates airport facilities pursuant to chapters 125 and 332, for transfer to qualified applicants who have secured approval from the board of county commissioners of such county for use within the confines of such airport facilities. Such licenses shall not be valid in any location beyond the confines of the terminal facilities of the airport. In the event of expiration or revocation of such licenses, such licenses shall revert to the board of county commissioners automatically, by operation of law. However, no special license issued pursuant to this subsection shall permit the county or its transferee to sell alcoholic beverages by the package for off-premises consumption.

(10) In addition to any licenses that may be issued under the provisions of this chapter, the division is authorized to issue a special license to any marketing association of horse breeders organized under the laws of the state. Such license shall be applicable only in and for facilities used by the association for public auction of its products. No license issued pursuant to this subsection shall permit the licensee to sell alcoholic beverages by the package for off-premises consumption. The provisions of this subsection do not preclude any cooperative marketing association of horse breeders from holding a license issued pursuant to any other provision of this chapter.

(11) In addition to any licenses that may be issued under the provisions of this chapter, the division is authorized to issue a special license to historic American Legion Posts in Florida which were chartered prior to September 16, 1919, the date on which the United States Congress issued the National Charter for the American Legion. Any holder of a license issued pursuant to this subsection shall, at its option, be permitted to sell alcoholic beverages to resident guests as well as members and nonresident guests for consumption on the premises only. Revenue from the sale of such alcoholic beverages must be used to operate, maintain, or improve said American Legion Post facilities, grounds, or activities and to maintain an emergency fund not to exceed the costs of operation of the American Legion Post for the prior calendar year. Any remaining revenue from the sale of alcoholic beverages shall be donated to local nonprofit charitable organizations on an annual basis. Posts exercising their option under this subsection shall pay an annual license fee of $500. This section shall not apply to any county which has held an election under s. 567.01 and whose electors have voted to prohibit the sale of alcoholic beverages for consumption on the licensed premises.

(12)(a) In addition to any other licenses issued under the provisions of this chapter, the division is authorized to issue a special license to a person or to an organization for the purpose of authorizing:

1. A sale pursuant to a levy and execution;
2. A sale by an insurance company in possession of alcoholic beverages;
3. A bankruptcy sale;
4. A sale resulting from a license suspension or revocation;
5. A sale of damaged goods by a common carrier;
6. A sale by a bona fide wine collector; or
7. A sale of packaged alcoholic beverages pursuant to part V of chapter 679.

(b) A special license shall be issued under this subsection upon filing an application at the district office and paying a $25 fee. Such fee shall be deposited in the Alcoholic Beverages and Tobacco Trust Fund.

(c) A special license is valid for 3 days after the time of its effective date and time as set by the division. A license issued pursuant to this subsection does not permit the licensee to sell alcoholic beverages for consumption on the premises.

(d) A distributor may purchase packaged alcoholic beverages at any sale specified in paragraph (a).

(13) Notwithstanding any other provision of law, any license to sell or serve alcoholic beverages issued to a port authority, as defined in s. 315.02, entitles that port authority, or the lessee or lessees which it may choose, to sell

and serve alcoholic beverages at any terminal within the port jurisdictional boundaries upon annual payment to the division of an annual fee equivalent to the annual license fee for each sales or service location. However, any lessees chosen by the port authority shall meet the criteria for licensure for sales and service of alcoholic beverages.

BUSINESS IMPACT ESTIMATE[1]

Meeting Date: March 11, 2026	Agenda Item No. 10.1

Summary of Proposed Ordinance and Statement of Public Purpose to be Served

The ordinance updates definitions to align with Florida law, revises extended-hours licensing (midnight–6:00 a.m.), clarifies proximity/separation requirements, and refines noise restrictions with targeted exemptions (including the MXE district). The changes are intended to improve regulatory clarity, harmonize Town code with state frameworks, and offer measured flexibility to qualified businesses while preserving public welfare.

Estimate of Direct Economic Impact on Private/For Profit Businesses

a. Estimate of Direct Business Compliance Costs:

There are no direct compliance costs for businesses, as the ordinance does not impose new requirements, operational changes, or mandates.

b. New Charges/Fees on Businesses Impacted:
Not applicable. The ordinance does not impose any new charges, fees, or taxes on businesses.

c. Estimate of Regulatory Costs:

There are no new regulatory costs associated with this ordinance.

Good Faith Estimate of Number of Businesses Likely Impacted: Businesses operating under alcohol licenses may be affected by updated definitions and extended-hours provisions. Additionally, businesses in different election districts could experience changes in commissioner representation.

Any Additional Information:

This Business Impact Estimate statement is provided as a courtesy. This Ordinance is exempt from the Business Impact Estimate statement requirements under Florida Law as an ordinance required for compliance with federal or state law or regulation under Section 166.041(4)(c)(1), Florida Statutes.

[1] Business Impact Estimate does not apply to the following:

1. Ordinances required for compliance with federal or state law or regulation;
2. Ordinances related to the issuance or refinancing of debt;
3. Ordinances relating to the adoption of budgets or budget amendments, including revenue sources necessary to fund the budget;
4. Ordinances required to implement a contract/agreement;
5. Emergency ordinances;
6. Ordinances relating to procurement;
7. Ordinances enacted to implement the following:
    a. Part II of Chapter 163, F.S.;
    b. Sec. 190.005, F.S. and Sec. 190.046, F.S.;
    c. Sec. 553.73, F.S. (Fla. Building Code);
    d. Sec. 633.202, F.S. (Fla. Fire Prevention Code).

Agenda Item Report

Subject:	Updated Vehicle Maintenance Plan- Chief Daniel DeCoursey
Meeting Date:	Special Commission Meeting - March 13, 2026
Prepared For:	Town Commission
Staff Contact:	Daniel DeCoursey, Police Chief
Dept/Group:	Police Department
Recommendation for Counsel to consider:	
Background Information:	Staff received notification from the vendor that the previously submitted and approved quote (reviewed at the February 3, 2026 Commission Workshop) reflected the 2025 Vehicle Maintenance Plan cost rather than the 2026 pricing. The vendor has provided an updated quote dated March 2, 2026. The updated 2026 quote reflects a cost of $3,520.00 per vehicle, for a total of $17,600.00, resulting in an increase of $1,275.00 from the previously approved amount.

October 2023

Drive On with Confidence.

It's more than just a routine oil change. Keep your vehicle running at its optimum performance with a Ford Protect Premium Maintenance extended service plan.

This comprehensive plan provides premium protection for your vehicle with routine inspections, preventive care and replacement of select wear items that require periodic attention to ensure it's running at top performance.

Premium Maintenance covers these important maintenance items:

- Engine oil and filter changes
- Multi-point inspections
- Tire rotations
- Brake pads and linings
- Shock absorbers/struts
- Spark plugs
- Clutch discs
- Engine belts, coolant hoses and clamps
- Wiper blades

Drive On with Peace of Mind.

Comprehensive maintenance coverage for Ford and competitive-make vehicles.

Keep your car or truck running great for years to come with a Ford Protect Premium Maintenance Plan. Covering scheduled maintenance required by the manufacturer, including select wear items, these prepaid plans help protect you against rising labor and parts costs.

Enjoy premium protection for miles and miles.

With this plan, you'll be able to protect your vehicle and budget with timely care and inspections that may:

- Prevent serious and expensive repairs
- Help you maintain optimal performance
- Possibly increase your vehicle's resale value

- All service intervals purchased must be completed before the coverage ends
- Coverage begins at the New Vehicle Limited Warranty start date and zero miles
- Coverage ends at the earlier of the number of years purchased or number of miles purchased

You can add to your plan and drive on with even greater peace of mind.

Ford Protect Pickup and Delivery Option.

This option provides convenient personalized service, which allows you more free time rather than spending your valuable time in a dealership. Service includes:

- Pickup & delivery
- For loaner benefits, First-Day Rental Option must be included
- Mobile service option

Coverage for scheduled maintenance.

The following services are representative of the required maintenance for your vehicle. Your specific plan will be based on requirements indicated in your Owner's Scheduled Maintenance Guide.

- Change engine oil and replace oil filter
- Inspect and rotate tires
- Inspect brake pads/shoes/rotors/drums, brake lines and parking brake system
- Inspect wheel ends for end play and noise
- Inspect and lubricate steering linkage, ball joints, suspension and, if equipped, halfshafts, driveshafts and u-joints
- Change transmission fluid
- Replace fuel filter
- Replace engine air filter
- Change engine coolant
- Replace PCV valve
- Change transfer case fluid*
- Inspect and lubricate 4x4 front axle shaft u-joints*
- Lubricate 4x4 front hub needle bearings*
- Lubricate 4x2 front wheel bearings, replace grease seals and adjust bearings*
- Fill diesel exhaust fluid*

Multi-point inspection.

At each scheduled service appointment, your vehicle will also undergo a comprehensive multi-point inspection as indicated in your Owner's Scheduled Maintenance Guide.

- Check fluid levels and fill:
  - Transmission (if equipped with a dipstick)
  - Brake reservoir
  - Power steering
  - Coolant recovery reservoir
  - Window washer
  - Diesel exhaust fluid (if necessary)*
- Check systems and components:
  - Horn, interior lights, exterior lamps, turn signals, and hazard and brake lights
  - Windshield washer spray, wiper operation and wiper blades
  - Windshield for cracks, chips and pitting
  - Radiator, heater and air conditioning lines (leaks and damage)
  - Engine air filter
  - Oil and fluid leaks
  - Exhaust system (leaks, damage, loose parts)
  - Steering and steering linkages
  - Shocks/struts and other suspension components (leaks and damage)
  - Accessory drive belt(s)
  - Clutch operation*
  - Tires for wear and proper air pressure

** If equipped.*

MINUTES REGULAR COMMISSION MEETING

7:00 PM - Wednesday, January 14, 2026
Commission Chambers

The REGULAR COMMISSION MEETING of the Town of Pembroke Park was called to order on Wednesday, January 14, 2026, at 7:00 PM, in the Commission Chambers, with the following members present:

PRESENT: Commissioner Ashira Mohammed; Acting Clerk Commissioner Erik Morrissette; Clerk Commissioner William Hodgkins; Vice Mayor Musfika Kashem; Mayor Geoffrey Jacobs

EXCUSED:

1 CALL TO ORDER

Mayor Jacobs called the meeting to order at 7:00PM.

2 PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was recited.

3 ROLL CALL

The meeting was called to order at 7:00 pm by Mayor Jacobs. Present at the meeting were Ashira Mohammed, Commissioner; Erik Morrissette, Acting Clerk Commissioner; William Hodgkins, Clerk Commissioner; Musfika Kashem, Vice Mayor; Geoffrey Jacobs, Mayor.

Additional staff in attendance were Jacob Horowitz, Town Attorney; Cynthia Garcia-Lima, Town Clerk; and David Lynch, Town Manager

4 DELETIONS OR WITHDRAWALS TO THE AGENDA

Town Attorney noted that item 9.2 regarding the second reading of the ordinance on personnel procedures manual would be pulled and re-

DRAFT

advertised for the next meeting. Commissioner Mohammed requested to pull item 12.1 regarding updates to the purchasing manual. Mayor Jacobs pulled all consent agenda items to make them individual items for consideration.

Motion to approve the amended agenda was made by Clerk Commissioner Hodgkins. Seconded by Acting Clerk Commissioner Morrissette, and it passed unanimously on a poll vote.

5 PRESENTATIONS / PROCLAMATIONS

5.1 Presentation from Florida Atlantic University on Re-Districting

Mike Stam and James Clark from Florida Atlantic University presented their analysis and recommendations for the town's redistricting process. Mr. Stam explained that the current districts are severely out of balance, noting that they haven't been updated in over 25 years. According to the 2020 census, Pembroke Park has a population of 6,260, with an average of 1,252 people per district. The estimated 2025 population is 6,354 with an average of 1,271 people per district.

The current districts show significant population disparities: District 1: 597 people, District 2: 531 people, District 3: 663 people, District 4: 1,765 people, District 5: 2,798 people.

Mr. Stam emphasized that the total deviation between districts is over 300%, with a mean deviation of 63%, significantly exceeding the recommended 10% maximum deviation. The presenters offered three redistricting alternatives, each designed to reduce populations in Districts 4 and 5 while increasing populations in Districts 1, 2, and 3.

Mr. Clark explained the criteria used for redistricting, including population equity, compliance with the Voting Rights Act, geographic contiguity and compactness, and maintaining communities of interest. He provided details for each of the three proposed alternatives: Alternative 1: Best population balance with a total deviation of 18.98% and a mean deviation of 3.8%, Alternative 2: Improves district recognizability using Hallandale Beach Boulevard as a boundary, with a mean deviation of 6.06%, Alternative 3: Provides a different configuration of the western boundaries with a mean deviation of 6.34%.

Acting Clerk Commissioner Morrissette expressed concern about the practical effect of redistricting when commissioners are elected at large.

Town Attorney explained that even with at-large elections, redistricting is required by law to ensure equal opportunity for residents to run for office. The attorney also clarified that the town charter requires redistricting and that commissioners must reside in their district one year prior to the election date, which creates a time constraint for implementation.

The commission agreed to discuss the redistricting options further at the February 3rd workshop and scheduled a special meeting to meet the March 9th, 2026, deadline for adoption.

6 PUBLIC COMMENTS RELATED TO AGENDA ITEMS / GOOD & WELFARE

There were no public comments.

7 CONSENT AGENDA

7.1 Motion of Approval of Park Use Fee Waiver for Community Outreach Event Hosted by Rose Heart Foundation and Earthly Doula - Sponsored by Mayor Jacobs

RESOLUTION NO.: 2026-001

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, APPROVING THE REQUEST FROM ROSE HEART FOUNDATION AND EARTHLY DOULA TO USE A LOCAL TOWN PARK AT NO COST FOR A COMMUNITY OUTREACH EVENT; PROVIDING FOR AN EFFECTIVE DATE.

Mayor Jacobs explained this was a nonprofit community event with bounce houses at Raymond Preserve that would benefit the community.

ACTION: Motion to approve Resolution 2026-001 made by Clerk Commissioner Hodgkins. Seconded by Vice Mayor Kashem, and it passed unanimously on a poll vote.

7.2 Motion to Approve the Capital Improvement Element for Submission to the Department of Commerce - Sponsored by Public Services Director Odoms and Finance Director Davermann

RESOLUTION NO: 2026-002

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, APPROVING THE CAPITAL IMPROVEMENT ELEMENT ATTACHED HERETO AS EXHIBIT A AND AUTHORIZING SUBMISSION TO THE DEPARTMENT OF COMMERCE; PROVIDING FOR AN EFFECTIVE DATE.

DRAFT

ACTION: Motion to approve Resolution 2026-002 made by Clerk Commissioner Hodgkins. Seconded by Vice Mayor Kashem, and it passed unanimously on a poll vote.

7.3 Motion of Approval to Waive Competitive Procurement and Approve Agreement with Blue Digital Corp. for Document Scanning Services - Sponsored by Town Clerk Garcia-Lima

RESOLUTION NO: 2026-003

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, APPROVING THE WAIVER OF COMPETITIVE PROCUREMENT PURSUANT TO SECTION 2-125(d)(17) OF THE TOWN CODE AND APPROVING AN AGREEMENT ATTACHED HERETO AS EXHIBIT A BETWEEN THE TOWN AND BLUE DIGITAL CORP. FOR DOCUMENT SCANNING AND RELATED SERVICES; PROVIDING FOR AN EFFECTIVE DATE.

Town Clerk explained that Blue Digital has already been handling the town's digital records, they are located locally, and the town can access their warehouse if documents need to be retrieved. The Town Attorney noted that Coral Gables had used the same vendor through a similar waiver process.

ACTION: Motion to approve Resolution 2026-003 was made by Acting Clerk Commissioner Morrissette. Seconded by Hodgkins, and it passed unanimously on a poll vote.

7.4 Motion to waive competitive procurement pursuant to Sec. 2-125(d)(17) of the Town's Code and finding that it is in the Town's best interests to engage CivicPlus for agenda management services - Sponsored by Town Clerk Garcia-Lima

RESOLUTION NO.: 2026-004

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, WAIVING COMPETITIVE PROCUREMENT PURSUANT TO SECTION 2-125(d)(17) OF THE TOWN CODE; FINDING THAT IT IS IN THE BEST INTERESTS OF THE TOWN TO ENGAGE CIVICPLUS FOR THE PROVISION OF CIVIC CLERK AGENDA MANAGEMENT SERVICES; AUTHORIZING THE TOWN CLERK TO EXECUTE ALL NECESSARY AGREEMENTS; PROVIDING FOR IMPLEMENTATION; AND PROVIDING FOR AN EFFECTIVE DATE.

DRAFT

The Town Clerk explained that CivicPlus already manages the town's website and public records request platform and offered a discount because the town already uses their services.

ACTION: Motion to approve Resolution 2026-004 was made by Clerk Commissioner Hodgkins. Seconded by Acting Clerk Commissioner Morrissette, and it passed unanimously on a poll vote.

7.5 Motion to Approve of HIDTA State and Local Task Force Agreement with the DEA - Sponsored by Police Chief DeCoursey

RESOLUTION NO: 2026-005

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, APPROVING AND AUTHORIZING THE EXECUTION OF THE HIDTA STATE AND LOCAL TASK FORCE AGREEMENT BETWEEN THE UNITED STATES DEPARTMENT OF JUSTICE, DRUG ENFORCEMENT ADMINISTRATION (DEA), AND THE PEMBROKE PARK POLICE DEPARTMENT ATTACHED HERETO AS EXHIBIT A; PROVIDING FOR IMPLEMENTATION; AND PROVIDING FOR AN EFFECTIVE DATE.

ACTION: Motion to approve Resolution No. 2026-005 was made by Acting Clerk Commissioner Morrissette. Seconded by Vice Mayor Kashem, and it passed unanimously on a poll vote.

7.6 Motion to Approve the Commission Meeting dates for the 2026 calendar year. Enclosed is a list of the proposed dates - Sponsored by Town Clerk Garcia-Lima

ACTION: Motion to approve the commission meeting dates for 2026 was made by Clerk Commissioner Hodgkins. Seconded by Acting Clerk Commissioner Morrissette, and it passed unanimously on a poll vote.

7.7 Approval of Meeting Minutes - Sponsored by Town Clerk Garcia-Lima

September 10, 2025 - First Public Budget Hearing Meeting
September 10, 2025 - Regular Commission Meeting
September 24, 2025 - Special Commission Meeting
September 24, 2025 - Second Public Budget Meeting
September 24, 2025 - Workshop Commission Meeting
September 29, 2025 - Regular Commission Meeting
October 29, 2025 - Workshop Commission Meeting

ACTION: Motion to approve the minutes made by Clerk Commissioner Hodgkins. Seconded by Acting Clerk Commissioner Morrissette, and it passed unanimously on a poll vote.

7.8 Motion to Approve to continue the Utilization of the Temporary Generator - Sponsored by Town Manager Lynch

A lengthy discussion took place regarding the emergency generator project.

Mayor Jacobs expressed frustration over the slow progress of the project, noting it has been pending for more than 10 years.

Town Manager Lynch explained that the current rental generator costs $7,020 per month, and Public Works Director Odoms estimated that a permanent generator installation would take approximately one year to complete due to supply chain issues and building modifications required.

The mayor voiced concern about spending over $84,000 annually on generator rental and questioned why the project has been delayed so long despite having grant funding.

Commissioner Mohammed and Mayor Jacobs noted similar concerns about the air conditioning system replacement which was also delayed.

Town Manager Lynch mentioned that there had been some pause to the project while considering a potential offer to purchase Town Hall, but the commission agreed that projects should move forward regardless.

ACTION: Mayor Jacobs gave directions to Public Works Director Jeffrey Odoms to include in his accountability presentation discussion on generator and AC Projects.

ACTION: Motion to approve to continue utilization of the temporary generator for a period of 12 months, the commission will revisit discussion depending on the installation and outcome of the town's emergency generator/new generator made by Clerk Commissioner Hodgkins. Seconded by Acting Clerk Commissioner Morrissette, and it passed unanimously on a poll vote.

Town Manager Lynch requested an ancillary motion before heading into the next item. Town Manager requested a motion to have him respond to Mr. Pelosi in reference to the email he sent out a week ago.

Direction was given to respond to Mr. Pelosi**.**

7.9 Motion to Approve the purchase of Backup system for the Police Department not to exceed $20,000 - Sponsored by IT Director Pakula

IT Director explained that this backup system would allow the police department to operate outside of Town Hall if the on-premises servers went down.

ACTION: Motion to approve the purchase of backup system for the Police Department not to exceed $20,000 made by Clerk Commissioner Hodgkins. Seconded by Vice Mayor Kashem, and it passed unanimously on a poll vote.

7.10 Motion to ratify expenses incurred for leased vehicles obtained through Enterprise Fleet Management without prior Commission approval - Procurement Specialist Woodbury

James Davermann explained that 16 vehicles had lease renewals at the same time, totaling approximately $946,000 over five years. He clarified that the town has an ongoing agreement with Enterprise Fleet Management that began in 2020, but the size of this renewal required commission ratification.

Commissioners expressed concern that vehicle acquisitions had not come before the commission for approval as had been the practice in the past.

Commissioner Mohammed emphasized the need for better oversight on spending and proper training on procurement procedures.

ACTION: Motion to ratify expenses incurred for leased vehicles obtained through Enterprise Fleet Management made by Clerk Commissioner Hodgkins. Seconded by Vice Mayor Kashem, and it passed unanimously on a poll vote.

8 APPLICATIONS/PUBLIC HEARINGS

8.1 Consideration and approval of a sign variance - Town Planner Consultant Von der Meulen
File No.: 25-SV-02
Applicant: Lucky Cigar, Inc.

Address: 2865 SW 30th Avenue
Request: The applicant is requesting two (2) variances from the sign code to increase the length
and height of the east sign. This application requests a variance from Section 21-20. (c).1.A limiting the letter height and Section 21-20. (c).1. B limiting the length of the sign.

RESOLUTION NO: 2026-006

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, APPROVING SIGN VARIANCE APPLICATION NO. 25-SV-02 AND GRANTING TWO (2) SIGN VARIANCES FOR THE PROPERTY LOCATED AT 2865 SW 30th AVENUE, PEMBROKE PARK, FLORIDA; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

Town Planner Michael Von der Meulen presented a request for two sign variances from Lucky Cigar at 2865 SW 30th Avenue. The variances would allow for an increase in sign length by 20 feet and letter height by 10 inches. Staff recommended approval, noting the sign would comply with the new sign code being developed.

ACTION: Motion to approve Resolution 2026-006 made by Commissioner Mohammed. Seconded by Vice Mayor Kashem, and it passed unanimously on a poll vote.

8.2 Consideration and approval of a sign variance - Town Planner Consultant Von der Meulen
File No.: 25-SV-05
Applicant: O'Reilly's
Address: 4700 W. Hallandale Beach Blvd
Request: The applicant is requesting three (3) variances from the sign code to increase the height, length and sign area. This application requests a variance from Section 21-20. (c).1.A limiting the letter height, Section 21-20. (c).1. B limiting the length of the sign and Section 21-20. (c).1.C limiting the sign area.

RESOLUTION NO: 2026-007

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, APPROVING SIGN VARIANCE APPLICATION NO. 25-SV-05 AND GRANTING THREE (3) SIGN VARIANCES FOR THE PROPERTY LOCATED AT 4700 WEST HALLANDALE BEACH BOULEVARD, PEMBROKE PARK, FLORIDA; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

Town Planner Michael Von der Meulen presented a request for three sign variances from O'Reilly's at 4700 W. Hallandale Beach Boulevard. The variances would allow for increases in letter height, sign length, and sign area. Staff recommended approval, noting this sign would also comply with the proposed new sign code.

ACTION: Motion to approve Resolution 2026-007 made by Clerk Commissioner Hodgkins. Seconded by Acting Clerk Commissioner Morrissette, and it passed unanimously on a poll vote.

9 ORDINANCES - SECOND READING

9.1 Consideration and approval of an Ordinance Amending the Purchasing Thresholds - Sponsored by Procurement Administrator Woodbury & Town Attorney Horrowitz

ORDINANCE NO.: 2026-001

AN ORDINANCE OF THE TOWN OF PEMBROKE PARK, FLORIDA, AMENDING CHAPTER 2 OF THE TOWN'S CODE OF ORDINANCES, ENTITLED "ADMINISTRATION;" BY SPECIFICALLY AMENDING ARTICLE V, ENTITLED "PROCUREMENT;" AMENDING SEC. 2-128, ENTITLED "PROCUREMENT AMOUNT THRESHOLDS;" AMENDING THE PROCUREMENT THRESHOLDS FOR THE TOWN'S ACQUISITION OF GOODS AND SERVICES; PROVIDING FOR CONSISTENCY WITH THE TOWN'S PURCHASING MANUAL; PROVIDING FOR CODIFICATION; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

The Town Attorney presented Ordinance 2026-001, which would increase the town's procurement thresholds.

Mayor Jacobs expressed concerns about raising the thresholds after discovering the nearly $1 million vehicle lease oversight.

Commissioner Mohammed agreed, stating she was uncomfortable with raising thresholds without proper procurement oversight and training.

Town Manager Lynch argued that current thresholds were restrictive and cited examples of programs they couldn't implement because costs exceeded his authority. He noted that the proposed thresholds were recommended by procurement professionals and were still lower than many other municipalities.

ACTION: Motion to approve Ordinance 2026-001 made by Vice Mayor Kashem. Seconded by Clerk Commissioner Hodgkins, and motion failed with Mayor Jacobs, Commissioner Mohammed and Vice Mayor Kashem voting no, poll 2-3.

9.2 Consideration and approval of the Revised Town Personnel Handbook - Sponsored by HR Director Frishman

ORDINANCE NO.: 2026-002

AN ORDINANCE OF THE TOWN OF PEMBROKE PARK, FLORIDA ADOPTING THE AMENDED PEMBROKE PARK PERSONNEL POLICIES AND PROCEDURES MANUAL, ATTACHED HERETO AS EXHIBIT "A," AND INCORPORATED AS IF FULLY SET FORTH HEREIN; AMENDING CHAPTER 19 OF THE TOWN'S CODE OF ORDINANCES, ENTITLED "PERSONNEL;" AMENDING ARTICLE I, ENTITLED "IN GENERAL" BY SPECIFICALLY AMENDING SECTION 19-1, ENTITLED "ADOPTION OF PERSONNEL POLICIES AND PROCEDURES MANUAL;" PROVIDING FOR FUTURE AMENDMENTS TO THE TOWN'S PERSONNEL MANUAL BY RESOLUTION OF THE TOWN COMMISSION; PROVIDING FOR CODIFICATION; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.

Item was pulled.

10 ORDINANCES - FIRST READING

10.1 Certificate of Use Application Ordinance - Sponsored by Building Department Manager Louis

ORDINANCE: 2026-003

AN ORDINANCE OF THE TOWN OF PEMBROKE PARK, FLORIDA, AMENDING CHAPTER 15 OF THE TOWN'S CODE OF ORDINANCES, ENTITLED "LICENSES AND BUSINESS REGULATIONS;" BY SPECIFICALLY AMENDING ARTICLE VIII, ENTITLED "CERTIFICATES OF USE;" AMENDING SEC. 15-175, ENTITLED "CERTIFICATE OF USE REQUIREMENTS;" PROVIDING FOR AN APPLICATION AND APPROVAL PROCESS; PROVIDING FOR CODIFICATION; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

The Town Attorney explained that this ordinance would establish an application process for Certificates of Use to replace the process that was eliminated when Local Business Tax Receipts were discontinued. The ordinance essentially copies the previous BTR application process to the

Certificate of Use process with minor changes, including accommodations for home businesses.

ACTION: Motion to approve Ordinance 2026-003 on first reading made by Clerk Commissioner Hodgkins. Seconded by Acting Clerk Commissioner Morrissette, and it passed unanimously on a poll vote.

11 NEW BUSINESS

11.1 Motion to Approve contract between Cigna and Town of Pembroke Park for insurance agent compensation - Sponsored by Town Manager Lynch

Town Manager Lynch explained that Evershore (formerly Cigna) provides health care plan administration for the town and operates on a standard commission basis. This agreement would formalize that arrangement.

ACTION: Motion to approve the contract with Cigna for insurance agent compensation made by Commissioner Mohammed. Seconded by Acting Clerk Commissioner Morrissette, and it passed unanimously on a poll vote.

12 DISCUSSION

12.1 Updates on town purchasing manual, and P-Card purchases - Sponsored by Commissioner Mohammed

Item was pulled.

13 ATTORNEY REPORTS

The Town Attorney reported on two items: Changes to the county's ethics code, eliminating various gift categories and simplifying the requirements to align with state law. Along with an update on the large user agreement with the City of Hollywood, noting that the town is working with the Akerman law firm and economic consultant Kevin Kwan to prepare correspondence to Hollywood outlining potential economic damages claims.

14 TOWN MANAGER REPORTS

Town Manager Lynch reported that the micro-hospital project next to Wawa is back online after some design issues had temporarily put it on hold. The project is being fast-tracked, and the town is planning a press

conference to announce the hospital, which is expected to be an economic catalyst for the area.

15 COMMISSION REPORTS

Commissioner Mohammed had nothing to report.

Acting Clerk Commissioner Morrissette had nothing to report.

Clerk Commissioner Hodgkins had nothing to report.

Vice Mayor Kashem had nothing to report.

Mayor Jacobs delivered a statement addressing recent media attention and defending his record of advocating for accountability in town government. He detailed ongoing infrastructure issues, delayed projects, and his commitment to transparency and progress despite challenges.

16 ANNOUNCEMENTS

16.1 Workshop Commission meeting, Tuesday, February 3, 2026, at 6:00 pm
Regular Commission meeting, Wednesday, February 11, 2026, at 7:00 pm
Special Magistrate Hearing, Wednesday, February 18, 2026, at 9:00 am

11 ATTORNEY COMMENTS

The Town Attorney is currently drafting a Redistricting Ordinance for the Commission's consideration. The body of the Ordinance will formally refer to a redistricting map as an 'Exhibit,' which the Commission must finalize and select. The goal is to present the completed Ordinance and Exhibit for a first reading at the February 11th meeting.

12 TOWN MANAGER COMMENTS

13 COMMISSIONER COMMENTS

13.1 Commissioner Mohammed

Acting Clerk Commissioner Morrissette

Clerk Commissioner Hodgkins

Vice Mayor Kashem

Mayor Jacobs stated there are no commissioners here. Therefore, they do not have a quorum for the commission meeting. He also stated he sent an open invitation to the Broward Office of Inspector General to be a part of the meeting. He hopes they attended online. He asked for all items to be transferred to the next commission meeting as a line item. He lastly mentioned the following meeting he will need to attend via zoom as he will be out for work.

14 ATTORNEY REPORTS

15 TOWN MANAGER COMMENTS

16 COMMISSIONER COMMENTS

13.1 Commissioner Mohammed

Acting Clerk Commissioner Morrissette

Clerk Commissioner Hodgkins

Vice Mayor Kashem

Mayor Jacobs noted that he had taken three flights in the last 24 hours and fought traffic to make it to this critical meeting. He expressed frustration that the other three commissioners had walked out of the dais after the previous meeting to prevent this meeting from occurring, stating that their absence was "self-serving" while he came for the residents, accountability, and to move the town forward.

Due to lack of quorum, Mayor Jacobs announced that the meeting could not proceed. After discussion with staff about timing requirements for various agenda items, particularly the sign variance that would need separate advertisement and the second reading ordinance requiring 10 days prior advertisement, it was determined that the entire meeting would be rescheduled.

The mayor and staff agreed to schedule a special meeting for Friday, February 20, 2026, at 6:00 PM to handle the regular agenda items. Additionally, a decision was made to schedule the second reading of the redistricting ordinance (item 7.2) for February 25, 2026, at 6:30 PM, prior to the workshop meeting, to allow sufficient time for proper advertisement.

MINUTES SPECIAL COMMISSION MEETING

6:00 PM - Wednesday, February 11, 2026
Commission Chambers

The SPECIAL COMMISSION MEETING of the Town of Pembroke Park was called to order on Wednesday, February 11, 2026, at 6:00 PM, in the Commission Chambers, with the following members present:

PRESENT: Mayor Geoffrey Jacobs (via Teams); Acting Clerk Commissioner Erik Morrissette; Clerk Commissioner William Hodgkins; Commissioner Ashira Mohammed (via Teams) and Vice Mayor Musfika Kashem

EXCUSED:

1 CALL TO ORDER

Mayor Jacobs called the meeting to order at 6:01pm.

2 PLEDGE OF ALLEGIANCE

Led by Mayor and Commissioners

3 ROLL CALL

The meeting was called to order at 6:01 pm by Mayor Jacobs. Present at the meeting were Ashira Mohammed, Commissioner (via Teams); Erik Morrissette, Acting Clerk Commissioner; William Hodgkins, Clerk Commissioner; Musfika Kashem, Vice Mayor.

Additional staff in attendance were Jacobs Horowitz, Town Attorney; Cynthia Garcia-Lima, Town Clerk; and David Lynch, Town Manager

DRAFT

4 DELETIONS OR WITHDRAWALS TO THE AGENDA

There were no deletions or withdrawals to the agenda.

5. PUBLIC COMMENTS RELATED TO AGENDA ITEMS / GOOD & WELFARE

There were no public comments.

Clerk Commissioner Hodgkins made a motion to pass the gavel to Vice Mayor Kashem. Acting Clerk Commissioner Morrissette seconded the motion and it passed with Vice Mayor Kashem, Acting Clerk Commissioner Morrissette, Clerk Commissioner Hodgkins voting yes, Commissioner Mohammed not voting and Mayor Jacobs opposing (3-1).

Vice Mayor Kashem made a motion to pass the gavel to Acting Clerk Commissioner Morrissette. Acting Clerk Commissioner Morrissette seconded the motion, and it passed with Acting Clerk Commissioner Morrissette, Vice Mayor Kashem, Clerk Commissioner Hodgkins voting yes, Commissioner Mohammed not voting and Mayor Jacobs voting no (3-1).

6 DISCUSSION

6.1 Discussion and possible action on Town Re-Districting - Sponsored by Town Attorney Horowitz

Town Attorney Horowitz introduced the item, reminding the Commission that at their last regular commission meeting, consultants from Florida Atlantic University (FAU) had made a preliminary presentation about redistricting. The item was originally scheduled for the February 3 workshop, which did not take place, so it was added to this special meeting.

Attorney Horowitz explained the timing issue with redistricting, noting that under the Town Charter, there's a requirement that commission members be permanent residents of the Town for at least one year prior to the date of election. With elections scheduled for March 2027, the ordinance needed to be adopted by March 2026 to comply with this requirement.

Michael Stamm from FAU presented redistricting options to the Commission. He explained that Pembroke Park's current population according to the 2020 Census was 6,280, meaning each district should have approximately 1,252 people. Based on current population estimates

DRAFT

including new developments, the population was now approximately 6,354, requiring 1,271 people per district.

Mr. Stamm showed that the current districts were significantly out of balance, with District 5 far above average population and District 2 far below. He presented three alternative maps: Alternative 1: Had the lowest, population deviation (under 10%), Alternative 2: Improved equity with approximately 20% deviation, Alternative 3: Another option with approximately 20% deviation.

All three alternatives dramatically improved the current situation, which had a 178% deviation.

During discussion, Vice Mayor Kashem expressed concern about potentially running against another commissioner if districts were redrawn.

Attorney Horowitz clarified that under state law (Chapter 166), districts cannot be drawn with the intent to favor or disfavor any candidate or incumbent, and consultants were not allowed to consider where commissioners lived when creating the maps.

Town Manager Lynch suggested the possibility of eliminating districts entirely and having commissioners run for numbered seats townwide, which would require a charter amendment voted on by residents.

Attorney Horowitz confirmed this was legally possible but noted that if such a ballot measure failed in November, they would still need redistricting.

After discussion, the Commission decided to proceed with Alternative 1 on first reading, with the understanding they could make adjustments before second reading.

ACTION: Clerk Commissioner Hodgkins moved to approve Alternative 1 as the exhibit for Ordinance 2026-007 on first reading. Seconded by Vice Mayor Kashem, and it passed unanimously on a poll vote.

6.2 Recommendation to engage Michael Garcia, Esq. to represent the Town in response to the Complaint filed on behalf of Mayor Geoffrey Jacobs including the filing of any counterclaims deemed to be necessary and appropriate - Sponsored by Town Manager Lynch

Town Manager Lynch presented this item, explaining that it was for the appointment of Michael Garcia to represent the Town in pending litigation.

Mayor Jacobs stated this is not the way business is done in Pembroke Park. The Town manager does not get to go out and attorney shop to find the attorney that he wants to use at the taxpayer's expense. He continued stating the town has council through the Florida League of Cities that when a lawsuit is filed, it goes through the insurance, and this is going to come out of the general funds. This is not the proper procedure that the town follows in doing business when it comes to attorneys.

Attorney Horowitz clarified that when the Town is served with a complaint, it is forwarded to their insurance carrier, the Municipal Insurance Trust (FMIT). He stated that he had spoken with the insurance defense team and adjuster, who indicated there is limited coverage for this matter (up to $100,000). The Town would need to engage counsel and would be reimbursed through the insurance if the Town prevailed in the litigation.
Commissioner Mohammed asked whether the attorney had to be from an approved list, and Town Attorney Horowitz read a statement from the Florida League of Cities stating that this was "reimbursable coverage only" and the Town would need to hire its own counsel and submit the bills for reimbursement later.

Commissioner Mohammed abstained from voting, citing concerns about other pending litigation that might create a conflict of interest.

ACTION: Clerk Commissioner Hodgkins made a motion to engage Michael Garcia, Esq., to represent the Town in response to the complaint filed on behalf of Mayor Geoffrey Jacobs. Second, by Acting Clerk Commissioner Morrissette and the motion passed 3-1, with Commissioner Mohammed abstaining vote and Mayor Jacobs opposed.

7 ORDINANCES

7.1 Consideration and Approval of Ordinance for Re-Districting - Sponsored by Town Attorney Horowitz

ORDINANCE NO: 2026-007

AN ORDINANCE OF THE TOWN OF PEMBROKE PARK, FLORIDA PROVIDING FOR THE RE-CREATION AND RE-ESTABLISHMENT OF THE GEOGRAPHIC BOUNDARIES FOR FIVE (5) ELECTION DISTRICTS IN THE TOWN OF PEMBROKE PARK IN ACCORDANCE WITH SECTION 9 OF THE TOWN CHARTER; PROVIDING FOR FINDINGS AND CONCLUSIONS OF THE TOWN COMMISSION; PROVIDING FOR THE IMPLEMENTATION OF REVISED ELECTION

DISTRICTS TO BE EFFECTIVE FOR THE ELECTIONS TO BE HELD IN THE TOWN OF PEMBROKE PARK, FLORIDA, COMMENCING AT THE GENERAL MUNICIPAL ELECTION IN MARCH 2027, AND THEREAFTER; PROVIDING A FORM OF REQUEST TO THE SUPERVISOR OF ELECTIONS OF BROWARD COUNTY, FLORIDA, TO IMPLEMENT THE REVISED PLAN ESTABLISHED PURSUANT TO THIS RE-DISTRICTING ORDINANCE AND TO CREATE FUNCTIONAL DISTRICTS CONSISTENT WITH THE IDENTIFICATION OF GEOGRAPHIC BOUNDARIES FOR ELECTION DISTRICTS; PROVIDING FOR THE ATTACHMENT OF ELECTION DISTRICT MAPS, CHARTS, STREET ADDRESSES, AND GRAPHIC DESCRIPTIONS, WHICH SHALL BE ATTACHED TO AND MADE A PART OF THIS ORDINANCE, AS EXHIBIT "A;" PROVIDING FOR AUTHORIZATION AND DIRECTION TO THE TOWN ADMINISTRATION TO IMPLEMENT THE TERMS, CONDITIONS, AND PROVISIONS OF THIS ORDINANCE EFFECTIVE FOR THE NEXT ENSUING GENERAL MUNICIPAL ELECTION OF MARCH 2027 OR AS OTHERWISE PROVIDED BY LAW; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.

Town Attorney Horowitz read Ordinance 2026-007 into the record, which provides for the recreation and reestablishment of geographic boundaries for five election districts in the Town of Pembroke Park. He noted that based on the Commission's previous discussion, Alternative 1 offered by FAU consultants would be included as Exhibit A to the ordinance.

ACTION: Commissioner Hodgkins made a motion to approve Ordinance no. 2026-007. Seconded by Vice Mayor Kashem, and it passed unanimously on a poll vote.

8 TOWN ATTORNEY COMMENTS

Town Attorney Horowitz had no comments to report.

9 TOWN MANAGER COMMENTS

Town Manager Lynch had no comments to report.

10 COMMISSIONER COMMENTS

Commissioner Mohammed attempted to bring up several items during commissioner comments, including authorization for conferences and discussion of data centers. Acting Clerk Commissioner Morrissette, who

was chairing the meeting at this point, ruled her comments out of order as they were not related to the special meeting agenda. Commissioner Mohammed continued commenting her concern on budget for commissioners conference trips.

Town Manager Lynch clarified that he had already approved Commissioner Mohammed's conference attendance as it was under the $10,000 threshold requiring Commission approval.

Acting Clerk Commissioner Morrissette had no comments to report.

Vice Mayor Kashem had no comments to report.

Clerk Commissioner Hodgkins had no comment to report.

Mayor Jacobs had no comment to report.

11 ANNOUNCEMENTS

Acting Clerk Commissioner Morrissette announced:

Special Magistrate Hearing, Wednesday, February 18, 2026, at 9:00 a.m.

Workshop Commission Meeting, Wednesday, February 25, 2026, at 6:00 p.m.

Regular Commission Meeting, Wednesday, March 11, 2026, at 7:00 p.m.

SPECIAL EVENT: Food Give Away - Saturday, February 28, 2026, at 9:00 a.m.

12 ADJOURNMENT

With no further business to discuss, the meeting adjourned at 7:07pm.

There were no public comments.

6 RESOLUTIONS

6.1 Consideration and Approval of Resolution for Codification of Charter Amendment Related to Residency of Elected Officials - Sponsored by Clerk Commissioner Hodgkins

RESOLUTION NO: 2026-008

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA AUTHORIZING AND DIRECTING THE TOWN ATTORNEY AND THE TOWN CLERK TO COORDINATE THE CODIFICATION OF THE CHARTER AMENDMENT ADOPTED BY THE ELECTORS OF THE TOWN OF PEMBROKE PARK AT THE GENERAL MUNICIPAL ELECTION ON NOVEMBER 8, 1988 RELATED TO THE RESIDENCY OF ELECTED MUNICIPAL OFFICIALS; DIRECTING THE TOWN ATTORNEY AND THE TOWN CLERK TO TAKE ANY AND ALL ACTION NECESSARY TO IMPLEMENT AND CODIFY THE CHARTER AMENDMENT ADOPTED BY THE ELECTORATE ON NOVEMBER 8, 1988; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

Town Attorney Horowitz presented Resolution No. 2026-008, explaining that this was a housekeeping item to address a historical oversight. He provided extensive background, noting that in November 1988, the voters of Pembroke Park approved a ballot question by approximately 85 percent requiring that elected officials be residents of the town. The ballot question asked: "Should section 9 of the charter of the town of Pembroke Park be amended to require that the electors and those holding elective office be residents of the town of Pembroke Park, Florida?"

The Town Attorney explained that while the voters approved of this amendment and the town commission certified the election results the following day, the charter change was never actually implemented into the written charter. The current charter requires electors to be residents and state law also contains similar requirements, but there is no language requiring elected officials to be town residents.

Commissioner Hodgkins engaged in a colloquy with the Town Attorney to clarify the issue. The Attorney confirmed that the charter has technically been amended since 1988 as approved by the voters, but the codification (printed version) never reflected this change.

Commissioner Hodgkins asked if they even needed to vote since the voters had already approved it, to which the Attorney explained that the commission was simply providing directions to correct the printed version of the charter.

The Town Attorney emphasized that this resolution does not amend the charter, as it has already been amended by the voters. Rather, it provides directions to the town clerk and town attorney's office to work with the codifier to add the language that was approved by voters in 1988.

Vice Mayor Kashem asked if there was any discussion, and heard none, and called for a motion.

ACTION: Clerk Commissioner Hodgkins moved to approve Resolution 2026-008. Seconded by Acting Clerk Commissioner Morrissette, and it passed unanimously on a poll vote.

7 TOWN ATTORNEY COMMENTS

Town Attorney Horowitz had no comments to report.

8 TOWN MANAGER COMMENTS

Town Manager Lynch had no comments to report.

9 COMMISSIONER COMMENTS

Commissioner Mohammed was absent.

Acting Clerk Commissioner Morrissette expressed satisfaction that the matter was finally straightened out and stated it was effective, encouraging the commission to move forward.

Vice Mayor Kashem had no comments to report.

Clerk Commissioner Hodgkins had no comment to report.

Mayor Jacobs was absent.

MINUTES SPECIAL COMMISSION MEETING

6:00 PM - Friday, February 20, 2026
Commission Chambers

The SPECIAL COMMISSION MEETING of the Town of Pembroke Park was called to order on Friday, February 20, 2026, at 6:00 PM, in the Commission Chambers, with the following members present:

PRESENT: Mayor Geoffrey Jacobs; Acting Clerk Commissioner Erik Morrissette; Clerk Commissioner William Hodgkins; Commissioner Ashira Mohammed and Vice Mayor Musfika Kashem

EXCUSED: Commissioner Mohammed left the meeting at 6:31pm.

1 CALL TO ORDER

Mayor Jacobs called the meeting to order at 6:03pm.

2 PLEDGE OF ALLEGIANCE

Led by Mayor and Commissioners

3 ROLL CALL

The meeting was called to order at 6:03 pm by Mayor Jacobs. Present at the meeting were Ashira Mohammed, Commissioner; Erik Morrissette, Acting Clerk Commissioner; William Hodgkins, Clerk Commissioner; Musfika Kashem, Vice Mayor.

Additional staff in attendance were Jacobs Horowitz, Town Attorney; Cynthia Garcia-Lima, Town Clerk; and David Lynch, Town Manager

DRAFT

4 DELETIONS OR WITHDRAWALS TO THE AGENDA

Mayor Jacobs expressed frustration that items 5.1 through 5.8 had been removed from the agenda by the town manager. These accountability items included reports from various departments (building, public services, finance, IT, town clerk, police, and fire) that had been rolled over from previous meetings due to commissioner absences.

A motion was made to pass the gavel to Vice Mayor Kashem, which carried 3-2 with Mayor Jacobs and Commissioner Mohammed opposing. Vice Mayor Kashem then immediately motioned to pass the gavel to Clerk Commissioner Hodgkins, which also carried.

Under Commissioner Hodgkins' leadership, items 10.3 through 10.9 were systematically tabled indefinitely over Mayor Jacobs' objections. These items included discussions on Little Free Libraries, vulnerability assessment, assistant town manager position, fire suppression, building department, ARPA funds, and Christmas tree projects.

5. PUBLIC COMMENTS RELATED TO AGENDA ITEMS / GOOD & WELFARE

Cheryl Robinson addressed the commission, expressing disappointment with the ongoing disputes and encouraging commissioners to work together for the community. She emphasized that commissioners represent the people and should focus on their duties rather than personal conflicts.

6 DISCUSSION

6.1 **Accountability – Sponsored by Mayor Jacobs**

This item was not discussed due to the agenda modifications.

7 ORDINANCES

7.1 Discussion and Possible action on Policy for Acceptance & Tracking of Tickets to Events (Ethics) - Sponsored by Town Attorney Horowitz

RESOLUTION NO: 2026-009

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA APPROVING THE COMMISSION

POLICY ATTACHED HERETO AS EXHIBIT "A," RELATED TO THE ACCEPTANCE, CONTROL AND DISTRIBUTION OF TICKETS TO CHARITABLE AND OTHER EVENTS; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE

Town Attorney Horowitz explained that this resolution establishes a framework for tracking charitable event tickets purchased by the town and distributed to commissioners or staff. The policy addresses recommendations from the Office of Inspector General's county-wide report on ticket tracking and gift disclosure requirements under state ethics laws.

ACTION: Acting Clerk Commissioner Morrissette made a motion to approve Resolution No. 2026-009. Second, Vice Mayor Kashem, and it passed 4-1 with Mayor Jacobs opposing.

7.2 Consideration and Approval for Adoption of Fixed Asset Management SOP Policy - Sponsored by Finance Director Davermann

RESOLUTION NO: 2026-010

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, ADOPTING A FIXED ASSET MANAGEMENT STANDARD OPERATING PROCEDURES POLICY, ATTACHED HERETO AS EXHIBIT "A;" PROVIDING FOR PURPOSE AND AUTHORITY; PROVIDING FOR IMPLEMENTATION AND ADMINISTRATION; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE

Finance Director Davermann explained that the current capitalization threshold of $250 creates administrative burdens and audit findings. Most municipalities use a $5,000 threshold, which would align with materiality principles and reduce tracking costs for items that quickly depreciate.

Mayor Jacobs opposed the change, citing recent financial issues and questioning the timing of any financial policy changes.

ACTION: Acting Clerk Commissioner Morrissette made a motion to approve Resolution No. 2026-10. Second, by Vice Mayor Kashem and it passed 4-1 with Mayor Jacobs opposing.

7.3 Consideration and Approval to Cancel Otis Elevator Maintenance Contract - Sponsored by Public Services Director Odoms

RESOLUTION NO: 2026-011
A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA AUTHORIZING THE CANCELLATION OF THE OTIS ELEVATOR MAINTENANCE CONTRACT; PROVIDING FOR CONFLICT; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.

Director Odoms explained that the town has experienced service challenges with Otis and plans to transition to a new contractor once the new elevator system is installed.

Mayor Jacobs questioned whether Odoms had been directed by the town manager to halt progress on town hall projects, which Odoms confirmed had occurred during an investigation period.

ACTION: Acting Clerk Commissioner Morrissette made a motion to approve Resolution No. 2026-011. Second, by Vice Mayor Kashem and it passed by unanimously vote.

7.4 Consideration of Approval of Agreement with the Broward County Supervisor of Elections for Administration of the 2026 General Election Referendum - Sponsored by Town Clerk Garcia-Lima

RESOLUTION NO: 2026-012
A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, AUTHORIZING THE TOWN TO ENTER INTO AN AGREEMENT WITH THE BROWARD COUNTY SUPERVISOR OF ELECTIONS FOR SERVICES RELATED TO THE ADMINISTRATION OF THE 2026 GENERAL ELECTION REFERENDUM AS REQUIRED BY ORDINANCE 2025 005; PROVIDING FOR AUTHORIZATION, IMPLEMENTATION, AND AN EFFECTIVE DATE.

Town Clerk Garcia-Lima explained that this agreement is necessary for Broward County to administer the tax abatement referendum approved by the commission last year.

ACTION: Acting Clerk Commissioner Morrissette made a motion to approve Resolution No. 2026-012. Second, by Vice Mayor Kashem and it passed by unanimously vote.

8 ORDINANCES - FIRST READING

8.1 Consideration and Approval of Ordinance Amending Commission Meeting Time from 7:00 p.m. to 6:00 p.m. - Sponsored by Town Manager Lynch

ORDINANCE NO: 2026-004
AN ORDINANCE OF THE TOWN OF PEMBROKE PARK, FLORIDA, AMENDING SECTION 2-36 OF THE TOWN'S CODE OF ORDINANCES, ENTITLED "DATE AND TIME FOR REGULAR MEETINGS;" BY SPECIFICALLY CHANGING THE TIME THE COMMISSION MEETS FROM 7:00 P.M. TO 6:00 P.M.; PROVIDING FOR CODIFICATION; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

Town Manager Lynch explained that changing meeting times from 7 PM to 6 PM would create consistency with workshop times and benefit staff who work long days during meeting weeks. Mayor Jacobs and Commissioner Hodgkins opposed the change, arguing that 7 PM meetings allow greater public participation since most people work until 5 or 6 PM.

The item failed for lack of motion to approve.

8.2 Consideration and Approval for Creation of Town-Wide Wellness & Weight-Loss Program With Incentives and Commercial Scale "Walking under the Stars" - Sponsored by Commissioner Mohammed

RESOLUTION NO. 2026-013
A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, AUTHORIZING THE ESTABLISHMENT OF A VOLUNTARY TOWN-WIDE WELLNESS PROGRAM; AUTHORIZING THE PURCHASE OF A COMMERCIAL-GRADE SCALE SUBJECT TO BUDGET AND PROCUREMENT REQUIREMENTS; AUTHORIZING THE USE OF GUEST TRAINERS SUBJECT TO INSURANCE AND WAIVER REQUIREMENTS; AUTHORIZING THE TOWN MANAGER TO ADMINISTER THE PROGRAM; PROVIDING FOR PRIVACY PROTECTIONS; AND PROVIDING FOR AN EFFECTIVE DATE.

Town Attorney Horowitz explained that this voluntary wellness program would include purchasing a commercial-grade scale and allowing guest trainers with appropriate insurance and waivers.

Town Manager Lynch expressed support for the health initiative.

ACTION: Acting Clerk Commissioner Morrissette made a motion to approve Resolution No. 2026-013. Second by Vice Mayor Kashem, and it passed by unanimously vote.

8.3 Consideration to Approve the Capital Improvement Element for Submission to the Department of Commerce - Sponsored by Public Services Director Odoms and Finance Director Davermann

ORDINANCE NO: 2026-005

AN ORDINANCE OF THE TOWN OF PEMBROKE PARK, FLORIDA, AMENDING THE TOWN'S COMPREHENSIVE PLAN TO PROVIDE FOR THE 2026 ANNUAL UPDATE TO THE CAPITAL IMPROVEMENTS ELEMENT, ATTACHED HERETO AS EXHIBIT "A" AND INCORPORATED HEREIN; AUTHORIZING AND DIRECTING TRANSMITTAL TO THE DEPARTMENT OF COMMERCE; PROVIDING FOR SEVERABILITY; PROVIDING FOR CONFLICTS; AND PROVIDING FOR AN EFFECTIVE DATE.

Finance Director Davermann noted that the town had not submitted a capital improvement element in 11 years and this submission covers $36 million in projects over five years across various infrastructure categories.

ACTION: Acting Clerk Commissioner Morrissette made a motion to approve Ordinance No. 2026-005. Second by Vice Mayor Kashem, and it passed by unanimously vote.

8.4 Consideration of Ordinance, amending Chapter 2 of the Town's Code of Ordinances to establish Town departments and repeal Ordinance No. 18-06-01 - Sponsored by Commissioner Mohammed

ORDINANCE NO: 2026-006

AN ORDINANCE OF THE TOWN OF PEMBROKE PARK, FLORIDA, AMENDING CHAPTER 2 OF THE TOWN'S CODE OF ORDINANCES, ENTITLED "ADMINISTRATION;" AMENDING ARTICLE III, ENTITLED "OFFICERS AND EMPLOYEES;" CREATING SECTION 2-56, TO BE ENTITLED "ESTABLISHMENT OF TOWN DEPARTMENTS;" REPEALING ORDINANCE NO. 18-06-01, ADOPTED JUNE 29, 2018; PROVIDING FOR THE CREATION OF CERTAIN DEPARTMENTS PURSUANT TO SEC. 12 OF THE TOWN CHARTER; ELIMINATING THE ADMINISTRATIVE SERVICES DIRECTOR POSITION; PROVIDING FOR CODIFICATION; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

Town Attorney Horowitz explained that this ordinance codifies town departments, establishes HR and IT directors as direct reports to the commission, and eliminates the unfilled administrative services director position.

Clerk Commissioner Hodgkins supported removing the administrative services director position due to its excessive authority, while Mayor Jacobs preferred keeping it available for future use.

ACTION: Acting Clerk Commissioner Morrissette made a motion to approve Ordinance 2026-006. Second by Vice Mayor Kashem, and it passed by unanimously vote.

9 NEW BUSINESS

9.1 Approval of Minutes - Sponsored by Town Clerk Garcia-Lima

November 7, 2025 - Regular Commission Meeting
December 1, 2025 - Final Budget Commission Meeting
December 1, 2025 - Workshop Commission Meeting
December 10, 2025 - Final Budget Commission Meeting
January 7, 2026 - Workshop Commission Meeting

ACTION: Acting Clerk Commissioner Morrissette made a motion to approve the minutes. Second by Vice Mayor Kashem, and it passed by unanimously vote.

9.2 Consideration and approval of ESRI Renewal for 2026 to 2027 - Sponsored by Mark Pakula

IT Director Pakula explained this is a renewal for the town's GIS system used by all departments, with costs decreasing from the previous year.

ACTION: Acting Clerk Commissioner Morrissette made a motion to approve the minutes. Second by Vice Mayor Kashem, and it passed by unanimously vote.

9.3 Vehicle Maintenance Plan Quote and Coverage - Sponsored by Chief DeCoursey

Chief DeCoursey presented a 5-year maintenance plan for new police vehicles totaling $16,325 ($3,265 per vehicle) covering everything except tires over 100,000 miles.

ACTION: Acting Clerk Commissioner Morrissette made a motion to approve the minutes. Second by Vice Mayor Kashem, and it passed by unanimously vote.

DRAFT

10 DISCUSSION

10.1 Discussion on the Creation of a Pembroke Park Community Benefit Fund Modeled After Tamarac's Program - Sponsored by Commissioner Mohammed

Town Attorney Horowitz indicated Commissioner Mohammed requested research into Tamarac's program and direction to explore creating a similar benefit fund.

The commission provided consensus to proceed with research.

10.2 Discussion on Attendance to the ICSC Las Vegas Conference - Sponsored by Commissioner Mohammed

Town Clerk Garcia-Lima explained this item was placed back on the agenda for formal approval after previous consensus approval.
The commission confirmed support for the attendance.

10.3 Discussion on Little Free Libraries - Sponsored by Mayor Jacobs

ACTION: Acting Clerk Commissioner Morrissette made a Motion to table 10.3 for a later time/date. Seconded by Vice Mayor Kashem, and it passed on 3-1 with Mayor Jacobs opposing.

10.4 Discussion on Vulnerability Assessment March 2025 - Sponsored by Mayor Jacobs

ACTION: Acting Clerk Commissioner Morrissette made a motion to table 10.4 for a later time/date. Second by Vice Mayor Kashem and it passed on 3-1 with Mayor Jacobs opposing.

10.5 Discussion on the Assistant Town Manager/Administrative Services Director Position - Sponsored by Mayor Jacobs

Mayor Jacobs asked for discussion and mentioned the town needs an assistant manager as an oversight is needed in the town.

DRAFT

ACTION: Acting Clerk Commissioner Morrissette made a motion to table 10.5 for a later time/date. Second by Vice Mayor Kashem and it passed on 3-1 with Mayor Jacobs opposing.

10.6 Discussion on Taxation/ Utilities/fire suppression - Sponsored by Mayor Jacobs

ACTION: Acting Clerk Commissioner Morrissette made a motion to table 10.6 for a later time/date. Second by Vice Mayor Kashem and it passed on 3-1 with Mayor Jacobs opposing.

10.7 Discussion on the Building Department - Sponsored by Mayor Jacobs

ACTION: Acting Clerk Commissioner Morrissette made a motion to table 10.7 for a later time/date. Second by Vice Mayor Kashem and it passed on 3-1 with Mayor Jacobs opposing.

10.8 Discussion on ARPA funds - Sponsored by Mayor Jacobs

ACTION: Acting Clerk Commissioner Morrissette made a motion to table 10.8 for a later time/date. Second by Vice Mayor Kashem and it passed on 3-1 with Mayor Jacobs opposing.

10.9 Christmas Tree - Sponsored by Mayor Jacobs

ACTION: Acting Clerk Commissioner Morrissette made a motion to table 10.9 for a later time/date. Second by Vice Mayor Kashem and it passed on 3-1 with Mayor Jacobs opposing.

10.10 Discussion and Direction to Prepare and Advance Data Center Regulatory Ordinance for DRC and Planning Review - Sponsored by Commissioner Mohammed (ADDED) Item was not discussed.

11 TOWN ATTORNEY COMMENTS

Town Attorney Horowitz had no additional comments but answered questions about mobile home park protections under the town charter, confirming that the charter prevents rezoning mobile home parks away from that use except by referendum with 65% voter approval.

12 TOWN MANAGER COMMENTS

Town Manager Lynch had no comments to report.

13 COMMISSIONER COMMENTS

Commissioner Mohammed had no comments to report.

Acting Clerk Commissioner Morrissette discussed his role in the Solid Waste Authority and urged support for upcoming waste management recommendations, noting that prices will increase due to landfill capacity issues.

Vice Mayor Kashem had no comments.

Clerk Commissioner Hodgkins had no comments.

Mayor Jacobs raised concerns about the PayActive service that provides employee pay advances, questioning whether the town should offer payday loan-type services. HR Director Frishman explained it's a free ADP service with minimal fees. Mayor Jacobs also addressed Inspector General Jody Breeze about alleged Sunshine Law violations and announced special commission meetings scheduled for the following week to address accountability items.

14 ANNOUNCEMENTS

14.1 Special Commission Meeting, Wednesday, February 25, 2026, at 5:30 p.m.
Workshop Commission Meeting, Wednesday, February 25, 2026, at 6:30 p.m.
Regular Commission Meeting, Wednesday, March 11, 2026, at 7:00 p.m.
Food Giveaway, Saturday, February 28, 2026, at 9:00 a.m.

15 ADJOURNMENT

With no further business to discuss, the meeting adjourned at 8:30pm.

MINUTES SPECIAL COMMISSION MEETING

6:00 PM - Monday, February 23, 2026
Commission Chambers

The SPECIAL COMMISSION MEETING of the Town of Pembroke Park was called to order on Monday, February 23, 2026, at 6:00 PM, in the Commission Chambers, with the following members present:

PRESENT: Mayor Geoffrey Jacobs; Commissioner Ashira Mohammed (participating remotely)

EXCUSED: Acting Clerk Commissioner Erik Morrissette; Clerk Commissioner William Hodgkins and Vice Mayor Musfika Kashem

No quorum was established.

1 CALL TO ORDER

Mayor Jacobs called the meeting to order at 6:00pm.

2 PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was recited.

3 ROLL CALL

The meeting was called to order at 6:00 pm by Town Clerk. Present at the meeting were Ashira Mohammed, Commissioner (remotely); and Geoffrey Jacobs, Mayor.

Additional staff in attendance were Jacobs Horowitz, Town Attorney; Cynthia Garcia-Lima, Town Clerk; and David Lynch, Town Manager

DRAFT

4 DELETIONS OR WITHDRAWALS TO THE AGENDA

No agenda modifications were discussed due to lack of quorum.

5. PUBLIC COMMENTS RELATED TO AGENDA ITEMS / GOOD & WELFARE

No public comments were made due to lack of quorum.

6 PRESENTATION

6.1 Report from the Building Department - Building Department Manager Louis

6.2 Report from the Police Department - Chief DeCoursey

6.3 Report from the Town Clerk Department - Town Clerk Garcia-Lima

6.4 Report from the Finance Department - Finance Director Davermann

6.5 Report from the Public Services Department - Public Services Director Odoms

6.6 Report from the IT Department - IT Director Pakula

6.7 Accountability - Sponsored by Mayor Jacobs

7 DISCUSSION

7.1 Discussion on Little Free Libraries - Sponsored by Mayor Jacobs (ADDED)

7.2 Discussion on Vulnerability Assessment March 2025 - Sponsored by Mayor Jacobs (ADDED)

8 TOWN ATTORNEY COMMENTS

No attorney comments were provided due to lack of quorum.

9 TOWN MANAGER COMMENTS

No town manager comments were provided due to lack of quorum.

10 COMMISSIONER COMMENTS

Commissioner Mohammed had no comments.

Acting Clerk Commissioner Morrissette had no comments.

Vice Mayor Kashem had no comments.

Clerk Commissioner Hodgkins had no comments.

Mayor Jacobs noted that the Town Clerk had contacted each commissioner prior to the meeting. Commissioners Kashem and Morrissette confirmed they would not be attending, while Commissioner Hodgkins did not respond to contact attempts.

With only two commissioners present, Mayor Jacobs declared there was no quorum to conduct official business. The Mayor expressed strong criticism of the absent commissioners and Town Manager David Lynch, stating this was the third consecutive meeting where commissioners failed to attend, which he characterized as abandoning their positions. Mayor Jacobs accused Lynch of manipulating the commissioners and preventing them from attending meetings to avoid accountability discussions.

DRAFT

The Mayor emphasized that Pembroke Park operates under a commission form of government, not a manager form, and criticized the continued absence of commissioners as detrimental to both residents and staff. He announced plans to invite the Office of Inspector General (OIG) to future meetings and indicated another meeting was scheduled for the following evening.

He indicated that another meeting would be attempted the following evening at 6:00 PM and expressed doubt about commissioner attendance at future meetings.

MINUTES SPECIAL COMMISSION MEETING

6:00 PM - Tuesday, February 24, 2026
Commission Chambers

The SPECIAL COMMISSION MEETING of the Town of Pembroke Park was called to order on Tuesday, February 24, 2026, at 6:00 PM, in the Commission Chambers, with the following members present:

PRESENT:	Mayor Geoffrey Jacobs; Commissioner Ashira Mohammed (participating remotely)
EXCUSED:	Acting Clerk Commissioner Erik Morrissette; Clerk Commissioner William Hodgkins and Vice Mayor Musfika Kashem

No quorum was established.

1 CALL TO ORDER

Mayor Jacobs called the meeting to order at 6:00pm.

2 PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was recited.

3 ROLL CALL

The meeting was called to order at 6:00 pm by Town Clerk. Present at the meeting were Ashira Mohammed, Commissioner (remotely), and Geoffrey Jacobs, Mayor.

Additional staff in attendance were Jacobs Horowitz, Town Attorney; Cynthia Garcia-Lima, Town Clerk; and David Lynch, Town Manager

4 DELETIONS OR WITHDRAWALS TO THE AGENDA

No agenda modifications were discussed due to lack of quorum.

5. PUBLIC COMMENTS RELATED TO AGENDA ITEMS / GOOD & WELFARE

Despite the lack of quorum, Mayor Jacobs allowed public comment. Howard Clark III of 2405 Howard Road addressed the Commission with two concerns. First, he reported ongoing noise issues from a speaker company testing equipment on Saturday and Sunday mornings starting at 7:30 AM at the mini storage facility in bay E or F on John P. Lyons Road. He stated he had called police and filed reports about this disturbance. Mayor Jacobs indicated he would ensure this matter was addressed.

Mr. Clark's second concern involved questioning Mayor Jacobs' residency in Pembroke Park, referencing news reports suggesting the Mayor lives in St. Lucie County with a homestead exemption there while representing Pembroke Park. He expressed confusion about the frequency of special meetings and questioned how someone not residing in the town could vote on ordinances and laws.

Mayor Jacobs responded that he has maintained residency in Pembroke Park since 2016 and does have a house in St. Lucie County where his wife and children live, as well as a farm in Osceola County. He clarified there has never been a homestead exemption on the Wellington property mentioned and directed questions about the town's media coverage to the Town Manager, noting that the Town Manager had already left and that three commissioners were unavailable to respond to concerns.

6 PRESENTATION

6.1 Report from the Building Department - Building Department Manager Louis

6.2 Report from the Police Department - Chief DeCoursey

6.3 Report from the Town Clerk Department - Town Clerk Garcia-Lima

7.6 Discussion on ARPA funds - Sponsored by Mayor Jacobs (ADDED)

7.7 Christmas Tree - Sponsored by Mayor Jacobs (ADDED)

8 TOWN ATTORNEY COMMENTS

No attorney comments were provided due to lack of quorum.

9 TOWN MANAGER COMMENTS

No town manager comments were provided due to lack of quorum.

10 COMMISSIONER COMMENTS

Commissioner Mohammed had no comments.

Acting Clerk Commissioner Morrissette had no comments.

Vice Mayor Kashem had no comments.

Clerk Commissioner Hodgkins had no comments.

Mayor Jacobs noted that without a quorum, the meeting could not proceed with official business. He expressed frustration that this was the fourth meeting since December 26th regarding accountability matters where three commissioners chose not to attend, preventing the town from moving

forward with important items. The Mayor emphasized that elected officials are there to serve the community and that the absence of a quorum prevents them from doing the work for the people of Pembroke Park.

11 ANNOUNCEMENTS

Quote For	**TOWN OF PEMBROKE PARK** 3150 SW 52ND AVENUE PEMBROKE PARK FL 33023 954-966-4600

Description of Work

FIRE ALARM SYSTEM INSTALLATION QUOTE

- Please read the narratives in this quote. There may be additional details and fees to consider beyond the pricing on this quote.

Note: Permitting & additional inspection labor should not be on the pricing of this quote. It will be invoiced separately

We propose to install new devices to bring building up to code.

- Will add new smoke detectors
- Will install new pull stations and move existing ones closer to the exit doors.
- Will add new horn strobes and strobes (ceiling mounted)
- Will add two power boosters for horn strobes (1 per floor)

ADDITIONAL COSTS TO CONSIDER

- Fire alarm drawings/designing $1025.00 with copy given of floor plan in CAD format. $1,800.00 without CAD files. Covers preparation of the permit package.
- Engineers sealing fee $225.00
- Permit fees will be invoiced separately for the COST OF PERMITTING
- Inspections with city has been assessed in this quote. Additional city inspections or inspections for other trades will be will be invoice separately at $95.00+tax per hour, per technician
- Permit handling fee of $450.00 will apply. Fees can be waived if others submit/pick up permits/plans. Has not been added to pricing of this quote. It is invoiced separately with permit fees.
- Notice of Commencement filing will be invoice with permit costs. If the permit falls under a master permit, there will be no filing requirement.
- Client responsible for any scissor lift rental fees, if needed
- Fees may apply for special insurance requirements and/or additional documents.

City Fire Inc. is not a licensed mechanical contractor. We do not perform any mechanical / air condition work. Including installation of any new duct smoke detectors, new sample tubes or new ac shut down wiring. We also will not connect any wiring or devices to any air handlers or any associated air condition components / control panels/boards. If such work is required, please contact a Licensed mechanical contractor. City Fire will not assume any responsibility for any issues related to the air condition systems.

TERMS

Scope of work under $1,000.00+tax - No deposit invoice required

Scope of work over $1,000.00+tax - 40% Down for plan creation, permitting & parts ordering. 40% due upon start, Balance due, (including permit fees & inspection labor) at time of city acceptance testing.

Additional notes/exclusions

City Fire is not responsible for any drywall repairs, patching or painting. We do make an effort to be as careful as possible to avoid any unnecessary repairs. If there is any digging, chipping, hammering, excavating or trenching. We will backfill. We will not repair, grow or replace grass, bushes or landscaping unless specified in this quote.

Ceiling tiles may be effected and will need replacement. City Fire is not responsible for ceiling tile replacements.

- An approved change order will be needed if there are requests beyond this quote. Additionally, This quote is itemized and if the item in question is not on this quote, it is not covered. Work may stop until change order is approved.
- Job site conditions or unforeseen building issues could effect this quote pricing. The local Fire department may request changes or additional devices to be added. If so, additional charges may apply.
- City Fire Inc. is not a licensed mechanical contractor. We do not perform any mechanical / air condition work. Including installation of any new duct smoke detectors, new sample tubes or new ac shut down wiring. We also will not connect any wiring or devices to any air handlers or any associated air condition components / control panels/boards. If such work is required, please contact a Licensed mechanical contractor. City Fire will not assume any responsibility for any issues related to the air condition systems.

WARRANTY COVERAGE

The period of warranty is 1 year from the city acceptance date/project end date. EXCLUSIONS: City Fire Inc. will not have any liability or obligation under this limited warranty, in case of, 1. Any defect caused by misuse or abuse of the product. 2. Damage caused by natural disasters. 3. Damage caused by unauthorized modification.

Additional notes:

- Have you ordered your KNOX BOX? You may be required to install a Knox Box on the building. You can order your Knox boxes online at https://www.knoxbox.com/

Agenda Item Report

Subject:	JP Lyons Lane Drainage Improvements: Construction Observation & Engineering Certification Services (Keith- Addendum #02) - Sponsored by Public Services Director Odoms
Meeting Date:	Special Commission Meeting - March 13, 2026
Prepared For:	Town Commission
Staff Contact:	Jeff Odoms, Public Services Director
Dept/Group:	Public Works
Recommendation for Counsel to consider:	
Background Information:	The JP Lyons Lane Drainage Improvements Project has completed 100% design and is ready for construction. The original professional services agreement with KEITH included engineering design services but did not include construction-phase engineering services. As the project advances into construction, professional engineering oversight is required to: • Review contractor shop drawings and submittals • Conduct periodic construction observations • Respond to contractor Requests for Information (RFIs) • Participate in inspections and punch list preparation • Review as-built drawings • Provide final engineering certification to permitting agencies These services are necessary to ensure construction compliance with approved plans and regulatory requirements. Scope of Services Per Contract Addendum #02, KEITH will provide: • Construction observation services • Shop drawing and submittal review • Pre-construction meeting participation • Periodic site visits • Semi-final and final inspections

	• As-built review (maximum two review cycles) • Final certification to applicable permitting agencies Services will be billed on a time-and-material basis, not to exceed $45,000. If billing reaches 75% of the authorized amount, KEITH will notify the Town and submit an additional addendum if required.
Staff Recommendations:	Legal / Compliance Considerations • Engineering certification is required for regulatory closeout. • Professional oversight reduces liability exposure associated with nonconforming construction. • Addendum maintains all terms and conditions of the original agreement. • This action does not expand the project scope beyond construction oversight and certification. Strategic Considerations • Construction-phase engineering services are the best standard practice for municipal infrastructure projects. Approval will: • Protect design integrity • Reduce contractor claims exposure • Ensure regulatory compliance • Support defensible project documentation
Procurement:	
Financial Implications:	Total Authorization: $45,000 (Not-to-Exceed) Funding Source: John P. Lyons Phase II Budget 401-941002-693200-00-3354 (as applicable) The Not-to-Exceed structure provides fiscal control while allowing flexibility for construction duration variability. Failure to authorize construction-phase engineering services may result in: • Delays in permit closeout • Increased contractor dispute risk • Increased change order exposure • Inability to obtain final stormwater certification

KEITH Project Number: 12609.00
Contract Addendum: #02
Project Manager: Michael Pinzon

DESCRIPTION OF ADDITIONAL SERVICES

CONSTRUCTION / PROJECT MANAGEMENT SERVICES

Task 801 Construction Observation for Engineering Certification
KEITH will provide construction engineering services in order to ensure the integrity of the design intent and certify to the CLIENT and other jurisdictional agencies that the construction work has been completed in substantial compliance with the approved documents and permits. Services included are described as follows and are anticipated to take three (3) months.

Shop Drawing Reviews
KEITH will review shop drawings, samples, and calculations, which the selected contractor is required to submit for review. This review will only be for conformance with the design concept of the project and compliance with the information provided on the design drawings and specifications. Such review will not extend to methods, means, techniques, construction sequence(s) or procedures, or to safety precautions and related programs. KEITH will also determine the acceptability, subject to CLIENT approval, of substitute materials and equipment proposed by contractors.

Periodic Site Visits and Construction Observation
KEITH will visit the Project at intervals appropriate to the various stages of construction, as KEITH deems necessary to observe as an experienced and qualified design professional to review the progress and quality of the various aspects of the contractor's work. KEITH will coordinate and attend one (1) Pre-construction meeting. If required by the CLIENT, KEITH will attend or participate in CLIENT scheduled coordination and progress meetings or telephone conferences. These services will be invoiced on a time and material basis in accordance with our Professional Service Fee schedule (attached). Re-tests and failed inspections will be invoiced based on this same Fee schedule.

As-Builts Review
KEITH will review the record drawings (as-builts) to ensure substantial conformance to the approved plans. KEITH will only review and reject any particular as-built plan set, a maximum of two (2) times; any additional review will be considered additional services. The contractor will be expected to have the as-builts revised in accordance with all comments.

Final Inspections
KEITH will participate, with the CLIENT's representative, in a semi-final inspection for the purpose of determining if the project is substantially complete and participate in the preparation of a written "Punch List" of all incomplete, defective, or deficient items. Upon notice from the CLIENT, participate in a final

inspection together with CLIENT and contractor representatives to assure that all “Punch List” items are complete, and the work is indeed completed in accordance with all contract documents. Upon completion of the final inspection, certify, in writing, that the work in-place is acceptable, subject to any conditions therein expressed. This service is anticipated to be two (2) inspections. Additional inspection(s) will be invoiced based on the attached Fee schedule.

Issue Clarifications
KEITH will issue all instructions and revisions of the CLIENT to Contractor(s); issue necessary interpretations and clarifications of the contract documents; have authority, as the City’s representative to require special inspection or testing of the work; act as initial interpreter of the requirements of the contract documents and judge of the acceptability of the work there under, and make decisions on all claims of the CLIENT and contractor(s) relating to the acceptability of the work or the interpretation of the requirements of the contract documents pertaining to the execution and progress of the work.

Meetings and Conference Calls
KEITH will attend and or participate in project meetings and conference calls as requested by the CLIENT and CITY. KEITH will review requests for information prepared by the Contractor and respond accordingly to all parties. KEITH will prepare drawings and supplemental information needed to address the contractor’s request for information.

Final Certification
KEITH will prepare final certification to all appropriate permitting agencies utilizing record drawings for the design from the survey information supplied by the contractor, or by other means agreed to by both KEITH and CLIENT.

Note: It is the Contractor’s responsibility to coordinate through KEITH the scheduling of testing. KEITH will represent the CLIENT in performing periodic observation of construction as necessary to confirm construction is in accordance with the approved plans.

The Construction Engineering and Certification for the work is for an anticipated period of one (1) month beyond the construction completion date for certifications.

We anticipate the following items requiring as-built certification:

- Stormwater System

Note: Construction-related surveying (stakeout, as–built plans, etc.) and testing (densities, concrete, LBR’S, etc.) services are not included in this Agreement.

*NOTE: The Construction Observation for Engineering Certification fee is estimated, and this work will be done/billed on a time and material basis in accordance with our current Professional Service Fee Schedule. If billing reaches 75% an additional contract addendum will be submitted to the CLIENT. **

SCHEDULE

CONSTRUCTION / PROJECT MANAGEMENT SERVICES		
Task 801	Construction Observation for Engineering Certification	12-15 Months

COMPENSATION

CONSTRUCTION / PROJECT MANAGEMENT SERVICES		
Task 801	Construction Observation for Engineering Certification	$45,000 (Hourly/NTE)*
Total Fee		**$45,000 + reimbursables**

**NOTE: The above "(Hourly/Estimate)" project task fees are based on the durations listed in the Project Schedule above. If the Task scheduled durations exceed the estimated time listed in the Project Schedule above, the "(Hourly/Estimate)" fee will increase proportionally. This work will be billed in accordance with KEITH current Professional Service Fee Schedule. If the billing reaches 75% of the estimated fee, an additional contract addendum will be submitted to the CLIENT.*

The CLIENT is required to execute this Addendum and return it to the CONSULTANT prior to commencement of the additional services described herein. All items, terms, and conditions of the original Agreement (as amended to include the scope defined herein) remain unchanged and in full force and effect.

IN WITNESS WHEREOF, CONSULTANT and CLIENT have executed this agreement the day and year indicated below.

Agenda Item Report

Subject:	Consideration and approval to Procure 350 kW Emergency Generator and 1200A Automatic Transfer Switch (ATS) - Sponsored by Public Services Director Odoms
Meeting Date:	Special Commission Meeting - March 13, 2026
Prepared For:	Town Commission
Staff Contact:	Jeff Odoms, Public Services Director
Dept/Group:	Public Works
Recommendation for Counsel to consider:	Staff recommend that the Town Commission authorize procurement of a 350 kW standby generator and 1200-amp Automatic Transfer Switch (ATS) under Florida Sheriff's Association Contract No. FSA23-EQU21.1 and authorize the Town Manager to execute associated purchase documents consistent with FDEM Hazard Mitigation Grant Program requirements
Background Information:	The emergency generator project is partially funded through the Florida Division of Emergency Management (FDEM) Hazard Mitigation Grant Program (HMGP), with required local match funds provided by the Town. The project will provide backup electrical power in the event of loss of Florida Power & Light (FPL) service due to hurricanes or other emergency conditions. The system will: • Automatically detect utility power loss • Initiate generator startup • Transfer electrical load via Automatic Transfer Switch • Restore utility power upon stabilization • This investment strengthens continuity of government operations and emergency response capability. **Equipment Overview -** Generator 350 kW standby capacity • 120/240V, 3-phase • 500-gallon subbase fuel tank • NFPA 110 compliant • Sound-attenuated enclosure rated 175 mph wind load • 2-year/1500-hour warranty **Automatic Transfer Switch (ATS)** • 1200A capacity • UL 1008 certified for Emergency Systems

	• 100% continuous current rating • Microprocessor-based controller • NEMA 3R outdoor enclosure **Estimated lead times:** • Generator: approximately 32 weeks ATS: approximately 29 weeks
Staff Recommendations:	**Compliance Considerations** • Grant reimbursement contingent upon strict documentation • Installation must meet NFPA and local code standards **StrategicConsiderations** • **The project enhances:** • Infrastructure resiliency • Emergency preparedness • FEMA mitigation alignment • Long-term disaster recovery cost reduction Acceptance of hazard mitigation funding reflects proactive capital planning. **Risk Considerations** • Operational Risk (If Not Approved) • Loss of critical facility power during storms • Disruption to emergency operations • Fiscal Risk • Price validity windows are limited • Long lead times may expose Town to cost escalation
Procurement:	
Financial Implications:	• Generator Cost: $158,613 ATS Cost: Not to exceed 80K

AGREEMENT
BETWEEN THE TOWN OF PEMBROKE PARK
AND
TRADEWINDS POWER CORP.

THIS AGREEMENT is entered into on_____, 2026 between the Town of Pembroke Park, a municipal corporation with principal offices located at 3150 SW 52nd Avenue, Pembroke Park, FL ("Town") and Tradewinds Power Corp., a corporation authorized to do business in the State of Florida, with principal office located at 5820 Northwest 84th Avenue, Miami, FL 33166 ("Contractor"). The parties hereby agree to the following terms and conditions.

1. In return for valuable consideration, Contractor shall comply with the terms and conditions of the Florida Sheriff's Association ("FSA") Cooperative Purchasing Program: Contract # FSA23-EQU21.1, Spec 176 ("Purchasing Contract") attached hereto as Exhibit A and the Contractor's proposal submitted to the Town (the "Proposal") attached hereto as Exhibit B. All terms and conditions of the contract documents set forth in Exhibit A, Exhibit B are incorporated herein as if set forth in full, except as modified by this Agreement. In the event of a conflict between this Agreement, Exhibit A and Exhibit B, this Agreement shall prevail, followed by Exhibit B.

2. Upon execution of this Agreement, all references made to FSA, as the lead agency in the Purchasing Contract, shall be interpreted as pertaining to the Town of Pembroke Park, and all terms and conditions of Exhibit A shall be deemed as having been implemented for use within the Town. It is understood that wherever the words "agency name" or "agency board name" appear, they shall be read as "Town of Pembroke Park" and "Town of Pembroke Park Town Commission."

3. Term. The term of this Agreement shall be concurrent with the term set forth in Exhibit A.

4. Contract Sum and Payments:

   The price for the Product is as set forth in Exhibit B. All payments shall be governed by the Local Government Prompt Payment Act, F.S., Part VII, Chapter 218.

5. **Insurance: In addition to the insurance requirements stated in the Purchasing Agreement, Contractor shall obtain at Contractor's expense all necessary insurance in such form and amount as specified in the original bid document or as required by the Town's Risk Manager before beginning work under this Agreement including, but not limited to, Workers' Compensation, Commercial General Liability, and all other insurance as required by the Town. Contractor shall maintain such insurance in full force and effect during the life of this Agreement. Contractor shall provide to the Town's Risk and Safety Manager certificates of all insurances required under this section prior to beginning any work under this Agreement. The Contractor will ensure that all subcontractors comply with the above guidelines and will retain all necessary insurance in force throughout the term of this agreement. The following minimal insurance coverage shall be provided:**

a. Worker's Compensation Insurance: The Contractor shall procure and maintain for the life of this Agreement, Workers' Compensation. Insurance covering all employees with limits meeting all applicable state and federal laws. This coverage shall include Employer's Liability with limits meeting all applicable state and federal laws. This coverage must extend to any sub-Contractor that does not have their own Workers' Compensation and Employer's Liability Insurance. The policy must contain a waiver of subrogation in favor of the Town of Pembroke Park, executed by the insurance company. Sixty-(60) days notice of cancellation is required and must be provided to the Town of Pembroke Park via Certified Mail.

b. Comprehensive General Liability: The Contractor shall procure and maintain, for the life of this Agreement, Comprehensive General Liability Insurance. This coverage shall be on an "Occurrence" basis. Coverage shall include Premises and Operations; Independent Contractors' Products and Completed Operations and Contractual Liability. This policy shall provide coverage for death, personal injury or property damage that could arise directly or indirectly from the performance of this Agreement.

c. Business Automobile Liability: The Contractor shall procure and maintain, for the life of the Agreement, Business Automobile Liability Insurance.

d. The Minimum Limits of Coverage shall be $1,000,000 per occurrence, Combined Single Limit for Bodily Injury Liability and Property Damage Liability.

e. The Town must be named as an additional insured for General Liability coverage unless Owners and Contractors' Protective Coverage is also provided, or required. Sixty (60) days written notice must be provided to the Town via Certified Mail in the event of cancellation.

f. The minimum limits of coverage shall be $1,000,000 per Occurrence, Combined Single Limit for Bodily Injury Liability and Property Damage Liability. This coverage shall be an "Any Auto" type policy. The Town must be listed as an Additional Insured under the Policy. Sixty (60) days written notice must be provided to the Town via Certified Mail in the event of cancellation.

g. In the event that sub-contractors used by the Contractor do not have insurance, or do not meet the insurance limits, Contractor shall indemnify and hold harmless the Town for any claim in excess of the sub-Contractors' insurance coverage, arising out of negligent acts, errors or omissions of the sub-contractors.

h. Contractor shall not commence work under this Agreement until all insurance required as stated herein has been obtained and such insurance has been approved by the Town.

i. Contractor shall indemnify and hold the Town harmless for any damages resulting from failure of the Contractor to take out and maintain such insurance.

Contractor's Liability Insurance policies shall be endorsed to add the Town as an additional insured. Contractor shall be responsible for payment of all deductibles and self-insurance retentions on Contractor's Liability Insurance policies.

6. Indemnification:

   a. The Contractor shall indemnify and hold harmless the Town, its elected and appointed officials, employees, and agents from any and all claims, suits, actions, damages, liability, and expenses (including attorneys' fees) in connection with loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the Town or its elected or appointed officials and employees. The above provisions shall survive the termination of this Agreement and shall pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination hereof.

   b. Upon completion of all services, obligations and duties provided for in this Agreement, or in the event of termination of this Agreement for any reason, the terms and conditions of this Article shall survive indefinitely.

   c. The Contractor shall pay all claims, losses, liens, settlements or judgments of any nature whatsoever in connection with the foregoing indemnifications including, but not limited to, reasonable attorney's fees (including appellate attorney's fees) and costs.

   d. The Town and Contractor recognize that various provisions of this Agreement, including but not limited to this Section, provide for indemnification by the Contractor and requires a specific consideration be given there for. The Parties therefore agree that the sum of Ten Dollars and 00/100 ($10.00), receipt of which is hereby acknowledged, is the specific consideration for such indemnities, and the providing of such indemnities is deemed to be part of the specifications with respect to the services to be provided by Contractor. Furthermore, the Town and Contractor understand and agree that the covenants and representations relating to this indemnification provision shall serve the term of this Agreement and continue in full force and effect as to the Town's and the Contractor's responsibility to indemnify.

   e. Town reserves the right to select its own legal counsel to conduct any defense in any such proceeding and all costs and fees associated therewith shall be the responsibility of Contractor under the indemnification agreement.

   f. Nothing contained herein is intended nor shall it be construed to waive Town's rights and immunities under the common law or Florida Statute 768.28 as amended from time to time.

7. Assignment and Subcontracting:

   Contractor shall not transfer or assign the performance required by this Agreement without the prior consent of the Town. This Agreement, or any portion thereof, shall not be subcontracted without the prior written consent of the Town.

8. Termination:

   a. Termination for Convenience: This Agreement may be terminated by the Town for convenience, upon seven (7) days of written notice by the Town to the Contractor for such termination in which event the Contractor shall be paid its compensation for services performed to termination date, including services reasonably related to termination. In the event that the Contractor abandons this Agreement or causes it to be terminated, Contractor shall indemnify the Town against loss pertaining to this termination.

   b. Default by Contractor: In addition to all other remedies available to the Town, this Agreement shall be subject to cancellation by the Town for cause, should the Contractor neglect or fail to perform or observe any of the terms, provisions, conditions, or requirements herein contained, if such neglect or failure shall continue for a period of thirty (30) days after receipt by Contractor of written notice of such neglect or failure.

9. Public Records

   A. Public Records: CONTRACTOR shall comply with The Florida Public Records Act as follows:

   1. Keep and maintain public records in the CONTRACTOR's possession or control in connection with the CONTRACTOR's performance under this Agreement that ordinarily and necessarily would be required by the Town in order to perform the service.

   2. Upon request by Town's records custodian, provide Town with a copy of requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law.

   3. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of this Agreement.

   4. Upon completion of this Agreement or in the event of termination of this Agreement by either party, any and all public records relating to this Agreement in the possession of CONTRACTOR shall be delivered by CONTRACTOR to Town, at no cost to Town, within seven days. All records stored electronically by CONTRACTOR shall be delivered to TOWN in a format that is compatible with Town's information technology systems. Once the public records have been

delivered to Town upon completion or termination of this Agreement, CONTRACTOR shall destroy any and all duplicate public records that are exempt or confidential and exempt from public record disclosure requirements.

5. CONTRACTOR'S failure or refusal to comply with the provisions of this Section shall result in the immediate termination of this Agreement by the Town.

IF CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT 954-966-4600, TOWNCLERK@TPPFL.GOV OR BY MAIL: TOWN OF PEMBROKE PARK, 3150 SW 52nd AVENUE, PEMBROKE PARK, FL 33023.

10. Agreement Subject to Funding

This agreement shall remain in full force and effect only as long as the expenditures provided for in the Agreement have been appropriated by the Town Commission of the Town of Pembroke Park in the annual budget for each fiscal year of this Agreement, and is subject to termination based on lack of funding.

14. Governing law and venue:

This Agreement shall be governed by the laws of the State of Florida as now and hereafter in force. The venue for actions arising out of this agreement is fixed in Broward County, Florida.

15. Signatory Authority:

The Contractor shall provide the Town with copies of requisite documentation evidencing that the signatory for Contractor has the authority to enter into this Agreement.

16. Severability; Waiver of Provisions

Any provision in this Agreement that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions hereof or affecting the validity or enforceability of such provisions in any other jurisdiction. The non-enforcement of any provision by either party shall not constitute a waiver of that provision nor shall it affect the enforceability of that provision or of the remainder of this Agreement.

17. No Construction Against Drafting Party:

Each party to this Agreement expressly recognizes that this Agreement results from the negotiation process in which each party was represented by counsel and contributed to the drafting of this Agreement. Given this fact, no legal or other presumptions against the party drafting this Agreement concerning its construction, interpretation or otherwise

accrue to the benefit of any party to the Agreement, and each party expressly waives the right to assert such a presumption in any proceedings or disputes connected with, arising out of, or involving this Agreement.

18. Notice:

Any notice, demand, communication, or request required or permitted hereunder shall be in writing and delivered in person; sent by U.S. Certified Mail, U.S. Express Mail, air or ground courier services or by messenger service, addressed to the party for whom it is intended at the following addresses.

TOWN

Geoffrey Jacobs, Mayor
Town of Pembroke Park
3150 SW 52nd Avenue
Pembroke Park, Florida 33023
gjacobs@tppfl.gov

With a copy to Town Attorney at the following address:

Jacob G. Horowitz, Esq.
Goren, Cherof, Doody & Ezrol, P.A.

CONTRACTOR

Tradewinds Power Corporation
5820 N.W. 84th Avenue
Miami, FL 33166
Telephone No. (305) 592-9745

Scrutinized Companies:

a. CONTRACTOR certifies that it and its subcontractors are not on the Scrutinized Companies that Boycott Israel List. Pursuant to Section 287.135, F.S., the Town may immediately terminate this Agreement at its sole option if the CONTRACTOR or its subcontractors are found to have submitted a false certification; or if the CONTRACTOR, or its subcontractors are placed on the Scrutinized Companies that Boycott Israel List or is engaged in the boycott of Israel during the term of the Agreement.

b. If this Agreement is for more than one million dollars, the CONTRACTOR certifies that it and its subcontractors are also not on the Scrutinized Companies

with Activities in Sudan, Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or engaged with business operations in Cuba or Syria as identified in Section 287.135, F.S. Pursuant to Section 287.135, F.S., the Town may immediately terminate this Agreement at its sole option if the CONTRACTOR , its affiliates, or its subcontractors are found to have submitted a false certification; or if the CONTRACTOR, its affiliates, or its subcontractors are placed on the Scrutinized Companies with Activities in Sudan List, or Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or engaged with business operations in Cuba or Syria during the term of the Agreement.

c. The CONTRACTOR agrees to observe the above requirements for applicable subcontracts entered into for the performance of work under this Agreement.

d. As provided in Subsection 287.135(8), F.S., if federal law ceases to authorize the above-stated contracting prohibitions then they shall become inoperative.

19. E-Verify. CONTRACTOR certifies that it is aware of and complies with the requirements of Section 448.095, Florida Statues, as may be amended from time to time and briefly described herein below.

20.1 Definitions for this Section:

20.1.1 "Contractor" means a person or entity that has entered or is attempting to enter into a contract with a public employer to provide labor, supplies, or services to such employer in exchange for salary, wages, or other remuneration. "Contractor" includes, but is not limited to, CONTRACTOR or consultant.

20.1.2 "Subcontractor" means a person or entity that provides labor, supplies, or services to or for a contractor or another subcontractor in exchange for salary, wages, or other remuneration.

20.1.3"E-Verify system" means an Internet-based system operated by the United States Department of Homeland Security that allows participating employers to electronically verify the employment eligibility of newly hired employees.

20.2 Registration Requirement; Termination:

Pursuant to Section 448.095, Florida Statutes, effective January 1, 2021, Contractors, shall register with and use the E-verify system in order to verify the work authorization status of all newly hired employees. Contractor shall register for and utilize the U.S. Department of Homeland Security's E-Verify System to verify the employment eligibility of:

20.2.1 All persons employed by a Contractor to perform employment duties within Florida during the term of the contract;

20.2.2 All persons (including subconsultants/subcontractors) assigned by Contractor to perform work pursuant to the contract with the Town of Pembroke

Park. The Contractor acknowledges and agrees that registration and use of the U.S. Department of Homeland Security's E-Verify System during the term of the contract is a condition of the contract with the Town of Pembroke Park; and

20.2.3 The Contractor shall comply with the provisions of Section 448.095, Fla. Stat., "Employment Eligibility," as amended from time to time. This includes, but is not limited to registration and utilization of the E-Verify System to verify the work authorization status of all newly hired employees. Contractor shall also require all subcontractors to provide an affidavit attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. The Contractor shall maintain a copy of such affidavit for the duration of the contract. Failure to comply will lead to termination of this Contract, or if a subcontractor knowingly violates the statute, the subcontract must be terminated immediately. Any challenge to termination under this provision must be filed in the Circuit Court no later than twenty (20) calendar days after the date of termination. Termination of this Contract under this Section is not a breach of contract and may not be considered as such. If this contract is terminated for a violation of the statute by the Contractor, the Contractor may not be awarded a public contract for a period of one (1) year after the date of termination.

IN WITNESS OF THE FOREGOING, the parties have hereunto set their hands and seals on the dates written below.

TRADEWINDS®
POWER CORP

STANDBY DIESEL GENERATORS

STANDBY POWER YOU NEED
AND POWER YOU CAN TRUST

Building on our long-term relationships with world renowned diesel engine manufacturers Perkins and Doosan, Tradewinds Power Corp (TPC) packages a comprehensive range of non- proprietary diesel powered standby sets, ranging from 9kW to 700kW. In addition to our standard product lineup, we build to individual customer specifications. TPC standby generators are completely self contained with auto start controls and offered in open, weather-protected, and sound-attenuated enclosures

- **Sound Attenuated Enclosure** - Marine grade aluminum with sound attenuation 68dBA measured at 27ft.
- **Auto Controls -** with analog display of all functions and SCADA interface points.
- **Fuel Tank -** Double walled daily service, UL142, with full spill containment.

- **Connection Panel -** with terminals suitable for 3 and single phase voltages.
- **Rigid Base -** Close coupled single bearing engine and generator assembly with anti-vibration mounts between assembly and rigid base.
- **Custom Fuel Tanks -** Sized to suit client application.

TP200 T3 - Depicted with Various Options

TRADEWINDS STANDBY GENERATORS

Tradewinds Power Corp fully integrated standby generator set provides optimum performance, reliability, and versatility with efficiency matched heavy duty diesel engine, with an AC synchronous, 12-wire brushless, single bearing alternator.

WARRANTY

Engines are covered under the original equipment manufacturer's warranty - consult Tradewinds Power Corp for details. Complete package supplied with 2-year limited warranty.

Notes	* Indicates Non UL only and Tier 2 diesels for the International Market, not domestic. All domestic are UL all export non-UL.								

STANDARD FEATURES

- EPA Tier 3 PERKINS diesel engines for stationary standby
- 1800 rpm 4-pole (*TD-14 3600 rpm 2-pole)
- Radiator rated for operating in 120°F ambient
- Auto start and stop digital control panel with full metering
- 12-wire reconnectable brushless generator (*4-wire TD-14)
- Heavy-duty air cleaner with restriction indicator
- Mounted exhaust muffler
- Oil and coolant drain lines with brass ball check valves
- UL certification domestic US (not applicable international)
- Battery disconnect
- External emergency stop
- Adjustable-trip mainline circuit breaker

OPTIONAL EQUIPMENT

- Weather Protective Enclosure constructed of Marine Grade Aluminum 0.125 thickness, SS Hardware, white powder coat paint finish on both sides, sound Insulation resistant to high temperatures, fuel and oil, hinged / removable / keyed alike doors
- Double walled UL142 base mounted daily service fuel tank
- Base frame with full spill protection
- Critical exhaust silencer
- Control options for low coolant level switch and 17-light remote annunciator panel
- Automatic transfer switch
- PMG generator exciter for high inductive and SCR loads

Problem: **Installation of Electric Service @ 2701 Commerce Center Way**

Technician asked to coordinate and install new 300 amp service. Location had an existing service connection point per FPL engineering design. New Building product Specifications used to determine 300 amp service.

Reparation:

In order to complete the aforementioned job-scope, the following procedures must be completed:

Engineering

Design

Analyze the electrical infrastructure necessary to accomplish the intended purpose. Incorporate into a cost effective design to accomplish said purpose. Coordinate with FPL produce certifications to pull permitting necessary for Permitting

45	Hours	x	$65.00	$2,925.00
	Services		LS	$2,600.00

Clear foot print

Layout and remove any obstacles in place impeding the erection of footprint of new electrical pedestal and stub up

24	Hours	x	$65.00	$1,560.00
	Material		LS	$458.00

Mount Electrical Pesdestal Structure

Layout and remove any obstacles in place impeding the erection of footprint of new electrical pedestal

16	Hours	x	$65.00	$1,040.00
	Material		LS	$745.00

All work is performed in strict accordance to the National Electric Code
All Material used + labor are included in the Total
Any work completed out of the original scope of work will be completed and billed accordingly.

Total Amount Due: $27,568.98

New Installation

Hand-Hole

Install handhole stations at necessary points to provide a necessary distribution point at key locations to complete the conduit path network below grade. (3 Hand Holes per Design)

5	Hours	x	$65.00	$325.00
	Material		LS	$749.48

Trench and Backfill

Complete necessary trenching for the installation of conduit, Handholes and electrical gear. Various means and methods shall be used to complete the necessary small trenches per site conditions.

24	Hours	x	$65.00	$1,560.00
	Equipment		LS	$850.00

Installation of PVC Conduit Pathway

Installation of a subgrade network of 3" conduit pathway. All conduit ends will be terminated at respective point per project design.

24	Hours	x	$65.00	$1,560.00
	Material		LS	$2,788.00

Grounding & Wiring

Install necessary Grounding and wiring at handholes and power stations at respective points per project design. Install grounding and bonding system.

10.5	Hours	x	$65.00	$682.50
	Material		LS	$2,368.00

Installation of Electrical Gear

Install 400 amp Service Meter-Can and Electrical Disconnect from Utility Service. Complete the install of Main Electrical Panels per design.

36	Hours	x	$65.00	$2,340.00
	Material		LS	$4,800.00

Installation of Bollard Protection

Pour footing and install a total of Four 6" Bollard Marking and New Service. Bollard must be secured 1/2" bolts tied into the foundation. Procure, Deliver, Mount and Level units in place.

12	Hours	x	$65.00	$780.00
	Equipment		LS	$1,088.00

Electrical Pedestal Foundation Base

Excavate and compact surrounding area of Handholes and power stations and prepare the area for CIP concrete. Form, Reinforce, pour concrete and finish. Setup mounting bracket for newpedestal protection

12	Hours	x	$65.00	$780.00
	Material		LS	$1,450.00

Complete Wiring pairs, Splices and Control

Finalize all wiring splices at the source box, terminate and close open electrical boxes. Test all circuitry Test all circuitry of the new Charging stations and terminate all wiring to new breaker devices at panel

8	Hours	x	$65.00	$520.00
	Material		LS	$858.00

PROPOSAL

TO: Pembroke Park New Service
Attn: Manny, Misael

DATE: March 11th, 2026

We hereby propose to furnish all labor and material necessary to provide electrical installation in accordance with the following:

PROJECT: New service at 2701 Commercial Blvd, Town of Pembroke Park

SCOPE:

1. Coordinate job with FPL and town of Pembroke Park to set new electrical service.
2. Town of Pembroke Park to do all excavation for conduit runs.
3. Run 2- 2 ½" PVC conduits from existing FPL pole towards desired rack location in east end of property in the center of lot.
4. Set FPL handhole at desired location specified from FPL.
5. Build a new unistrut service rack with 2" IMC vertical pipes running from the ground.
6. Mount a new 400 Amp single phase meter main combo on rack.
7. Run 2- 2 ½" PVC conduits from meter main south following parallel to property line.
8. Set a handhole at edge of property for a pull box.
9. From handhole continue conduit running conduit west to new building location.
10. Set new 400 Amp main lug outdoor panel on the south side of new building.
11. Run conduits up into 400 Amp panel.
12. Pull new 250 MCM in both conduits from FPL handhole to meter main, then from meter main to new panel on building.
13. Make all terminations at both panels once wire is pulled.
14. Conduit run is approximately 400' from start to finish.
15. Run 3- 1 ½" conduits from new panel to panels inside modulars.
16. Run new #2 THHN to each panel.
17. Install new 125 Amp breakers in outdoor main panel.
18. Make all necessary terminations once finished.
19. Test and label all panels once finished.
20. Meet FPL and town for all required inspections.
21. Town of Pembroke Park to supply engineered drawings.
22. Exclusions
    - A. Signed and sealed drawings
    - B. Any and all excavation for conduit runs, plus backfill.
    - C. Any and all FPL utility charges.
    - D. Any and all permit fees.
    - E. Notice of commencement fees.

Pembroke Park new service- continued
Proposal - New service at 2701 Commercial Blvd, Town of Pembroke Park

PRICE: $ 72,600.00

Payable upon the following terms: Draw schedule to follow:

Terms and Conditions: A non-refundable 50% deposit due at signing, with balance due upon completion. Order cancellations are not accepted after work has started. Buyers agree to pay for goods ordered and delivered plus attorney's fees and court cost in the event of litigation. The courts of The State of Florida and Broward County Florida will have jurisdiction over a dispute arising hereunder. Acceptance of and or payment for merchandise constitutes agreement of terms. Late payments are subject to a 1.5% per month interest charge.

The above price, specifications, terms and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as stated above. Issuing funds or purchase order for commencement of project indicates acceptance of proposal as outlined above. R & R Electrical Contracting, Inc. will not be held responsible for any other existing conditions not covered under this proposal. All patching and painting of surfaces necessary for electrical installation to be by others.

This proposal void if not accepted in writing within 10 days after this date: March 11th, 2026

2701 Commerce BLVD TOPP.pdf;

Good after noon,

The Town of Pembroke Park is looking to get a quote to run electrical to a new modular building. I attached a set of plans for your review and inluded the illustration below as well. The red indicates where the power will be routed to. The red box indicates where the FPL Meter will be placed.
Please advise on your soonest availability for this. Thank you!

Agenda Item Report

Subject:	Consideration and authorization for paving improvements - Future Public Works Lot - Sponsored by Public Services Director Odoms
Meeting Date:	Special Commission Meeting - March 13, 2026
Prepared For:	Town Commission
Staff Contact:	Jeff Odoms, Public Services Director
Dept/Group:	Public Works
Recommendation for Counsel to consider:	Staff is requesting authorization for paving and surface improvements to a portion of the Town-owned approximately two-acre lot located at 2701 Commerce Center Way, which is shared operationally with Westwind.
Background Information:	The Town has identified the need to utilize a portion of the approximately two-acre parcel at 2701 Commerce Center Way to support expanded Public Works operational needs. Currently, portions of the lot consist of deteriorated asphalt and unprepared surface areas that are not suitable for consistent municipal vehicle parking or placement of modular facilities. To prepare the site, staff propose: • Cleaning and repairing the existing asphalt surface • Seal coating and re striping the designated operational area • Preparing a stable paved area to accommodate Public Works vehicles and equipment • Supporting the installation of a modular building for operational use • The improvements will allow the Town to organize equipment storage, improve accessibility, and enhance the durability of the site. The attached proposal from All County Paving outlines the recommended scope of work, including asphalt repair at multiple locations, base repairs where necessary, sealcoating, and pavement striping. Scope of Work According to the contractor's proposal, the project includes: • Maintenance of traffic setup and site safety controls • Asphalt repair at eight (8) damaged locations • Asphalt and base repair at two (2) locations • Installation of hot mix asphalt (Type S-III) • Application of two coats of commercial-grade sealcoating • Pavement striping to restore parking layout These improvements will prepare the designated area for Public

	Works operations and support the installation of the modular building.
Staff Recommendations:	• Approve the proposal from All County Paving for $11,263.75 for paving improvements at the Public Works future located at 2701 Commerce Center Way. • Authorize the Town Manager to execute necessary purchase orders or agreements for the work. • Direct staff to coordinate scheduling of the paving work in conjunction with the modular building installation and electrical service installation. The proposed improvements represent a low-cost operational infrastructure upgrade that supports: • Improved organization of municipal equipment • Preparation for modular facility installation • Reduced long-term surface maintenance costs • Better utilization of Town-owned property Completing the paving concurrently with modular building preparation minimizes disruption and prevents rework.
Procurement:	
Financial Implications:	Paving Improvements – All County Paving **$11,263.75** Funding is expected to be provided through the appropriate Public Works or facilitiesimprovement budget line.

Agenda Item Report - Paving Improvements
Town of Pembroke Park Future Lot

Agenda Item Report

Subject:	**Authorization for Paving Improvements - Future Public Works Lot**
Meeting Date:	Regular Commission Meeting - MAR 11, 2026
Prepared For:	Town Commission
Staff Contact:	Jeff Odoms, Public Services Director
Dept/Group:	Public Services
Recommendation for Counsel to consider:	Staff is requesting authorization for paving and surface improvements to a portion of the Town-owned approximately two-acre lot located at 2701 Commerce Center Way, which is shared operationally with Westwind.
Background Information:	The Town has identified the need to utilize a portion of the approximately two-acre parcel at 2701 Commerce Center Way to support expanded Public Works operational needs. Currently, portions of the lot consist of deteriorated asphalt and unprepared surface areas that are not suitable for consistent municipal vehicle parking or placement of modular facilities. To prepare the site, staff propose: • Cleaning and repairing the existing asphalt surface • Seal coating and re striping the designated operational area • Preparing a stable paved area to accommodate Public Works vehicles and equipment • Supporting the installation of a modular building for operational use • The improvements will allow the Town to organize equipment storage, improve accessibility, and enhance the durability of the site. The attached proposal from All County Paving outlines the recommended scope of work, including asphalt repair at multiple locations, base repairs where necessary, sealcoating, and pavement striping. **Scope of Work** According to the contractor's proposal, the project includes: • Maintenance of traffic setup and site safety controls • Asphalt repair at eight (8) damaged locations • Asphalt and base repair at two (2) locations • Installation of hot mix asphalt (Type S-III) • Application of two coats of commercial-grade sealcoating • Pavement striping to restore parking layout These improvements will prepare the designated area for Public Works operations and support the installation of the modular building.

Staff Recommendations:	• Approve the proposal from All County Paving for $11,263.75 for paving improvements at the Public Works future lot located at 2701 Commerce Center Way. • Authorize the Town Manager to execute necessary purchase orders or agreements for the work. • Direct staff to coordinate scheduling of the paving work in conjunction with the modular building installation and electrical service installation. The proposed improvements represent a low-cost operational infrastructure upgrade that supports: • Improved organization of municipal equipment • Preparation for modular facility installation • Reduced long-term surface maintenance costs • Better utilization of Town-owned property Completing the paving concurrently with modular building preparation minimizes disruption and prevents rework.
Financial Impact	**Cost:** Paving Improvements – All County Paving **$11,263.75** Funding is expected to be provided through the appropriate Public Works or facilities improvement budget line.

PROJECT INFORMATION:

Town of Pembroke Park Future Lot
2701 Commerce Ctr Wy
Pembroke Park,FL 33023
03 / 04 / 2026
PROPOSAL NUMBER: 2026-813369

SCOPE OF WORK:

STANDARD MOT:
1. Set up standard MOT to include signage,barricades and/or cones.

DAMAGED ASPHALT REPAIR: (8) Locations
1. Sawcut and/or Mill where required and clean areas to be patched.
2. Tack areas with DOT approved primer tack.
3. Install hot plant mixed asphalt, Type S-III
4. Roll and compact areas with a steeldrum roller.
5. Haul away any job related debris.

*This proposal includes up to 1 inch thick asphalt.

ASPHALT & BASE REPAIR: In (2) location(s)
1. Saw cut and remove the asphalt to expose the voided area.
2. Compact the exposed base materials.
3. Install new compactable base material as required.
4. Roll and compact exposed base material.
5. Tack areas with primer tack.
6. Install hot plant mixed asphalt type SIII
7. Roll and compact areas with a steel drum roller.
8. Remove any job-related debris.

*This contractor will not be responsible for future settling in the area of repair. If additional repair is needed beyond the scope of work detailed above, a change order will be required. Contractor is not responsible for any plumbing / utility repair of any kind.

SEALCOATING: (2) Coats Spray; In (1) Mobilization
1. Secure area with cones and barricades.
2. Thoroughly clean the entire asphalt area.
3. Heavy oil spots will be treated with a bonding agent.
4. Apply by spray, first coat of Neyra Industries Tarconite commercial grade coal tar sealer that meets or exceeds federal specifications, with 2% latex additive and 3-5lbs of silica sand as per manufacturer's requirements mechanically agitated and applied at the rate of 1/5th of a gallon per square yard.
5. Apply a second separate coat of sealer with sand in the same quantity and proportion as the first coat.

NEW PAVEMENT MARKINGS
1. Stripe a new layout using DOT approved latex white, yellow, and/or blue paints to match what was previously existing to include 4" white parking stalls per city layout.

*Project bid with typical industry and municipal standards. City specifications, permit and code requirements are subject to change without notice.

TERMS AND CONDITIONS

1. Our proposals are limited to included items only, anything not specifically included is excluded from the contract. Any alteration or deviation from proposal specifications involving extra costs, will be executed only upon written orders, and will become an extra charge over and above the contract.
2. The proposal or contract provided, including all stated terms and conditions, shall become a legally binding attachment to any contract entered between All County Paving and the financially responsible company for which the work will be performed.
3. 90% of contract amount and change orders must be paid prior to completing punch list items and/or any changes for additional work required by cities or municipalities
4. For projects requiring city or county permits, All County Paving will coordinate the process and charge Procurement Fees $795.00 per application, plus cost of permit(s). Any additional work required by the permit(s) will be a change order to the contract. If the Owner / Authorized Agent/ Customer directs this work to be completed without required permitting, all costs including, but not limited to, fees, expediting and fines are the responsibility of the Owner / Authorized Agent/ Customer.
5. Change orders, additions or extras requested by Owner, Contractor or Municipality will be invoiced as an addition to the contract and shall not delay payment of the original contract sum. All Change Orders must be approved and signed by authorized representative,
6. It is understood and agreed that all work is performed “weather permitting”.
7. Tow Trucks need to be arranged 5 days prior to the start of work and must be on call to remove cars from the scheduled work zone as necessary. The Customer is responsible for towing services and any created delays. If any cars are left in the area of work, All County Paving cannot be held responsible for any damage to the vehicle.
8. The customer is responsible to notify all landscapers and garbage companies to not show on the area of work the day we are performing work. In the event of a reschedule due to unforeseen conditions, you are required to let all service providers know about the change.
9. All County Paving cannot guarantee sealcoat longevity where there is standing water. Cracks in pavement will still be noticeable after sealcoating. Tire turning marks will be visible at first but will disappear over time.
10. If there are existing car stops on the property, the new line striping of the parking stalls will not be installed beyond the car stop(s) unless they are removed. The striping machine cannot fit between the car stops. If you would like the existing car stops removed during the striping phase, there will be additional costs associated with this scope of work. It is the customer’s responsibility to inform All County Paving if this is desired prior to commencement of the project.
11. Any broken car stops will be replaced at an additional cost of $85.00 each.
12. Reflective Pavement Markers are excluded from the warranty. Any additional reflective pavement markers that are required by the city code will be an additional charge of $10.00 each to the contract amount.
13. Asphalt Repairs/Paving: If the actual asphalt is determined to be thicker than the proposed depth once the area(s) are excavated, All County Paving will provide photo documentation showing the additional depth and a change order will be sent to customer the additional material.
14. Additional mobilization(s) to be billed at $2,000.00 each for **Asphalt Repairs**. This charge may be billed due to, but not limited to: site unavailability for commencement of the work due to vehicles encroaching on the work area, change of schedule by Customer /Authorized Agent without prior consent of contractor or repairs to work caused by trespassing.
15. Additional mobilization(s) to be billed at $2,000.00 each for **Sealcoating.** This charge may be billed due to, but not limited to: site unavailability for commencement of the work due to vehicles encroaching on the work area, change of schedule by Customer /Authorized Agent without prior consent of contractor or repairs to work caused by trespassing.
16. Additional mobilization(s) to be billed at $2,400.00 each for **Concrete Services.** This charge may be billed due to, but not limited to: site unavailability for commencement of the work due to vehicles encroaching on the work area, change of schedule by Customer /Authorized Agent without prior consent of contractor or repairs to work caused by trespassing.
17. Additional mobilization(s) to be billed at $7,200.00 each for **Paving.** This charge may be billed due to, but not limited to: site unavailability for commencement of the work due to vehicles encroaching on the work area, change of schedule by Owner/Authorized Agent without prior consent of contractor or repairs to work caused by trespassing. All County Paving will provide a schedule to be approved by Customer prior to any additional mobilizations.
18. If All County Paving is performing milling and/or paving, the customer acknowledges that this work will not result in new elevations/grades. This means that any existing ponding water will not be rectified by performing this scope of work. It is the owner's responsibility to notify the account manager if there is ponding water. The only method to improve standing water is to perform additional rock and grading work which will be an additional cost.
19. All County Paving cannot guarantee 100% drainage in areas where the design grade is less than 1% fall.
20. All County Paving will not accept responsibility for reflective cracking of new asphalt overlay due to the cracked condition of the existing asphalt pavement.
21. This Proposal does not include asphalt leveling or asphalt overruns unless stated otherwise in the original scope of work. Customer agrees to pay to leveling and overruns at $205.00 per ton.
22. Crack Sealing: Hairline cracks, alligatored or spider web cracks or other failing asphalt areas cannot and will not be crack sealed. Crack sealing is designed to keep water out, not in, so ground water is subject to seep from wet areas.
23. All underground utilities including electrical, plumbing and irrigation lines if damaged or broken are the responsibility of the customer and not All County Paving. If All County Paving needs to repair damages, the costs will be billed to the owner as a change order.
24. All County Paving will not be responsible for trafficking, paint tracking or damage to cars or persons trespassing in designated construction areas.
25. All County Paving recommends a Civil Engineer be retained for ADA upgrades. As such All County Paving makes no claim that existing or ADA upgrades will meet any/all local, state and federal guidelines on ADA compliance.
26. The prices used in this proposal are based on the condition that all work quoted will be accepted in total.
27. In the event of any litigation or other proceeding arising out of this agreement, the prevailing party shall be entitled to collect its attorneys' fees and all costs of litigation from the other party, including appellate attorneys' fees.
28. There will be a charge of $47.50 above the Contract amount to dispose of used materials at an approved environmentally compliant waste facility.
29. Due to the fluctuations in the petroleum markets, All County Paving will impose a fuel surcharge
30. All accounts past due will incur a finance charge of 1.5% per month.

TERMS AND CONDITIONS CONTINUED

SEALCOATING | CUSTOMER INSTRUCTIONS AND INFORMATION

1. Barricaded Parking Lot: It is vital that all vehicles are removed from our area of work no later than 7:15 am, unless otherwise agreed. Our project costs are based on the property having all cars, people and objects off the area of work. Tow Trucks need to be arranged 5 days prior to the start of any work and must be on call to remove cars from the scheduled work zone. If any cars are left in the area of work, we cannot be held responsible for any damage to the vehicles. There will be additional costs if we are unable to access the work area billed at a minimum of $2,000.00.
2. Cleaning: Customer is responsible for any “heavy cleaning”; otherwise, All County Paving will bill for this additional cleaning.
3. Cracking: cracks in pavement will still be noticeable after Sealcoating
4. Lawn Fertilization: should not be installed seven days before or after service.
5. Rain: If it's raining the day of scheduled service, assume we aren't coming, and we will contact you to reschedule as soon as possible. If it rains after our installation, please contact your representative. We monitor the weather closely and can generally predict this very well. If an unexpected storm happens, we will touch up any areas where sealer has not bonded.
6. The sprinkler system should be off 24 hours prior to the commencement of your project and stay off 48 hours after completion of project. The surface must be dry for our arrival as areas where the newly sealed pavement is wet may wear prematurely.
7. Newly sealcoated areas will be barricaded for 24-48 hours after each project phase completion. It is the responsibility of the customer to keep the area clear to allow proper curing of the material. Failure to do so will void any warranty.
8. Sealer: will take a minimum of 30 days to fully cure and is sensitive to animal droppings, tree droppings; water stains from irrigation systems, ponding water & tire markings during this time. This is normal, it will fade over time. Areas of shade will take longer to dry and cure than areas in the direct sunlight.
9. Driving on Surface: Once you start driving on sealed surface, avoid turning your wheels unless your car is moving. Understand when wheels are turned on a freshly sealed parking lot, scuffing and turn marks will be evident, in time they will blend in with surrounding surface.
10. Overspray on Grass: where grass meets your pavement, you may expect a small spray of sealer. This is normal and will disappear generally after the next mowing.
11. Weeds: It is important to note that we have proposed all work at the time of the assessment. If you decide to do work months after we look at the project, if your parking area has developed excessive weeds in the cracked areas as well as the edge lines for any reason, there may be additional costs for treatment & removal.

PAVING | CUSTOMER INSTRUCTIONS AND INFORMATION

1. Barricaded Parking Lot: It is vital that all vehicles are removed from our area of work no later than 7:15 am, unless otherwise agreed. As you can imagine, our project costs are based on the property having all cars, people and objects off the area of work. Tow Trucks need to be arranged 5 days prior to the start of any work and must be on call to remove cars from the scheduled work zone. If any cars are left on the area of work, we cannot be held responsible for any damage to the vehicles. There will be additional costs if we are unable to access the work area billed at a minimum of $7,200.00
2. Site Services: The property is responsible to notify all landscapers and garbage companies to not show on the area of work the day we are performing work. In the event of a reschedule due to unforeseen conditions, you are required to let all service providers know about the change.
3. Rain: If it's raining the day of scheduled service, assume we aren't coming and we will contact you to reschedule as soon as possible. If it rains after our installation, please contact your representative. We monitor the weather closely and can generally predict accurately.
4. Sprinklers should be off 24 hours prior until 48 hours after service. Avoid lawn cutting during this same period of time. The surface must be dry for our arrival.
5. Drainage: All County Paving cannot guarantee 100% drainage in areas where the design grade is less than 1% fall.
6. All County Paving will not accept responsibility for reflective cracking of new asphalt overlay due to the cracked condition of the existing asphalt pavement.
7. De-mucking and removal of unsuitable materials not included.
8. Driving on Surface: Once you start driving on the paved surface, avoid turning your wheels unless your car is moving. Understand that when wheels are turned on a freshly paved asphalt surface, scuffing and turn marks will be evident, and will blend in over time.

LINE STRIPING & ADA | CUSTOMER INSTRUCTIONS AND INFORMATION

1. Barricaded Parking Lot: It is vital that all vehicles are removed from our area of work no later than 7:15 am, unless otherwise agreed. As you can imagine, our project costs are based on the property having all cars, people and objects off the area of work. Tow Trucks need to be arranged 5 days prior to the start of any work and must be on call to remove cars from the scheduled work zone. If any cars are left in the area of work, we cannot be held responsible for any damage to the vehicles. There will be additional costs if we are unable to access the work area billed at a minimum of $995.00
2. Line striping will match all existing pavement markings unless changes are approved by the customer and municipality.
3. All County Paving is not responsible for any tracking of paint caused by any vehicles and/or pedestrians if the barricades are moved prematurely or without authorization. The project manager will remove the barricades once the material has cured properly.
4. If existing curbs are flaking, it is not recommended to re-paint them without sand-blasting or power-washing them first. All County Paving will not be held responsible for flaking if proper procedure is not taken prior to painting.

WARRANTY AND CONDITIONS

1. This proposal is based on the price of the liquid asphalt index as per FDOT. If there is an increase from the date of this proposal additional costs will be incurred.
2. This proposal is good for 30 days. If work is unable to start based upon permit requirements or weather additional cost will be charged for the increase of FDOT by Bituminous index, based upon proposal date above and the stated published index prior to mobilization a change order will be presented prior to mobilization.
3. Due to aggregate shortages, this proposal is based on FOB asphalt prices. If the price increases from the date of this proposal, additional costs will apply.
4. All material guaranteed to be installed exactly as specified.
5. Due to unforeseeable conditions during excavation, depths may go deeper than anticipated. A change order may be necessary should this occur.
6. All County Paving reserves the right to withdraw the contract at any time prior to the commencement of work should material price fluctuations rise significantly.
7. The cost of and obtaining of all permits, bonds, stakeouts, cut sheets, engineering and testing are excluded.
8. In the event of undesirable sub-base or base course conditions, if the customer or authorized agent insists on the installation of any part of the pavement without authorizing corrective action, All County Paving will not be responsible for any subsequent pavement failures and will be paid as stated in the contract. All County Paving shall not be liable for any failure to undertake or complete the work for causes beyond our control.
9. The existing surface will be expected to support the weight of all required construction equipment. If due to poor sub-grade conditions sinking may occur when we drive onto your site, All County Paving will not be held responsible for damages to any concrete or asphalt due to the weight of our trucks & equipment.
10. All County Paving cannot guarantee elimination of standing water.
11. All County Paving assumes no liability for damage to any utilities such as, but not limited to, gas, electric, plumbing, phone, cable, dog fencing, sprinklers and culvert pipes.
12. There will be a charge of $47.50 above the contract amount to dispose of used materials at an approved environmentally compliant waste facility.
13. Due to the fluctuations in the petroleum markets, All County Paving will impose a fuel surcharge.
14. All County Paving will provide a one (1) year warranty, starting on the last day of substantial completion, on materials and workmanship. Normal wear and tear is not covered by this warranty. No warranties will be honored unless payment is made in full.

Memo from Commissioner Mohammed
SB 484

PART I MEMORANDUM

MEMORANDUM

TO: Town Planner; Town Attorney

FROM: Ashira Mohammed, Commissioner

DATE: February 4, 2026

RE: Direction to Prepare and Advance Data Center Regulatory Ordinance for DRC and Planning Review

PURPOSE

The purpose of this memorandum is to direct staff and legal counsel to prepare a comprehensive local regulatory framework governing data centers in the Town of Pembroke Park in anticipation of pending and proposed state-level legislation related to data center development, utility allocation, and infrastructure capacity.

Given the pace at which data-center-related items are advancing through the Legislature, it is prudent for the Town to have local regulations in place in advance, rather than responding reactively after state policy changes are adopted. Establishing a clear framework now will help preserve local land-use authority to the maximum extent permitted by law and ensure that future development decisions remain consistent with the Town's Comprehensive Plan, infrastructure capacity, and long-term fiscal stability.

This effort is intended to position the Town proactively, not in response to any specific application.

BACKGROUND AND RATIONALE

Municipalities nationwide are reassessing how data centers are regulated due to their unique and disproportionate impacts, including:

- Extremely high electrical demand and peak-load strain

- Significant water use for cooling
- Backup generation emissions, noise, and fuel storage
- Minimal on-site employment relative to land and infrastructure consumption
- Long-term infrastructure, climate, and fiscal exposure
- Incompatibility with mixed-use, redevelopment, and community-serving district

Given Pembroke Park's limited land area, finite utility capacity, and strategic redevelopment goals, staff is directed to prepare regulatory language ensuring that data center development does not undermine community objectives or shift infrastructure and climate-related costs onto residents.

POLICY DIRECTION TO STAFF AND LEGAL COUNSEL

Staff and the Town Attorney are directed to collaboratively prepare draft ordinance language for review by the Development Review Committee (DRC) and Planning & Zoning Board incorporating the following principles.

1. Distinct Land-Use Classification

- Define "Data Center" as a stand-alone land-use category, distinct from warehouse, industrial, flex, office, or utility uses.
- Prohibit data centers as a permitted or by-right use in all zoning districts.
- Require discretionary approval through Conditional Use and/or Special Use processes only.

2. Zoning, Location, and Compatibility

- Establish minimum separation distances from residential areas, schools, parks, and community-oriented districts.
- Identify mixed-use, redevelopment, and entertainment corridors as incompatible by use.

- Prohibit reliance on variances, administrative adjustments, or interpretations to allow data centers.

3. Infrastructure and Utility Capacity Protection

- Require applicants to demonstrate no adverse impact to electric, water, sewer, stormwater, transportation, or emergency services.
- Mandate that all on-site and off-site infrastructure upgrades be fully funded by the applicant.
- Allow denial based solely on projected infrastructure or utility strain.
- Prohibit priority utility restoration or guaranteed capacity agreements.

4. Water and Energy Restrictions

- Restrict or prohibit potable water use for cooling.
- Require closed-loop or reclaimed water systems where applicable.
- Establish electrical load caps tied to overall system capacity, calculated at maximum theoretical demand.

5. Climate Resilience and Emergency Preparedness

- Require climate-resilience and disaster-response plans addressing flooding, heat, hurricanes, and extended power outages.
- Require facilities to operate without reliance on municipal emergency resources during declared emergencies.
- Allow approvals to be modified or revoked if future climate conditions render a facility incompatible with public safety or infrastructure capacity.
-

6. Employment Efficiency Standards

- Establish a minimum jobs-per-megawatt threshold.

- Require disclosure of permanent on-site employment only; exclude remote or regional job counts.
- Allow denial where employment benefits are disproportionate to infrastructure consumption.

7. Artificial Intelligence and High-Intensity Computing

- Explicitly recognize AI training and high-intensity computing as a distinct subset of data centers.
- Allow outright prohibition or heightened review standards due to extreme energy demand, cooling intensity, minimal employment, and grid impacts.

8. Fees, Escrows, and Fiscal Neutrality

- Require substantial application fees and professional review escrows.
- Impose ongoing monitoring and impact fees.
- Prohibit tax abatements, utility rebates, fee waivers, or incentives of any kind.

9. Expansion, Lifecycle, and Decommissioning

- Require full re-approval for any increase in power, cooling, generators, or floor area.
- Require a decommissioning plan and financial assurance for site restoration and removal of specialized infrastructure.

10. Enforcement and Review

- Require annual operational review and renewal.
- Allow suspension or revocation for non-compliance.
- Include fines, injunctive relief, and forfeiture of bonds or escrows.

PROCESS AND NEXT STEPS

1. Town Planner and Town Attorney to prepare draft ordinance language and staff report.
2. Review by DRC for infrastructure and operational implications.
3. Planning & Zoning Board review for land-use consistency.
4. Forward recommendation to the Town Commission for consideration.

This memorandum provides policy direction and does not predetermine Commission action.

PLANNING OBJECTIVE

The objective is to ensure that any data center or related facility:

- Does not shift infrastructure, climate, or fiscal risk to the Town or residents;
- Produces a meaningful economic return relative to resource consumption; and
- Preserves long-term redevelopment flexibility and local land-use authority.

PART II — SKELETON ROUGH DRAFT ORDINANCE

AN ORDINANCE OF THE TOWN OF PEMBROKE PARK, FLORIDA,

REGULATING DATA CENTERS AND ARTIFICIAL INTELLIGENCE TRAINING FACILITIES;

ESTABLISHING DEFINITIONS;

PROHIBITING DATA CENTERS AS A PERMITTED USE;

REQUIRING CONDITIONAL AND SPECIAL USE APPROVAL;

IMPOSING LOCATION, INFRASTRUCTURE, CLIMATE RESILIENCE, EMPLOYMENT, AND OPERATIONAL STANDARDS;

IMPOSING APPLICATION FEES, ESCROWS, COMMUNITY AND INFRASTRUCTURE IMPACT FEES, ANNUAL SURCHARGES, AND FINANCIAL ASSURANCES;

REQUIRING DECOMMISSIONING;

PROVIDING FOR ENFORCEMENT, SEVERABILITY, AND AN EFFECTIVE DATE.

SECTION 1. FINDINGS AND INTENT

The Town Commission finds that data centers and artificial intelligence training facilities impose unique and disproportionate demands on electrical, water, sewer, stormwater, transportation, and emergency service systems; generate limited on-site employment; and present long-term climate, fiscal, and infrastructure risks. This Ordinance is intended to ensure fiscal neutrality, infrastructure protection, climate resilience, and consistency with the Town's Comprehensive Plan.

SECTION 2. DEFINITIONS

Data Center means any facility primarily used for data processing, storage, cloud computing, artificial intelligence, machine learning, blockchain processing, or network operations, including all supporting mechanical, electrical, cooling, and backup power systems.

AI Training Facility means a data center primarily used for artificial intelligence or machine learning model training characterized by sustained, high-intensity computing loads and continuous energy demand.

SECTION 3. ZONING STATUS AND APPROVAL

(A) Data centers and AI training facilities are prohibited as a permitted or by-right use in all zoning districts.

(B) Such facilities may only be considered through Conditional Use and Special Use approval by the Town Commission.

(C) No variance, administrative adjustment, or interpretation shall be permitted.

SECTION 4. LOCATION AND COMPATIBILITY

(A) Data centers and AI training facilities are prohibited within or adjacent to:

- Residential zoning districts
- Schools, parks, childcare facilities, or places of assembly
- Mixed-use, redevelopment, or entertainment districts

(B) Required separation distances and buffers shall not be waived.

SECTION 5. INFRASTRUCTURE AND UTILITIES

(A) Applicants shall demonstrate no adverse impact to electric, water, sewer, stormwater, transportation, or emergency services.

(B) All on-site and off-site infrastructure upgrades shall be fully funded by the applicant.

(C) Electrical demand shall be calculated at maximum theoretical load.

(D) Priority utility restoration or guaranteed capacity agreements are prohibited.

SECTION 6. WATER AND ENERGY USE

(A) Potable water use for cooling is prohibited unless expressly approved.

(B) Closed-loop or reclaimed water systems shall be required where feasible.

SECTION 7. CLIMATE RESILIENCE AND EMERGENCY PREPAREDNESS

(A) A climate resilience and disaster response plan shall be required.

(B) Facilities shall operate without reliance on municipal emergency resources during declared emergencies.

(C) Approvals may be modified or revoked if future climate conditions render the facility incompatible with public safety or infrastructure capacity.

SECTION 8. EMPLOYMENT STANDARDS

(A) A minimum jobs-per-megawatt ratio shall be required.

(B) Only permanent, on-site employment shall be counted.

SECTION 9. AI TRAINING FACILITIES

(A) AI training facilities may be prohibited outright or subjected to heightened standards.

(B) Additional fees, electrical load caps, cooling restrictions, and operational limits may be imposed.

SECTION 10. APPLICATION FEES AND ESCROWS

- Non-Refundable Application Fee: $250,000
- Re-Application / Expansion Fee: $150,000
- Professional Review Escrow: Minimum $500,000, replenishable without cap

Failure to replenish escrow shall result in suspension of review or operations.

SECTION 11. COMMUNITY AND INFRASTRUCTURE IMPACT

(A) Electrical / Community Impact Fee: $1,000,000 per megawatt of total approved electrical demand, calculated at maximum theoretical load.

(B) Water Capacity Mitigation Fee: $500,000 per acre of data center development footprint.

(C) Emergency Services Impact Fee: $250,000, plus any additional amount required for specialized equipment or training.

SECTION 12. ANNUAL OPERATIONAL FEES AND SURCHARGES

- Annual Infrastructure Monitoring Fee: $250,000
- High-Demand Utility Surcharge: As adopted by resolution
- Backup Generation Impact Fee: $100,000 per megawatt of installed backup generation capacity, payable annually

SECTION 13. CLIMATE IMPACT OFFSET FEE

(A) A one-time Climate Impact Offset Fee of $500,000 shall be required.

(B) Climate-related fees may be adjusted by resolution based on updated risk projections.

SECTION 14. PERFORMANCE BOND AND FINANCIAL SECURITY

(A) Performance Bond / Letter of Credit: Minimum $10,000,000

(B) Additional financial security may be required for operational or emergency risks.

SECTION 15. EXPANSION AND MODIFICATION

Any increase in electrical load, cooling capacity, backup generation, or floor area shall require full re-approval under this Ordinance.

SECTION 16. DECOMMISSIONING

(A) A decommissioning plan is required.

(B) A minimum $5,000,000 decommissioning bond shall be maintained for the life of the facility.

(C) The Town may draw upon the bond to restore the site if abandoned.

SECTION 17. NO INCENTIVES

No tax abatements, utility rebates, CRA incentives, fee waivers, or development incentives shall be permitted.

SECTION 18. ENFORCEMENT

Non-payment or non-compliance may result in suspension, revocation, fines, injunctive relief, and forfeiture of bonds or escrows.

By the Committee on Community Affairs; and Senators Avila and Yarborough

578-02478-26 2026484c1

A bill to be entitled

An act relating to data centers; creating s. 112.231, F.S.; defining terms; prohibiting an agency from entering into a nondisclosure agreement or other contract that restricts the agency from disclosing certain information to the public; providing that an agreement or contract, or a provision of an agreement or contract, is void and unenforceable under certain circumstances; providing civil penalties; authorizing the state attorney or Attorney General to bring an action to collect a fine; providing applicability; creating s. 163.326, F.S.; providing legislative findings; specifying that local governments maintain authority to exercise power and responsibility over comprehensive planning and land development regulations related to large load customers; creating s. 366.043, F.S.; providing legislative findings; defining terms; requiring the Florida Public Service Commission to develop minimum tariff and service requirements for large load customers; requiring that such requirements ensure that large load customers bear their costs of service and that such costs are not shifted to the general body of ratepayers; requiring that such minimum tariff and service requirements include certain provisions designed to prevent a public utility from providing electric service to a large load customer that is a foreign entity; prohibiting a customer from separating a certain electrical load into multiple smaller

connections for a specified purpose; authorizing the commission to include certain measures in minimum tariff and service requirements; prohibiting any tariff, contractual provision, service requirement, or other public utility policy from preventing or hindering the curtailment or interruption of electric service to a large load customer for certain purposes; prohibiting a public utility from knowingly providing electric service to a large load customer that is a foreign entity; requiring the commission to adopt rules by a specified date; specifying a deadline for utilities to file a tariff in compliance with the final rule; amending s. 373.203, F.S.; defining terms; creating s. 373.262, F.S.; providing legislative intent; prohibiting the governing board of a water management district or the Department of Environmental Protection from issuing a permit for the consumptive use of water to a large-scale data center under certain circumstances; requiring that such permit be issued to a large-scale data center applicant if the applicant establishes that the proposed use of water satisfies certain requirements; requiring the governing board or the department to require the use of reclaimed water for a large-scale data center applicant's allocation when certain requirements are met; specifying requirements for certain permit applications; prohibiting the approval of permit applications without a hearing; amending s. 373.239, F.S.; requiring that consumptive use permit

modifications proposed by a large-scale data center be treated in a specified manner; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Section 112.231, Florida Statutes, is created to read:

112.231 Data center nondisclosure agreements.—

(1) As used in this section, the term:

(a) "Agency" means any state, county, district, authority, or municipal officer, public employee, department, division, board, bureau, or commission, or other separate unit of government created or established by law and any other public or private agency, person, partnership, corporation, or business entity acting on behalf of any such agency.

(b) "Data center" means a facility that primarily contains electronic equipment used to process, store, and transmit digital information, which may be:

1. A free-standing structure; or

2. A facility within a larger structure which uses environmental control equipment to maintain the proper conditions for the operation of electronic equipment.

(2) An agency may not enter into a nondisclosure agreement or other contract restricting the agency from disclosing information about a potential data center development to members of the public.

(3) An agreement or contract, or a provision of an agreement or contract, that violates this section is against

public policy and is void and unenforceable.

(4) An agency that violates this section is subject to a civil fine of not more than $1,000. The state attorney of the county in which the violation occurred or the attorney general may bring an action to collect the fine.

(5) This section applies to agreements entered into on or after July 1, 2026.

Section 2. Section 163.326, Florida Statutes, is created to read:

163.326 Large load customer considerations.—

(1) The Legislature finds that certain land uses, including facilities with substantial electric or other utility demands, such as data centers and other large load customers as defined in s. 366.043(2)(d), may present unique planning, infrastructure, and compatibility considerations. The Legislature intends that such considerations shall be addressed through local comprehensive planning and land development regulations adopted pursuant to this chapter, including provisions related to infrastructure capacity, land use compatibility, environmental impacts, and the efficient provision of public facilities and services.

(2) Local governments shall maintain the authority to exercise the powers and responsibilities for comprehensive planning and land development regulation granted by law with respect to large load customers.

Section 3. Section 366.043, Florida Statutes, is created to read:

366.043 Large load tariffs for public electric utilities.—

(1) The Legislature finds that the provision of safe and

reliable electric services, provided at fair, just, and reasonable rates, is essential to the welfare of the ratepayers of this state. The Legislature further finds that when one class of electric service customer requires uniquely large electrical loads at a single location, it imposes a disproportionate risk on the other ratepayers of this state and makes it necessary for the commission to develop and enforce rate structures and other policies for such customers which ensure such risk is mitigated as much as possible and prevent shifting the costs of serving large load customers to the general body of ratepayers.

(2) As used in this section, the term:

(a) "Controlled by" means having the power to direct or cause the direction of the management or policies of a company, whether through ownership of securities, by contract, or otherwise. A person or an entity that directly or indirectly has the right to vote 25 percent or more of the voting interests of the company or that is entitled to 25 percent or more of its profits is presumed to control the entity.

(b) "Foreign country of concern" has the same meaning as in s. 692.201.

(c) "Foreign entity" means an entity that is:

1. Owned or controlled by the government of a foreign country of concern; or

2. A partnership, an association, a corporation, an organization, or other combination of persons organized under the laws of or having its principal place of business in a foreign country of concern, or a subsidiary of such entity.

(d) "Large load customer" means a customer with an anticipated monthly peak load of 50 megawatts or more,

calculated as the highest average load over a 15-minute interval at a single location. This does not include a load aggregated across multiple locations owned by the same customer. However, it does include all customers or other entities that have entered into a colocation or similar agreement at a single location that otherwise meets the anticipated monthly peak load provided in this paragraph.

(e) "Public utility" has the same meaning as in s. 366.02, except that it does not include a gas utility.

(3) The commission shall develop minimum tariff and service requirements for large load customers pursuant to all of the following:

(a) The minimum tariff and service requirements must reasonably ensure that each large load customer bears its own full cost of service and that such cost is not shifted to the general body of ratepayers. Such cost of service includes, but is not limited to, connection, incremental transmission, incremental generation, and other infrastructure costs; operations and maintenance expenses; and any other costs required to serve a large load customer. The risk of nonpayment of such costs may not be borne by the general body of ratepayers.

(b) The minimum tariff and service requirements must include provisions reasonably designed to prevent a public utility from providing electric service to a customer that would otherwise qualify as a large load customer if that customer is a foreign entity.

(4) A customer may not separate an electrical load at a single location into multiple smaller connections to avoid being

classified as a large load customer.

(5) To effectuate the requirements of subsection (3), the commission may include in such requirements utility industry-accepted ratemaking and other financial tools, including, but not limited to, all of the following:

(a) Contributions in aid of construction or other required customer infrastructure investments that may be returned, in whole or in part, to such customers over time.

(b) Demand charges, including minimum demand charges.

(c) Incremental generation charges.

(d) Financial guarantees.

(e) Minimum load factors.

(f) Take-or-pay provisions or similar provisions requiring payment for contracted capacity, regardless of a large load customer's actual electricity use or demand.

(g) Minimum period of service contract requirements, including early termination fees or other fees for violation of such contracts.

(6) Any tariff, contractual provision, service requirement, or other public utility policy relating to large load customers may not prevent or otherwise hinder the curtailment or interruption of electric service to a large load customer where such curtailment or interruption is intended to ensure grid stability, reduce the likelihood or breadth of wider service outages, or ensure public safety during an emergency or other exceptional circumstance.

(7) A public utility may not knowingly provide electric service to a customer that would otherwise qualify as a large load customer if that customer is a foreign entity.

(8) The commission shall adopt rules to implement and administer this section and shall propose a rule for adoption by March 1, 2027.

(9) Within 60 days after adoption of the final rule implementing this section, each public utility shall file, for commission approval, a tariff that complies with the final rule.

Section 4. Present subsections (3) and (4) of section 373.203, Florida Statutes, are redesignated as subsections (5) and (6), respectively, and new subsections (3) and (4) are added to that section, to read:

373.203 Definitions.—

(3) "Data center" means a facility that primarily contains electronic equipment used to process, store, and transmit digital information, which may be:

(a) A free-standing structure; or

(b) A facility within a larger structure which uses environmental control equipment to maintain the proper conditions for the operation of electronic equipment.

(4) "Large-scale data center" means a single location, with a data center on site, that has an anticipated monthly peak load of 50 megawatts or more, calculated as the highest average load over a 15-minute interval. This does not include a load aggregated across multiple locations owned by the same customer. However, it does include all customers or other entities that have entered into a colocation or similar agreement at a single location that otherwise meets the anticipated monthly peak load provided in this subsection.

Section 5. Section 373.262, Florida Statutes, is created to read:

373.262 Large-scale data center permitting.—

(1) It is the intent of the Legislature that the development and operation of large-scale data centers in this state be managed under a permitting framework that ensures this state's water resources are used in the public interest, in a manner that is not harmful to the water resources of this state, and consistent with local government zoning regulations and comprehensive plans.

(2) Consistent with other provisions of this part, the governing board of a water management district or the department may not issue a permit to a large-scale data center applicant for an allocation of water if the proposed use of the water is harmful to the water resources of the area or is prohibited by the applicable local government zoning regulations and comprehensive plan. A permit shall be issued to a large-scale data center applicant for an allocation of water if the applicant establishes that the proposed use of water:

(a) Is a reasonable-beneficial use as defined in s. 373.019;

(b) Will not interfere with any presently existing legal use of water; and

(c) Is consistent with the public interest.

(3) The governing board or the department shall require the use of reclaimed water in lieu of all or a portion of a proposed use of surface water or groundwater by a large-scale data center applicant when:

(a) A suitable reclaimed water supply source is available and permitted;

(b) Reclaimed water distribution or supply lines are

available at the property boundary in sufficient capacity and quality to serve the applicant's needs;

(c) The applicant is capable of accessing the reclaimed water source through distribution or supply lines;

(d) Use of reclaimed water is environmentally, economically, and technically feasible; and

(e) Use of reclaimed water would not conflict with the requirements contained in the applicant's surface water discharge permit, if applicable.

(4)(a) In addition to the requirements of s. 373.229, all permit applications made under this part requesting an allocation of at least an average daily flow of 100,000 gallons of water per day by a large-scale data center must contain:

1. All sources and amounts of water and losses of water used for cooling, industrial and treatment processes, personal or sanitary needs of employees, and landscape irrigation; and

2. A water conservation plan that, at a minimum, incorporates recycling cooling water before discharge or disposal, implementation of a leak detection and repair program, use of water efficient fixtures, and implementation of an employee awareness and education program concerning water conservation.

(b) Notwithstanding s. 373.229(4), the governing board or the department may not approve a permit application made under this part by a large-scale data center without a hearing.

Section 6. Subsection (2) of section 373.239, Florida Statutes, is amended to read:

373.239 Modification and renewal of permit terms.—

(2) If the proposed modification involves water use of

100,000 gallons or more per day or is proposed by a large-scale data center as defined in s. 373.203, the application shall be treated under the provisions of s. 373.229 in the same manner as the initial permit application. Otherwise, the governing board or the department may at its discretion approve the proposed modification without a hearing, provided the permittee establishes that:

(a) A change in conditions has resulted in the water allowed under the permit becoming inadequate for the permittee's need, or

(b) The proposed modification would result in a more efficient utilization of water than is possible under the existing permit.

Section 7. This act shall take effect July 1, 2026.

Agenda Item Report

Subject:	Discussion on Agenda Preparation - Sponsored by Commissioner Mohammed
Meeting Date:	Special Commission Meeting - March 13, 2026
Prepared For:	Town Commission
Staff Contact:	Ashira Mohammed, Mayor
Dept/Group:	Administrative
Recommendation for Counsel to consider:	
Background Information:	**Proposed Ordinance Language Revision** Amending Sec. 2-45 – Supplemental Commission Procedures **Add New Subsection: Commissioner Agenda Authority** (1) Right to Place Items on Agenda Any duly elected Commissioner, including the Mayor, Vice Mayor, or Acting Clerk Commissioner, shall have the authority to place items on the agenda of a Town Commission meeting. The administrative responsibility for preparing the agenda shall not be interpreted to grant authority to remove, refuse, delay, or alter an item properly submitted by a member of the governing body. (2) Administrative Role The Town Manager, Clerk, or administrative staff may assist in the formatting, organization, and preparation of agenda materials for distribution, but such administrative functions shall not include discretionary authority to remove or reject agenda items submitted by a Commissioner. (3) Removal of Commissioner Items An agenda item submitted by a Commissioner may only be removed from the agenda by: • The sponsoring Commissioner; or • A majority vote of the Town Commission. No administrative officer or employee of the Town shall unilaterally remove or decline to place a Commissioner-sponsored item on the

	agenda. (4) Timing Requirements Commissioners shall submit agenda items in accordance with established agenda deadlines unless waived by a majority vote of the Commission. Failure to meet administrative deadlines shall not be grounds for permanent denial of an item but may result in placement on the next available meeting agenda. **Short Justification (for the agenda report)** This amendment clarifies the distinction between administrative agenda preparation and legislative agenda authority. While staff may assist in organizing and preparing agenda materials, the governing body retains the exclusive authority to determine the matters it wishes to consider. The intent is to reaffirm the Town's Commission form of government and prevent administrative interference with the legislative prerogatives of elected officials.

Pembroke Park, FL Code of Ordinances - Supplemental Commission Procedures

Sec. 2-45. - Supplemental Commission procedures.

These rules, consistent with the Town Charter and applicable Town ordinance, statute or other legal requirement shall govern the proceedings of the Town Commission.

(1) *Authority of the chair.* Subject to appeal to the full Town Commission, the Mayor shall have the authority to prevent the misuse of motions, the abuse of any privilege, or the obstruction of the business of the Town Commission by ruling any such matter out of order. In so ruling, the Mayor shall be courteous and fair and should presume that the moving party is acting in good faith. Any member of the Town Commission may move to require enforcement of the rules, and the affirmative vote of a majority of the Town Commission shall require the presiding officer to act. A majority vote of the Town Commission may overrule any parliamentary ruling made by the Mayor.

(2) *Mayor to facilitate Commission meetings.* In the role of facilitator, the Mayor shall assist the Town Commission in focusing agenda discussions and deliberations.

(3) *Commission deliberation and order of speakers.* The Mayor has been delegated the responsibility to control the debate and the order of speakers. Speakers will generally be called upon in the order of their request to speak. With the concurrence of the Mayor, a Commission member holding the floor may address a question to another Commission member and that Commission member may respond while the floor is still held by the Commission member asking the question. A Commission member may opt not to answer a question while another Commission member has the floor.

(4) *Limit deliberations to the item at hand.* Commission member shall limit their comments to the subject matter, time or motion being currently considered by the Town Commission.

(5) *Length of Commissioner comments.* Each time a Commission member is given an opportunity to speak on an item on the agenda, the Commission member shall limit their comments on the item to three (3) minutes. Each Commission member shall be given an opportunity to speak on an item before a Commission member is given a second opportunity to do so. The Mayor shall have discretion to grant additional time to members of the Commission to finish their comments on an agenda item.

(6) *Obtaining the floor.* Any member of the Town Commission wishing to speak must first obtain the floor by being recognized by the Mayor. The Mayor must recognize any Commission member who seeks the floor when appropriately entitled to do so.

(7)

Motions. Motions may be made by any member of the Town Commission, including the Mayor or the then-presiding officer, provided that before the Mayor or the then-presiding officer offer a motion, the opportunity for making a motion should be offered to other members of the Town Commission. Any member of the Town Commission, other than the person offering the motion, may second a motion.

(8) *Procedures for motions.* The following is the general procedure for making motions:

a. Before a motion can be considered or debated, it must be seconded.

b. A Commission member who wishes to make a motion should do so through a verbal request to the Mayor.

c. A Commission member who wishes to second a motion should do so through a verbal request to the Mayor.

d. Once the motion has been properly made and seconded, the Mayor shall open the matter for discussion offering the first opportunity to the moving party and, thereafter, to any Commission member properly recognized by the Mayor.

e. Once the matter has been fully discussed and the Mayor calls for a vote, no further discussion will be allowed, provided, however, Commission member may be allowed to explain their vote.

f. The motions set forth in subsection (9) are examples of possible motions. Commission members may word motions in any common manner provided such motions and intended action is clear. The Mayor or then-presiding officer will confirm that each of the Commission members under the motion prior to calling for a vote on the motion.

g. When a motion is on the floor and an amendment is offered, the amendment should be acted upon prior to acting on the main motion. No motion of a subject different from that under consideration shall be admitted as an amendment. A motion to amend an amendment shall be in order, but one (1) to amendment an amendment to an amendment shall not be in order. Action shall be taken on the amended amendment prior to any other action to further amend the original motion.

(9) *Examples of motions.*

a. *Motion to Approve or deny.* A motion to approve or deny is a proposal to take specific action. The maker of the motion may state "I move to approve/deny Agenda Item #..." or may state the recommended motion in clear and concise terms.

b. *Motion to approve with amendments.* A motion to approve a specific action may include amendments recommended by Town staff, another Commission member or the Town Attorney. The maker of the motion may state, "I move to approve Agenda Item #..... with the following amendments...." or may state the recommended motion in clear and concise terms.

c.

Motion to reconsider. A motion to reconsider indicates that a Commission member wants the Town Commission to reconsider a prior action of the Commission and, if successful, for the Commission to consider taking different action. A motion to reconsider may only be made by a Commission member who voted on the prevailing side of the motion they are seeking to have reconsidered. A motion to reconsider may be made at the same meeting or at the next succeeding meeting following the relevant Commission, provided that the reconsideration request complies with the requirements of Ch. 286, F.S. If the motion to reconsider a prior action is not made at the same meeting, such motion and the related agenda item must be posted on the agenda for the meeting at which the motion is to be reconsidered. If a motion to reconsider fails, the action seeking to be reconsidered remains in effect. If the motion to reconsider passes, then a motion is made for the different action on the item being reconsidered.

d. *Motion to adjourn.* A motion to adjourn is to end a meeting. The maker of the motion may state, "I move to adjourn the meeting." A motion to adjourn is not required to adjourn a meeting once all business on the meeting agenda is concluded.

e. *Withdrawal of motion.* A withdrawal of a motion indicates a motion may be withdrawn or modified by the Commission member who originally made the motion at any time prior to passage. If a motion is withdrawn the Commission member who originally made the motion, or another Commission member may then make a motion to be seconded by another Commission member.

(10) *Non-observance of rule.* The procedures set forth in this section are intended to expedite and facilitate the transaction of the business of the Town Commission in an orderly fashion and shall be deemed to be procedural only. The failure of the Town Commission to strictly adhere to any of the rules set forth in this section shall not affect the jurisdiction of, or invalidate any action taken by, the Town Commission.

(11) *Decorum.* Members of the Town Commission, staff members, citizens and others are required to use civil and appropriate language when addressing the Commission or anyone present at the meeting, and must refrain from using profanity, cursing, or exhibiting aggressive or threatening behavior. No personal, verbal attacks towards any individual by either the Commission staff, citizens or other shall be allowed during any meeting of the Commission. Any persons making impertinent or slanderous remarks or who becomes boisterous or disruptive while addressing the Commission or who otherwise violates the Town's Code of Conduct, as set forth in section 2-16 of the Town's Code of Ordinances, shall, after two (2) warnings, be barred from further audience before the Commission by the Mayor, or by request of any member of the Commission, unless permission to continue or again address the Commission be granted by a majority vote of the Commission members present.

(12) *Town Commission meeting agenda.*

a.

The Town Manager, or his/her designee shall be responsible for preparing the agenda for all town commission meetings. Town staff may request that a matter of business be placed on the agenda provided sufficient notice is provided to the Town Commission and the Town Manager. Unless otherwise provided for in this section, items previously brought before the Town Commission for consideration or for an expression of interest on three (3) occasions, may not be brought forward for reconsideration or expression of interest again before six (6) months have lapsed from the last consideration or expression of interest pertaining to said item, unless a super majority four-fifths (⅘) of the Town Commission agrees to reconsider the item. All proposed agenda items shall be delivered to the Town Clerk's office at a minimum of six (6) business days before a town commission meeting.

b. *Members of the Town Commission may submit items for placement on the agenda.* All proposed agenda items shall be delivered to the Town Clerk at a minimum of six (6) business days before a Town Commission meeting. These items shall be part of the meeting notice and part of the meeting agenda. No member of the Town Commission may present more than four (4) items at any meetings. Commission members adding items to the agenda must include an agenda cover sheet, fiscal impact of the item, and sufficient back-up to their item to ensure that the public has a reasonable understanding of the item's intent. The limitations on agenda items herein shall not include proclamations or keys to the Town.

c. It is the responsibility of the Town Clerk to compile and deliver the agenda and all supporting documentation under the general supervision and direction of the Town Manager. All members of the Town organization are encouraged to cooperate with the clerk in making the agenda complete and accurate. Pursuant to F.S. Ch. 286, as amended from time to time, additional items may only be added to the agenda under exigent circumstances to protect to life, health, safety and welfare of the citizens and residents of the Town. The Town Manager may request additional time to study an item not included on the agenda but presented for action at the meeting.

(Ord. No. 2023-005, § 3, 7-12-23)

Agenda Item Report

Subject:	Discussion and approval to provide funding for a Lightning Lounge for Lake Forest Elementary - Sponsored by Town Manager Lynch
Meeting Date:	Special Commission Meeting - March 13, 2026

And speaking of our local schools
The Lightning Lounge Budget
The Lightning Lounge Partnership Overview
FW_ Thank You and Follow-Up_ Lightning Lounge at Lake Forest Elementary

And speaking of our local schools, I want to talk about a great meeting I had with **Debbie Lizano who is the principal of Lake Forest School.**

She has a great idea.

She wants to establish a special room in the school which will be called the **LIGHTNING LOUNGE**.

No, it's not a tavern for Nikolai Tesla fans.

It is a special room filled with education materials on **STEAM topics** (STEAM was formerly known as **STEM,** which was an acronym for **S**cience, **T**echnology, **E**ngineering, and **M**ath----the added **A** stands for **Arts**).

This special room would be a privileged place where students are rewarded by being given the opportunity to hang out in the **LIGHTNING LOUNGE** to further their education on an independent basis away from the regular classroom.

The concept behind the **LIGHTNING LOUNGE** is to create a place for independent study and learning that is **fun.** The room would be equipped with items that create a *gaming* type of atmosphere.

Everybody likes to hang out in a cool place and the **LIGHTNING LOUNGE** will be a very cool place.

The problem is that Lake Forest does not have the funding for this project which amounts to a total budget of **$12,000** for the **LIGHTNING LOUNGE**.

I will be placing on the next workshop for our commission to approve providing the $12,000 funding for the **LIGHTNING LOUNGE**. We are currently spending more money than that just to guarantee that the students have hot lunches.

This is an investment worth making.

Lightning Lounge Equipment & Materials Budget

1. STEM Technology & Digital Learning Equipment

Item	Qty	Unit Cost	Total
Dell 24" All-in-One Desktop Computer	4	$809.00	$3,236.00
Apple iPad 11" (128GB)	5	$329.00	$1,645.00
Amazon Basics 27" Monitor	1	$99.99	$99.99
Creality K2 Combo 3D Printer	1	$799.00	$799.00
WEEDO TINA2S Mini 3D Printer	1	$215.49	$215.49

Section Total: $5,995.48

---

2. Robotics, Coding & STEM Exploration Kits

Item	Qty	Unit Cost	Total
V-Opitos Fort Building Kit	1	$39.99	$39.99
OleFun Fort Building Kit	1	$54.99	$54.99
Magnetic STEM Tile Set	2	$19.99	$39.98
STEM Robotics Craft Kits	2	$17.99	$35.98
Coding Chameleon STEM Robot	2	$37.99	$75.98
Mega Cyborg Hand Engineering Kit	2	$29.97	$59.94

Section Total: $306.86

---

3. Interactive Engagement Technology

Item	Qty	Unit Cost	Total
PlayStation 5 Console	1	$549.00	$549.00
Xbox One X Console	1	$289.00	$289.00
Xbox Wireless Controllers	3	—	$149.30
PlayStation DualSense Controllers	3	—	$231.87
Xbox Controller Charging Stations	2	$27.94	$55.88

PS5 Charging Stations	2	$24.99	$49.98
Gaming Headsets	10	$21.68	$216.80
RGB Headset Stand	1	$23.36	$23.36
Nex Playground Gaming System	1	$362.97	$362.97
Sonic Racing Game	1	$35.20	$35.20

Section Total: $1,963.36

---

4. Collaborative Games & Student Engagement

Item	Qty	Unit Cost	Total
Giant Jenga	1	$129.95	$129.95
Twister Game	1	$13.99	$13.99
Giant Checkers/Tic Tac Toe	1	$15.15	$15.15
Giant 4-in-a-Row Game	2	$71.31	$142.62
Giant UNO	1	$19.97	$19.97
Giant Sorry Game	1	$23.95	$23.95
Cornhole Game Set	2	$44.73	$89.46
Bean Bag Toss Game	1	$35.99	$35.99
Spring Fling Bounce Game	1	$36.99	$36.99
Prize Wheel	1	$42.99	$42.99
Bingo Card Set	1	$32.98	$32.98
Dance Bomb Game	1	$19.99	$19.99
Basketball Arcade Game	1	$119.99	$119.99

Section Total: $724.02

---

5. Furniture & Seating

Item	Qty	Unit Cost	Total
Bean Bag Lounge Chairs	4	$69.99	$279.96
Kids Table & Chair Set	1	$59.99	$59.99
Kids Picnic Table	1	$104.99	$104.99

Section Total: $444.94

---

6. Learning Environment Setup

Item	Qty	Unit Cost	Total
Gaming Rug (5x8)	1	$56.99	$56.99
Gaming Rug (4x6)	1	$47.49	$47.49
Gaming Rug (5x7)	1	$69.99	$69.99
Hopscotch Learning Rug	1	$23.99	$23.99

Section Total: $198.46

---

7. Audio & Presentation Equipment

Item	Qty	Unit Cost	Total
JBL Wireless Microphone System	1	$109.95	$109.95
Microphone Storage Case	1	$21.99	$21.99
Monster Rockin’ Roller Speaker	1	$239.00	$239.00

Section Total: $370.94

---

8. Supplies, Maintenance & Replacement Reserve

Item	Purpose	Total
3D printer filament, maintenance parts, replacement components	Equipment upkeep	
Replacement STEM kit parts and classroom materials	Ongoing program supplies	
Replacement of worn or damaged equipment	Sustainability of the space	

Reserve Allocation: $6,000

Total Funding Request

Initial Equipment & Materials: **~$10,000**
Operational Supply & Replacement Reserve: **~$6,000**

Total Request: $16,000

The Lightning Lounge

A STEM Innovation & Engagement Space at Lake Forest Elementary

The Lightning Lounge is a hands-on STEM innovation and engagement space designed to spark curiosity, creativity, and confidence in students at Lake Forest Elementary School.

The space provides elementary students with opportunities to explore science, technology, engineering, and math through play, experimentation, and hands-on learning experiences.

The goal of the Lightning Lounge is to introduce students to tools and experiences that help them begin thinking like builders, problem-solvers, and innovators at an early age.

What Happens in the Lightning Lounge

Students participate in rotating activities and open learning experiences that include:

• Building and engineering challenges using STEM kits and construction tools
• Robotics and coding activities that promote logical thinking and experimentation
• Digital exploration through age-appropriate technology and interactive learning tools
• Strategy-based games that strengthen math skills, collaboration, and critical thinking
• Creative and movement-based activities that support focus, confidence, and social development

These experiences combine hands-on learning, technology exploration, and collaborative play in a structured but engaging environment.

Why This Space Matters

The Lightning Lounge supports student development through:

• Early exposure to STEM learning experiences
• Development of teamwork, creativity, communication, and problem-solving skills
• Age-appropriate digital literacy experiences
• Increased student engagement through an interactive learning environment

Introducing these experiences at the elementary level helps students build familiarity and confidence with STEM concepts early in their academic journey.

Leadership & Program Partnership

The Lightning Lounge is being developed in collaboration with the Entrepreneur Education and Development Center (TEEDC) and Lake Forest Elementary School under the leadership of Principal Denise Dopico-Lizano.

TEEDC is a nonprofit organization focused on empowering youth through entrepreneurship education, financial literacy, and hands-on learning experiences that build confidence, creativity, and practical skills.

Through this partnership, TEEDC works alongside Lake Forest Elementary School to support the development of engaging STEM-based learning experiences that complement the school's instructional goals.

Use of Funds (Total Request: $16,000)

The requested $16,000 investment will support the purchase of equipment, technology, learning materials, and furniture needed to establish the Lightning Lounge learning space.

In addition to the initial equipment purchases, a portion of the funding will be reserved to ensure the space remains functional throughout the school year.

Approximately **$6,000 will be allocated toward supplies, consumables, and replacement materials**, including items such as:

- 3D printer filament and maintenance parts
- Replacement materials for STEM kits and robotics activities
- Replacement of damaged equipment due to regular student use
- Classroom activity materials and learning supplies

This reserve ensures the Lightning Lounge can remain operational and fully stocked throughout the school year.

Subject: Thank You and Follow-Up: Lightning Lounge at Lake Forest Elementary

Good morning Mr. Lynch,

Thank you again for taking the time to meet with me and learn more about the vision for the Lightning Lounge at Lake Forest Elementary. I truly appreciate the opportunity to share the concept and discuss how this space can support students and families within the Town of Pembroke Park.

Following our conversation, I wanted to share two documents that provide additional context for the project: a brief Lightning Lounge overview and an itemized budget outlining the materials and equipment connected to the development of the space.

Lake Forest Elementary School is currently exploring the possibility of securing $16,000 in support from the Town of Pembroke Park Commission to help establish the Lightning Lounge prior to the start of the upcoming school year. The overview document explains the purpose of the space, while the budget document provides a breakdown of the equipment, materials, and supplies needed for implementation.

The budget also reflects that a portion of the funding would be reserved for ongoing supplies and

replacement materials to help ensure the space remains functional throughout the school year, including items such as 3D printer materials and other tools that may require maintenance or replacement over time.

Both documents are attached for your review. Please feel free to let me know if there is any additional information that would be helpful as the school continues exploring this opportunity.

Thank you again for your time and for the conversation we had. I truly appreciate your willingness to learn more about the Lightning Lounge and the potential impact it could have for students.

Respectfully,

--

May 2025 – April 2027

Restoring Integrity, Accountability, and Results

Pembroke Park was flagged for decades of mismanagement, fraud, waste, abuse, and noncompliance. That era ended when I was first elected mayor. From day one, the mission was clear: rebuild broken departments, modernize operations, restore accountability, and bring this town back into full compliance with state and federal requirements.

Despite only having two years during my first term, we made measurable progress. Toxic staff who resisted accountability were removed. Departments were rebuilt. Systems were modernized. Unfortunately, following the most recent election, progress stalled. Infrastructure projects were halted, compliance slipped, and old habits began resurfacing. Instead of advancing the town, the commission diverted nearly $300,000 attempting to remove me from office, despite being advised repeatedly that they lacked the authority to do so.

Taxpayer dollars are not political weapons. They are a public trust.

I am a corporate executive, entrepreneur, and public servant. I believe in fiscal discipline, accountability, and results. People are paid to work, not to occupy chairs. That principle will continue to guide every decision through April 2027.

Core Priorities Through April 2027

1. Infrastructure Completion or Termination

Every pending infrastructure project will meet one of two outcomes:

- A shovel in the ground, or
- Formal termination and withdrawal

Pembroke Park has spent decades deferring decisions and endlessly recycling plans. That ends now. No more extensions. No more lifelines. No more begging state and federal agencies for time due to internal dysfunction. Projects that cannot move forward in 2026 will not be carried into the next commission cycle.

2. Public Safety Independence

It took two years to build Pembroke Park's police department while navigating political resistance and internal obstacles. Without that interference, it would have taken twelve months.

We are now applying the same discipline to public safety fire services. When the final proposal is complete, it will be brought forward transparently. The goal is fiscal responsibility, local control, and independence from inflated external contracts that have historically cost this town millions.

Pembroke Park will be self-reliant again.

3. Zero Tolerance for Noncompliance

By the end of 2026:

- Pembroke Park will be fully compliant with all state and federal agencies
- All audits, grant reporting, and required filings will be completed on time
- Late submissions will not be tolerated

Department heads are responsible for compliance. If a vendor fails to perform, we will escalate. Accountability does not stop at internal staff.

4. Professional Government Operations

Before I was elected, the town had not completed meeting minutes for over two and a half years. Everything was paper-based. There were no job descriptions. No accountability. An employee with thirty years of service could not articulate their role.

We have since:

- Built a functioning Human Resources department
- Established formal job descriptions
- Updated an employee manual untouched since 1997
- Transitioned the town into a modern, electronic government

That progress will continue.

5. Governance Boundaries and Civility

It is illegal for elected officials to interfere with day-to-day operations. Any commissioner who attempts to direct staff outside their authority must be reported immediately to Human Resources and the Mayor's office.

The civility ordinance was passed to protect staff from abuse. That protection remains non-negotiable. Ethical violations, illegal conduct, or intimidation will be addressed swiftly and appropriately.

6. Compliance, Transparency, and Zero Corruption

I have made it clear since day one: I will not go to jail for anyone in Pembroke Park.

Every allegation brought against me has been dismissed. Every attempt to manufacture wrongdoing has failed. The town's focus moving forward is transparency, compliance, and ethical governance.

There are no hidden agendas. No side deals. No tolerance for corruption.

7. Media, Messaging, and Community Confidence

The objective for 2026 is simple:

- Complete long-delayed projects
- Open the Pembroke Park Fire Department
- Restore public confidence
- Generate positive, fact-based visibility

Pending litigation and unresolved matters will be addressed lawfully and professionally. The goal is stability, progress, and trust.

Closing Commitments

Leadership is temporary. Institutions are not.

My commitment is to leave Pembroke Park stronger, compliant, financially responsible, and respected. Every department head, every employee, and every elected official shares that responsibility.

We are not repeating the past.
We are not delaying the future.
We are moving forward.

Wed, Jan 7, 2026, 9:27 PM

Department Directors, Managers, and Staff,

This email is a follow-up to my previous message regarding expectations for 2026 and our discussion during tonight's meeting focused on "measurable results".

Prior to the next workshop, I am directing each Department Head to prepare a presentation for the Commission. This presentation must clearly outline your department's measurable results from 2025. I understand that not every director served for the entire calendar year. That is acceptable. What matters is what was accomplished within your department during 2025, regardless of time in Pembroke Park.

This presentation must be factual and data-driven. Do not include fluff, filler, or padded language. I am looking for real, demonstrable outcomes. If something did not move forward, say so. If progress was limited, explain why.

In addition, each presentation must clearly address your plans for 2026, including:

- Current projects that are actively moving forward
- Projects that will be completed in 2026
- Projects that should be eliminated.

This level of transparency and accountability is not optional It is how we move Pembroke Park forward. Clear expectations, honest assessments, and measurable performance are the foundation of effective leadership. This starts from the commission, to the town manager on down...

I appreciate your cooperation and professionalism as we continue to raise the standard for how this town operates.

Respectfully,

Mayor Geoffrey Jacobs

Good afternoon Mr. Mayor,

Sorry for the late submittal, due to Jeffrey Louis who since past Friday has being admitted to the Hospital due to an emergency and we have to take over from where he left off unexpectedly.
When I first started as the Building Official in April 2025, there were piles of plans waiting since the beginning of that year and beyond and likewise inspections.
As of today, plans take less days to be reviewed and there are no outstanding inspections except for the normal ones.
This has been all due to the extreme dedication of everyone currently serving the Town of Pembroke Parks. Almost everyone is new, but due to the influence and inspiration from the Town Manager, Mr. David Lynch a lot was achieved.

Here are a few notable benchmarks.

Nations Market

- Nations Market was completed and a CO was issued.

  This project was first initiated and was dragging on forever.

Margolis Town Houses

- The Swimming pool was completed but could not be used as the earlier official building would not let them.

  I came in and worked with Lennar Homes, Broward County Health Department and the Private provider and it was able to open to the delight of the residents.

Coca Cola Sound Wall

- This was finally completed after years.

Victor Hernandez.

- 3120 W. Hallandale Beach Blvd.,

He was finally able to complete the violations that took forever and enjoy his abode.

Daniel Read

- 107 Lone Pine Drive

His issue was finally resolved after many months back and forth.

Here is a list of the Team members who made all these possible:

Grace Escalente- Assistant Building Official (Part time)

Jason Candiotti, Administrative Associate

Nehemie "Mimi" Paul-Sauveur-Permit Tech

Marta Santiago- New Permit Tech previously , Administrative Associate

Nazly Cardona- Certificate of Use

CURRENT GOALS BEING PURSUED

The first goal I had in mind the first day I took over was to tell all the permit techs to have their permit technician licenses, because we wanted to make the Town of Pembroke Park the best Building Department in the whole of Broward County. The more knowledgeable the clerks are the more they can offer help quickly and efficiently. They are currently attending courses run by the Broward County Board of Rules and Appeals. We don't have any SOP (Standard Operating Procedures)'s, which we have now started working on. Grace has been actively leading the Team jointly with Jason primarily for the Private Providers especially EKOS which is now in operation making the process very smooth and efficient.

Likewise, all these future upcoming projects will benefit from all the updates we are making:

PEMBROKE OAKS

5434 W Hallandale Beach Blvd.

Upcoming residential unit complex.

FUTURE HOME DEPOT

3121 W. Hallandale Bch. Blvd

CLOMR-FILL Conditional Letter of Map Revision based upon Fill already approved by FEMA

RAKING SYSTEM

Raking System most critical requirement was never followed by having a special inspector certify the installation of the racking system- something which in essence could cause it to overturn. It has never been enforced. Nobody knows how many racks were installed without a licensed engineer verifying which is a violation of the Florida Building Code with the Town of Pembroke Park being liable. We now actively enforce them.

Direct engagement with Residents, Design Professionals, Contractors and Developers.

We are working on having in Person Meetings with Residents, Contractors, Architects, Engineers constantly who are having problems with their submittals which helps them understand comments better to have their approvals on time instead of repeated rejections.

Sharon School of Excellence

They have major safety concerns on the property housing students like mold, exposed ceilings, failed structural elements, exposed wood trusses prone to catching fire and unsafe electrical installations in the classrooms. They have been cited by the Broward County Sheriff Fire Department. We had since then organized face-to-face meetings with all the stakeholders to resolve these violations which if not corrected sooner could affect health, safety and the general welfare of the kids.

Koinonia Church

Just like the Sharon School of Excellence, Koinonia Church has several life safety and potential fire hazardous situation in many of the structures on site. They have also been cited by the Broward County Sheriff Fire Department. We are working on having a direct meeting with them at City Hall to explain further the implication of what those violations to their members if not taken care of urgently.

We are currently updating the Building Department's website. There are outdated forms

and we are revamping them. Grace and Jason are working expediently towards that.

UPCOMING CHALLENGES

1. Florida Building Code is changing from the Eighth Edition (2023) by December 31,2026, to the Ninth Edition (2026). This means we must begin preparing ahead of that change. It will mean attending seminars, classes and others, which take away time from work.
2. We are transitioning from the current GovEasy system to the new upcoming CivicPlus in a couple of months, which does entail studies and classes throughout the whole year learning the new permitting system, intakes, payment system, plan reviews and others which also require time.

Again, I want to apologize for the late submittals.

As we are aware Jeffrey is still out due to an emergency, and we are all praying for his quick recovery.

Thanks,

RE: Rumors circulating, job stability and accountability ***DO NOT RESPOND ALL***

Geoffrey Jacobs
Town Staff , Police Staff , David Lynch , Jacob Horowitz , Ashira Mohammed , Musfika Kashem , Bill Hodgkins , Erik Morrissette , Desinda Wood Carper , HR
Fri, Jan 9, 2026, 1:52 PM

Town Directors, Department Heads, Staff, and Officers,

Since the conclusion of our last meeting, I have become aware of rumors circulating that jobs are at risk or that I am seeking to have people terminated. That is simply not true. These statements are unfounded, and I am sending this message to put an end to that narrative.

The purpose of my recent direction to Department Directors/Heads is straightforward. I am asking for a clear accounting of what has been accomplished in Pembroke Park, to establish a realistic and measurable baseline for 2026, and to identify projects that are not achievable and should be discontinued as we look toward 2027. This is about accountability, focus, and responsible planning. It is not about targeting individuals.

If you are aware of who is originating or spreading these personal and damaging rumors, whether that individual is a Commissioner, manager, or department heads, I strongly encourage you to report it to Human Resources. The sooner this behavior is addressed, the sooner we can stop the distractions and continue moving the town forward.

I have been clear from day one. I am not here to be liked or to win popularity contests. I am here to do a job for the taxpayers of Pembroke Park. I will not compromise my integrity, and I will not participate in or overlook fraud, waste, abuse, or any illegal, unethical, or immoral conduct. Any such matters will be addressed and properly reported.

Department Directors and Heads have sufficient time to prepare their presentations for the Commission prior to the next workshop. I expect those presentations to be

honest, factual, and focused on results.

Thank you for your professionalism and continued commitment to serving this community.

Respectfully,

Mayor Geoffrey Jacobs
Town of Pembroke Park

Commissioners, Department Directors, and Town Staff,

As has unfortunately become routine once again, rumors are again circulating within Town Hall. I want to be unequivocal and put these matters to rest immediately.

I do not give direction to the Town Manager, Directors, or Department Heads outside of the dais. Any direction I have ever provided in the Town of Pembroke Park has been given openly during a duly noticed Commission meeting, with the Commission asked for concurrence. Direction is issued from the dais only, by a majority of the Commission, or by those Commissioners present at the meeting. Anything outside of that process is improper and did not come from me.

To be clear, I am not involved in any discussions regarding the sale of Town Hall, the purchase of another building, or any similar actions. I have not given direction on these matters privately, informally, or behind closed doors. These rumors stop now!

Long-time employees are well aware of my record. I have been successful in Tallahassee advocating for this town, securing resources, extending grants, and helping bring Pembroke Park back into compliance. That is the sole purpose of my trip to Tallahassee from Monday through Wednesday.

No other Commissioner is accompanying me due to the obvious risk of Sunshine Law implications. I do not require a chaperone, another Commissioner, or the Town Manager to perform the duties I was elected to carry out. Accordingly, the Town Manager will not be attending this trip with me.

I will be working directly with our lobbyist and elected officials to pursue resources and opportunities for Pembroke Park. At the next workshop, I will provide a full report of the trip and outline any potential outcomes for the Town.

I expect professionalism, accuracy, and an end to rumor-driven distractions so we can focus on the work that actually matters.

Respectfully,

Mayor Geoffrey Jacobs

Commissioners, Department Directors, and Town Staff,

As has unfortunately become routine once again, rumors are again circulating within Town Hall. I want to be unequivocal and put these matters to rest immediately.

I do not give direction to the Town Manager, Directors, or Department Heads outside of the dais. Any direction I have ever provided in the Town of Pembroke Park has been given openly during a duly noticed Commission meeting, with the

Commission asked for concurrence. Direction is issued from the dais only, by a majority of the Commission, or by those Commissioners present at the meeting. Anything outside of that process is improper and did not come from me.

To be clear, I am not involved in any discussions regarding the sale of Town Hall, the purchase of another building, or any similar actions. I have not given direction on these matters privately, informally, or behind closed doors. These rumors stop now!

Long-time employees are well aware of my record. I have been successful in Tallahassee advocating for this town, securing resources, extending grants, and helping bring Pembroke Park back into compliance. That is the sole purpose of my trip to Tallahassee from Monday through Wednesday.

No other Commissioner is accompanying me due to the obvious risk of Sunshine Law implications. I do not require a chaperone, another Commissioner, or the Town Manager to perform the duties I was elected to carry out. Accordingly, the Town Manager will not be attending this trip with me.

I will be working directly with our lobbyist and elected officials to pursue resources and opportunities for Pembroke Park. At the next workshop, I will provide a full report of the trip and outline any potential outcomes for the Town.

I expect professionalism, accuracy, and an end to rumor-driven distractions so we can focus on the work that actually matters.

Respectfully,

Mayor Geoffrey Jacobs
Town of Pembroke Park

Commissioners, Town Staff, and Management,

I am writing to address what occurred surrounding last night's scheduled workshop and to be very clear about governance, roles, and expectations in the Town of Pembroke Park.

Pembroke Park operates under a commission form of government. The Commission sets policy and direction. The Town Manager is responsible for day-to-day operations and executing the will of the Commission. When a Commission meeting or workshop is scheduled, participation and preparedness are expected. That is fundamental to how this government functions.

A scheduled meeting must still open and close, regardless of whether a quorum is ultimately present. A quorum may appear or may not appear, but that determination is made at the dais, not in advance. It is the responsibility of each Commissioner to perform their due diligence and attend scheduled meetings. That is what Commissioners are elected and paid to do.

The Town Attorney has been very clear on this point: it is not the responsibility of the Clerk, management, or staff to determine whether a quorum exists or whether a meeting should proceed. Those decisions belong to the Commission, in public, on the record.

Despite this, I was informed that at approximately 4:00 PM yesterday, before the close of the business day, the Town Manager dismissed Town employees and sent staff home on the same day departments were scheduled to present at a Commission workshop. We then had a scheduled meeting where three Commissioners and Town staff were not in attendance. That sequence of events is

highly irregular, deeply concerning, and raises serious questions about what is occurring inside Town Hall.

Compounding this concern, I was also informed that the Town Manager may have attempted to influence Commissioners not to attend the meeting. That is not within the scope of the Town Manager's authority. When staff are dismissed and Commissioners are absent on the same night accountability was scheduled, that is not coincidence. That is manipulation.

Over the last several months, I have observed a troubling pattern. Financial information has not made sense, items required to come before the Commission have not been brought forward, and questions have gone unanswered. Taken together, these issues point to a significant and systemic problem within Town Hall that can no longer be ignored.

You have all seen my recent emails. Presentations were expected. Accountability was expected. So much so that I personally invited the Broward County Office of Inspector General to attend and observe firsthand how business is conducted in this town. When transparency arrived, the room was emptied.

I also want to be clear about the personal cost of this dysfunction. Myself, my wife, and my children have all suffered at the hands of political corruption over the last several years in Pembroke Park. No family should ever be placed in the position mine has been placed in for simply insisting on accountability and lawful governance. Despite this, I hold my head high and stand proud to represent the residents of this town. The noise, the rumors, and the obstruction will not stop me.

Accountability does not rest solely with the Commission. Accountability must also exist within management. If we are serious about fixing this town, everyone must be held to the same standard. Titles do not exempt anyone from responsibility.

I am aware that some of you may fear retaliation or concern for your position if you come forward about what you see occurring. Let me be clear: my phone number is public, my line is always open, and I am available. My town cell phone: (954) 290-1262. If you do not feel comfortable coming forward, this is a problem... I encourage you to reach out to the town attorney Jacob Horowitz at jhorowitz@gorencherof.com or to Bradley, our HR Director at HR@tppfl.gov. If you want to take it outside of town please feel free to reach out to my personal attorney, Michael Pizzi MPIZZI@PIZZILAW.COM. I strongly recommend that you document

what you see and send an email today, whether in support of or opposition to my efforts. Silence only enables dysfunction.

We all know the phrase, if you see something, say something. The time to say something is now. Many of you have been here a long time. You have seen this pattern before. It is time to draw a line in the sand and put a stop to the continued manipulation and nonsense inside this Town.

Let me be absolutely clear going forward. It is not the Town Manager's role to dismiss staff in order to prevent a Commission meeting from functioning. It is not the Town Manager's role to manipulate outcomes or shield departments from accountability. That behavior is unacceptable.

The nonsense stops today. This town must move forward, and it will not do so without transparency, accountability, and people willing to stand up and tell the truth.

Respectfully,

Mayor Geoffrey Jacobs

14 YEARS EXPERIENCE IN MUNICIPAL LEADERSHIP

March 5, 2022

Beth Gunderson, Sycamore Township
Board of Trustees
8540 Kenwood Rd.
Sycamore Township, Oh 45236

Re: Township Administrator Vacancy

Dear Ms. Gunderson and Board of Trustees:

I recently noticed the posting for the township administrator position with your fine community. I have run big and small municipalities and I have served the entire State of Ohio as President of the Ohio Municipal League. Attached is my resume for your review. I would kindly ask for the chance to interview for this post.

Thank you in advance for this opportunity to make contact regarding this position.

Sincerely,

David M. Lynch

DISCIPLINARY COUNSEL *v.* LYNCH.

[Cite as *Disciplinary Counsel v. Lynch*, 130 Ohio St.3d 1206, 2011-Ohio-5410.]

Attorneys at law—Reciprocal discipline from the State Bar of Arizona—Public Reprimand—Gov.Bar R. V(11)(F)(4).

(No. 2011-1190—Submitted October 5, 2011—Decided October 14, 2011.)

ON CERTIFIED ORDER of the Supreme Court of Arizona, No. 10-0651.

{¶ 1} This cause is pending before the Supreme Court of Ohio in accordance with the reciprocal discipline provisions of Gov.Bar R. V(11)(F).

{¶ 2} On July 8, 2011, relator, Disciplinary Counsel, filed with this court a certified copy of an order of the Supreme Court of Arizona entered March 8, 2011, in *In re a Non-Member of the State Bar of Arizona,* in Case No. 10-0651, admonishing respondent, David M. Lynch. On July 25, 2011, this court ordered respondent to show cause why identical or comparable discipline should not be imposed in this state. Respondent filed a response to the show cause order, and relator filed a reply to the response.

{¶ 3} On consideration thereof, it is ordered and adjudged by this court that pursuant to Gov.Bar R. V(11)(F)(4), respondent, David Marlborough Lynch, Attorney Registration No. 0006380, last known business address in Wickliffe, Ohio, is publicly reprimanded.

{¶ 4} It is further ordered, sua sponte, by the court, that within 90 days of the date of this order, respondent shall reimburse any amounts that have been awarded against respondent by the Clients' Security Fund pursuant to Gov.Bar R. VIII(7)(F). It is further ordered by the court that if, after the date of this order, the Clients' Security Fund awards any amount against respondent pursuant to

Gov.Bar R. VIII(7)(F), respondent shall reimburse that amount to the Clients' Security Fund within 90 days of the notice of such award.

{¶ 5} It is further ordered that service shall be deemed made on respondent by sending this order, and all other orders in this case, by certified mail to the most recent address respondent has given to the Office of Attorney Services.

{¶ 6} It is further ordered that the clerk of this court issue certified copies of this order as provided for in Gov.Bar R. V(8)(D)(1), that publication be made as provided for in Gov.Bar R. V(8)(D)(2), and that respondent bear the costs of publication.

O'CONNOR, C.J., and PFEIFER, LUNDBERG STRATTON, O'DONNELL, LANZINGER, CUPP, and MCGEE BROWN, JJ., concur.

IN RE RESIGNATION OF LYNCH.

[Cite as *In re Resignation of Lynch*, 155 Ohio St.3d 1282, 2018-Ohio-4671.]

Attorneys at law—Resignation with disciplinary action pending—Gov.Bar R. VI(11)(C).

(No. 2018-1484—Submitted November 14, 2018—Decided November 22, 2018.)

ON APPLICATION FOR RETIREMENT OR RESIGNATION PURSUANT TO GOV.BAR R. VI(11).

{¶ 1} David Marlborough Lynch, Attorney Registration No. 0006380, last known business address in Euclid, Ohio, who was admitted to the bar of this state on November 15, 1982, submitted an application for retirement or resignation pursuant to Gov.Bar R. VI(11). The application was referred to disciplinary counsel pursuant to Gov.Bar R. VI(11)(B). On October 17, 2018, the Office of Attorney Services filed disciplinary counsel's report, under seal, with this court in accordance with Gov.Bar R. VI(11)(B)(2).

{¶ 2} On consideration thereof, it is ordered by the court that pursuant to Gov.Bar R. VI(11)(C), the resignation as an attorney and counselor at law is accepted as a resignation with disciplinary action pending.

{¶ 3} It is further ordered and adjudged that from and after this date all rights and privileges extended to respondent to practice law in the state of Ohio be withdrawn, that henceforth respondent shall cease to hold himself forth as an attorney authorized to appear in the courts of this state, and that respondent shall not attempt, either directly or indirectly, to render services as an attorney or counselor at law to or for any individuals, corporation, or society, nor in any way perform or seek to perform services for anyone, no matter how constituted, that

must by law be executed by a duly appointed and qualified attorney within the state of Ohio.

{¶ 4} It is further ordered that respondent desist and refrain from the practice of law in any form, either as principal or agent or clerk or employee of another, and hereby is forbidden to appear in the state of Ohio as an attorney and counselor at law before any court, judge, board, commission, or other public authority, and hereby is forbidden to give another an opinion as to the law or its application or advise with relation thereto.

{¶ 5} It is further ordered that before entering into an employment, contractual, or consulting relationship with any attorney or law firm, respondent shall verify that the attorney or law firm has complied with the registration requirements of Gov.Bar R. V(23)(C). If employed pursuant to Gov.Bar R. V(23), respondent shall refrain from direct client contact except as provided in Gov.Bar R. V(23)(A)(1) and from receiving, disbursing, or otherwise handling any client trust funds or property.

{¶ 6} It is further ordered that respondent shall not enter into an employment, contractual, or consulting relationship with an attorney or law firm with which respondent was associated as a partner, shareholder, member, or employee at the time respondent engaged in the misconduct that resulted in this acceptance of respondent's resignation with discipline pending.

{¶ 7} It is further ordered that respondent shall surrender respondent's certificate of admission to practice to the clerk of the court on or before 30 days from the date of this order and that respondent's name be stricken from the roll of attorneys maintained by this court.

{¶ 8} It is further ordered by the court that within 90 days of the date of this order, respondent shall reimburse any amounts that have been awarded against respondent by the Lawyers' Fund for Client Protection pursuant to Gov.Bar R. VIII(7)(F). It is further ordered by the court that if after the date of this order the

Lawyers' Fund for Client Protection awards any amount against respondent pursuant to Gov.Bar R. VIII(7)(F), respondent shall reimburse that amount to the Lawyers' Fund for Client Protection within 90 days of the notice of that award.

{¶ 9} It is further ordered that on or before 30 days from the date of this order, respondent shall do the following:

{¶ 10} 1. Notify all clients being represented in pending matters and any co-counsel of respondent's resignation and consequent disqualification to act as an attorney after the effective date of this order and, in the absence of co-counsel, also notify the clients to seek legal services elsewhere, calling attention to any urgency in seeking the substitution of another attorney in respondent's place;

{¶ 11} 2. Regardless of any fees or expenses due, deliver to all clients being represented in pending matters any papers or other property pertaining to the client or notify the clients or co-counsel, if any, of a suitable time and place where the papers or other property may be obtained, calling attention to any urgency for obtaining such papers or other property;

{¶ 12} 3. Refund any part of any fees or expenses paid in advance that are unearned or not paid and account for any trust money or property in the possession or control of respondent;

{¶ 13} 4. Notify opposing counsel or, in the absence of counsel, the adverse parties in pending litigation of respondent's disqualification to act as an attorney after the effective date of this order and file a notice of disqualification of respondent with the court or agency before which the litigation is pending for inclusion in the respective file or files;

{¶ 14} 5. Send all notices required by this order by certified mail with a return address where communications may thereafter be directed to respondent;

{¶ 15} 6. File with the clerk of this court and disciplinary counsel of the Supreme Court an affidavit showing compliance with this order, showing proof of

service of the notices required herein, and setting forth the address where respondent may receive communications; and

{¶ 16} 7. Retain and maintain a record of the various steps taken by respondent pursuant to this order.

{¶ 17} It is further ordered that on or before 30 days from the date of this order, respondent shall surrender the attorney-registration card for the 2017/2019 biennium.

{¶ 18} It is further ordered that until such time as respondent fully complies with this order, respondent shall keep the clerk and disciplinary counsel advised of any change of address where respondent may receive communications.

{¶ 19} It is further ordered that all documents filed with this court in this case shall meet the filing requirements set forth in the Rules of Practice of the Supreme Court of Ohio, including requirements as to form, number, and timeliness of filings. All case documents are subject to Sup.R. 44 through 47, which govern access to court records.

{¶ 20} It is further ordered that service shall be deemed made on respondent by sending this order and all other orders in this case to respondent's last known address.

{¶ 21} It is further ordered that the clerk of this court issue certified copies of this order as provided for in Gov.Bar R. V(17)(D)(1) and that publication be made as provided for in Gov.Bar R. V(17)(D)(2).

O'CONNOR, C.J., and O'DONNELL, KENNEDY, FRENCH, FISCHER, DEWINE, and DEGENARO, JJ., concur.

Attorney David Lynch of Euclid, OH; Dumbo, repeat offender
The state of Ohio presented David Marlborough Lynch with a law license in 1985 after he graduated from Georgetown University Law School
The Disciplinary Counsel found Davey guilty of the following misconduct
Davey's 1st bite at the Attorney Misfit Apple Tree
Misrepresented himself to a doctor in Arizona
Falsely claimed to be suffering from a medical problem to a physician in order to gain access to that doctor
Filed motion in Arizona court misrepresenting some of the statements made by the doctor
As a direct consequence of his misconduct, the cheerleaders for Attorney Misfits sitting on the Arizona and Ohio Supreme Court punished Davey by gifting him with a complimentary reprimand
Davey's 2nd bite at the Attorney Misfit Apple Tree
The Cleveland Metropolitan Bar Association found Davey guilty of the following misconduct
Failed to try to negotiate settlement of client's personal injury claim
Failed to take any concrete actions on client's case for two years
Failed to communicate with client
Failed to act with due diligence (slacker)
Failed to provide competent representation (Dumbo)
Engaged in conduct prejudicial to administration of justice
As one would suspect, this wasn't Davey's first bite at the Attorney Misfit Apple Tree. He previously received a complimentary reprimand for engaging in a variety of misconduct
As a direct consequence of his misconduct, the cheerleaders for Attorney Misfits sitting on the Ohio Supreme Court punished Davey by gifting him with a complimentary 1 month suspension of his law licence
As we speak (ca. April 2018), Davey practices at 333 Bubbitt Road in Euclid, Ohio

Attorney David Lynch of Euclid, OH; perjuring loser
The state of Ohio presented David Marlborough Lynch with a law license in 1982 after he graduated from Georgetown University Law School
Disciplinary Counsel of the Ohio Supreme Court found Dave guilty of the following misconduct
In one matter, Dave found it acceptable to execute a false affidavit that his client had not been convicted following the reversal of the client's rape conviction
Dave gave the false testimony in his affidavit despite the fact that he had appeared in court with the client when a negotiated plea was entered
Because Attorney Misfits in Ohio are held to a much lower standard of conduct then everyone else, Dave was never criminally charged for perjury
As a consequence of his misconduct, the enablers for Attorney Misfits sitting on the Ohio Supreme Court punished Dave by gifting him with a complimentary 6 month suspension of his law license.
As we speak (ca. August 2015), Dave practices at 333 Babbitt Road in Euclid, Ohio

Suspended Newton Falls finance director disputes reasons for leave

Suspended Newton Falls finance director Anna Musson insists that there is no medical reason for her being placed on medical leave in May.

Monday, July 12th 2021, 1:20 PM EDT

By **J. Breen Mitchell**

Suspended Newton Falls finance director Anna Musson insists that there is no medical reason for her being placed on medical leave in May.

City manager David Lynch placed Musson on medical leave on May 14 but did not disclose the "medical" reason for the leave.

Musson was placed on medical leave by city manager David Lynch on May 14 for undisclosed reasons. On June 13, Lynch changed Musson's leave to a six-month suspension without pay, saying she'd failed to meet obligations she was "obligated to adhere to," without elaborationg on what those obligations may be.

In a letter obtained by 21 News from Musson to Newton Falls council members dated May 28 , Musson called the reasons for her having been placed on medical leave "misrepresentations," saying she has asked Lynch, through her attorney for an explanation of her medical leave.

"There has been no explanation on what medical exam Mr. Lynch has requested and he has not communicated any job-related reason, consistent with business necessity for a medical exam," the letter states.

Lynch said the reasons for Musson's suspension have to do with "employee/management issues," saying that beyond that, he had no comment, when asked about the suspension in late June.

NEWTON FALLS, Ohio (WKBN) – A protest was held Monday afternoon in Newton Falls demanding that city manager David Lynch be fired over what the protesters claimed were racist remarks.

About 25 people gathered around the Statue of Liberty monument, saying they will not accept Lynch's apology and want him to resign or be fired.

At a city council meeting last Monday, Lynch said that Jose Morales, a resident of Newton Falls, was "a tunnel guy that was working on his green card."

"If I would have had the opportunity, I would have stood with all those protesters and held up a sign myself," Lynch said.

Protesters said these types of jokes have no place in their government.

"Making a bad joke is never appropriate, especially when it causes offense to someone who's a great person," Lynch said.

ADVERTISEMENT

"I don't think that any member of council should be making those comments, elected or not. I don't think there's any room for racism, joke or not, because racism is not a joke in our council or in our city government," said Newton Falls resident Katarra Waldron.

Lynch says he has contacted Morales to apologize but Morales has said that there is no way to apologize for that kind of comment.

Morales is an American citizen born in Florida who moved to Newton Falls 28 years ago.

Petition details Comments

Dear Councilwoman Spletzer:

A member of City Council has asked to initiate the process of a hearing related to your removal from office pursuant to Article III, section 4 (attached hereto) of the Newton Falls Charter. Under section 4 referenced above, you are charged with "gross misconduct" because of your improper use of the 911 system on the date of April 16, 2021.

You are entitled to a hearing on this charge which will be conducted on the date of May 19, 2021 in the council chambers at 612 W. Broad Street, Newton Falls, Ohio 44444 at 5 PM. You are entitled to retain counsel in this matter and will be given full due process rights in this hearing at which you may make any statements, present or cross examine witnesses, or present any relevant evidence related to these charges.

Stop Councilwoman Spletzer's Removal

Why this petition matters

Started by Christopher Granchie

Media inquiries

On Tuesday, May 4th, Councilwoman Sandra Breymaier requested to remove Councilwoman Tesa Spletzer for "gross misconduct." The gross misconduct she cites is "misuse of 911 communications." On April 16th, 2021, Councilwoman Spletzer was obstructed from conducting official business at the Village Administration Building by City Manager David Lynch by not allowing her into the building to conduct her business. In response, with no police dispatcher I'm Newton Falls, Councilwoman Spletzer dialed 911 to hail the police to resolve this matter. Despite it being discussed in past council meetings, it is now being used against her for removal. Not only were there no charges issued for misusing 911 by police, but no discipline was brought forth during council meetings. From this, it is clear that this removal was brought forth in response to former Councilman Alberini's resignation in order to keep majority of council on their side. Councilwoman Spletzer has remained steadfast during her tenure to no only represent and support her ward, but our entire village. Now, we must support her in defeating this assault on her, and the voice of the people.

Lynch added that he did not know Jose's last name when he made the comment at the meeting. He said the volunteer coordinator sent an email to him referring to "Jose the tunnel guy," since Jose worked on the tunnel as part of the community project.

Morales said that City Manager David Lynch was also at the cleanup and overheard the statement. Morales said several others at the cleanup expressed their disapproval of the comment.

At a Newton Falls City Council meeting on Aug. 17, 2020, Lynch is accused of making a similar statement referring to Morales as the "Tunnel Guy" and stated, " He's working on his green card we think, folks." The comment is heard about 18 minutes and 50 seconds into the recording.

NF City Council August 17, 2020

The statement was made as Lynch was recognizing those that helped clean up the tunnels.

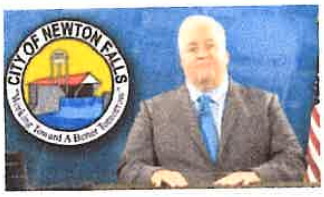
NEWTON FALLS, Ohio (WKBN) – A Newton Falls man is suing Newton Falls, the city manager and another resident following comments made at a public meeting.

According to the lawsuit, Jose Angel Morales claims he was defamed twice. Once in front of city officials and residents and another time during a city council meeting. Both incidents happened last year.



Hubbard mom accused of leaving child inside vehicle while she shopped >

Morales claims that he was involved in a community cleanup for the "tunnels" of Newton Falls in August 2020. During that cleanup, Morales claims that Roy Clouch, Jr. made a statement to the effect that Morales was an illegal Mexican immigrant working on his green card, according to the lawsuit.

Newton Falls law director questions legality of city manager removal

The political turmoil in Newton Falls continued Monday night as a vote was held to terminate the contract of City Manager David Lynch.

According to Mayor Ken Kline, city council voted 3-1 to terminate Lynch's contract.

On Tuesday, Lynch returned to work despite Mayor Ken Kline acknowledging his termination because Lynch points to Law Director Joseph Fritz who said the city did not follow proper protocol in their effort to fire Lynch.

In a letter Fritz sent to city officials he said, in part, "This evening Council voted 3 to 1 to terminate the City Manager's Contract. Council did not give prior notice of this matter on the agenda. The Council properly added the matter to the agenda by simple majority vote"

According to Lynch, the law director said council needs four votes to remove him.

Kline told 21 News there wasn't one specific reason for Lynch's termination, stating that council decided to move in a different direction, but Kline said Lynch is "under investigation," although Kline would not comment on why.

Kline said he plans to pursue a restraining order against Lynch to ban him from the city building.

Bill George, electric superintendent for the city, was named the interim city manager following Lynch's removal, but Kline said this is in limbo because of the controversy involving Lynch's position and said he's seeking legal advice from another attorney on handling the matter.

Kline said a citizen's committee comprised of business owners and residents will help screen new candidates for the job.

The City Manager's role is to manage most day-to-day operations of the community.

Mayor Kline said he will release more information on the matter in the coming days.

Newton Falls council to vote again on firing of David Lynch

Police chief's job also on line after mayor decries 'insubordination' during meeting

NEWTON FALLS — After voting 3-1 this week to fire village manager David Lynch, Newton Falls Village Council now plans to meet again next week to rehash Lynch's termination and to discuss the termination of police Chief Gene Fixler.

Some members of council believe Fixler may have been insubordinate in not carrying out its wishes after voting to fire Lynch.

After council's vote Monday, Lynch walked out of the meeting on his own.

Following the vote, village Law Director A. Joseph Fritz stated the 3-1 simple majority vote was insufficient for official passage because the matter was introduced on council floor with no advance notice.

Mayor Ken Kline said he still believes that Lynch's termination was proper, but rather than risk a lengthy, costly legal battle, council will proceed with a special meeting to come to some resolution.

"We will go into executive session to see if he wants to resign, and then if not, council will proceed with terminating of the contract," he said.

Kline said Lynch has been at work since Tuesday morning and has not surrendered his keys. Kline said while Lynch may physically be at the building, Kline does not recognize that he is acting as village manager.

"I do not know why he wants to stay in the position when a majority of council and many members of the community do not want him here," Kline said.

Lynch said he welcomes the meeting next week to speak with council and Kline.

"I hope a solution to this can be reached. I think council realizes now what they did at the meeting was not the right way and had to schedule another meeting," Lynch said.

Lynch said he is optimistic all parties will be able to come to a resolution.

POLICE CHIEF CONTRACT

Also added to the special meeting notice issued Thursday by Kline is discussion and possible vote to terminate the contract of Fixler. The move comes after some council members said they believed Fixler was insubordinate by not removing Lynch from the meeting on Monday, Kline said.

Kline said while the police chief takes his orders from the village manager, he also should take orders from council and requests from the mayor at meetings.

"There are some members of council who feel his actions at the meeting were insubordination," he said.

Reached Thursday, Fixler said he was acting on a decision of the law director, who Monday evening issued a memorandum indicating that council's vote Monday was insufficient for passage.

"I am following the decision of the law director. He has ruled that Mr. Lynch's contract was not legally terminated and that it was an improper vote of council," Fixler said.

Fixler said he walked with Lynch out of the meeting Monday, but he did not remove him from the municipal building this week because he did not believe he was fired.

Fixler said in light of next week's meeting to discuss his contract, he has contacted an attorney.

"I have no idea what that is about. I am doing my job as police chief. The community is pleased with the police department and what we do," Fixler said.

UNANNOUNCED MEETING

Kline acknowledged he and council members Brian Kropp and Tesa Spletzer met for lunch last week, prior to Monday's meeting. The gathering was not announced publicly, according to Ohio Sunshine laws. Kline said

he did not believe two of five members of council constituted a quorum and therefore was not a Sunshine Law meeting violation. He added no decision about Lynch was made during the lunch meeting.

Kline said Lynch's contract was not discussed, but the group met with a liaison from the state auditor's office and state Rep. Michael Loychik on various matters.

"It was the middle of the day, and we were all at a local restaurant where anyone could see us. We were speaking with some state officials on different issues," he said.

According to Ohio open meeting laws, all public business must be conducted in open meetings. Under the law, any time a public body gathers for a preplanned meeting to discuss public business, it must be announced publicly in advance.

Lynch said he was aware of the meeting and questioned whether it was a violation of Ohio Sunshine laws because under council's charter, the mayor is considered a voting member of council, thereby constituting a quorum.

Also, according to Lynch, Spletzer and Kropp make up village council's Audit and Finance Committee, which under Ohio law, would constitute an illegal meeting of that council committee.

Lynch said he believes his contract was discussed at that gathering.

"I hope that this situation can be resolved and not come to litigation," Lynch said.

Subject: Commission hires

RESOLUTION NO. _____

A RESOLUTION OF THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, AFFIRMING AND CLARIFYING THE AUTHORITY, REPORTING STRUCTURE, AND OVERSIGHT OF CHARTER POSITIONS AND COMMISSION-APPOINTED DIRECTORS; REAFFIRMING THAT ALL EMPLOYMENT AUTHORITY RESTS

SOLELY WITH THE TOWN COMMISSION ACTING COLLECTIVELY; DEFINING AND LIMITING THE ADMINISTRATIVE AUTHORITY OF THE TOWN MANAGER; ESTABLISHING A MANDATORY COMMISSION REVIEW PROCESS FOR ALLEGED MISCONDUCT; PROVIDING A NARROW AND CONTROLLED EMERGENCY PAID SUSPENSION EXCEPTION WITH AUTOMATIC COMMISSION OVERSIGHT; PROHIBITING THREATS, COERCION, AND RETALIATION; PROVIDING ENFORCEMENT; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS,

WHEREAS, the Town of Pembroke Park operates under a Commission-Manager form of government pursuant to its Town Charter; and

WHEREAS, the Town Commission is the governing body of the Town and is vested exclusively with the authority to appoint, evaluate, discipline, and remove Charter officers and Commission-appointed directors; and

WHEREAS, the Town Manager serves as the chief administrative officer and is authorized to conduct day-to-day administrative operations only within the limits of the Town Charter and lawful Commission policy; and

WHEREAS, no individual official, including the Town Manager, possesses unilateral authority to discipline, threaten, coerce, suspend, demote, reassign, or terminate Charter officers or Commission-appointed directors except as expressly authorized by formal action of the Town Commission; and

WHEREAS, the Town Commission finds that misuse of administrative authority—whether through threats, informal discipline, retaliation, or coercive practices—undermines lawful governance and exposes the Town to significant legal and operational risk; and

WHEREAS, the Town Commission further finds it necessary to allow for limited emergency action in rare circumstances involving serious misconduct, while ensuring immediate Commission oversight and control;

NOW, THEREFORE, BE IT RESOLVED BY THE TOWN COMMISSION OF THE TOWN OF PEMBROKE PARK, FLORIDA, THAT:

Section 1. Exclusive Commission Authority.

All Charter positions and Commission-appointed directors shall be appointed, evaluated, disciplined, and removed solely by the Town Commission acting collectively, through formal Commission action in accordance with the Town Charter and applicable law.

Section 2. Strict Limitation on Town Manager Authority.

The Town Manager shall conduct day-to-day administrative and operational functions strictly within the limits established by the Town Charter and Commission policy.
Nothing in this Resolution shall be construed to authorize the Town Manager to independently discipline, threaten, intimidate, suspend, demote, reassign, evaluate for punitive purposes, or terminate any Charter officer or Commission-appointed director.

Section 3. Mandatory Commission Review of Alleged Misconduct.

In the event the Town Manager alleges misconduct, performance deficiencies, or policy violations by a Charter officer or Commission-appointed director:

a. The allegation shall be reduced to writing and submitted to the Town Commission through the Town Attorney or Human Resources Director;

b. No disciplinary or adverse employment action of any kind, including threats, written warnings, adverse evaluations, reassignments, or changes in duties or compensation, shall be initiated, threatened, or implied unless and until the Town Commission reviews the matter and provides formal direction;

c. The Town Commission shall determine whether:
1. An investigation is warranted;
2. Corrective or disciplinary action is appropriate; or 3. No action shall be taken; and

d. Any action taken in violation of this Section is declared unauthorized, improper, void, and of no legal effect.

Section 4. Limited Emergency Paid Suspension Authority.

Notwithstanding the foregoing, the Town Manager may impose a temporary paid administrative suspension of a Charter officer or Commission-appointed director only under the following narrow circumstances:

a. Emergency Defined.
An emergency suspension may be imposed only where the Town Manager has a good-faith, articulable belief, supported by specific facts, that the employee's continued presence presents an immediate and substantial risk to:
• Workplace safety;
• An ongoing criminal or serious misconduct investigation; • Evidence preservation; or • The Town's legal or ethical obligations, including but not limited to allegations of sexual misconduct, harassment, violence, or abuse of authority.

Mere allegations of insubordination, policy disagreement, performance concerns, or refusal to carry out directives reasonably believed to be unauthorized shall not constitute an emergency.

b. Immediate Written Notice.
Any emergency suspension shall:
1. Be paid;
2. Be expressly characterized as non-punitive; 3. Be documented in writing within twenty-four (24) hours, stating the specific factual basis; and 4. Be immediately transmitted to the Town Commission through the Town Attorney and Human Resources Director.

c. Automatic Commission Review and Expiration.
Any emergency suspension imposed by the Town Manager shall automatically expire unless reviewed and affirmed, modified, or lifted by the Town Commission at the next available Commission meeting or within seven (7) calendar days, whichever occurs first.

d. No Expansion or Circumvention.
An emergency suspension:
• Shall not be extended, converted, or repeated without express Commission approval; • Shall not be used as leverage, retaliation, or coercion; and • Shall not result in discipline, adverse evaluation, reassignment, or reduction in pay or benefits absent Commission action.

e. Void if Improper.
Any suspension imposed outside the strict confines of this Section is declared unauthorized, improper, void, and of no effect, and may constitute grounds for disciplinary action against the official imposing it.

Section 5. Absolute Prohibition on Threats, Coercion, and Retaliation.

No individual official, including the Town Manager, shall threaten, coerce, retaliate against, or otherwise interfere with a Charter officer or Commission-appointed director for adhering to the Town Charter, lawful Commission directives, or professional and legal obligations.

Section 6. Enforcement.

Failure to comply with this Resolution by any individual official, including the Town Manager, shall constitute grounds for corrective or disciplinary action by the Town Commission, up to and including termination, subject to applicable law.

Section 7. Implementation.

The Town Attorney and Human Resources Director are directed to immediately align all personnel policies, supervisory practices, and procedures with this Resolution and the Town Charter.

Section 8. Severability.

If any provision of this Resolution is held invalid, such invalidity shall not affect the remaining provisions.

Section 9. Effective Date.

This Resolution shall take effect immediately upon adoption.

EMPLOYMENT AGREEMENT

THIS AGREEMENT (hereinafter referred to as "Agreement"), is by and between Town of Pembroke Park, Florida, a subdivision of the State of Florida (hereinafter referred to as "Town"), and David Lynch (hereinafter referred to by name or as "Town Manager").

WITNESSETH:

WHEREAS, the Town Commission desires to appoint David Lynch to serve as the Town Manager of the Town of Pembroke Park, Florida in accordance with Sec. 2-92 of the Town's Code of Ordinances; and

WHEREAS, the Town, through its Town Commission, desires to provide for certain benefits and compensation for Town Manager and to establish conditions of employment applicable to Town Manager; and

WHEREAS, David Lynch desires to be employed as Town Manager of the Town of Pembroke Park under the terms and conditions set forth herein.

NOW, THEREFORE, in consideration of the mutual promises as set forth in this Agreement, the parties agree as follows:

Section 1. Employment

A. The Town's employment of David Lynch shall be commence on October 21, 2024, and will continue for a period of three (3) years. Provided that neither party gives the other two (2) months' written termination notice, there shall be an unlimited number of one (1) year automatic renewals of this Agreement. In the event the Town Commission decides not to renew this Agreement, there shall be no severance pay made except for accumulated Vacation Leave (up to a maximum of 400 hours) and sick leave (up to $500.00). In the event that less than two (2) months' notice of termination is provided by either party, terminations shall occur in accordance with Sections 11 and 12 of this Agreement.

Section 2. Salary and Evaluation

A. For the performance of services pursuant to this Agreement, the Town agrees to pay the Town Manager an annual base salary of One Hundred Sixty-five Thousand Dollars and 00/100 ($165,000.00), payable in equal weekly installments at the same time as other Town employees are paid.

B. After the first full year of this Agreement, and annually thereafter, should the general Town staff receive a cost of living increase, the Town Manager will receive the same increase at the same time as the other staff.

C. Not less than (30) thirty days prior to the first anniversary date of this Agreement, and annually thereafter, the Town Manager and Town Commissioners shall meet individually, and,

in consideration of resources provided and matters outside the control of the Town Manager and Town Commission, discuss the Town Manager's performance and how the Town Commission can assist the Town Manager in performing the Town Manager's duties. Following the individual meetings with the Town Commissioners, the Town Manager will provide the Town Commission with a draft progress report inclusive of the Town Manager's and Town Commissioners' comments and suggestions. Following the Town Commission's review of the draft, the Town Manager shall prepare the final progress report to the Town Commission for adoption.

D. The Town may also increase the Town Manager's base salary and/or other benefits of the Town Manager in such amounts and to such an extent as the Town Commission may determine desirable on the basis of an annual performance evaluation of the Town Manager. The form of the evaluation shall be suggested by the Town Manager and approved by the Town Commission. The annual evaluation shall be made between June 1st and August 1st of each year in which this Agreement is effective.

E. Nothing in this Section shall require the Town to increase the base salary or other benefits of the Town Manager. Furthermore, the Town's failure to conduct any of the scheduled evaluations shall not constitute noncompliance with a material provision of this Agreement.

Section 3. Duties and Obligations

A. The Town Manager shall have the duties, responsibilities and powers of said office under the Pembroke Park Code of Ordinances. The Town Manager agrees to perform all duties and responsibilities faithfully, industriously, and to the best of his ability and in a professional and competent manner.

B. The Town Manager shall remain in the exclusive employ of the Town and shall devote all such time, attention, knowledge and skills necessary to faithfully perform his duties under this Agreement. The Town Manager may, however, engage in educational and professional activities and other employment activities, provided that such activities shall not interfere with his primary obligation to the Town as its Town Manager. The Town Commission has the sole and unilateral discretion to amend this provision if a majority of the Town Commission finds that the Town Manager's outside activities interfere with the performance of his duties pursuant to this agreement. The Town Manager shall dedicate no less than an average of forty (40) hours per week in the performance of his duties hereunder, and shall be present at Town Hall on Monday through Friday during regular business hours.

C. In the event the Town Manager shall serve on any appointed boards or elected boards of any professional organization, or serve on any committees related to his professional activities, in the event any monies are paid, or gifts received, by the Town Manager related to such service, such money or property shall be paid over to or delivered to the Town, unless otherwise provided by the Town Commission.

D. In the event the Town Manager is temporarily unable to perform his duties, he shall nominate an Acting Town Manager for consideration and designation, if acceptable, by Town Commission.

Section 4. Automobile Allowance and Communications Equipment

The Town Manager is required to be on call for twenty-four hour service. In recognition thereof:

A. Automobile Allowance

1. During the term of this Agreement the Town will provide the Town Manager with an automobile allowance in the amount of five hundred dollars and 00/110 ($500.00) per month. The Town Manager shall be responsible for providing all insurance, including liability and collision, and shall pay the cost of all fuel and maintenance of his own vehicle. The Town shall not be responsible for any vehicle-related expenses for the Town Manager other than the automobile allowance established by the section. The Town Manager shall be further responsible for any and all incomes taxes and other tax obligations that may be payable as a result this allowance.

B. Town shall not provide the Town Manager with a cell phone or laptop computer capable of remote connection to Town internet for his use in conducting Town business. The Town shall provide the Town Manager with a desktop computer at City Hall for use for Town business.

Section 5. Dues and Subscriptions

The Town agrees to pay the Town Manager's professional dues for membership in the International City/County Management Association, the Florida City and County Management Association or other local government management professional association. The Town shall pay other dues and subscriptions on behalf of the Town Manager as are approved in the Town's annual budget (on a line item basis) or as authorized separately by the Town Commission.

Section 6. Professional Development

The Town agrees to pay reasonable and customary travel and subsistence expenses pursuant to the Town's travel policy for the Town Manager's travel to and attendance at the International City/County Management Association's annual conference, the Florida City and County Management Association's annual conference or other local government management professional association's annual conference. The Town may choose to pay for the Town Manager's attendance at other seminars, conferences, and committee meetings as it deems appropriate and approves by Town Commission action. Travel outside of the State of Florida requires Town Commission prior approval.

Section 7. Vacation Leave, Personal Holiday, and Sick Days

A. The Town Manager shall be entitled to one hundred sixty (160) hours of annual Vacation Leave during each year of the term of this Agreement. The Town Manager's annual

Vacation Leave shall be available for use upon commencement of employment and each year thereafter on the service date anniversary. There is no limit on the amount of Vacation Leave that may carry forward. Upon separation of employment, Town Manager shall be paid for up to Four Hundred (400) hours of unused Vacation Leave.

B. In addition to Vacation Leave, the Town Manager shall be entitled to personal leave days in each calendar year, as provided in the Town's Personnel Policies and Procedures Manual, as may be amended from time to time. Vacation leave may not be carried forward from year to year.

C. Town Manager shall be entitled to and abide by the Sick Leave Policy stated in the Town Personnel Policies and Procedures Manual, effective December 2021, or as such policy may be updated and adopted upon future action of the Town Commission.

Section 8. Holidays

The Town Manager is entitled to the same paid holidays as the general Town staff.

Section 9. Health, Dental, Vision, Life and Disability Insurance

A. The Town agrees to pay 100% of the Town Manager's health, dental and vision insurance and the Town Manager's long term disability insurance on the same terms as general employees, with the exception that the Waiting Period for the insurance is waived and the insurance is effective on the date of hire. The Town Manager may waive the City's health insurance provided by this section by providing the Town with written notice of his intent to waive such coverage within five (5) days of the execution of this Agreement. As consideration for a waiver of such insurance, the Town shall provide the Town Manager with a one-time relocation stipend not to exceed $8,000. Upon completion of such relocation, the Town Manager shall submit moving expense receipts to the Town's Human Resources department for review and reimbursement up to $8,000. Relocation expenses may include furnishings for the Town Manager's residence, subject to the $8,000 limit on such expenses.

B. Life insurance for the Town Manager shall be provided in an amount equal to $100,000.00, or highest amount as may be available through the Town's insurance carrier, if less than $100,000.00.

C. Supplemental life insurance in larger amounts can be requested in accordance with and subject to the "Evidence of Insurability Form" being approved through the underwriting guidelines. Such supplemental life insurance is at the Town Manager's expense.

Section 10. Retirement

The Town agrees to contribute as stipulated by the Florida Retirement System Senior Management Class of the Town Manager's base salary to the Florida Retirement System, upon approval by the Town's Finance and Budget Department, such approval not to be unreasonably

withheld. Contribution percentage amounts are subject to change each year based on legislative law changes, investment experience, and the actuarial experience of the trust fund.

Section 11. Termination by the Town and Severance Pay

A. The Town Manager shall serve at the pleasure of the Town Commission, and the Town Commission may terminate this Agreement and the Town Manager's employment with the Town at any time, with or without "just cause," as set forth in this section.

B. Termination "without just cause." Should a majority of the members of the Town Commission, then currently holding office, vote to terminate the services of the Town Manager "without just cause," then within ten (10) business days following such vote, the Town Commission shall cause the Town Manager to be paid any accrued and unpaid salary and benefits earned (including 400 hours maximum hours of Vacation Leave, up to Five Hundred ($500.00) dollars of Sick Leave, and insurance, but excluding such items and allowances as are used in conducting Town business such as, but not limited to, the use of the Town computer and the automobile and cell phone allowance) prior to the date of termination based on a forty (40) hour work week. If such termination without just cause occurs within the first twelve (12) months of employment, Employee shall receive a cash payment equal to eight (8) weeks of the Employee's aggregate salary; if such termination occurs within the first twenty-four (24) months of employment, Employee shall receive a cash payment equal to fourteen (14) weeks of the Employee's aggregate salary; if such termination occurs between after the employee has been employed for at least twenty-four (24) months, Employee shall receive a cash payment equal to twenty (20) weeks of the Employee's aggregate salary ("Severance Pay"). As consideration for such Severance Pay, the Town Manager shall, prior to receipt thereof, execute and deliver to the Town a general release of the Town, the Town Commission members, and all Town officers, agents, and employees for all claims, acts and actions (whether accrued or subsequently accruing) from the beginning of time until the date of release, said release to be prepared by the Town Attorney.

C. Termination "with just cause." In the event the Town Manager is terminated "with just cause," the Town, with the exception of accrued and unpaid salary and benefits actually earned, shall have no obligation to pay the amounts outlined in Section 11, Paragraph B of this Agreement. For purposes of this Agreement, "just cause" is defined and limited to any of the following:

1. Misfeasance, malfeasance and/or nonfeasance in performance of the Town Manager's duties and responsibilities.

2. Conviction or a plea of guilty or no contest to a misdemeanor or felony crime, whether or not adjudication is withheld.

3. Neglect of duty, including the inability or unwillingness to properly discharge the responsibilities of office.

4. Violation of any substantive Town policy, rule, or regulation, which would subject any other Town employee to termination.

5. The commission of any fraudulent act against the interest of the Town.

6. The commission of any act which involves moral turpitude, or which causes the Town disrepute.

7. Violation of the International City/County Management Association Code of Ethics or being found to have committed an ethics violation by the Florida Commission on Ethics.

8. Any other act of a similar nature of the same or greater seriousness.

D. In the event Town terminates the Town Manager "with just cause," as provided in Paragraph C above, then the Town Manager will be given a written copy of the particulars and shall have the right to appear in public before the Town Commission, with counsel, if so desired, and present evidence, argument, and rebuttal concerning said allegations. After such hearing, if a majority of the members of the Town Commission then currently holding office finds there is cause to terminate the Town Manager, then the Town Manager shall not be entitled to severance pay. Said hearing shall be held within sixty (60) days of the notice of terminations.

E. In the event the Town Commission, during the employment term, reduces the salary or other benefits of the Town Manager, as identified herein, in a greater percentage than an equivalent across-the-board reduction for all full-time Town employees, or in the event the Town allegedly refuses to comply with any other material provision of this Agreement benefiting the Town Manager, the Town Manager shall notify the Town Commission in writing of the alleged violation. The Town Commission shall have forty-five (45) days from such notice within which to cure the violation, otherwise, the Town Manager may at his option, consider such violation as termination "without just cause" as of the date of such alleged reduction or refusal, and the severance pay provisions and other termination provisions contained herein shall become applicable at the annual salary and benefit level in effect prior to the reduction or refusal.

Section 12. Termination by the Town Manager

The Town Manager may terminate this Agreement at any time by delivering to the Town Commission a written notice of termination not later than two (2) months prior to the effective date of the notice of termination. If the Town Manager terminates this Agreement, then the provisions of Section 11, Paragraph B above, shall not apply. If the Town Manager voluntarily resigns pursuant to this Section, the Town shall pay to the Town Manager all accrued compensation due the Town Manager up to the Town Manager's final day of employment, including any accrued Vacation Leave up to the Four Hundred (400) hour limit. The Town shall have no further financial obligation to the Town Manager pursuant to this Agreement. This subsection shall not prevent the Town Manager from collecting any money earned as a result of participation in a deferred retirement or pension program approved as per Section 10 of this Agreement.

Section 13. Disability

If the Town Manager becomes permanently disabled or is otherwise unable to perform his duties because of sickness, accident, injury, mental incapacity or health for a period of four consecutive weeks beyond any accrued leave, the Town shall have the option to terminate this Agreement, subject to the severance pay provision outlined in Section 11, Paragraph B of this Agreement.

Section 14. Indemnification

A. Town shall defend, save harmless, and indemnify the Town Manager against any action for any injury or damage suffered as a result of any act, event, or omission of action that the Town Manager reasonably believes to be in the scope of his duties or function, unless he acted in bad faith or with malicious purpose or in a manner exhibiting wanton and willful disregard of human rights, safety, or property. The Town will compromise and settle any such claim or suit and pay the amount of any settlement or judgment rendered thereon. The Town shall not be liable for the acts or omissions of the Town Manager committed while acting outside the course and scope of his agreed duties or committed in bad faith or with malicious purpose or in a manner exhibiting wanton and willful disregard of human rights, safety, or property. In such instance, the Town Manager shall reimburse the Town for any legal fees and expenses the Town has incurred or otherwise paid, for or on his behalf, in connection with the charged conduct.

B. Said indemnification shall extend beyond the termination of employment and the expiration of this Agreement to provide protection for any such acts undertaken or committed in his capacity as Town Manager, regardless of whether the notice of claim or filing of a lawsuit occurs during or following employment with the Town.

Section 15. Code of Ethics

Inasmuch as the Town Manager is an active full member of the International City/County Management Association (ICMA), or other local government management professional association, the "Code of Ethics" promulgated by ICMA or other local government management professional association is incorporated herein, and by this reference made a part hereof. Said "Code of Ethics" shall furnish principles to govern the Town Manager's conduct and actions as Town Manager of the Town. Additionally, the Town Manager shall abide by the standards established by the Florida Commission on Ethics.

Section 16. Attorney's Fees

If any litigation is commenced between the parties concerning any provision of this Agreement or the rights and duties of any person in relation thereto, the party prevailing in such litigation will be entitled, in addition to such other relief as may be granted, to reasonable attorney's fees and expenses incurred in connection therewith, including appellate fees and expenses.

Section 17. Bonding

The Town agrees to bear the full cost of any fidelity or other bonds required of the Town Manager under any policy, regulation, ordinance or law.

Section 18. Transparency

A. Open Door Policy: The Town Manager shall maintain an open door policy encouraging communication between the members of the Town Commission, Town Employees, residents, property owners and other persons who have matters of interest related to the well-being of the Town.

B. Governmental Relations: The Town Manager shall strive to maintain positive constructive relationships with elected officials, employees and agents of other governmental agencies for the purpose of mutual good will and the constructive conduct of business regarding matters of interest between the parties.

C. Communications: The Town Manager and Town Commission shall work cooperatively to keep each other and the community informed as to the status of plans, projects and the operations of the Town.

D. Right to Speak: The Town Manager shall have the right to address the Town Commission orally and/or in writing in all matters before the Town Commission affecting those matters under his responsibility and/or his employment with the Town.

Section 19. General Terms and Conditions

A. If any provision or any portion thereof, contained in this Agreement is held by a court of competent jurisdiction to be unconstitutional, illegal, invalid or unenforceable, the remainder of this Agreement, or portion thereof, shall not be affected and shall remain in full force and effect.

B. The waiver by either party of a breach of any provision of this Agreement by the other shall not operate or be construed as a waiver of any subsequent breach by that party.

C. This Agreement shall be binding upon and inure to the benefit of the heirs at law or personal representative of Town Manager.

D. This Agreement contains the entire Agreement of the parties. It may not be changed verbally, but only by an Agreement in writing signed by the parties.

E. Florida law shall govern this Agreement and any litigation that may arise from this Agreement, shall be filed and litigated in Broward County, Florida.

F. Upon Town Manager's death, the Town's obligations under this Agreement shall terminate except for:

1. Transfer of ownership of retirement funds, if any, to his designated beneficiaries;

2. Payment of accrued leave balances in accordance with this Agreement;

3. Payment of all outstanding hospitalization, medical, vision and dental bills in accordance with this Agreement;

4. Payment of all life insurance benefits in accordance with this Agreement;

G. The parties acknowledge that each has shared equally in the drafting and preparation of this Agreement and, accordingly, no court construing this Agreement shall construe it more strictly against one party that the other and every covenant, term and provision of this Agreement shall be construed simply according to its fair meaning.

H. This Agreement may be executed in duplicate or counterparts, each of which shall be deemed an original and all of which together shall be deemed one and the same instrument. No term, condition or covenant of this Agreement shall be binding on either party until both parties have signed it.

I. The effective date of this Agreement shall be the last date it is executed by either of the parties to this Agreement.
